THE SCHOOLMASTER'S STORY.

The villains of my story were two They lived on the banks of a lonely by fishing and ferrying the gentry who came to visit the ruined castle beyond.

They made a poor fiving in this spoke to the other that night, and way, and from being lighthearted only the groans of pain broke the they grew morose, and grumbled about the tyranny of rich the and their hard fate in life.

One night a richly clad young man rode up to the farmhouse and asked to be piloted across the lake. "I am young Mr. Firth," he said.

"My Father owns the mills and I'n pay you well." As he spoke he shifted a double

fitted with gold. "I'll speak to my partner," said Bryan, withdrawing into the nut. "Yonder," he whispered in Peter's ear, "is young Firth with the mill hands' wages in his saddlebags. He wants to be ferried over the lake."

"Well?" said Peter. bounds in those bags. A fortune to gother, and the boy told his story.

"But the law would soon put a stop o our enjoyment of it."

"And who is to know if young Firth goes to the bottom of the lake? asked Bryan, "I tell you luck has ome to us. Don't thrust it away. Peter looked him full in the face and rese up and took the oars from

We'll lerry Master Firth over the lak." he said aloud: and the two tramped out together.

Young Firth had allighted. He ed his horse, with the saddlebags, to the edge of the lake. The long boat in which so many ladies and gentlemen, parties of fifteen often, had crossed to see the ruins, lay there. "King will behave himself well,"

said the boy. "He's a horse with brains and a heart, aren't you, King?" The horse whinnied and rubbed his ose against young Firth's shoulder Peter and Bryan took their places, and the boat moved heavily out into

the middle of the deep take. There Bryan lifted his oars into the boat and Peter followed his example. The boy, with his elbow on the saddle and his hand turned so that the back of his fair headfrested on the palm, was looking up at the moon thinking of his sweetheart, perhaps.

He dropped his eyes to Bryan's gloomy face in surprise. "What's this for?" he asked.

As he spoke, Bryan brought his fist, with a stone he held hid in it, against his head and Peter caught his ankles and tripped him. He feld into the lake tike a dead thing, and vanished under the dark water. Bryan seized the sad-flebags, but King seeming to know something was wrong, turned and bit him fur-

He strnck out with his hoofs, crashing against Peter's knee, and sprang over the side of the boat. "So much the better," said Bryan, furiously. "If he swims home we'd

never be suspected." He dragged the chinking bags toward him, and the two men rowed back to the spot they had started from with difficulty, both suffering fearful pain. Peter could not nove his leg, and Bryan's right arm was burning as though seared with red hot irons; but they beached the boat and dragged their prize to the cabin, barred the miserable door, and lit their yellow tallow dip at the smoul-

Bryan, lifting the bags to the deal table. "Our pain will be over soon, but our money will last. G d knows how much there must be here, all in ed Bishop Janes and Matthew Simhow they were come by. All hard, on fire for God until their holy en-

He could only use one arm, but Peter dragging himself to the table, helped him to undo the stout leather fastenings and pour the contents on the boards; and Satan, children, stood behind grinning; for the round pieces of metal that tumbled out before their eyes, chinking and clashing together, were only bits of ironlittle nuts and clamps, or what not-I can't tell you just the names of the things-that were used in the machinery.

Young Firth had been to the bank sure enough, but the money was in a pocket-book next to his bosom, These bits of iron he had brought to saye delay on Monday morning, when re-

It was Peter who spoke first.

"We've done murder for this!" he sald, and Bryan flew at his throat as he spoke, but shrank back and cowpoor men named Peter and Bryan. ered in the corner the next moment. The wind monned about the house Irish lake, and supported themselves and rattled the rickety door, and blew the smoke down the chimney into their faces, and the candle gutted down and went out; but neither

But in the dawn, when it came gray and soft over the lake, with of Christian civilization and the light flecks of pink low down on the water's edge, a roar like a coming storm | ed for joy, and the procession started was heard, the muttering of men's voices and oaths of vengeance. Mounted on his grey horse came old | 000 gallons of rum; one missionary. Firth from the mills, pistol in hand, with a posse of constables about him. saddle, which gave out a chink as if and among them rode young Firth, with a bandage on his head, mounted on King and no other horse in creation. For King, with more sense

than some men have, had saved his bundred more. The missionary's master, taking him by his clothes with his teeth, until, his senses re- Christians at home, for the love of turning, he was able to cling to Christ, stop the rum!' But, as the King's mane, and so, with God's climate does its exhaustive work, "There must be four hundred grace, the two had gained land to- and one by one the brave workers They arrested the two men, with at home are discouraged, and the

But, after all, it was King who had taken yengeance on ing liquors sent from Massachusetts, them, for Bryan died of the bite on two hundred of those people (of Conhis arm, and Peter of the kick he had go) slaughtered each other in a single got, both ending in mortification. day. Again, we are told of a single And the whole story is but another proof that Satan is a treacherous friend even to those who take him sold his Lord for seventeen dollars. friend even to those who take him for a master. God bless all and protect us from him. And now you may all go home, children.

Misrepresentation.

All the evangelical denominations are misrepresented. They say the Presbyterian church believes there are infants in perdition. If you will bring me a Presbyterian of good morals and sound mind who will say that he believes there ever was a baby in the lost world, or ever will be, I will make him a deed to the house I live in, and he can take possession to morrow. So the Episcopalian church is misrepresented by the enemies of evangelism. They say that church substitutes forms and ceremonies for heart religion, and it is all a matter for liturgy and genuflection. False again. All Episcopalians will tell you that the forms and creeds of their church are worse than nothing unless the heart go with them. So also the Baptist church has been misrepresented. The enemies of eyangelism say the Baptist church believes that unless a man is Lamersed he will never get into Heaven. False again. All the Baptists, close communion and open communion, believe that if a man accept the Lord Jesus Christ he will be saved, whether he be baptized by one drop of water on the forehead, or be plunged into the Ohio or Susque hanna, aithough immersion is the only gate by which one enters their earthly communion. The enemies of evangelism also misrepresent the Methodist church. They say the Methodist church believes that a man can convert himself, and that conversion in that church is a temporary emotion, and that all a man has to do is to kneel down at the altar and feel bad, and then the minister pats him on the back and says, "It is all right," and that is all there is of it. False again. The Methodist church believes that the Holy Ghost alone can convert a heart, and in that "Let's see what we've got," said church conversion is an earthquake of conviction and a sunburst of pardon. And as to mere "temporary emotion," I wish we all had more of the "temporary emotion" which last hard coin. No bills to tell tales of son for a half century, keeping them thusiasm consumed their bodies .-Talmage.

TREATMENT OF CHILDRY .- "Put the little ones to bed happy," says an exchange, alluding to the habit some parents have of deferring punishments for faults committed during the day until bed-time. "Never whip children just before they retire to rest. Let the father's caress, the mother's kiss, be the last link be tween the day's path of pain or plea sure and the night's sleep. Send the children to bed happy. If there is "Stop the Rum!"

In a vigorous and startling article, which appeared some time since from the pen of Margaret E. Stewart, in the Heraid and Presbyier, occurs the following burning passage: "A few years ago, in a lonely hut in Central Africa, a worn-out man died upon his knees, praying in the fervor of a consecrated, loyal soul, 'Oh, let Thy Kingdom come!' He had opened, he thought, the great Dork Continent to the onward march of God's truth. Christendom shout-

across the sea. "Watch it. One missionary, 70,-70,000 gailons more of rum; another missionery, another 70,000 gallons; and so on and on it goes, rum and missionaries, missionaries and rum. Thus we touch the great Congo State. Watch again. One convert to Christ, a hundred drunkards; one more, a heart grows sick, it cries out: 'Oh, sink beneath the burning sun, nearts

out the missionary. "Under the madness of intoxicatbut America hurries fifty souls to the bar of God for ninety cents."

Contempt on Pride. The life and death of our Lord Jesus Christ are a standing rebuke to every form of pride to which men are liable. Take for instance;

Pride of birth and rank-"Is not this the carpenter's son?" Pride of wealth-"The Son of Man

hath not where to lay His head." Pride of respectability-"Can any good thing come out of Nazareth?" "He shall be called a Nazarine." Pride of personal appearance-"He

hath no form or comeliness." Pride of reputation-"Behold, a man gluttonous and a winebibber, a friend of publicans and sinners," Pride of independance - "Many others, who ministered to Him of

their substance." Pride of learning-"How knoweth this Man letters, having never learned?"

Pride of superiority -"I am among you as he that serveth." "He humoled Himself." "Made a curse for us." Pride of success-"He came unto His own, and His own received Him

believe or Him." "He is despised and rejected of men." Pride of self-reliance-"He went down to Nazareth, and was subject

not." "Neither did His brethren

unto them." Pride of ability-"I can of Mine own self do nothing,"

Pride of self-will-"I seek not My will, but the will of Him that sent Me." Pride of intellect-"As My Father

hath taught Me, I speak these things." Bride of bigotry-"Forbid him notfor he that is not against us is on our part."

Pride of resentment-"Father, for-

give them, for they know not what they do." "Friend, wherefore art thou come?" Pride of reserve-"My soul is exceeding sorrowful, even unto death. Tarry ye here and watch with me," "The Son of Man must suffer many

Pride of sanctity-"This man receiveth sinners, and eateth with them."-Indian Witness.

things, and be rejected."

TACT IN DOING GOOD, -I have the entire conviction that, as Christians, we should have constantly before us the doing good to our fellowcreatures as the great aim of life; and that this must include adove all the giving them that truth which we have felt to be very precious to ourselves. But how are we to give it is a question that requires very much Christian wisdom and the much-maligned tact - not the Jesuitical tact the creeps to its end by hidden ways, but the fineness of judgement that can choose time, place, opportunity, and sorrow, punishment, or disgrace, let all the while conceal nothing of what tnem meet it in the day time, and we are and believe. The truth is have hours of play or thought in which to recover happiness, which is childhood's right. Let the weary we have established our position and feet, and busy brain, rest in bed happy." We like that fellow's philosophy and humanity.—Petosky Record. John Ker.

JAS. A. HAYDEN. Publisher. OAKLAND. GARRETT CO., MD.

MY GRANDMOTHER'S FAN. It owned not the color that vanity dons Or slender wits choose for display; Its beautiful tint was a delicate bronze, A brown softly blended with gray. From her waist to her chin, spreading out with

out break.
"Twas built on a generous plan;
The pride of the forest was slaughtered to make
My grandmother's turkey-tail fan.

For common occasions it never was meant; In a chest between two silken cloths
'Twas kept safely hidden with careful intent
In camphor to keep out the moths.
Twas famed far and wide through the whole
country-side;
From Beersheba e'en unto Dan;

And often at meeting with envy 'twas eyed, My grandmother's turkey-tail fat.

Camp-meetings, indeed, were its chiefest de Like a crook unto sheep gone astray t beckoned backsilders to re-seek the right, And exhorted the sinners to pray. It always beat time when the choir went wrong In psalmody leading the van.
Old Hundred, I know, was its favorite song—
My grandmother's turkey-tail fan.

A fig for the fans that are made nowadays. Suited only to frivolous mirth!

A different thing was the fan that I praise, Yet it scorned not the good things of earth.
At bees and at quiltings 'twas aye to be seen;
The best of the gossip began
When in at the doorway had entered serene
My grandmother's turkey-tail fan.

Tradition relates of it wonderful tales, Its handle of leather was buff. Though shorn of its glory, e'en now it exhales An odor of hymn-books and snuff. An odor of hymn-books and sauf.

Its primeval grace, if you like, you can trace:

'Twas limned for the future to scan,

Just under a smiling gold-spectacled face,

My grandmother's turkey-tail fan.

—Samuel Minturn Peck, in Century.

#### A CANDOR CLUB.

Unforeseen Results It Happily Brought About.

"Haven't I told you how much I detest flattery? Even praise, and even when my vanity tells me it is merited, makes me distrustful of the person ut-

tering it."
"Yes, r believe you have expressed that idea," replied Melville lazily; "and now perhaps you will kindly tell me to what your remark is relevant?" "And can you ask that," said she,

"after your repeated persistent attempts to flatter me?" "I have made no such attempt, as I think you will admit on reflection," responded the gentleman, placidly, while he idly tossed pebbles into the water. 'Indeed! did you not just now tell me that I made a singular impression on

you the first time you saw me?"
"Yes, I presume I said that; and, it is true, you did. You impressed me as being the most original person I had lately met-as being quite singular."

"Oh!" said the girl, coloring slightly at having placed the other more complimentary interpretation on his remark.

"But you also said, if I remember rightly, that my taste was remarkablecalled this gown I wear 'unusually attractive.'

"I've no doubt that I did," said he. "It certainly attracted no little attention as we came through the streets. I saw Teed, the painter, take it in somewhat interestedly, and I fancied, too, that he shrugged his shoulders a trifle; but his ideas of color harmony may differ slightly from yours. You see, my friend," he continued. "I use words advisedly. and say exactly what I mean. My fault, as you will find, is really frankness, not flattery." So speaking, as he half-reclined on the beach by her side, he shot some more pebbles into the lake, with what seemed an unnecessary effort at accuracy of aim.

"Well, this color combination quite suits me," replied the young lady, surveying her gown with a pouting pretense of vexation; and then, reluctant to give up beaten: "But you surely did say, Mr. Melville, and confused me very much at the time, that you found more in me to admire than you had found in any other woman for a long time, and more in that same tenor, until I cut you short. Perhaps you can also explain

Melville left his pebble-shooting and looked into her face with a little mischievous twinkle in his eyes. "I had just come home from the West, Miss Mayne, from a wandering life in the mountains and on the frontier. You are really the only woman with whom I have talked much in more than a year. I think I was not inaccurate in my remark.

Secretly provoked to see his words of supposed praise resolve themselves into doubtful compliments, or worse, and vet amused at her own discomfiture, the girl laughed merrily. "Well, I take on this boat? How strange it is!" said back my charge, I retract fully and re- he. pent. The mistake I made was in asfancy it part of their duty to a woman to continually feed her vanity with sugared compliments."

"Yes, you are quick to jump at conclusions," he replied, with a smile. "But I have an idea. Let us organize ourselves into a Candor Club or an Anti-Flattery Society, with a membership limited to two, and see if we can not become acquainted with each other. I quite believe that it is possible for a man and changed. a woman to be real, true friends. Of lovers or haters, but to be good friends, that's quite another thing. Yet I think | love for her," he thought, "and this is experiment? Every one ought to have mained moodily in another part of the one friend, and I have none, now, since | boat, through all the homeward trip. I lost my brave old comrade out among the mountains."

There was something of sadness in his den string in the girl's heart, and she replied: "Indeed, I shall be happy to be your friend, and to believe you mine.' After which, for a moment, neither one made any remark. He gazed away absently over the glassy waters, and she

of the party, was introduced to Charlie, and easily guessed him to be the gentle- rival, with faithlessness and duplicity. man whose ring Miss Mayne was wearing. He was a lively, good-hearted, rattle-headed young fellow, with little ambition other than to live to his liking on an inherited fortune, wearing partitennis balls. Comprehending at a glance the young man's shallow na-ture, Melville frequently found himself

girl, a girl with ideas, could find his so-ciety congenial or even tolerable. Fail-pillow that night were not for a love ing to solve the problem to his satisfaction, he gave it up; but only to find it ever recurring to his mind.

brother at college, was a welcome caller entertaining, thoughtful stranger, whose talk and trivialities in which so many very respectable people pass their lives. Indeed, so far removed from the ordinary were the themes of their conversation, that, by a tacit understanding, they usually changed the subject on the approach of others—came down to the laughing, frivolous level of the gay young people summering in the village. Gradually it began to dawn on Melville that the morning seemed long and tedious in which he found no opportunity to chat with Laura. Of course he could read or write leiters, or talk with other well-informed guests of the hotel; he could do these things if he wished to; but the trouble was that he someway didn't feel like it—found himself more inclined, in Laura's absence, to take a solitary ride or ramble, in the course of which his meditations were, for the most part, about his last or his next meeting with her. He knew she was engaged to Charlie, and assumed that she loved him; and, knowing this, he would not admit, even in the depth of his own heart; that he was or would ever be any thing more than her loyal friend; while as for her frankly acknowledged friendship ever deepening into

So the month went by, and the cooler autumn evenings became an unwelcome reminder that he must soon leave the village; and with this began to come sudden pangs, a sense of impending loss, which somehow robbed the future of hope and incentive to action. Revolving this one evening as he paced to and fro on the deserted porch of the matter squarely in the face. What did it all mean? Ah! he could deceive himself no longer; his fool's paradise was at an end; he must pay for it now with a long struggle to forget. Yes, he was in love, though he had been calling it friendship-had thought that the new name he gave it made it a different

ous second thought.

thing. He loved a woman who loved another who was to be wedded in less than a month; and, moreover, he had known all along that such was to be the case He must leave her, must go away immediately; nothing could be more evi dent; but should be not see her again once more before he went? Ah! there was the rub; and if he saw her, how should he say: "Good-bye?"

After long doubt, he resolved that it yould be wiser not to meet her-to be called away suddenly and write her his adieus. He could certainly wish her joy on paper; his handwriting would tell no secrets, whatever his face and voice might show. In this resolution he next morning met two young ladies of the village, who had called to invite

him to a lawn-party.
"You must be sure to come," they had said; but, knowing whom he should meet there, he pleaded, on the spur of the moment, the necessity of a journey to the near city as a possibility which might prevent his acceptance of their

kind invitation. Persisting in his determination to avoid Laura, he did leave town that afternoon, though not, as he had contemplated, for the city. In the mood he was, he wished to be alone with his thoughts; and to that end boarded a lake steamer, found a quiet seat on the upper deck, and, with unread papers in his lap, remained in melancholy reverie until the boat was far on its way. Then, glancing up, his heart gave a quick leap. 'Fate, it is fate," said he; for Laura had just passed him, and was now sitting alone, her elbow on the rail, gazing out

pensively over the bow of the boat. Uncontrollably drawn, he went forward and took a seat beside her.

Her surprise equaled his own, but suming that you were like all the rest of mankind—like Charlie or John, who Wayland," she replied simply, "to meet a school-friend who is coming to visit

> After this, little was said, each one seeming to be occupied with somber thoughts. Finally, pleading a too cool breeze, she went below, and they did not meet again until on the return boat. Laura's friend had not come. Fate had thrown them together alone again, but only a few commonplaces were inter-

To Melville it was evident that Laura course, we know it is easy enough to be had some reason for wishing to avoid him. "She has fathomed my secret-my it can be done. Will you not try the her just reproof." In this belief he re-

Reaching the wharf and seeing Charlie waiting there for Laura, Melville made no effort to see her; and on the followvoice, a wistfulness that touched a hid- ing morning, quitted the village-for haven't given me my five cents yet to the West, he said, but really caring little where he went, since every way

seemed dark. For Laura, also, the glamour of life was gone. Malicious people had hinted to Charlie that "it was really remarka- having his right arm amputated as the mechanically twisted and turned the ble that Melville and Laura should have glittering brilliant on her engagement-happened to take the same aimless trip arm in a valise, and, unattended, went on the same afternoon," and Charlie, ten miles to his home.

During the day, Melville, who had secretly jealous, was easily influenced ome to their picnic a stranger to most by their insinuations, and petulantly charged her with preference for his

"Here, Charlie, take your ring," she replied, not unkindly. boy; we never could make each other happy. I once thought that we might, but it was not to be; so let us part good colored flannel suits, and chasing lawn friends, now, while there is nothing to regret or forget." Angry and wounded in vanity, Charlie

left herat the gate, free, and went away wondering how Laura Mayne, a superior free himself. But this was the least of pillow that night were not for a love that was lost, but for a love that had never been told. "What," said she to herself, "was the meaning, the only Meanwhile the summer days drifted possible interpretation, of Melville's by. Melville, who had known Laura's embarrassment at finding me on the boat, his constraint and subsequent at their house, and the girl, who cared little for the sports which interested avoidance, if not that he didn't wish to meet me, having discovered that while her fiance, walked and talked with the I wore the ring of one, I had given my heart, unasked, unwanted, to another wit, wide experience, easy courtesy, and He despises me for my weakness-would good-humored cynicism made him a not attend the lawn party because he charming companion. In converse with did not wish to meet me. And yet we him, they wandered in broader fields of were to be such friends; he warned me thought, far above the stratum of small- that we were to be nothing more. 'It is easy to be lovers or haters,' he said. 'but harder to be nothing but friends.' "

All the summer people were now gone.

Even Charlie had left, to pass the winter ground with narrow black stripes an in the city; and the village became again came and faded again from the hills, and the clover-blossoms followed; but nothing occurred to vary the joyless dreariness of Laura's life. In a hotel corridor, however, of a distant city, Melville now by chance encountered Charlie, who was beaming with happiness and holding out his hand frankly as he advanced.

"I once had a grudge against you, old fellow," said he, "was awfully jealous; but it's all over now that I'm married. Come up and see my wife. Yes, you really must!" and taking him by the arm and refusing "No" for an answer, he led him to the parlor.

It was with the utmost reluctance that Melville consented to go. He was secretly afraid to meet her, fearing that his emotions would overmaster him; could scarcely help going, whether he straight rows from belt to foot on the any warmer feeling, he had too little vanity to give such a possibility a seri-"I thought you said she was here?"

said Melville, glancing around the room. "Here she is," was the reply, as a winsome, pretty girl came forward to first-sight love," he added, laughingly. 'Wasn't it, my dear?"

that you were to marry-Miss Mayne?" Melville, in amazement. "Oh! I was." replied Charlie, "but she said I was 'only a boy,' and broke it off. But we're the best of friends. See that pretty pin that Jennie wears?

That's from Laura." "I suppose she is still in Falltown?" said Melville, with a sorry attempt at nonchalance; and hearing that she was, he excused himself rather unceremoniously, Jennie thought, and started at nce, traveling a night and a day on his

way back to the village.

Though it was somewhat late when e reached his journey's end, he went at once to the Mayne dwelling. As he rang the bell he heard a light step advancing in the porch, and a never-forgotten voice spoke through the darkless. "Father is not at home, sir.-is omewhere about the village, though, I

"Is this Miss Mayne?" he inquired, though he knew full well whose voice

it was. "It is," she replied, startled at some thing strangely familiar in his tone, yet unable to see him clearly as he stood in the shadow of a clambering vine. He walked forward. "And do you ot know me? Have you forgotten? or

is it that you wish to forget?" "No, I have not forgotten," she said, striving to speak composedly, though her heart beat so loudly she thought he must surely hear it.

"I thought you were married," he went on, "were married to Charlie .thought so until twenty-four hours ago; and I have come a thousand miles since He still held her hand, and his tone

and actions told her plainly on what errand he had come. Thus, with her heart at ease, she could afford, womanlike, to be tantalizing. "I am really glad to see you," she replied. I feared, from your sudden disappearance without saying good-bye, that our friendship was not, after all, so eminently uccessful as you had planned."

"No; I confess that I failed," he answered, "my friendship grew into love long before I dared to acknowledge it, even to myself; and now, in a wild, sudden hope, have come to see what has become of yours. May I not hope that it is something more than friendship, Laura?"

"Oh! 'it is easy enough to be a lover," you know you once said," she replied, with a smile. Whereupon, jumping to a conclusion, he kissed her, and told her a number of sweet things which an outsider might have considered the most absurd kind of flattery-how constantly he had thought of her, and what a thrill passementeric bands. "If you knew me, then why did you

asked, fancying she had found an inconsistency.

INDIA SILK DRESSES.

tyles That Will Prevail During the Com Full bodices, full sleeves and slightly raped skirts ar seen in the best models or India silk dresses. The bodice is in some cases lapped to one side straight down from the shoulder, giving a blouse effect to the middle of the front, and a frill of lisse or a jabot of muslin passes down the lapped edge. A shell-like plaiting of the same fabric is then put on the high collar and on the straight waistbands. Many bodices are the simple French waists with only seams under the arms and on the shoulders. Darts are not taken up in the fronts of these silks, but very full figures require side forms to give a proper fit. The fulness at the waist line is tucked or laid in four or six small plaits that turn toward the middle, and the edge of the waist is pointed and banded with ribmakes slight drapery necessary in the skirt, such as a full front breadth held

in slightly curved drapery at the top, a plaited or shirred side breadth, with full back breadths. The silk foundation skirt has a short reed in the back, and is more trimmed at the foot than it was last year. Among the prettiest India silks are

inch and a quarter apart. The front of monotonously duil. Maple-leaves the skirt has a seam down the middle to red and drifted to the ground, the skow them vandykes of the stripes, and black the skirt has a seam down the middle to Chantilly insertion is set in the yellow stripes to accentuate these points, each row of insertion filling a space between two black stripes. Bias rows are similarly placed far back on the sides, and there are three straight breadths behind. A jabot breadth otherwise straight is next the pointed front breadths. A black velvet ribbon belt with long sash ends edges the bodice, which is cut to meet in points in front and back, and also trimmed with insertion. A dark blue India silk with very large Persian design entirely in white has a double jabot of white Fedora lace down the right side, while the full back breadths are draped to show their selvage in short handkerchief points at the top. A useful gown of golden brown India silk strewn with cream-colored vines and green foliage and yet he was longing to see her: be. has for its trimming golden brown velsides which, Charlie was so persistent he vet ribbon two inches wide set in three left side breadth, and in shorter loops on the right side; with a square bow on the ends; the front breadth between these is draped, and the back is quite straight. Lengthwise velvet ribbons on skirts are fastened at the belt, then allowed to droop able for the defence of the country if the work." But for "a child overworked at meet them. Beautiful New Fabrics—The Supper Jacket
—A New Perfume. Among the great variety of beautiful fabrics that are now crowding the market are Corah silks in two shades of one color, or in contrasting tints. On one fine design in brocade in beautifully shaded tints of roses. On a dinner gown is a design showing a delicate gold ound with clusters of shaded narcisus, with odd leaves surrounding these of dark terra-cotta velvet. The gown is in Directoire style, with trimmings of terra-cotta velvet in vandyke points.

The "supper jacket" is the last name for those nonedescript and fantastic little bodices that are everywhere so popular. The chief aims to be kept in view with regard to those jackets are, that they should be in themselves very beoming and so arranged in color as to be are also adaptable garments, for they appear at the theatro, opera, at dressy dinner parties, and in boudoirs and re ception-rooms. There is no doubt about the beauty of some of the expensive models created in Paris. The shape of one, for example, is perfect for those who can wear the high Medici collar, and rook well in a blouse vest. This is made of cream-colored velvet, tight-fitting in the back, and open in front with a crossing of the velvet, diagonally below the chest. The jacket shows no fastenings. It is braided in gold, and the high collar is gold, others have gold

England's Military Power, and Why She Needs a Great Statesman The present establishment of the British army is as follows: cavalry, 19,-094; infantry, 140, 278; artillery, 35, 728; engineers, 7,005; colonial troops, 2,989; and epartmental corps, 6,113; This gives a total of 211,207 of all ranks. The First from the sawdust refuse of mills. When Class Army Reserve numbers 51,584 men, which, added to this total, gives a grand total for our active army of, say, in round numbers, 260,000 men. The number of norses and mules-officer's chargers not and mercury, has been found to adhere included-is 25,578, of which a very small proportion are mules. The law forbids that it can be used as solder. It is pre-us ever to exceed by one man or horse pared for use by heating and kneading, at any time throughout the year the establishment fixed annually by Parliament; so, with an army scattered all over the world, it is practically impossible to keep it actually up to that fixed number. As a matter of fact, we are generbon. The light quality of India silk ally now about one thousand under our establishment. Our number of field guns on peace establishment is 600, to which 36 guns would be added upon the mobilization of the army.

Of this army 72,408 British soldiers, 10,336 horses, and 318 guns are in India; 30,595 men and 905 horses are abroad elsewhere; the balance being at home. regular army of 21,700 native cavalry. 109,000 native infantry, and 2,000 native artillery, all under the command of 1,411 British officers. With the exception of 48 mounted guns, all the artillery in India is now English. From these figures it will be seen that of the army with which we hold India, not more than 36 per cent. are English, whilst 64 per cent.

are natives. This article deals only with our reg-ular army, but still it would be absurd to make no allusion in it to the yeomanry, militia and volunteer forces. I shall not attempt any description of them, but will content myself with giving their numbers. The actual strength-all ranks included-of the military forces

of the crown on the 1st July, 1888, was: REGULAR ARMY. RESERVE FOR REGULAR ARMY. First Class Army Reserve... Second Class Army Reserve Militia Reserve... eomanry cavalry.... ilitia, exclusive of Militia Reserve. 89,759 227,821 Grand total of all ranks... 757,698

STATE RAILWAYS.

An Australian Experiment That Is Giving Universal Satisfaction. Victoria is an Australian colony with the size and the population of Kansas

But instead of letting corporations build the railroads and giving land away munity of about 1,000,000 souls, or the population of Philadelphia, had last year an income of \$41,000,000, and of this sum \$16,500,000 was in the shape of profits on the State railroads. years ago the income from the railroads was only \$9,000,000; in 1886-8 it was \$12,-265,000, and for the year just closed it has gone up to nearly double the income of seven years ago, and as no one can build roads but the State, and the State shot foundation of gold and reseda is a is an enterprising builder and a good manager, the profits on the railroads will in time pay all the expenses of the government. In addition, Victoria owns not only the post-office, as the people do all the telegraph business, and the profit on these for this wise, thrifty little State

last year was \$2,140,000. Victoria has a heavy debt of \$165,595, for railroads and water-works, which two or more justices of the peace for pay a heavy profit, taxpayers feel tolerably happy over it, and the remaining at certain intervals. fraction went into school buildings, wearable with any sort of skirt. They all the horse-car lines are owned by the which pay a profit in their way, too. As people also, the cities in Victoria get more and more profit from them the bigger they get, and the taxpayer again finds that it pays to own these means of communication, even if he has to run in debt for them.

The natural result is that the surplus last yezawas \$4,400,000, the revenue outrunning estimates by this amount. In the year just coming it will be bigger, and the "budget speech" of the Minister of Finance was principally taken up with telling the direct and indirect taxes which could be repealed .- Philadelphia Press.

Bridge Across the Bosporus The proposal to cross the Bosporus somewhere near Constantinople and Skutari has again taken shape, and a French firm has proposed to do this, it is said, by a single span. "It is not The color of the perfume is a faint likely, says the London Engineer, "that lilac, and the pretty little bottles are such a project will be carried out, espetied up with lilac ribbon. officient bridge might be built across the Bosporus in three spans." The water is deep, but not more than from 115 to 130 feet where piers would have to be sunk, and there is no reason for thinking that iron piers could not be easily sunk in this depth of water, and a send to the heathen. "I have just ries can be worn until July at least with perfect comfort, and it is still indistian would be possible with one span. That conductor charged me full fare for pensable that these should be made in bridge much more cheaply constructed of the necessity for attention on the part of engineers to the building of bridge piers in deep water, possibly by a development of the system devised by Mr. Arrol for sinking the piers of the new

SCIENCE AND INDUSTRY.

-No animal can see in the dark. Some have eyes extremely sensitive to light of low intensity. Such can see in places which we pronounce dark, but there must be some light present.

-Paper has long been made from wood pulp, but it is now manufactured tarred and dried it makes an admirable sheathing for houses

-An alloy prepared from finely divided copper, mixed with sulphuric acid to glass with such remarkable tenacity at which time it is as pliable as wax.

-Blue soap, rendering the employment of bluing in laundry work unne essary, is made by incorporating with ordinary soap a solution of aniline green in strong acetic acid. By the action of the alkali of the soap, the green is converted into blue, uniformly coloring the mass. -Our woolen manufactures have not

yet reached the universal excellence which has been attained in the old world. We still import our finest carpots, cloths, etc. The time will come when more ingenuity will be thrown In addition to this, we have an Indian into this manufacturing, and then we shall manufacture all the woolen goods

-A London physician, who is an expert in diseases of the eye, says that he recently had a patient who, by excessive smoking, had brought on "an attack of amblyopia, with a central scotoma." That ought to be a warning to smokers. The plain English of it is, that the smoker's vision had become dulled and weakened, and that he was afflicted with a dizziness which caused him to imagine that his head was constantly

spinning around. -Among the successful inventions in the practical application of electricity, the United States may claim the telegraph, the telephone, the incandescent light, and unquestionably the microphone also. This is a brilliant record. To France belongs the credit of the accumulator and the Gramme ring; to Italy, the battery and the Pacinotti ring; to England, the self-exciting dynamo; to Germany, the drum armature, and to Russia, the commercial

arc lamp. -In a recent work on "The Physiology of Bodily Exercise," Dr. F. La-Besides the numbers here given there grange says that fencing, apparatus gymgame of leap frog and prisoner's base, running games, anything, in fact, rather than difficult exercises and acrobatic gymnastics."

-It has recently been proven by measurements, that France is undergoing a process of slow sinking which may lead to serious consequences. Since 1884, the "genic" corps of engineers have been engaged in effecting level measurements over the whole country, and it has been shown that the country sinks from the south toward the north. Thus between Marseilles and Lille-a distance of 540 miles -the sinking amounts to ten inches annually. If this movement continues, the northern part of France may in a few centuries become submerged. It may here be mentioned that off the coast of St. Malo, in fine weather, fossilized trunks of trees may be seen at the bottom of the sea, indicating that these parts were once above water.

ABOUT STREET LIGHTS.

Facts Regarding the Origin of the Modern Street Lamp. By a law of William and Mary, passed in 1690, every householder who resided in certain parishes, or in the city of Westminster, whose house adjoined or was near the street, from Michaelmas unto our Lady's Day yearly, shall every night set or hang out candles or lights in lanthorns on the outside of the house next the street, to enlighten the same here, but all the express business and for the conveniency of passengers, from time to time, as it shall grow dark, until twelve of the clock in the night, upon the pain to forfeit the sum of two shillings for every default." 000, but as all but \$5,500,000 was incurred | ments, might, however, be made with

> This law seems to have prompted similar legislation in the town of New York, in 1697, in an order requiring every seventh house to hang out a lamp upon a pole. New York thus antedates all other American towns in this respect by nearly sixty years.

> the establishment of lamps in the street.

The next town in order of time and the first in New England, is Newport. Here, however, street lamps were hung out of shop windows and houses, and this was due to private enterprise. In 1751 the town petitioned the General Assembly of Rhode Island to pass a law for the protection of these lamps, as. wilful and mulicious persons would often break them .-- N. E. Magazine. Fell 5,415 Feet and Lives.

The remarkable series of Alpine disasters in 1888 were evidently taken to heart by mountain climbers, for the last. season has been almost without tragedies above the snow line. The thousands who last summer scrambled up and down a hundred slopes in Switzerland all returned home unscathed, though a few of them had some ugly tumbles which will teach them to observe greater caution when they next. appear on the Alpine snow fields. The season would have been entirely devoid of exciting incidents if two or three fatal accidents had not occurred in the Bavarian and Austrian Alps. There were also some hair-breadth escapes, as or instance, that of the North German courist, who, with his guide, tumbled head over heels down a mountain side a listance of 5,415 feet, and still lives to will the tale. A story like that will en-

ertain his grandchildren fully as much

is though he had conquered the Matter-

torn.-N. Y. Sun.

The Deadly Serpent - A Horrible Dream

That Is a Reality. Somewhere we three, my husband, my brother and myself, moved in a field that yet was narrow and close as some carefully constructed dwelling. I knew or felt that any evil within that field belonged to Company F, of the Thirtywas as a foe within a camp, a thing that Seventh Massachusetts Volunteers in must slay or be slain. Present escape would not insure future safety.

barred house, I came upon a large snake or profanity. In the battle of the lying between two low and sheltering Wilderness the Thirty-Seventh was shocks of fragrant hay. After the first recoil I put out my foot to crush its head, then again recoiled as I remembered and were struck—one, John Dunbar, bered how frail and light were my sandals and thought of the snake's size and Foster, got a bullet through his arm probably venomous character. My hus above the elbow that shattered the band now stepped forward and lifted his bone, passed through and tore open his foot to kill the reptile in his usual man- side, exposing his vitals and carrying ner, with his heavy boot heel. It thrust away a part of two ribs. Mr. Lewis its head forward, close to the ground | had a bullet through the knee. Foster now, jaws dilating and forked tongue lay for tive days without care, and thrust forward with low hisses.

But on the other side of the shocks appeared my fair young brother, hold- The bone had to be removed from his ing up a warning hand as he knelt and arm for a few inches above the elbow; leaned forward with a confident smile. | yet within five weeks from the day he We realized his intention with horror, for he bent forward and grasped the left hand. Ere his hand reached it, with a terrible shock there flashed across my mind the conviction: "It is a But now my brother stood erect

Soon the snake ceased to struggle, yet

proud of a victory gained.

"He will kill it," I thought. "But So long as the youth held the snake that carried him off."-Northwestern it was harmless, but if he cast it from him its freedom and venom would be fatal to himself and others. If he continued to hold it he was as truly a pris

oner as was the deadly serpent. "He will dash its body against a tree," I thought, "But no, one touch of the fangs, so near his hand, would be fatal, and he dare not provoke it. It is

a cobra." But my brother, with his disengaged hand, began to stroke the sleek head of the serpent. Horror held me motion-

less. I had not feared the free serpent much. We three were more than a match for it as it lay coiled in its shady nook; besides, its venomous character was not fully realized until my brother held it aloft in the light. Then who could think that one of us would dream of grasping the thing as my daring brother had done!

He had heard of snake-charmers What others did, why could not he? I felt that my husbard knew the charstood smil ing, amused, perhaps, and not too watchful. He overestimated my brother's power. That high spirit aroused his adbrother.

"It is a cobra," I said in a low tone, afraid of angering the serpent by loud words; afraid I might too suddenly attract my brother's attention. I wanted to scream, to cry out in an agony of grief and fear. Yet I dared not. That dear brother's safety depended on my off his guard was to give the serpent its watched-for opportunity. Its bite would be fatal. Now the muscles of the reptile relax;

the head ceases to writhe. It is strangely quiet. My brother is pleased, proud and confident. Its glittering eyes grow steady, dreamy, even, but the forked tongue yet moves swiftly, "He will conquer it," I reason. But

like lightning memory asserts: "It is a

The youth is making passes with his disengaged hand before the serpent's

Oh, be careful, my brother, my dear young brother! Your fingers almost close upon those poisoned fangs. Are you mad? I think, but dare not speak. BEER AND THE BODY.

Testimony as to the Relative Resisting food, and a sufficiency of sleep." Powers of Beer Drinkers and Temper-

ance Men. About two years ago the Mail gathered the opinions of the medical fraternity of Madison on the effects of beer on the human body. With one exception they gave straightforward replies, The wandarder gets. the majority being quite adverse to the

ous wounded limb to dress. The wounded man was healthy and temperate, and happiness, comfort, sustenance, labor, botter with good treatment. "If you all lose so heavily? -- Union Signal.

had been even a moderate beer drinker," said the physician to the patient, "we would have had to amputate it." This adds another to the long list of medical estimony against the use of beer.

William E. Lewis, Wisconsin State ecretary of the Young Men's Christian Association, gave us some testimony on the relative resisting powers of a beer drinker and a Temperance man. He the civil war. He belonged to a squad of four called "the model squad" be-Moving in that field that yet was a cause they did not use liquor, tobacco ordered to charge the advancing line of was fatally wounded; another, Joe when found at last a cupful of maggots was taken from the wound in his side.

was shot he reported for duty. Mr. Lewis, like many others of the reptile just back of the neck with his twenty-five thousand wounded in that awful battle, lay eight days without any thing but water which a wounded companion brought in his canteen. Yet no one seeing Mr. Lewis to-day would

holding his writhing trophy, as one think that he was in delicate health. "There was another fellow in our regiment by the name of Waite," said Mr. continuously thrust forward its forked Lewis. "He got the end of his little finger shot off and it caused his death. He was a beer drinker, and it was the state of his system caused by the beer

TEMPERANCE ALLIES. TEMP

The Reform Work Accomplished by the Forces of Steam and Electricity. In an article in the Statesman on 'Forces Which Make for Temperance," that the complexity of modern life, rendering the members of society so dependent on one another, is itself insuring the prevalence of habits of Temperance. He instances the obligation upon railroad men to let liquor alone, and then goes on to say:
"The same law which bears upon the

train men is rapidly being brought to bear upon all men throughout society. In a primitive state, where each family is practically independent of the others, the conduct of the individual is not a matter of communal concern. He may spend as much of his life in a besotted state as he likes, if he does not interfere with his neighbors. But it naturally follows that when society has reached such a complex state as ours there are very few opportunities for drunkenness when the rights of others are not abridged. In the "good old days" a mechanic might attempt to lamiration. I alone saw danger to my bor when under the influence of alcohol without serious consequences, but such a man in a modern machine shop or factory would very soon make trouble for prisoner denied having played for himself or somebody else. Steam and electricity are most faithful servants when under intelligent direction; but no horse is more ready to take advantage silence. To throw him for one instant to cheat a careless master, than these to of an ignorant driver, no slave quicker bring confusion upon incompetent di- still thought that chips were m rectors. There is horse-power and slavepower which will not take advantage of its opportunities, but it is never so of have to pay my fine." Coolly counting steam and electricity. We are as a magician who has called from the istrate's desk and disappeared. The nether world spirits to do his bidding, which are faithful only so long as his judge, but the "chips" are still in his watchful eye is upon them. The forces possession as a reminder of his ruling which have in the past century been called into being by man's genius will not obey children nor fools, nor men rendered worse than fools by the use of alcohol; they bow only to the clear brain and the cunning hand.

again. We have read it all up for ourselves, but we listen while the guide explains that these excavations are ancient quarries extending under nearly all of old Paris, that when, in 1784 (the church-yards throughout the city having fallen into a bad condition), it became necessary, for sanitary reasons, to remove the dead, the quarries were prepared and duly consecrated, and the bones of three millions of human beings were removed into these receptacles by night, with solemn religious rites.

Each cemetery was kept separate and carefully marked.

We pause to examine various tablets AROUND THE WORLD.

in Sixty Minutes. Chicago, Jan. 14, 2090, 11 a. m.—Am ment there is nothing like a cut-away. just starting for a trip around the world. My baggage consists of an opera-glass, a couple of oranges and a ten-cent cigar. New York, 11:02-Reached this city by pneumatic tube. Only special feature of the whirl across the country was

vania.

London, 11:10-Lost nineteen seconds in New York on account of having to stop and subscribe to the Grant monument fund, the memorial arch fund and the Greeley monument fund. The fellows said it was the custom for every body-outside of New York-to drop a few nicke s in the slot for those funds hands of a woman has long been no secret and get a card of thanks. They were or mystery. From buttoning a boot to confident the monuments and the arch would be built within the next two hunmending an umbrella it is useful in almost any emergency, but a New York woman has capped the climax by utilizing the ever-present hairpin for stabbing hind time, having had to dodge two cyclones and a pair of trousers belonging to an English tourist. The trousers had dropped from a rocket-train just ahead of us and were gyrating wildly through the air on their way down from the

clouds. Paris, 11:19-Am four minutes and a half behind time. The "lazy tongs" tramway that runs to this city by tunnel er the English Channel and overland the rest of the way was not sufficiently greased and it took us nearly five minutes to make the last fifty miles. This lack of grease shows that the French couldn't run a political campaign in Ohio to save their lives.

Rome, 11:27-Nearly ten minutes beis merely to show her preference for hind time. The passenger bomb in which you, and means an invitation for you to I traveled to this point scraped against the sides of the sheet-iron vacuum rain--Several remarkable pictures have bow it was fired through, and we had to the Rio Grande, in Texas. They were have just hired an Italian brigand to painted by the Indians and represent a go out behind the Coliseum and swear as long and as hard as he feels justified in doing for \$2.65.

Calcutta, 11:30-My time is half gone and I am not yet half way round. Come from Rome by the Electric Inclined-Plane route. The cars are huge lignumvitæ balls that roll down the hollow tube through which a blast of air is forced by powerful dyna s. The sensation of traveling in this ay is novel,

Hong Kong, 11:40-Ten minutes behind schedule time. Came from Calcutta to this place by the famous Catapult line. There was a delay of several minutes in cutting the cable that held the spring down at the western end of a thought struck him. Rushing back to the spring down at the western was standing on the trap and nobody liked to take the liberty of asking him to

move off. Sitka, Alaska, 11:50-The Chinese at Hong Kong have their old-time hatred of foreign devils. They fired me out of there by the Projectile route to Kamchatka where I took the Electric Toboggan slide. Came from Petropaulovski to this place in a large hollow icicle, the slide being laid across Behring Strait, which is fortunately frozen over. The icicle was very much worn and haggard by the time it got here. Only ten minutes now to get to Chicago.

Sitka, 11:50-Haven't got away from here yet. Went out and caught a seal and a bad cold while waiting. Have just made a bet of \$100 I'll go through

on time. Chicago, 12 m.-Was delayed at Sitka till 11:59 in consequence of a slight change in the time table. Stepped into the air-tight tube of the Great Overland Rubber-Band Air-Line route at that exact moment, the catch was loosed, and the gigantic elastic rope, made of the best Para rubber and stretched to its utmost tension, whisked me across the country, more than 2,500 miles in a direct line, in the twinkling of an eye. Reached here with more than half a

minute to spare. It isn't a difficult job to go around the globe in sixty minutes. All you need beside your ticket is a fan, an overcoat a bottle of lung balsam and a small bottle of the other kind of balsam to counteract the effect of sudden changes

of climate. Any body can go round the world in

sixty minutes. In the old fogy days of 1890, two hundred years ago, it was thought a wonderful thing to make the trip in seventytwo days, six hours and eleven minutes. This only shows that the people of that bygone age were not really sensible of their misery. They thought they were pretty smart. Let us regard them, my countrymen, with feelings of sincere compassion rather than contempt. My little jaunt has made me hungry-

I must go to lunch .- Y. Knott, in Chicago Tribune.

WELSH PROVERBS.

Old English Saws.

As might be expected, very many of the proverbs here given are familiar in English also, and in many cases in other languages as well. For instance, nobody will have much difficulty in supplying the English prototypes of the following: "Every dung-hill dog is bold when on his own dung-hill rolled;" "The moment when the cat departs, give back to mice their merry hearts;" "Let dogs that sleep their slumbers keep;" "No risk has he run; no prize has he won;" "Brothers in trade, or good, or ill, are seldom brothers in good-will;" "Out of sight; forgotten quite;" "Examine not the horse's eye, which with your thanks alone you buy;" "Three things do no good till they're knocked on the crown, a wedge, tether stake, and a lubberty clown;"
"Who makes most haste, time most doth We pause to examine various tablets fastened here and there with quotations from Scripture, verses from Latin and French poets, or moral sentiments in memory of the dead or for the consolation or warning of the living. After an adjusted wealth we leave the assuary, pass shour's walk, we leave the ossuary, pass through another stone vault and up a spiral stair, which brings us out on a street a mile and a half from where we started. An officer stands at the exit "Who loveth me, my dog love he;" "If on two stools a man will sit, ere long his limbs the floor will hit;" or "Rome's started. An officer stands at the exit the count us as we emerge, in case of any one being lost, and a crowd of urchins scramble for the candle ends which people throw away.—Christian at Work.

Saturday Review.

The Pride of His Class. He was a bright, handsome boy of six-een, sunny-tempered, brilliant and engag-ng, the delight of his parents, the joy of his ome, and the pride of his class. But a shading, the delight of his parents, the joy of his home, and the pride of his class. But a shadow fell across his bright prospects. It began with a trifling cough; soon came premonitions of consumption, his strength failed, his cheeks grew hollow, and he seemed doomed to an early grave. Then a friend advised Dr. Pierce's Golden Medical Discovery. He tried it and was saved. Health and strength returned, his cheerful voice rang out again across the school playground, his cheeks again grew rosy, his eyes bright. He is still "the pride of his class" and he graduates this year with highest honors. passing through the State of Pennsyl-

#### Secretary. Obituary.

It is with feelings of sorrow and regret that we chronicle the death of M. P. Faherty, who was killed in Keyser yard, on Monday, Feb. 17th. Md. We wish them a happy and He had only beel young man, and high esteem, as the large number of attested his jovial disposition, He was a good Christian, and was always ready to help the needy and afflicted. His funeral took place on Wednesday, Feb. 19th from St. bury, Pa., James Cochrane, aged 59 Peter's Catholic Church, followed by years, Mr. Cochrane was born in a large number of sympathizing

And the tears that we shed were warm ones As we kissed and caressed thee in one long

farewell; When we saw the calm smile on thy placid dead face. And in the cold grave his once lithesome

form lies, For Death's chilling breath closed those bright, laughing eyes;

And he sleeps the sweet sleep now of peace and of rest. Now the grave is closed o'er him, the requiems are said. And lowly he is laid in his lone, narrow bed; One more rests 'long side the dead of other years, And the fresh sod is wet with our hot, blind-

ing tears. A FRIEND.

## Real Estate Transfers.

Just how the The spacious room in which it was fire originated is not known but is held was almost filled. supposed to have been the work of a dering, as the fire started there. Mr. chosen to preside. Kolb's children had been sick with ing, and the youngest not resting up about 3 oclock in the morning when everything was all right yet. And further, there was no fire at all in the house at that time, but the no fire, but went back to bed again. manner. It is supposed that some one had been in the cellar at this time, and hearing Mr. Kolb up, thought he was discovered, and threw down a lary remarks, between the teachers, match he had lit for the purpose of brief farewell addresse, expressions finding what he wanted, which fell of regret at the near approaching sep among some dry stuff-as there was some in the celler-and caused the fire. The cellar door had been closed and propped by a plank from the inside, but when the fire was discovered, was standing wide open. The of his teachers; also, a vote of thanks were accompanied by their sister, fire was first discovered by Mrs. Kolb at about 5 o'clock in the morning, by means of the smoke that had accumulated in the steeping-room. Mr. Kolb and his family made their escape through the window in their sleeping-room, every other way of escape being cut off. An elevenyear old son of Mr, Alex. Haenfiling, who had gone to Kolb's on Friday evening, was sleeping up stairs, and only saved his life by jumping from a second-story window, being caught by Mr. Kolb before he reached the ground. Mr. Kolb lost all be had in the house, but a few things that were in his bed-room. Mr. Kolb is a young man and this loss falls heavily on him. With the dwelling house burned the spring house and smokehouse, Mr. Kolb himself was badly burned in his face and on his hands; so much so that the attention of a physician was necessary. A movement is on foot to help Mr. Kolb rebuild, and if there are any friends from a distance who wish to give anything in the way of lumber, or bedelothing, &c., they can make

I thought 'twould be easy as ple Ketchin' up city ways. But my! I've seen more folks a minute here Than folks to home see in a year; But I've felt jest dog-lonesom Knowin' a one o' the hull lot.

There ain't no sociableness though. Ain't a nary one, I'll be bound, Where anybody sets around. I'm ge tin' hungry for a sight O' Hen Hill's grocery Sat'day night, Car'line she thinks I'm dretful old; Dresses me up an' lets me hold The babies. Land! I fairly ache
Thinkin' what works the boys'll make;
I want to git home and commence
Haulin' rails for that back-yard fence.

There's stores enough here, high an' low;

I know it's tarnal foolishness The way I hanker for a mess O' dock-an'-dandelion greens; I know jest how well Car'line means, But seems as though I can't sit still Till they p'nt me back to Baldwinville. Emma A. Opper, in Judge.

#### A GAME OF CHESS.

How the Identity of the Sultan's Opponent Was Revealed.

Fifty years ago, in Mehemet Ali's time, Suleiman Pasha-a naturalized Frenchman-was commander-in-chief of the Egyptian artillery, and universally acknowledged to be the best chess player in Cairo. As a soldier he stood in high favor with the court as well as with the people; for in the war waged by the Sultan of Turkey against Mehemet Ali in 1839, the Egyptians owed Nisib to the prompt decision and strategy of Suleiman Pasha. The Egyptian army had already taken to flight, carrying its commander, the heroic Ibrahim Pasha, away with it, when suddenly, as if by magic, the battle took a favorable turn, changing the fleeing masses into pursuers, who succeeded in completely vanquishing the Turkish troops. This blow proved fatal to Mahmoud, the unhappy Sultan, whose supreme power hitherto had been unquestioned. He took the loss of his brave army so much to heart, that he died of grief barely a week afterwards.

When peace had succeeded war, Suleiman Pasha returned to the city of the califs to enjoy there his favorite pastime of chess. Punctually every afternoon he made his appearance in a cafe situated on the banks of the Nile, where, on the terrace, under the shade of mighty vas fought was the sixty-four black and white squares of the chess-board, where ivory armies strove with each other. each trying hard to decoy his opponent into some hidden trap. They only ceased fighting when the evening twilight descended, and when the cry of the muezzin from the minaret of the mosque called the faithful to prayers, to resume it again the next day, and to continue for weeks and months until one of the combatants was defeated. But it was never the Pasha who was beaten, though Reshid Aga was not only highly considered on account of his great learning, but also far-famed for his masterly playing of chess.

The two masters were generally surrounded by all the best players of Cairo, who followed their moves with eager and attentive looks. One afternoon, while Suleiman Pasha was waiting for Reshid Aga, a stranger stepped up to him and addressed him as follows: "Pasha, may I propose a game of chess to thee?"

The persons who as usual had gathered round the latter were so much startled by this unexpected proposal, that their chibouks nearly dropped from their grasp, while a gray-bearded Cadi was almost choked in the act of gulping down his Mocha. For who could be so daring as to venture to challenge the conqueror of Reshid Aga?

Suleiman Pasha, however, only cast ing a searching look upon the stranger, quietly replied: "I am at thy service. What is the stake thou art accustomed to play for?"

"For nothing the first time; for a great stake the next. But it is for thee, Pasha, to name the stake now."

"A hundred ducats won't be too much then?" Suleiman Pasha replied, again looking inquiringly at the stranger, whose face remained quite unmoved while he calmly took his place.

The board was brought and lots were

each other.

With masterly skill White now led his ing him within an iron ring. At the through the blockade by sacrificing his Queen, but in vain. White declined to accept the sacrifice, and moved his Knight with "Check to the King." Eleventh move! The spectators, whose excitement had nearly reached fever-heat, now saw that their Pasha, never before vanquished, would be checkmated the next move. Suleiman's King was compelled to withdraw into a corner, their victory in the notable battle of and with the twelfth move, as he as if they had been carbonized. He had predicted, the stranger pronounced "Checkmate!"

A murmur of admiration was heard om the spectators, while the Pasha sat there with bent head, as if trying to search in his memory, when suddenly, as if a thought had flashed upon him, he turned upon the stranger. "Once already in my life," he said, "I have seen chess played in the manner in which thou hast played to-day. Thy masterly and swore—at least he made sounds in moves are not unknown to me, but I was an accent, with accompanying looks and unable to resist them. The game, however, which was then played before my eyes was a great deal more beautiful human breast. The keepers tried to even than to-day's. The field upon which the battle opposed to an army of one hundred and is better to keep away from him. For of acute diseases for the twelve hours which, led by the genius of a single man, threatened to crush us completely. And this man whose genius made our brave soldiers take to flight, and whom it was impossible to withstand, was a son of the cold North. It was only to the recklessness of Hafiz Pasha, the Turkish commander-in-chief, who envied the youthful genius his brilliant success, and who, though fully warned, wildly pursued the Egyptians, that we owed the victory of Nisib, which otherwise we never should have gained."

The Pasha stopped, and casting a sary suddenly, cried out enthusiastic-"Stranger, thy incomparable play of to-day recalls to my memory afresh the game of chess at Nisib and its skilful player. Only one man can play like that, and that man is-Colonel Moltke!" "Thou hast hit it, Pasha," the stran-

Moltke." This indeed was Count Von Moltke-

alive still, and with the reputation of the greatest soldier in Europe. While a young man he went to the East, and was in the service of Sultan Mahmoud from 1835 to 1839. He was present at battle of Nisib, when, as above said, the Turkish commander-in-chief, jealous of the great abilities of the young soldier, refused to follow Moltke's ly over the prairie. advice, and so lost the battle.-Chamber's Journal.

## LORD NAPIER'S NERVE.

How the General Tested the Skill of a Sikh The death of Lord Napier of Magdala recalls a story of the old soldier's nerve as exhibited once, in a time of profound peace, in India. The Sikh warriors were famous swordsmen, and, if any one was hardy enough to test their skill, they could cut an apple, resting on the palm of a man's hand, cleanly in two equal pieces, so that each piece dropped separately to the ground, without fraying the skin of the outstretched hand. Pertators soon collected round the players. fect steadiness was required in the per-After the very first moves it was clear to son holding the apple, for if the hand shrank the consequences were likely to them. The ivory figures seemed to be serious. It is perhaps needless to say grow into life in the hands of the that the offer to perform this feat was

twelve hours of the day. Again, from two to six p. m. there were sixty-six changes of the moon in one month demore deaths than from two to six a. m. notes cool weather in summer and cold from six p. m. to six a. m. is 169 less bring on a flood. warned not to approach the Polar bear's than for the corresponding period during the day. The hours from two to six p. m. in this list show fifty-three cases more than for the corresponding period in the morning; this in nearly 4,000 cases is very slight. In the chronic cases the greatest number of deaths at any one hour was at four p. m., with two and five p. m. and six a. m. closely following. The greatest in the acute list was at three a. m., with eleven a. m. and p. m. closely following. The lowest

number in the acute list was at twelve of days of continued rain.-Lieut. J. P. m. (midnight), that hour so dreaded in Finley, U. S. Signal Service, in National the sick room by attendants, and to which a good deal of superstition attaches. It is noticeable that the number for this hour is exceedingly lowabout half of the average number. In the chronic cases the lowest number appears at nine a. m. From these 15,000 cases extending

over a period of twelve years, it would appear that death occurs seemingly without any particular predilection for any certain hour, and that the number of deaths for each hour is very evenly proportioned, considering the large num ber of cases taken and the time covered. The only very positive conclusion I notes. Again he tried, and again he have formed from the figures are: failed. Then, with a sad smile and a 1. That the idea that more deaths take place in the early morning hours is an erroneous one. 2. If stimulants are to the air, and retired from the stage amid be pursued in disease during thes iustified hours the practice must be upon some other ground than to avert the possibility of danger supposed to be very probable at this period. 3. That the vitality of an individual disease is not regulated by the same influences or subject to the same laws that govern the vitality of a healthy human being. the normal equilibrium maintained in health between the mental and physical

Two full moons in a calendar month

If the full moon rises clear expect fine weather. If the moon is seen between the scud and broken clonds during a gale it is ex-

pected to scuff or break away the bad weather. The larger the halo about the moon

the nearer the rain clouds and the sooner the rain may be expected. A lunar halo indicates rain, and the number of stars observed inclosed within the ring is said to indicate the number

#### Tribune. THEIR LAST CONCERTS.

Poor Mario's Fiasco at Boston and Signor Bottesini's Pathetic Failure. One of the most pathetic of sights was that seen in the Boston Music Hall at the last concert given by Mario, the once famous tenor. He was poor, and the hall was filled with persons who had been ardent admirers of his wonderful art, and now that he had lost his art were willing to put money in his purse.

The tenor tried one of his great songs, but his decayed voice refused to sing the slow, mournful movement of his head, the silence of the pitving audience. Another pathetic story is told of Bot-

tesini, a famous violinist, concerning his late concert at Parma: It was a rainy evening, and the managers had forgotten to send a carriage for the veteran, who set out on foot, and had gone some distance before a passing friend perceived him and made him

enter his carriage. Arrived at the concert-room, Bottesini tuned his instrument and began to rub and mail-bags. There are newspapers his bow with rosin. The rosin crumbled in his hands, and turning to his friends with a half-sad smile, he said, "See, it

is so that Bottesini, too, will break up." Then he grasped his loved instrument and drew the bow across the strings, but instantly stopped with a wondering look, for he felt something strange in the tone; his touch was answered less readily and certainly than of old.

Once more he tried, and once more he stopped, this time with a smile, saying only, "It answers no more." His audience perceived nothing unusual in the performance, which they applauded as warmly as ever, but Bottesini seemed to feel the shadow of death.

On the following day he was stricken with illness, and soon after the wonderful hand was stilled forever.-Boston

Journal. The Fishes' Dinner-Bell.

Not far from Berlin is Charlottenburg, where there is a great palace with splendid gardens. The German fathers and mothers take their little ones to see a wonderful sight in these gardens. through which winds the River Spree. Now, in this same river is a quantity of carp, and it is to see them fed-and to feed them-that the little Heinrichs and Gretchens love to go to Charlottenburg. These carp are very aged, some of them, and as cunning as possible, for when a certain bell rings they all come rushing in shoals, knowing perfectly well that it is their own dinner-bell; and they are never disappointed, for the public light in feeding them-Berlin Letter.

Then -" "Get out of the house as soon as possible, I suppose?" put in the tired listener, for the sake of saving some thing. "Certainly." "What a relief it must be to your family."-Philadelphia Inquirer.

-A young versifier, upon submitting one of his productions to his older and less dreamy roommate, was asked, the verses having been read with great care: "Did you write this stuff?"
"Yes." "Where will you send it?" "To Mr. Blank. "He's the editor of the - Journal. I send it to him be cause he is an old friend of my father's.' "All right. I'm glad you're going to send it to Blank. Perhaps, for your father's sake, he will decline to print it."-Harper's Magazine.

## QUEER AFRICAN CITY.

Nothing More Oriental in the East Than Tangier Within Sight of Spain. What is there to see in Tangier and why do American tourists after "the run through Spain" think it quite essential to visit the Barbary coast? I can answer for one party. A sagacious friend who recently went trom the straits of Gibralter to the Bosporus said to us before we left home: "You will see nothing more purely oriental than Tangier in al your proposed journey." Certainly we have found the place so completely for eign to all our ideas that only the oldfashioned word "outlandish" seems ade quate to describe it. Here is the most western of all the seaports of northern Africa, lying within sight of the coast of Spain and the rock of Gibraltar, a place of 16,000 inhabitants, upon whose ways of life and thought European Christian civilization has scarcely made an impression. Yet more than two hundred years ago this city for a short period belonged to the English crown. It is now the residence of the foreign ministers who are accredited to the Sultan of

Morocco. It is in almost daily communication with France, Spain and Gibraltar, both England and Spain maintaining postoffices, with separate bureaus, stamps published here in English and Spanish. The Hotel Continental is so good that there is a current mot to the effect that the best hotel in Europe may be found in Africa. The English come here at certain seasons "for sport," the particular attraction being the chase of wild boars, for which a manual of "hog-stick ing" has been elaborately set forth.

Yet, notwithstanding all this, the

Moors and the Jews go on in their oldfashioned ways as if they were living in the fifteenth century. Indeed, it is easy to believe that we see in Tangier much of the same sort of life which pre vailed in Southern Spain four hundred years ago-before the conquest of Granada-with one important qualification: Tangier has nothing which suggests the learning, the science, the arts, or even the sacredness of the great cities of Andalusia when Moorish sway was dominant. The Arabic or Mohammedan dominion, without the Arabic enlightenment, loses all the charm which is suggested by what is even now to be seen in Cordova, Granada and Seville.-Cor. Baltimore Sun.

The Most Wonderful Kittens A most wonderful toy has been on

private exhibition in Paris. Fancy even life-sized kittens covered with real skin, but with eyes of emerald set in pearly white enamel and each playing on a musical instrument; a flute, a zither, a violin, a drum, a harp, a cornet and an accordion, all perfectly armonized and playing the most difficult operas, then you have the picture complete. The mechanism is similar to that of a music box and the whole apparatus, kittens et al., is valued as 30,000 francs.—St. Louis Republic.

A GRINDSTONE REST. Put Your Grindstone in Order-This Arti-

cle Tells You How. form, it should be turned off by holding would waste fuel in that way. And yet a piece of wrought iron, such as an old a piece of wrought iron, such as an old are not some of the practices of farmers bolt or piece of bar iron, flat on the quite as wasteful. Take, for example, bench, keeping it firmly in place; not the loss of animal heat resulting from letting it work in or out, but wearing insufficient protection of stock in winoff the high places until the stone is uniformly concentric with the axis. If blooded animals heat is generated by the stone loses its sharpness of grit and does not grind well, it is because the sustained by the consumed food, and, in sustained by the consumed food, and, in work pores have become filled with particles its absence, by the adipose or fatty of steel, which can be removed by the tissue of the body. When the temperative first cooked. This applies equally to frame, when together, even or flush on both sides. Bore a hole in the middle keeps the creature warm. of the narrow end piece, and drive in an

leaving the tang out.

A CONVENIENT GRINDSTONE REST. the long cross-piece, fastening it there by putting a two-and-a-half-inch screw through both ends into the side strip, letting this piece project out about an inch beyond the side strip. Round off ing the constitution of so many heris the corners of the projecting ends of the side strip for handles. The halfinch, hard-wood cross-piece is used as a clamp, placing the article to be ground between that and the cross-piece, and dium course between the two extremes. stone near the side of a building or to cold is threefold. Extra keeping is post, far enough away so that the sharp point in the narrow end of the holder here is a loss of forage. With warm article to be ground in its proper position above the stone. The pointed end can be raised or lowered to fit the bevel of the tool to be ground, and also to allow of its being moved sidewise on the stone. The person using it needs the stone. The person using it needs only to guide it and give the necessary health.

Pressure by taking hold of both handles.

The stone should have a water-box placed under it and fastened to a leg of which requires extra feed, the production of milk by cows, or the production of milk by cows, which requires extra feed, the present blook, the impatient blow that has wrung blood from the tender little heart. We the stone to rest in the water when in use. The box should have a plug near greater, for the animal heat must be part to stand in water, causing it to wear away unevenly, and to freeze up in

#### SCAB ON SHEEP.

Treatment. single instance. I send to some large tobacco house and buy the coarse, heavy leaf tobacco, which is cheap-from six to nine cents per pound. Use about fifty pounds to one hundred sheep, tion; boil it and dip while as hot as you can bear your hand in it. Make a vat five feet deep, eighteen inches wide, two feet long at bottom, six feet long at top, one end running out like a hopper. Then nail cleats on inside for the sheep to walk out on without slipping. Set the vat in the ground, about three and a-half feet, so the top will be just below a man's knees; then make a slanting platform at the end of the vat where the sheep go out, with the end in the vat to save the liquid that drains from the sheep. This should be large enough

to hold thirty or forty sheep at once if

your flock is large. Fill the vat three-quarters full of the solution. Catch your sheep by one fore leg and one hind leg and hold it over the vat with its head the lowest; then let go, and be sure that it goes under all over, so you may kill all the ticks and nits. As soon as the sheep finds it is loose it will turn over, and, its head being at the hopper end of the vat, it will walk out on the platform, where you can let them stand and drain while you refill your vat. You need have no eyes or ears, for I have dipped several ers is the sliding; to prevent this bore thousand in that way. If the weather is cold crowd your sheep in a warm room and one-half feet apart, and equal disfor two or three days, only letting them out long enough to eat. The drippings on their hay will not hurt, and by put- and one-half feet long, and you have a ting them in their old shed while wet it will kill all nits. If the wool is short Fireside. and weather warm you may have to dip them two or three times before you effect a permanent cure, but as it will not take much juice and is not much trouble at that time of the year do not neglect it.-Breeder's Gazette.

the most valuable animal.

CARE OF STOCK

Some Good Suggestions on an Old But Important Subject, There is no farmer's wife so ignorant of the simple laws of nature as to attempt to bake a loaf of bread with the If the stone is out of proper circular oven doors open. No thoughtful woman

wrought iron. The rest shown in the engraving is for holding in the right position the article to be ground or as to sition the article to be ground, so as to the radiation of heat is very rapid, and grind it to a uniform bevel. For making the rest, take two strips of hard temperature of the body would soon plain. Coat the inside thick with boiled other. Cut a piece of wood an inch and uniform temperature of the body being smell badly.—Ladies' Home Journal. a-half thick and ten inches long, so it in exact proportion to the loss of heat by will fit the narrow end. Cut a similar its passing off in the air-that a much one six inches wide, and long enough to larger quantity of such food is necessary night in equal parts of water and either go eighteen inches into the wide end, when the animal is exposed to extreme and nail firmly together, having the cold than if it is well protected. It is till the water is clear before frying.

We do not say this as any thing new. iron pin having a sharp point, projecting about an inch. An old three-corevery farmer. The thing peculiar or nered file is the best for this purpose, strange in the matter is that the practice of so many farmers should exhibit Then place a piece of hard wood, half a striking indifference on the subject. an inch thick and six inches wide, over | Many neglect to furnish warm quarters for their stock, and others, who have comfortable barns and stables, keep stock all or a part of the time "out in the cold." We have often seen milch cows lying on ice and snow in a barnyard much exposed to wind, without a little straw to lie upon on cold winter days. We desire especially to have it understood that we do not advocate the system of constant housing in close quarters, deprived of exercise in the open air, which, with high feed, is destroying can be more odious to the friend of improvement in stock than this pernicious system. There is a proper metightening by two screws. Place the The loss resulting from undue exposure can be stuck in the post, and bring the quarters there would be a gain of flesh instead of loss; without extra feed here is a loss of condition. Constant suffering from cold exhausts and enfeebles the nervous system, upon which de-

If there is some special drafn upon the frame, coming high enough to allow which requires extra food, the necesthe bottom to let the water off when not sustained first. If that requires nearly in use, as it injures the stone for one all the food, the remainder will be insufficient for work or milk, which must be made up out of the stores in the

Without alluding in specific terms to every detail to be attended to, we de-A Sheep Raiser Gives His Method of Sire to urge farmers not to try to bake their bread with the oven door open. I have had large experience with scab The farmer who stints the feed of his on sheep and have had good success in stock during the winter months in order curing it. I have never failed in a to have something to carry to market is foolish; the farmer who feeds his stock well through the winter months is wise. One makes his stock bring a price far more than the cost of the extra feed given; the other has the pleasure of seeor enough to make a very strong soluthe highest market price, while his own is slow of sale and at a reduced price .-Ohio Farmer.

Corn-Stalk Breaker.

Take a pole large enough to be hewn down to four by six inches, and long enough to take three rows of stalks at a swath. Bore a hole two and a half feet from each end. Take another pole, same length as first, and much lighter; bore holes in it to correspond with those in the front piece, and pin the two together by stakes three feet long. The main object is to keep the weight in the front pole, as it does the breaking; the hind

CORN-STALK BREAKER.

pole being used merely to steady the fears about the tobacco injuring their front one. The great fault with breaktances from the ends, extending outward. Insert pins from the front, two splendid corn-stalk breaker. - Farm and

The Importance of Good Seed. So much has been written upon this subject that the Western Rural hesitates to say a word more upon it; yet when we say that immense losses occur The Walk of the Horse.

Reference is frequently made to the respond: "That is so." Well, what is walking gait of horses, and the farmer the cause of poor seed? These are is advised when buying a horse to test among the causes: There is not a suftlie speed of the animal in walking. ficient observance of the law that like That is all right, but test the speed as produces like. There is too much carewuch as you like and the fast walker lessness in making a selection. Seed will not be found. In all our experishould be taken from perfect specimens. ence and observation we have never We observe that one writer in an Eastseen but one horse that was a fast ern paper affirms that the bean crop walker. It is true that there is a differ-ence in horses in the matter of walking, from plants that grow few pods and not but the walking gait of the fastest is many beans in a poo. That is possible. not what would be called fast. The Then-and it is here that our interest truth is that there is not the slightest centers at this time of year-much seed care taken to produce fast walkers. is very carelessly kept. It is not kept Neither in selection of breeders or the in a dry place. Let that matter be attraining of colts is fast walking made a tended to at once, and when the spring special purpose, and it will require both comes never plant seed that you have to improve the walking gait of our not tested. It is so easy to sow a little horses. We ought to remember, how-ever, that the horse that will walk fifty spring to test its vitality that there is er cent. faster than another horse is no excuse for planting sord that lacks

Beat these ingredients into the butter, and it will be ready for ise. It is nice to spread on fried or broiled fish, and also over potato balls. When intended for the latter, however, half a tablespoonful of lemon juice will be enough.—Boston Herald.

-We should be glad that it is childnature to be forgetful; that a kiss, a smile, a kind word will efface the recolblood from the tender little heart. We would not dare to insult those of our own age as we do our children. Thank heaven for their short memories! So short that the suffering of cutting one tooth is clean forgotten before the next saws a jagged edge through the swollen gum.-Christmas Talk with Mothers.

Makes Occasional Cruises.

THE QUEEN'S YACHT. The Floating Palace in Which Her Majesty

The exquisite cleanliness of every thing strikes one forcibly on board the Victoria and Albert. The deck is laid with cork floor-cloth, over which, when the Queen is on board, a carpet is placed, and every thing else that is to be seen is of pure white, with gilded relief work and silver mountings. There are very comfortable little sit

ting rooms on the promenade deck, and behind the paddle wings, and there is also a dining room on the promenade deck, which has three big windows and a skylight. It is furnished in green morocco, and the ceiling is painted in white and gold. The state apartments below are placed on either side of the corridor, and they are furnished with a very pretty chintz. The Queen's cabins are on the starboard side, and her sleep ing apartment contains a large and oldfashioned but very comfortable looking bedstead with pillars and canopy, and next is the dressing-room, which formerly Prince Albert's cabin, and it remains as he left it, his little writing table and wardrobe never having been

moved. Large maps hang on the walls. The cabin occupied by Princess Beatrice (or any Princess who happens to be traveling with the Queen) are all of her Ma jesty's quarters, and on the other side of the corridor are the cabins of the Princess and a large bath-room. The breakfast room is in the afterpart of the vessel, and it has very large windows, and is hung with the portraits of all the officers who have commanded the royal vacht.

The drawing-room is forward on the port side, and it is furnished in bird's eye maple, with a piano and several beautifully carved side tables. It is hung with portraits of members of the royal family, and in this room is a small library. The yacht is now lighted with electricity, except in the Queen's own cabins.—London Truth.

Who Can Best Be Spared. Young men, this is the first question your employers ask themselves when business becomes slack, and when it is thought necessary to economize in the matter of salaries. "Who can best be spared?" The barnacles, the shirks, the makeshifts, somebody's proteges, somebody's nephews, and especially some-body's good-for-nothing. Young men, please remember that these are not the ones who are called for when responsible positions are to be filled. Would you sition of prominence? Would you like to know the probabilities of your getting such a position? Inquire within! What are you doing to make yourself valuable like to gage your own future for a poin the position you now occupy? If you are doing with your might what your hands find to do, the chances are ten to one that you soon become so valuable in that position that you can not be spared from it; and then, singular to relate, will be the very time when you will be sought out for promotion for a better place .- Medical Record.

CHINA'S SILK FESTIVAL.

Religious and Symbolical Services Per formed by the Empress We, who are always grateful to our benefactors, honor the inventor of the art of silk-culture with a real perpetual, cult. Besides the temples which we which will strengthen both mind and have erected in all the corners of the empire, her Majesty the Empress goes -A pair of infant's shoes, filled with every year at the hatching season, in person, with all her suite, and in great pomp, to the field of the mulberry, to sacrifice to the goddess who was the queen of the Emperor Hoang-Ti. After the ceremony at the temple, Her Majesty, followed by her ladies, goes into the field, and, surrounded by farmers' wives, cooks some mulberry leaves and lays them on a basket containing the newly hatched worms. The festival is closed with her winding a cocoon by way of setting an example, in the presence of the people, and distributing gifts to those persons who have been reported by the authorities of their villages as most worthy by reason of their fidelity in attention to the care

of the silk-worms. This ceremony, which is one of the most important of those her Majesty has to perform during the year, is a great incentive to the silk-raising population, who can not neglect their own work when they see their sovereign occupied in the same way. An old proverb says that "an idle farmer causes two persons to die of hunger, and a woman who will not weave will see ten dying of cold." The proverb illustrates the value of encouragement, and shows that silk-worm raising and weaving are duties of the women.—General Tcheng Ki-Tong, in Popular Science Monthly.

The very best way to know whether or not Dobbins' Electric Soap is as good as it is said to be, is to try it yourself. It can't deceive you. Be sure to get no imitation. There are lots of them. Ask your grocer. A saloon is like a harbor—most of the wrecks are to be found outside the bar.—Terre Haute Express.

Under and by virtue of Sec. 13 of Art. 12 of the Code of Pub. Local Laws entitled Garrett County subtitle "County Treasurer." the un-derstand, Ross Compton, as County Treas-urer for Garrett County aforesaid, will offer at Public Sale to the highest bidder for cash in front of C. Livengood's Hotel, in the town of Grantsville, on

## MARCH,

in the year 1890, at the hour of 11 o'clock A. M. of said day, the following LANDS AND REAL ESTATE,

adjoining the farm of Lewis Hench er, in the 3d Election District of said county, and contained within the follow meles and bounds: Beginning for the same at a bounded sugar tree on the East side of County Eoad leading from Grantsville to Salisbury, it being a corner of Lewis Henchier's farm, and running theme N. 36 degrees E. 26 perches, thence S. 4 degrees W. 23 perches, to line of said Henchier farm, and thence with said Henchier Mie N. 46 degrees W. 33 perches to beginning containing five acres and thirty three perches, and being a part of the same property which is assessed upon the Assessment Books of the County Commissioners of said county to a certain Elijah Livengrood.

ertain Elijah Livengood. Saldiand will be sold for the payment of he State and County Taxes due and in arrear hereon for the year 1889. ROSS COMPTON.

FROM THE JAWS OF DEATH.

of a late admiral is told by Comman. ed. "Yah! yah!" came back in reder Erroll, R. N., in the Illustrated piy, followed by something in a language with which I was nnacquaint-Naval and Military Magazine:

Although the vessel was steered ed.

by warring nature, yet full of a great schooner admitted. my sailor's ear was startled by a their languege, or they of mine, but sound that was like, yet different by means of signs and rough sketches from, the breaking waves. Before I I managed to explain to them how it had time to consider what it might had happened that they came to have be, a large black mass passed between | me for a passenger. I drew a skytch me and the red glow forward, and of myself clinging on to bowsprit. the next instant an irresistable, un- and one of them promptly added a seen power lifted me off my legs, and large pair of horns and a tail to my we have a larger stock of Paints, Olls, the steamer passed away beneath my figure, at which all the others nod feet. With the tenacity of a drown- ded and exclaimed: "Yah! yah!" ing man I clung to the object which again holding up their hands to exnow carrying me away into the dark- understand that when they first disness. I found myself suspended covered me they had all taken me above the boiling waters, expecting for the devil himself. Of course, I after 1st March, for the convenience of my every moment to be engulfed therein, was most anxious to communicate patrons, and will be able to fill Prescriptions and I thought despairingly of my with my wife and Amy, who I knew dear wife and daughter who would must by this time, be in agonies of never know the mystery of my distress and bewilderment at my death. Then it flashed across my strange disappearance; and I exmind that perhaps people would say plained to my hosts that I would

> my position were altogether hopeless. down into vacancy, but occasionally off in a moment by the violent pitching of the yessel, whereas I knew

ance came to me. The vessel, whatever she was, had no lights burning, and was perfectly invisible in the darkness. Evidently no one was on the lookout, the helmsman having probably lashed the wheel for a short time whilst he went below to light his pipe or get a I lost my grip on my husband. I glass of grog, and none of those on hoard knew how nearly they had been in collision with the Boulogne packet. They had escaped her by a mere hair's breadth; the steamer's stern must have fallen into the trough of the sea at the very moment that the yessel's bowsprit passed over the

the cold and wet until some assist-

taffrail, and so neatly picked me off. I had plenty of time out there in the cold to reflect on what an exceedingly narrow escape I had had, Had the spar struck me when I had been facing aft, cr, indeed, in any manner except exactly as it did, I should not have been able to grasp it, and must inevitably have been knocked overboard or killed by the blow. Then I thanked Providence for having so mercifully preserved me, and prayed I might yet be restored to those dear ones whose loying hearts would be torn with anguish when, on reaching the land, they would discover the SATURDAY, the 22nd Day of bereavement that had befallen them.

I was still in a very perilous position, clinging as well as I could to the end of that small spar, buried sometimes almost to my waist, and nearly dranged from my hold by the water, as the vessel pitched into the edy. heavy seas. I was also benumbed with the cold, and my half-frozen fingers could hardly feel the wet and slippery rope. As soon as I had recovered my breath I began to shout again, and presently, to my great satisfaction, heard some one reply, then a glimmer of a lantern revealed a glimpse of the yessel's bows, and an astonished face gazing into the night. 'As I continued to shout the owner of the face disappeared in a search of assistance and shortly the

whole crew clustered on the forecas tle, gazing at me in wonder and The following incident in the life amazement, "Help! help!" I shout-

from the bridge, there was a spare | Presently the little vessel fell off wheel abaft and a raised grating for before the wind as they put the helm the helmsman to stand upon. I got up, and her motion became comparon this, and, steadying myself by the atively easy and gentle; at the same wheel with one hand, tried to peer moment I saw a sturdy fellow climb through the darkness astern; but all our upon the bowsprit with a rope's was black as jet, a darkness that al- end; it was now easy enough to get most might be felt. Standing all along the spar. He soon reached alone up there, amidst the swirl, I the place where I was sitting, and began rather to enjoy the weirdness made the rope fast around my waist, of my position. I was poised in the and, with his assistance, in another midst of the raging elements, the minute I found myself safe upon the gale whistled about my ears, the wa- ueck of the little craft. With this aid crossing by the next boat, I found I managed to climb into a place of myself on the following morning tolerable security where 1 could sit once more in the arms of those I so upon the bowsprit end and hold on dearly loved. But I will draw a by the jibstay. I dared not attempt | veil over that sacred meeting, when to climb in towards the bows of the after the first paroxysm of our joy ship, as the spar was so wet and slip- was over, we knelt, and, with our pery that I should have been jerked arms entwined together and tears of happiness rolling down our cheeks, gave thanks to that merciful Provithat where I was I was safe enough dence who had brought me safely provided I should hold out against back out of the very jaws of death.

> A woman came to Mr. Carr at the close of one his Bible readings and said: "You told the truth to day. My husband is an infidel, but he did respect Christianity a little until one night I took a character in a drama played in in our church. That night

am afraid I shall never get it again." The church that resorts to broomdritts, and dramas, and mum socials, and fairs, and festivals to raise money, is without the faith that takes hold on God. A genuine Holy Ghost revival is a thing unknown. Fathers have lost their grip on wayward sons, mothers have lost their grip on unconverted daughters, the church has lost her grip on God. Down on her knees in sackcloth and ashes before Him who drove the buyers and sellers out of the temple, let such a church plead with God for mercy, promise to forego all worldly meader es of money-making and regain the lost grip .- The 1.lustrator.

"The story was crarsely told, perhaps." adds the old narrator,

Too Much.

There is too much love in the world, said some one. There is too much of a great many things in this world, but not too much of that. There is too much bad temper.

Too much scandal. Too much eyil thinking. Too much hard judgment. Too much impertinence, Too much weakness unforgiven.

Too much of bad puns. Too may courses at dinner. Too many women who support their husbands. Too many liars.

Too many bores, Too many tiresome plays. Too many books written to sell and not to read. Too many-no there are not too many babies, and while there are plenty of babies and plenty of love.

there will always be plenty of happiness in this world.

A Bridegroom's Advice. "Now, then, Jennie," said the bridegroom to the bride, after they had returned from church, where the knot had been tied, "how many

brothers have you?" "Brothers!" exclaimed the bride in astonishment, "you know I haven't any brothers, I'm the only child of new parents."

"Oh, I know that; but how many young men did you promise to be a sister to before you accepted me? Those are the brothers I want to know about."

"Well," replied the bride, smiling, "I think I must have about half a dozen of brothers."

"All right. You just drop a note to each of them and tell them the gie. I'm all the brother you need

#### PROGRESS VS. LOVE.

Ah me! the march of Progress Is driving Love from hence, For how can parting lovers talk Across a barb-wire fence?

No swinging gate to lean on, No high fence with its bars. Which seemed to shut out Eden, Where two eyes gleamed bright as stars

Ah me! the march of Progress Exiles the great log fire,
The stove severe and blackly grim Can no fair thoughts inspire.

The tallow dip is fated-Gas in its place burns bright; he candle had an end some time. But the gas will burn all night,

Ah me! the march of Progress And now an ocean passage Is short-lived as a dream, No time is left for courting Upon the steamers fast— You meet a maid—scarce know her,

When, behold! the journey's past, Ah me! the march of Progress Has brought the railroad car; More enchanting was the stage-coach With its sumble and its jar. As the train speeds swiftly ouward It suggests unrest and strife

You have no time left for loving, You have scarcely time for life. And now the march of Progress An idol has o'erthrown, Which this age iconoclastic Had left to me alone.

Through the streets of ev'ry village Blaze the great electric lights— And the porch has lost its romance Tarough the balmy Summer nights.

"—Flavel Scott Mines, in Puck.

#### THAT GIRL.

She Was Wild and Uncouth, But Brave and Noble Withal.

"I never in all my life did see the like of that girl! I don't believe there's an- But no other woman don't bother!" other of her sort in all California. I hope not, anyway!"

interest and disapproval up the mounfour-year-old Jerry for her to talk to, disappointment. and he was too busy to pay any atten-tion, but with the performances of "that mountain, for that matter—was quite so the nature of those later tracks.

had to stop talkon which had so upset her mind.

THE USES OF HISTORY. It Is the Record of Facts Bearing on Or-In his eloquent address before the New York Historical Society on the oceasion of its eighty-fifth anniversary, November 21, 1889, the Rev. John Hall, D. D., said: "When memory was given by the Creative hand as one of the powers of the mind, it was evidently neant that the past should have to do in the mental experiences of the present. To the Infinite One, past, present and future make one picture of perfect distinctness. The finite man falls immeasurably below this capacity, but there is still a lingering vestige of like- ation. ness to the image of the infinite in that we can learn and remember something of what is behind us, and in that we can not help wondering, inquiring, hoping, regarding the future. The exercise that strengthens this original faculty which reproduces the past, and places it beside the living present-is good in itself provided we keep the power so en-larged at work on fruitful fields. In the careful analysis of the mental powers by Dr. Noah Porter we have ense-perception and consciousness, making a first presentation of objects to sentative faculty acting (in part without the will), making a second presentation of the objects. But will-power comes in, and is employed in keeping represented to the mind what is desired, and so at once employing and strengthening it. Good history furnishes the material on post deep in the ground, tied a straw man to it, and then turned a fierce bull into the inclosure. The bull made a bee and so far giving vigor, direction, and versatility to that which constitutes the man. For what is history? There is a nost valuable—one might say, invaluable-department of literature, in which the make-up, the career, and the influences of individuals are portrayed, a conspiracy of some sort was on the and single lives stand out in their distinctness before a community so that terview with the tenderfoot. ## A RUNAWAY ELEVATOR.

Four Men of Pittsburgh Pass an Exciting Half Hour. What might have resulted in a fatal accident, but developed into a ludicrous circumstance, happened a short time ago in the Allegheny General Hospital. A well known man in the steel business. who is popularly called Tom, was attacked by a serious trouble in the head.

The physician persuaded him to go up to the Allegheny General Hospital. One Saturday four men from the steel works formed a party and called upon the sick man. His room was on the second floor. and it was necessary to take the elevator. The trip to the room passed off successfully; very differently, however, on the return. After remaining with the invalid for some time it was suggested that it would be advisable to go. Coming around to the elevator, the bell

was rung to call it. A pretty blonde nurse, with laughing eyes, asked if any of the party could run an elevator, because she had a poultice to put on a patient, and she was afraid it would cool if she took the elevator down again. The leader of the party came to the front, and said he would operate the elevator, having had experience, and was an adept at the job.

Having gotten in the elevator the eader pulled the rope the reverse way to the floor which was wanted. Like a flash the machine struck the roof of the hospital, seriously disconcerting the entire party. A rumble of discontent was heard within the box while the men were straightening their battered hats. Again the elevator rope was pulled, and quicker than the first ride in the elevator, the party were landed in the cellar. For fully twenty minutes the elevator was going up and down in a remarkable manner. Every man in the uncontrollable box tried his skill in stopping it. Up and down went the elevator. The men imprisoned in the four-by-four swore enough to fill the City Hall. On every floor numbers of nurses and patients had gathered, watching the antics of the machine. The elevator was at last stopped at the same floor which the men got in at. One of them thought that for security's sake and his family's, not having an insurance on his life, that he had better

get out. Just as he put one foot on the passage, the elevator made a sudden shoot and he was sent whirling along the hall. His clothes suffered consider When the elevator got started again she was as unmanageable as a mad bull. The nurses shricked, and the whole place was like a bedlam. ing half an hour see-sawing the mad machine was finally brought to a standstill.
All got out thankful they were alive.—

THE ARIZONA KICKER.

Extracts from a Recent Issue of That Journal of Civilization. "Not a Murder.-The other morning Hank Poole, a veteran old bum and bluffer of this locality, was found dead in Codfish alley, about ten feet from the door of the Red Jacket saloon. He had received about thirty buckshot, and had been dead for some hours when discovered. It was, of course, suspected that he had been killed in a row in the saloon, and the sheriff was wabbling around with half a dozen warrants in his hand when we stepped in and threw a light of 250 candle-power on the situ-

"At about midnight on the previous night some one kicked on our office door, and when we called out to know who was there a rock was hurled through one of the windows. We slid out of bed, grabbed our shot-gun, and fired into the street through the same window, supposing 'the boys' wanted some fun with us. We heard some one run away, and have no doubt that Hank Poole was the targetof our buck-shot. Hank had been down on us ever since we sliced off his left ear a. year ago in front of the post-office, and within two days he had been heard to declare that he would have our life.

"The coroner's jury acquitted us of all blame, but stuck us for the burial expenses, which footed up \$6.50. We are not complaining any. Any man is liable to kill one of his fellow-creatures. out here any hour in the day, and it is only fair that he should see the body decently laid away. We are sorry that Hank didn't meet us on the street in daylight, and thus have a better show, but as he chose his own way no one is to blame but himself.'

"HE WILL, EH?-The other day, when we saw Judge Saunders steering a Boston man around the country, we felt that carpet, and we arranged for a private insult justified our anticipations. The cactus three miles ledge of pure silver, and was worth a

"COME AND SEE IT .- We have just received from a friend in Denver a laundried shirt, valued at seventy-five cents cut in the latest style and buttoning in the back. It is not only a valued present, but a curiosity which all should see, and for a few days we will have it on exhibition at the office."

SETTLED OUT OF COURT .- One of the first libel suits started against this paper was brought by Dr. King, the druggist on Sioux Place. We stated that the doctor was a quack and a fraud; that he was a skipper from the East; that he did not know quinine from arsenic, and that this climate would be sure effect his health if he stayed a few weeks longer. A shyster lawyer named Davis made the doctor believe that he had been damaged, and he brought sait for a quarter of a million.

"Six months ago Davis spit on our hat as we were coming out of the post-office. and we had to pay \$13 to bury him. Three months ago the judge before whom the case would have been tried was thrown out of a second-story window in a saloon and killed. Four weeks ago the doctor was hung by the boys up at Penny Gulch for giving a sick man strychnine in place of calmel, and yesterday we settled the case with his heirs for a sack of flour and two dozen Michigan clothes-pins. We have eleven others on hand, aggregating about \$2,000,000, and if any of the plaintiffs want to settle we will be open to a trade all this week, though we shall limit them strictly to clothes-pins."-Detroit Free Press.

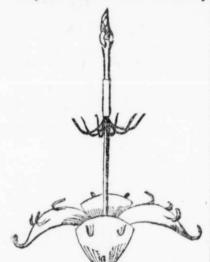

## DURABLE TIMBER.

Eight Valuable Suggestions Based on Prof. Rankine's Experience. Professor Rankine says: "There are certain appearances which are characteristic of strong and durable timber to what class soever it belongs. 1. In the same species of timber that specimen will in general be strongest and most durable which has grown the slowest, as shown by the narrowness of the an-nual rings. 2. The cellular tissue, as seen in the medullary rays (when visible) should be hard and compact. 3. The vascular or fibrous tissue should adhere firmly together and should show no wooliness at a freshly-cut surface, nor should it clog the teeth of the saw with loose fibers. 4. If the wood is colored, darkness of color is in general a sign of strength and durability, 5. The freshly cut surface of the wood should be firm and shining, and should have somewhat of a translucent appearance. A dull chalky appearance is a sign of bad timber. 6. In wood of a given species, the heavier specimens are in general the stronger and the most lasting. 7. Among resinous woods, those which have least resin in their pores, and among nonresinous woods, those which have least sap or gum in them, are in general the strongest and most lasting. 8. stated by some authors in fir-wood that which has the most sap wood, and in hard wood that which has the least, is the most durable-but the universality of this law is doubtful. Timber should cracks radiating from the center; "cupshakes" or cracks which partially separ ate one annual layer from another; V "up-sets," where the fibers have been crippled by compression; V "ringalls," or wounds in the layer of the wood. which have been covered and concealed by the growth of subsequent layers over The Clever Invention of a French Naval Officer.

A Grapuel Which Will Reach Either Vertically or Horizontally, and Bring Up a Body from Any Depth of Water.

To bring up a helpless man from the bottom of the sea in time to permit reshe thinks he has very effectively solved, takes the pains to say that one should says the New York World. His position in the commercial marine gave him abundant chance to study the question of life-saving in all its various phases to note the merits and demerits of the existing systems and to know from observation just what was needed and how best to apply it.

In the commercial ports of Havre, Marseilles, Bordeaux and St. Nazaire the great French society for succoring the drowning had placed all known appliances. There were grapples and lines, belts and poles and other devices to be thrown in various ways to the struggling victim. How well these numerous appliances do their work the statistics of the work of the life-saving corps most eloquently testify, but against each and every one of them there are objections, and the unhappy exceptions were entirely too many when all the devices failed and the loss of human life was recorded. Even the plucky life saver who plunges in at the risk of his own to save the life of another can not always meet with success. If the body

THE GRIP ACTING VERTICALLY

goes down in dark and murky water the diver, no matter how skillful he may be, finds the chances of success reduced to the teeth of laughing Enriqueta. Their barest minimum. Many of the hooking devices are limited by the length of the pole to which they are attached, and the others, fastened to long lines, are with difficulty manipulated under very readily supposable circumstances.

Officer Debrosse had two drowning cases occur under his own eyes, either lottery. A little more money and they one of which might have been turned to a rescue had the proper implement been at hand. The first was at Marseilles in 1886, and the other no later than the evening of September 18 last beside the French line pier in this port. A sailor was engaged in painting the side of the vessel and fell into the sea, sinking almost at once, but indicating his position under the water by the bubbles of air rising to the surface. Two good div-ers went to his rescue, but the bottom was fully thirty feet away and the water so black that at half that depth the divers were unable to see any thing Several sailors rigged up from a raft a device for dragging the bottom, but the raft was not easily managed. A boat was hastily procured and for upward of two hours the efforts towards rescuing were kept up, the ship-carpen-

THE GRIP ACTING HORIZONTALLY.

implement, but this served only in the end to bring up the dead body. It was a case where something entirely different from any present apparatus was called for, and the case was one of many The Debrosse grapnel may be readily

understood from an inspection of the cuts showing it under two plans of operation. Supposing, as in the case cited, the body rests at the bottom or near it, with its position plainly indicated by the rising bubbles of escaping air. It is lowered down, its weight carrying it vertically, a jerk of the sustaining string and the four sections of the metallic globe open out like arms, and with the movement upward close in tightly upon the body and lift it to the surface and within reach of waiting friends. It may be worked with celerity and if the first aim of the fisher should not be successful it is only the work of an instant to make a new effort a little distance away. From the diameter of 35 centimetres when closed the arms spread out to a reach of 80 centimetres the metre being 39% English inches and the centimetre a hundredth part thereof. There is no dependence upon poies, etc. In the weight of the instrument is its principal power, and no matter how deep or how shallow the water is it is equally effective. Dragged along the bottom in the manner of an ordinary grapnel, the Debrosse apparatus answers admirably. The hooks upon the outer surface of the now closed sphere attach themselves to the clothing of the helpless victim, and so, long after life has apparently departed, he may be brought to the surface and resuscitated. It is, however, as a vertical grapnel that the machine will do its best work, and that for which it is uniquely adapted.

#### SPANISH GYPSIES.

They Live in Homes Cut in the Selid Rock-They Dance to the Merry Music of the Guitar and Tell Travelers Their

I took a long walk up the course of the silver Xenil, beginning it through the Alameda, the loveliest of public gardens, says a writer in the New York Journal. No prohibition of picking flowers there! I fancy there are enough for all. Again I followed the tumbling Darro, and frequented the torative measures to be applied is the Gypsies in their rock-cut caverns on the problem which First Officer Emmanuel hill over against the Alhambra till I borders and sometimes fringes on one ae least disrespect—a thing no man can Debrosse, of the French line steamer had got a considerable comprehension Bourgoyne, had set himself and which of their way of life. My guide-book

A SPANISH GYPSY.

not do it unless very well accompanied. Perhaps there is something of exaggeration in this. At all events I yet sur-

vive to tell the tale. Their homes are cut in the veritable solid rock, supplemented here and there with a trifle of masonry, and the chimneys project among the cactus on the hillside above. There must be a hundred or more of them.

This kind of dwelling is of very ancient origin and not uncommon in Spain. Nor is it as uncomfortable as might be supposed, that is to say when faces. compared with other dwellings of the poor. The rock is all ready to hand and moderately soft, and it is easier to cut it out into the habitations desired than to build them up regularly of brick

and stone; that is all there is of it. You don't get too much window light it is true, since none enters except by a mall opening or two in front; but then these are not a people to put their fine eyes out with much reading or writing, or indeed with working either, though one or two make a semblance of having forges and doing blacksmith work.

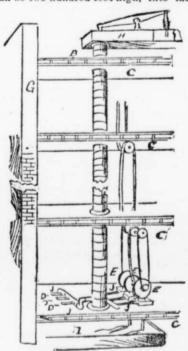

How they jigged and clapped and twanged their guitars, those darkskinned gypsies, and how white were dance ought to have succeeded at the Paris exhibition, after the precedent of those in the Rue du Caire.

They wanted to tell my fortune in my hand. A beautiful blonde lady with blue eyes was sighing for me, and I would win a million pesetas (francs) in the would tell me the name of the lady. "Vamos! a little more money; now

her name?" She would be called Quiteria Ramona Henceforward, then, writes a Madrid correspondent of the San Francisco Chronicle, whenever I shall meet Quiteria Ramona, and shall be free to respond to the purposes of destiny, I must think my fate approaches.

## TO USE NIAGARA FALLS.

A Mechanic Invents a Machine by Which the Wasted Power Can Be Used. Another scheme has been devised to utilize the water at Niagara. Several schemes have been talked about, and all of them have been too expensive to be even thought of. W. E. Weaver, a mechanic of Buffalo, has a plan which calls for towers to be erected at the base of the bluff below the village, which can be two hundred feet high, into the

WEAVER'S SCHEME.

open top of which he would put the water by means of a canal tapping the river above the village.

A, automatic water regulator; B, water tower; C, floors; D, turbine and pulley to connect power to machinery; G, wall standing at base of bluff; H, water from feed canal; I, escape of vaste water under wheels; J, pipes notors and turbine wheels. At the base of the tower are a series of turbine wheels from which practically unlimited power can be generated. This machinery could be used for any purpose.

With Her It Is a Success. "Do you think marriage is a failure,

Mrs. Choker?" asked Mrs. Simeral of the minister's wife. "No, indeed!" was the reply. "Mr. Choker gives me his fees for pin-money."

OAKLAND, MARYLAND. Fourth Year-Easter Term Begins

January 6th, 1890. Regular and elective studies. Three courses outlined—Academic, Scientific or Commercail. Special attention to collegiate requirements. Number of Puphs strictly Limited, Reference Library.

For terms, hours, courses, &c., apply to REV. J. NEWMAN. Principal. IMMORTAL.

He walked the world with bended head; "There is no thing," he meaning said, "That must not some day join the dead." He sat where rolled a river deep;

A child lay in her lap asleep. The waters touched the mother's hand, His heart was touched. He passed from land, But left it laughing in the sand.

That one kind word, that one good deed, Was as if you should plant a seed In sands along death's sable brede, And looking from the farther shore He saw, where he had sat before, A light that grew; grew more and more,

He saw a growing, glowing throng Of happy people white and strong With faith, and jubilant with song. It grew and grew, this little seed

Of good sown in that day of need, Until it touched the stars indeed And then the old man smiling said, With youthful heart and lifted head: "No good deed ever joins the dead."

—Joaquin Miller, in N. Y. Independent.

#### A PERFECT PLOT.

Reason Why He Was No Better Off After Discovering It.

"You are rather late, Stephen," said Mrs. Mostyn, as her husband came into the dining-room one day, just as she had finished breakfast, "and I can not stay with you, as I have to go out."

"Go out! Why, you said last night you were going to finish that china painting this morning, though I really don't know why you should work so hard. We are not in absolute penury."

"No; but it is pleasant making mone; in a way one likes. Besides, there will be some to give away when we find we have too much ourselves. And how is your trade going on?"

"To tell the truth, not brilliantly. In fact, I am rather hung up for want of a "A plot?"

"Yes, it is ridiculous. I have a short story to write this week, and, though I I sent you last?" have rather a neat set of characters and small incidents ready, if you understand, a main idea is wanting."

"Dear me, that is unfortunate! Why don't you go out for a walk, or for half rich; you an hour in the underground, or to the city on a 'bus, and find one?"

"My dear Millicent, what nonsense must try and worry it out myself some-

"Well, I must be off. Good-bye, Stephen; take my advice-go and look for your ideal in the real of life. I am sure you can find it there."

After his wife had gone Stephen Mostyn ate his breakfast and then sat muof his chair, he said: "I never felt less inclined to write in hand.

my life! Really, I have a good mind to "And now that she is ill and in want follow Millicent's advice and go out." In a few minutes he was standing on the doorstep, deciding upon his next

lose much under ground, so here goes | what I expected of you-what I waited for the Metropolitan railway."

"Oh, Whitechapel. I should think that

leaves room for discovery," he thought coward, or without your knowing that to himself. "What class?" "Third-better do it thoroughly. Now

ton and the Mile End Road, to test Mil- an answer, he was, happily, away from licent's theory. "Sir, I think this is Blackfriars' Station," she said, whisking her head round as she spoke, the end of her nose depriving the glass of a very fine smut senting to see you again, as you asked, at the same time.

'It is not my business to tell her that she is now still more attractive than when she got in," thought Stephen; 'she would probably give me into custody if I did-Blackfriars? Yes, it is. Do you get out here?"

"Ah." he said, turning the handle for

her, "I don't," There entered, before he shut the door, a small woman, holding in one ber. Stephen Mostyn's umbrella be arm a tiny bundle of a baby, and push- coming unfortunately mingled with the ing before her a little boy. She sat swearer's legs, he was precipitated paindown, the baby keeping its position in fully on to the plaiform, as the train the sling formed by its mother's arm, left the station, and Stephen bounded the boy holding close to her, pulling at up the steps to the surface of the earth. her shawl, and continually asking her in an unintelligible mutter for some- that evening, and was sitting by the fire thing that she had not got or didn't when her husband came in.

mean to part with. Her bonnet was "Well, Stephen, when you do follow cyes, pink, pinched little nose and discontented mouth. The poor little apol- "Very nearly."

ogy for a baby might have hung round er neck by a ribbon, and the other child was small and sickly. A shrunken,

lepressing little group. Just as Stephen Mostyn was beginning to weave round in his mind a pathetic, tender fancy, the small boy ecoming more than usually importu nate, his mother said, with no flicker of change in the expression of her face, but with a voice whose rough grating easily overpowered the noise of the

"Jest you stop a worritin', Tommy, else I'll tell yer bloomin' dad when wo git 'ome-see if I don't." Stephen shut his eyes, and only opened them as the little family bundled out

two stations further on. "The Monument!" "Mark lane!" No further passengers invaded his carriage. "I can't stand this any longer, and the condensed fog chokes one. I shall get out at the next station and go back."

"Aldgate!" Out he jumped and crossed to the return platform, literally feeling his way. The underground station at Aldgate is often quite dark in the middle of summer, and on this day the fog was dense. He found his way to a seat and (so thick was the darkness) did not discover, till he had taken his place at the end of it, that there were two other people near him. One of them, a man, was speaking in a disagreeable querulous voice.

"I'm sure it's not my fault if I get nothing to do. I am always trying to find something."

"Yes; in other people's pockets," and the loose comforts of a beauther wage, not the work."

"The atmosphere of these pfa an extraordinary resemblance!"

"What becomes of money in your hands I can't conceive," she went on. "It is Millicent's voice! What in God's to catch a glimpse of the figure that was gambling and desire nothing but to them, and still more so by the darkness. "What have you done with the money

"Done with it? Spent it, of course. A family can not live on nothing. It the great bay window of the Mediterrawas not much for you to give-you, who live in luxury; you, whose husband is

"My husband is very far from rich, and if he were so it would benefit you in no way. Every farthing I have given you talk. As if I were the least likely you for your wife was my own, made by to find my ideal plot that way! No; I my own work. I, a woman, worked to player and thought nothing of the ordihelp a woman, as I would a man, but not such as you."

"Well, and have you found your plop" "Yes, but I can't write it now, so un not much better off than before."

"Good gracious! why?" "Because," said Stephen, bending and kissing her eyes, "the story is so prety that I have no words in which to tell it: no character that I have hitherto conceived is good enough to play a part in it; no incident that I have known or —Dudley—"You look at me as if you imagined but seems poor and tedieus

"Then it is very good?" "Perfect!"

"And is it real or ideal?" "Both.

"Won't you tell it to me?" "Some day."-London World.

A SINGER'S LUCK.

How Chevaller Scoville Won Eighty Theqsand Dollars in One Sitting. Chevalier Scoville, of the Boston Ideals, is one of the few men who have broken the bank at Monte Carlo. It was during sixteen days spent between Nice and Monte Carlo, in the winter of 188. Scoville had gone to Nice to sing in "Lohengrin." Perhaps no living lan can claim to have had better fortuneat cards than he had during those sixten days. At the end of that time he as 1,500,000 francs winner. Talking abut this at the Burnett one evening afer dinner, with a glass of claret before he and the loose comforts of a bear traveling suit about him, he said:

"Well, my dear, they have elected you president of the women's equal rights club. You're Mrs. President, of course. That will be your title now. What will [he?" Wife—"You'll be the same little and the loose comforts of a bear traveling suit about him, he said:

"Mrs. Hobbs (parent of an infant ter-

"Good heavens! that is Millicent's breathes the gaming spirit. A 1,000 "Well, Mr. Hobbs, since you are so dissoice, exactly," thought Stephen; "what franc note becomes nothing. A lever is satisfied with the way I am raising our still could be a second with the way I am raising our still be a second with the way I am raising our still be a second with the way I am raising our still be a second with the way I am raising our still be a second with the way I am raising our still be a second with the way I am raising our still be a second with the way I am raising our still be a second upon every body. Great wimnings are darling Willie, maybe you will condeof hourly occcurrence, and nothing but the gaming table is discussed. Men stake boys." Hobbs—"Certainly, every boy their fortunes and win and lose them name is she doing?" and Stephen tried again within a few days. You breathe screened from him by the man between stake. Soon after I arrived at Nice I became infected. Success there and at Monte Carlo flushed me. grew daring.

I cared nothing for mone; nean Club at Nice. Prince Arem Bey, a cousin of the present Khedive of Egypt, came in, and speaking of my singing in 'Lohengrin, proposed a game baccarat. He was then living at Paris with 10,000,000 francs a year and a mountain of debts. He was a heavy

And then he proposed 50,000 francs as a oath, that this man had the appearance limit. That is only one bet, said I, of a gentleman. Will you be good with the memory of my Monte Carlo luck to spur me on. He asked 100,000 francs credit of the cashier and obtained We sat down to play. An old friend of mine from Vienna held my cards for me. I instructed him to throw the little pencil, attached to the betting card, into the center of the table where the bets are placed.

What does this mean?' said the "'That represents 50,000 francs,' said I, and at the same time I obtained of

the cashier credit for 250,000 francs for " 'The cards were turned. My friend held the necessary nine and won. I

for the second bet.
"What does the pencil now represent? inquired the Prince. "Let us say 50,000 francs," said I. "This made my bet 100,000 francs The Prince again played, and again I won. I was now 150,000 francs, or \$30,-000 ahead of the game. There was exactly that amount in the chips which

I had won with my pencil. I again put it upon the stack. "'What is the pencil worth now?"

demanded my opponent. "'One hundred thousand francs,' I answered, with the calmness and assumed indifference which my luck brought me. The Prince rose. He in sufficient quantities, after midnight The Prince rose. He brought me. ouldn't stand it. I went over and took and before dawn, to give employment to his place. That is, I was betting my 250,000 francs on the Prince's hand. I turned over the cards which he had abandoned. I was again winner. If he abandoned. I was again winner. If he had had the nerve he would have won dealer who does a large trade in coffee it all instead of allowing me to win. and cakes. "Printers and those who

"During those sixteen days I broke one of the tables of 'rouge et noir' at Monte Carlo. I backed the red to win cakes are healthier for men who must nine times in succession, and at the last turn the bank closed, while I walked work as soon as they have cleared their away with 500,000 francs. O, yes, those plates and emptied their cups; and I try sixteen days were wonderful. The Russians who were winning there thought and sinkers used to be the name by I was a supernatural being.'

"And did you ever lose?" The chevalier sighed and looked! nournful for a moment. Then he said: "But who cares to hear of those who ose in the game?"-CincinnatiCommer-

LEADEN BUTTER CAKES The Mainstay of the Cellar Restaurants in

Our Large Cities "Coffee and cakes," ordered a custome in an east side restaurant of small preplaced the pencil on the stack of the cakes are wet, ain't they?" he added in

"Yes, all wet," replied the waiter. The cakes were served, and it was apparent that the term "wet" applied to them was not used literally, but merely to distinguish them from another sort known as "dry." They were saturated with lard, or grease of some sort, called butter for the purposes of trade. "dry" cakes have no butter on them when served, and the customer has to supply that deficiency from a plate on the table. Both are styled butter cakes,

It all instead of allowing me to win.

This gave me 400,000 francs, \$\$0,000 in three plays. The pencil had been my feed upon them in preference to taking three plays. The pencil had been my leed upon them in process three plays. The pencil had been my heavy meals at unseasonable times. I prefer a sirloin steak, first, last and all the time, myself, but I believe that the to make them good and light. Coffee which the basement supper was commenly known. The sinkers were butter cakes, made so heavy that a fishing line might have been weighed down with one of them. They were, indeed, very filling at their price, and a few of them went a long way with a hungry man. They owed their apparently substantial qualities to the fact that they contained

no yeast. They were pure dough, and used in their manufacture, they are fairly profitable to every one who han-

## Warch April May

Are the best months in which to purify your blood. During the long, cold winter, the blood becomes thin and impure, the body becomes weak and tired, the appetite may be lost, and just now the system craves the aid of a reliable medicine. Hood's Sarsaparilla is peculiarly adapted to purify and enrich the blood, to create a good appetite and to overcome that tired feeling. It increases in popularity every year, for it is the ideal's oring medicine.

"My health was very poor last spring and seeing an advertisement of Hood's Sarsaparilla I thought I would try it. It has worked wonders for me as it has built my system up. I have taken four bottles and on the fifth. I recommend it to my acquaintances." John Mattreews, Oswego, N. Y.

## Hood's Sarsaparilla

Sold by all druggists. \$1; six for \$5. Prepared only

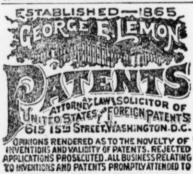

100 Doses One Dollar

VASELINE PREPARATIONS. On receipt of price in postage stamps we will send ree by mail the following valuable articles: One Box of Pure Vaseline.... 10 Cents. One Box of Vaseline Camphor Ice, 10 Cts. One Box of Vaseline Cold Cream. 15 Cts. One Cake of Vaseline Soap.....10 Cents. One Bottle of Pomade Vaseline, 15 Cents. One Doutie of Foliade vaseline, 10 Cents.

If you have occasion to use "Vaseline" in any form be careful to accept only genuine goods put up by us in original packages. A great many druggists are trying to persuade buyors to take Vaseline Preparations put up by them. Never yield to such persuasion, as the article is an imitation without value and will not do good nor give you the result you expect. A two onnee bottle of Blue Seal Vaseline is sold by all druggists at ten cents. No Vassilue is genuiue unless our name is on the label.

Edward H. Sincell vs. Olivia. M. C. Fowler, James B. Fowler and Wilson W. Fowler,

No. 499 Equity. In the Circuit Court for Gerrett County in Equity.

The object of this suit is to procure a decree vacating and annulling the following deeds; Samuel Selby, 3d, James and Thomas Cook to Wm. D. Rogers, recorded in Liber 35 follo 567 of the Land Records of Aliegany county—Wm. D. Rogers to Morgan N. Garland; Morgan N. Garland to Ofivia M. C. Larkin; Olivia M. C. Fowler and S. L. Fowler to Jas. B. Fowler; James B. Fowler to Whom W. Fowler, recorded respectively in Liber 35-2 follo 73. No. 2 follo 76. No. 14 follo 730 and No. 14 follo 733 of the Land Records of Garrett county. The bill states the plantiff has title to a tract of land in Garrett county. Md., called "Recourse" or "Resurvey on Recourse," and that the above mentioned deeds purport and pretend to convey said land to the defendants, and are a cloud upon the plaintiff title and are false, fraudulent and pretended deeds, and prays for a decree vacating and annulling the same.

It is thereupon this 5th day of March, 183, ordered by the Circuit Court for Garrett county by the circuit Court for Garrett

THE MONUMENT TO GEN. GRANT. tions. Tickets should always be pro THE WEEKLY MAIL & EXPRESS.

YOU CAN SUBSCRIBE TO BOTH AT ONCE | cents.

HOW IS THIS? YOU ASK.

WE WILL EXPLAIN

The weekly Mail and Express has agreed with the Grant Monument Association that the entire revenue of the paper from yearly subscriptions of two dollars each will be turned over to the Fund for the erection of a NATIONAL MONUMENT to G-neral Ulysses S. Grant at Riverside Park. New York City. In other words, if you send Two Dollars to the Weekly Mail and Express you will receive the paper for a year and your money will be paid over to the Grant Monument Fund. You will thus receive a full equivalent for your money in a first class weekly new-paper and at the same time you will be helping to forward a nobleand worthy cause. The Weekly Mail and Express has further evidenced its earnestness and sincerity in this work by subscribing TEN THOUSAND DOLLARS to the Monument Fund.

The following letters are self explanatory LETTER FROM EX-GOVERNOR CORNELL. NEW YORK, Nov. 28, 1889.

NEW YORK, NOV. 28, 1889.

Proprietor of the MAIL and EXPRESS:

It gives me pleasure to assure you that the members of the Grant Monument Association appreciate, approve and accept your generous offer to aid, through the medium of the Weekly Mail and Express, in the erection of the grand memorial at Riverside Park in honor of the illustrious solder and patriot, Ulysses S. Grant.

ALONDO B. CORNELL. Chairman Executive Committee of the Grant Monument Association. LETTER FROM MRS. GRANT.

NEW YORK, Nov. 28, 1889.

The arrangements made between the Weekly Mull and Express and the Grant Monument Association meets my hearty approval. The offer of the Weekly Mail and Express is partiolic, and should it be responded to promptly by the citizens of America the monument will speedily be built at the very site suggested by my husband, and selected by me as the last resting place of his precious remains, the spot where I hope my remains will be beside his, and where our children unite with me saying, "Here only shall be his tomb."

Julia Dent Grant. NEW YORK, Nov. 28, 1889. JULIA DENT GRANT.
ANOTHER LETTER FROM GOV. CORNELL.

GRANT MONUMENT ASSOCIATION, NEW YORK, Dec. 18, 1889. New York, Dec. 18, 1889.

DEAR SIR—It gives me profound satisfaction to ack nowledge receipt of your esteemed layor of this date inclosing check from the Week.y Mail and Express for TAN THOUSAND DOLLARS, payable to the order of the Grant Monument Association, as a contribution toward the erection of the Grant memorial at the Riverside Park, in the city of New Yor.

Such a contribution coming at this time, is doubly valuable. It will stimulate the renewed efforts recently entered upon to complete the Fund necessary to construct what we confidently believe will be the grandest personal memorial in Christendom. Faithfully and cordiality yours. personal memorial in Christendom. Faits fully and cordially yours. Alonzo B. Cornett, Chairman Executive Committee.

To Col. Elliott F, Shepard. Will you not help in this work by subscrib-ing at least Two Dollars to the Grant Monu-ment Fund?

The Processes Through Which It Passes The introduction of cinchona into European Pharmacopæia is of comparatively recent date. The story runs that the Countess of Cinchon, vice-Queen of Peru, was low down with a lingering feeer, and that native physicians pre scribed a certain bark that grew in the neighborhood for the fair patient. The Countess recovered, and never ceased to praise the wonderful bark to which she gave fame and a name. This was about 1637-8. But properties of cinchona as a tonic and a febrifuge were not generally known in Europe until the latter

part of the seventeenth century.

For considerably more than a hundred years, the people of Europe were wholly at the mercy of one or two South American States for their supply of cinchona. gland. These boats are thought to be I say "at the mercy," because the quantity and price of quinine was practically regulated by the action of these erration States. Peru, Bolivia and Ecuador were wrangling or fighting with one another most of the time for a long series of seemed to ball itself. Every body vas filled with intense surprise. Was he mad? Had his troubles dethroned his 'Rritish Isles, but is supposed to have reason? He stepped back a step. "I been introduced from Eastern Europe country. The price of quinine would dollars a pound within a fortnight. Besides these petty States monopolized the

The Dutch were the first to break the South American monopoly of the cinchona trade. They found that the tree would grow in the East India Islands. They bore him from the room. The went. There are also hoopers, or wild number of trials they found also that the tree would flourish in northern India. All these different experiments showed that it was easy to grow the cinchona tree, but it also proved that it was no to be the case with the swan, as M. easy to grow the right kind of bark. It Baillon, King's Counselor and bailiff of is surprising how barks of the same species vary in their medicinal proper

"The abundance and the choice of food | ties. The barks look so much alike that often chemical analysis is required to tell their medicinal values. Some barks gance; it has preserved the same graces | yield as high as thirteen per cent. of and the same freedom in all its motions; alkaloids, while others show hardly a its majestic port is ever admired. I trace of them. Generally speaking, the doubt even whether all these qualities are found to equal extent in the wild amount of alkaloid yielded. Quinine is bird." At Abbotsbury, however, the the most constant and most abundant swans are not fed; they find ample pro- constituent. The alkaloid known as usion for themselves in the algae and quinidine is the rarest. The preparation ther marsh plants which grow on the used in medicine is the alkaloid quinine in the form of a sulphate.

The species known as C. Calisaya consvan moves in what we may call his native element are delightful. On land grows in the thick, rank, tropical forests he has been coupled with the dis- of Bolivia and South Peru, where it is ed with much labor and difficul by the natives. There are two varieties of calisaya-one is a small, shrub-like growth; the other is a large, tall tree. The last variety is said to be the best.

The season for gathering the bark begins in August and lasts till October or November, according to the weather. After the bark is stripped from the tree. it has to be thoroughly dried. Then it is packed in ceroons of moistened cow of these bales are stamped or branded with the dealer's name or trade mark It is said that certain brands have ac quired considerable reputation in the trade, and any bark in the bales so marked can be relied on. It is also said that there is a good deal of sharp practice in the cinchona bark trade, as in ferior or worthless barks are sometimes skillfully mixed with good barks and sometimes branded with a good trade mark. Hence, I am told that all imports of bark, brand or no brand, name or no name, are analyzed before they are accepted. The quinine trade abroad and in the United States is practically in the hands of a monopoly or a combination. The great factory for preparing cinchona bark for medicinal purposes is located

#### in Mannheim, Germany.—L. J. Vance, in Once a Week. PERSIAN CIVILIZATION.

False Impressions Entertertained by Europeans and / mericans. I have been much surprised to hear even well-educated Englishmen, in re cent discussions on Persia, speak of the Persian nation as if it were completely wanting in civilization and were age behind Europe in manners, customs and ideas. Such a false impression of the characteristics and social condition of our good friends, the neighbors of our Indian Empire, is, I think, due to ignorance, and, I fear, also to insular preju-Persia has not progressed as Europe has done, but Persian civilization and Persian art had reached a high degree of development when England was covered with tangled forests and its inhabitants were half-clothed savages whose highest skill was shown in the slaughter of wild animals with the rudest of weapons. Persian civilization has not retrograded, though Persian art is certainly stifled by the introduction of cheap but inartistic articles from the commercial West. In Persia a polite etiquette is asstrictly observed as in any country in the world, and though in some trifles, the manners of a Persian gentleman may appear strange and even amusing when observed in the West, it is safe to say that nothing which a Persian gentleman would be likely to do when mixing in Western society would in any way shock the delicate feelings of that society. In this respect it is fortunate that the recent journey ings of the Shah and his suite were sufficiently extended to give a practical and widespread contradiction to the numerous absurd stories which had been current concerning the disagreeable culiarities of Persian manners and cus-

As regards habits of personal manliness, on which Englishmen so greatly oride themselves, it may astonish many of my readers to learn that the Persians, with considerable reason, consider them selves far superior to any Westerns in this respect. I will only mention, as an instance, that the Persian considers that to remain sitting in a small bath and to commence and complete ablu-tions in the same water is far from a cleanly habit, and it is one which is never practiced in the heated baths which the natives frequent with such pleasure in Persia, and which he greatly misses when traveling in the West.-

SCIENCE AND INDUSTRY. -Brick is generally regarded as the best building material. And its ornamental capacity is fully equal to its durability.

he has discovered a cure for diphtheria. He says the disease is easily cured by inoculating erysipelas. -Chemical analysis is said to establish it as a fact that four and one-half pounds

-A Russian physician announces that

of potatoes are approximately equivalent to one poundof rice. -A French scientist, who has been studying the hands of manual laborers,

finds that very marked physical peculiarities are engendered by the pursuit of different occupations. -The application of hydraulic power to the manufacture of steel seamless boats is one of the latest things in En-

in every particular superior to those made of wood, and can be made at about the same cost. -The pack of California canned peaches in 1888 consisted of 363,476 cases, twenty-four cans to the case. This was about onethird the total pack of table fruits. In twelve years the total annual fruit pack has grown from

270,000 cases to 1,200,000 cases. -The international display of scientific progress to be made this year include the Electrical and Industrial Exhibition at Edinburgh and the Exhibi-tion of Botany and Microscopy at Ant-werp. At the latter will be celebrated

the tercentenary of the compound micro--It is confidently predicted that the present high price of maple sugar will never be lower, owing to the rapid decrease in the area of maple orchards. The variety made from hickory sap and brown sugar will prolong the supply, however, for those who are not well ac-

quainted with the genuine article. -The belief that smoke from soft coal may have beneficial sanitary effects, is gaining ground. It is claimed that the sulphur in the coal when burned becomes sulphurous acid, then a well known disinfectant. Further, that creosote and its allied products are thrown off with the fumes of bituminous coal, and that an atmosphere charged with carbolic acid must be freer from germs of the disease than an apparently purer one.

-Another new fiber-producing plant, which is looked upon by its discoverer as to become a rival of those now in use, has been discovered, but we have not yet heard of any of the large cotton fields being abandoned. These new fibers are mostly of a coarser grain, and not adapted to the production of the finer grades of goods. They are valuable, however, as they open up new fields for industry and enterprise, and their introduction into the textile industry will no doubt result beneficially prove to be what is claimed for them.

-- An examination of the textiles from the German peat-finds of the northern bronze period has enabled Herr Buschan to distinguish the fibers of the stuff, and to show that at a period of great remoteness wool and flax, but not hemp, were made into webs. The folk of the lake dwellings could manufacture flax into coarse lace nets, mats and even embroidery. Herr Buschan holds it proved by the instruments discovered that they could knit and weave to the Neolithic period, when mighty mammoths were roaming over Europe and when England harbored the musk ox and grizzly

#### A CONDUCTOR'S HEART. It Was of Stone and Not Even Threats

Could Move It. When a certain conductor on a Michigan Central train got down to the depot he other morning for his run he found stranger awaiting him, who asked him if he was so and so, and added:

"Four weeks ago I left Ypsilanti to come to Detroit. When you came around for my ticket I couldn't find it. Do you remember?" "Yes, I believe I do."

"You said I must produce the ticket or pay cash."

"I had no eash. I told you I had changed coats and forgotten my wallet."

"You didn't believe me." "No." "You looked upon me as one trying to

dead-beat his way." "Yes." "But you stopped the train and put me off five miles from a town.' "Yes.

"I protested and assured and asserted.

but your obdurate heart refused to melt." "Exactly." "Well, sir; I have come twenty miles to prove to you that I am no dead-beat. Here is the ticket I had at that time. See the date. I had put it in the wrong

pocket."
"Well." "Well, I want to sue the railroad for damages. I want \$60,000. Can you direct me to the proper official?"

"Certainly. Right through that door up stairs-turn to the left-fifth door down. Knock before you enter. aboard for Ann Arbor, Jackson, Niles and Chicago."- Detroit Free Press.

The Original Grand Old Man. "The Grand Old Man" is a phrase that is popularly supposed to belong to Mr. W. E. Gladstone, and to have been invented to especially distinguish him. This is not the case. In a speech "t'owd Vicar" of Leeds, the late Dr. Hook made at Manchester about thirty years ago, the reverend gentleman used the phrase in reference to the composer Handel. He was addressing a workinging-class gathering at a popular concert, and here is the sentence in which the phrase occurred: "I dare not allude to the sacred oratorio, "The Messiah." as merely an entertainment and an amusement, for I remember that when the oratorio was first produced in London, and Handel was congratulated on having 'entertained' the town for a whole week, the grand old man in his usual outspoken manner, said: 'I did not wish to entertain the town; I wished to do it good.'" There you have at once an interesting anecdote and the precursor of the most famous sobriquet of modern times. - Notes and Queries.

#### TEMPERANCE NOTES.

#### HERE'S A LADDIE

Here's a laddle, bright and fair,
And his heart is free from care;
Will he ever, do you think,
Learn to smake, and chew, and drink?
Make a furnace of his throat,
And a "chimney of his nose,"
In his pecket not a great. Elbows out and ragged toes?

Here's a laddie, full of glee, And his step is light and free; Will be ever, do you think, Mad with thirst, and crazed with drink, Stagger wildly down the street; Wallow in the mire and sleet; Hug the lamp-post, and decla Snakes are writhing in his hair?

Not an ill this laddie knows And his breach is like the rose; Will he ever, do you think, Poisoned by the cursed drink, Fever burning in his veins, Soul and body racked with pains, Sink into a drunkard's grave, Few to pity—none to save?

No: this laddie honor bright. Swears to love the true and right, Keep his body pure and sweet, For an angel's dwelling meet; Never, never will he sup Horrors from the drunkard's cup; Never in the "flowing bowl" Will he drown his angel-soul, —Julia M. Thayer, in Temperance Journal.

#### SMALL DOSES OF ALCOHOL. Experiments Which Show Conclusively It

Retards the Action of the Brain. "Half a pint of beer can't do anybody any harm." This is regarded as a selfevident truth by non-abstainers. Half a pint of beer, or a glass of wine, or a couple of tablespoonfuls of spirits, all containing about half an ounce of absolute alcohol, are considered such extremely moderate quantities of these beverages that it seems absurd to suppose that any injury can result from so small a dose. The fact that so many the human race have taken these drinks were all performed after sufficient skill and pronounced them good is consid-3red by many (even by some who might have been expected to reason better) conclusive proof that they must do good rather than harm. How is this to be settled? Is the declaration of the beer, wine and spirit drinker that he feels all the better for his glass sufficient proof? Is the common custom of millions enough to prove that the drinking of alcohol is beneficial either to the in-dividual or to the race? If it be, then the similar declaration of the opiumsmoker and the victim of every other tion of the action of the alcohol, and narcotic, who all cherish the profound roughly indicates the comparative conviction that their particular drug is amount of injury done. The influence both necessary and beneficial to them, of one drachm is decisively indicated, must be accepted as equally conclusive. and I found two drachms quite enough And so must the widely-spread and ex- to produce transient giddiness. tion was tested in a similar way, but in this case there were two flags, red and blue, and the signal was only to be given when the flag was shown which No Hope for Smithers—He's Tohad been previously agreed on. The time taken up in considering this point prolonged the interval, and the difference by which this exceeded the time in the previous experiment indicated the time consumed in this process.

(c) The time required for decision was arrived at by having to give a different signal for the red and blue flags repectively. Hence the person had not rly to distinguish them, but to decide which key to press.

Several drugs were experimented on, out I wish to call special attention to the fact that alcohol prolonged all these speriods. It took longer both to signal, to discriminate and to decide; in fact, all these mental processes were slower after taking it. This is entirely in accordance with previous observations, and there can be no doubt whatever that the role of alcohol is that of a narcotic. But there is one most significant as many as twelve cigars a day and as remark which I quote from Dr. Brunton. He says: "The influence of alcohol upon physical processes is curious; for while t renders them much slower, the individual under its influence believes them to be much quicker than usual."

As a corroboration of this narcotic ction of alcohol, I have made several experiments, chiefly on myself. These consisted in endeavoring to pass a pointed stick through a swinging ring, counting the number of swings between each successful endeavor and adding these together when sixty had been accomplished. A certain dose of pure rectifled spirit was then taken, and after fifteen minutes the number of swings required to accomplish sixty more swings was counted. I append the result of the experiments made on myself, because I can guarrantee their bona millions and so many generations of fide performance and accuracy, and they

MISCELLANEOUS.

-In Colorado in case of debt the law allows forty-five per cent. of a man' wages till the bill is paid. -One orange grower of San Diego keeps trees from being plucked of ripe fruit by putting up placards: "These oranges have been poisoned."

-The Ridgewater (Pa.) physician says that olive oil is an antidote for rattlesnake poison. Half a dozen tablespoonfuls are sufficient, he declares, to cure any case of snake bite. -It is said that nearly all the postal

elerks and carriers who become thieves begin bystealing letters addressed to lottery agents, which they know are almost sure to contain money. -A Dodge City (Kan.) dentist who had

ade a set of teeth for a lady who had ailed to pay for them, took them out of her mouth in a crowded store in that place. In an hour or two the molars were paid for and returned to the woman. -It is a curious fact that lumber is transported in large quantities from New York to Para, Brazil, although the vast forests of that country contain no fewer than sixty-seven varieties of the most valuable building woods in the

world. It is a clear case of "carrying coals to Newcastle.' -A Petaluma (Cal.) merchant found in his papers recently a note of hand given him in January, 1860. The face of it called for \$200, with three per cent. a month interest compounded monthly if not paid. He got a number of sharp accountants to figure up the present value of the note with interest. The result

was startling—\$8,997,337.90. -The application of a caveat to stop a marriage is something new. It is stated that a member of the Maryland Legisature had contracted a marriage with a lady, and journeyed to the county seat to procure a license, when he made the painful discovery that his rival had filed a caveat against the issue, and before he can get it the case will have to be argued. The wedding day has been postponed, but the man is a fighter and won't give up easily.

-"People who endorse others for positions say very strange things once in a while," remarked a western Senator. "I received papers the other day urging the nomination of a constituent of mine as a chaplain in the army, and one of the documents, after saying a number of nice things about the candidate, and detailing his long service as a minister of the Gospel, wound up with the emphatic remark: 'He is a man of good moral How character.' 'How's that." - Washington

Star. nd nart agreeing to feed and clothe and give the boy a good common school education. There was some discussion as to the question under what head the paper should be filed, some claiming it was lease, but it was finally concluded that as the boy was a movable property the chattel mortgage head was the proper

-Among the most oppressive monopo lies of the present day are the express companies. English post-offices do the bulk of the express business. The average cost of sending parcels throughout Great Britain is eleven cents. It costs \$1.50 to send a suit of clothes cross our continent. It is to be hoped the United States will encourage the adoption of the parcels post system in this country. Now American express companies do a great part of the business which properly belongs to our Postoffice Department, and charge outrageously for it. The people demand cheaper service.-Boston Budget.

SOME BIG BRIDGES.

Engineering Feats That the Ancients Would Have Thought Impossible. The inventors of phrases have much exercised their ingenuity of late in coining a proper title for the present age, and to the list of labels already made there may surely be added that of the Age of Big Bridges. The Brooklyn oridge led the way, then came that cross the Firth of Forth, next the project to join the shores of the English channel, and now congress has been asked to grant a company of engineers and capitalists the right to span the Hudson from New York to New Jersey.

It is claimed that this will be the biggest bridge in the world, the engineering standard being the length of span and not the length of the whole structure. Thus, while the English channel is twenty miles wide at the point to be bridged, the longest span of the contemplated great link between England and France is to be but 1,700 feet, while the span of the North river bridge is to be 2.850 feet. A better idea of the boldness of this enormous leap may be gathered from the fact, in comparison, that the river span of the Brooklyn bridge is 1,495 feet, while that at Niagara is but 1,268 feet. The height of this giant span from the river is to be 150 feet, or fifteen feet higher than the Brooklyn. This will leave the river practically un-

The dispatch does not say so in so many words, but there is very fair internal evidence that the bridge is to be of the suspension order of construction -the most graceful form of all bridges. It is to be built of steel and steel wire, materials now so much cheaper than they were at the time the Brooklyn bridge was built that the probability is that the airpassage over the North river will be completed at no greater if not at a less cost (\$8,000,000) than was that over Mrs. Flyabout (with a sigh)-Yes, I the East river. One important factor in this probability is the fact that the New York-New Jersey bridge is to be open for traffic in seven years from the date of franchise, while fifteen years elapsed before the New York-Brooklyn bridge was completed.

The enterprise is undoubtedly a good commercial one, as the success of the Brooklyn bridge has proved; and parhaps by the time the Jersey bridg s in good running order the spirit of boldness may have made its way so far West that we may begin to seriously ascuss t'e feasibility of a similar con nection between San Francisco and Oak and, -- San Francisco Chronicle,

TRAINING IN USEFULNESS.

How to Develop the Thinking and Reasons ing Powers in Children. How quickly children learn who is ust, and firm, and exact with them! and ow they pour out their love more upon those who act thus than upon the over indulgent and weak ones who pet and caress, and then feel compelled to punish! From two to five the temper and affections develop quicker than the reasoning powers; but constant firmness vill subdue and regulate the most passionate of children, without resort to corporal punishment, if it be but exerised steadily. It is at this age that a child's training for after life more seriously begins; not in book learning, but in little actions of utility; of little household matters, and little offices that teach a child that it can be of use in the world. Proudly a little one of four or five will talk of "my work," if it be given some little task that its tender years can manage-some help to mother, or nurse, or servants, done well and carefully; and such small tasks lay the foundation for a son or daughter that shall be useful to the world they live in. The day is almost past when handiwork is considered derogatory to any one. Is a man less a man if he can clean his poots better than his servant? Even at the tender age of four or five, a little task of usefulness within its power will make a prattling little one proud and happy, and more satisfied than the tear-

ing to pieces of twenty toys. It is from the age of five that the seribusness of life begins with a child. Lessons (call them not tasks) have to be learned, and work, "Heaven's noblest gift," performed. But here this very seriousness should be made the joyousness of an occupied life; each characteristic of the child developed and not crushed. Well has Goethe put it when he sees in "self-will" future firmness and resolution; and yet, how many parents and teachers try to crush out self-will as an evil thing, instead of directing it into self-reliance and firmness and resolution! Temper, too, is crushed; whereas, if guided it may mean immense power of purpose; unguided, it does mean awful misery and

untold grief. Lessons to most children are a pleasure; it is the teaching and the school that are irksome, and some times hateful. All children are proud of knowledge, and will not mind the trouble if they but see the end and aim of their

How early a little child's thinking and reasoning powers are made use of by itself was aptly illustrated the other day -Among the transfers filed in the rec- by a mite of four, on hearing of the Gerord office at Washington, recently, was man Emperor's death, asking, "And now one of Agnes Holtz, transferring to he's gone to heaven, isn't he, mamma? And will he know little baby?" explanation, "And will little baby understand him?" Such thinking and reasoning powers can be developed delicately and gently, even in children thus young; but in most of our schools they are crushed out by a child's being set to learn tasks of inexplicable grammar from not-to-be understood primers.

Because an exceptional child shows power to understand grammar and mathmatics we must have a system for all children on his mental plane.-Phrenological Journal.

#### HOLMES AT EIGHTY. How the Autocrat of the Breakfast Table Takes Care of Himself.

Oliver Wendell Holmes thinks that he owes his good health and the retention of his mental vigor in his eighty-first year to the extreme care he has long taken of himself. Never robust, he was still wiry in his earlier and maturer life, but since he reached seventy his hygienic vigilance is unceasing. The rooms that he daily occupies are equipped with barometers, thermomters, aerometers-every kind of instrunent, in short, to prevent his incurring the slightest risk of taking cold. He knows that pneumonia is the most formidable foe of old age, and he is determined to keep it at a distance, if possible. He never gets up until he knows the exact temperature, during winter, or takes his bath without having the water accurately tested. He lives by rule, and the rule is inflexible. His time is scrupulously divided-so much allotted to reading, so much to writing, so much to exercise, so much to recreation. His meals are studies of prudence and digestion. He understands the specific qualities of ordinary foods and never departs from the severest discretion in eating. One might think that it would be a serious infliction to keep up existence by such precise, unvarying methods. But the little doctor enjoys them, having settled firmly into these habits years ago. Philosophic as he is about death, he has an eager curiosity to see how long he can live by following the laws he has vigorously prescribed for himself. He has long had vigorous theories on the subject of health and longevity, and he relishes experimenting upon himself. He thinks sometimes that he may attain one hundred, which he would dearly like, it he could retain, as he has retained thus far, the full possession of all his faculties.-Commercial Advertiser.

Gay Funerals in Cuba. So gaudy was the first funeral procession that I witnessed on the island that I actually mistook it for the Cuban way of advertising a circus. It consisted of a highly enameled black chariot, ornamented on top with tall, waving black and gold plumes. The charioteer wore a long plume in his hat, a scarlet jacket elaborately embroidered with gold ord and trimmed with gold lace and a double row of gilt buttons. The trappings of the horses were black and gilt, and two men, wearing gorgeous uniforms, walked on either side of the leading horses, holding long black reins. This was followed by a line of carriages extending the length of five blocks. In ach carriage were seated one or two gentlemen. Some were talking, all were smoking.-Drake's Magazine.

-There died in New York City the other day a man who commanded \$200,-00,000. But he didn't take a cent with im. Shrouds have no pockets,-Elmira Telegram.

#### SATURDAY, MARCH 29, 1890.

A bill was introduced in the Unita pension of \$2,000 a year to the widow of General Crook.

#### General Crook's Successor.

New York Sun's Washington special: While there are five other possible candidates for General Crook's vacancy besides General Miles, in the five other brigdier generals, practically there are only two to be considered. These are Gen. Dayid S. Stanley and Gen. John Gibson, the second and third respectively in the grade. The argument urged for passing ed at General Crook's bedside only his son, Webb Hares, came on lo feated in the Senate, and no one was them, or rather one of the two, over the head of their senior, is that they are soon to be retired for age. The three junior brigadier generals Gen. Thomas H. Ruger, Gen. Wesley Merritt, and Gen, John R, Brooke, are much younger men, and by retirements hereafter to take place will articulo mortis when I arrived, and ed the funeral in force. Oakland Post. the Republican members are in favor have opportunities for promotion, so died without rallying. It appeared No 35, G. A. R., accompanied by of a service pension. Several of the that this consideration does not apply to them.

For months past the Free-Traders have been telling us and our farmers stomachic complications." that they have not been having sufprofits accruing from a high tariff, whatever. Well, we are always glad friends, and being convinced that our agricultural interests have lacked sufficient protection to certain products the framers of the new Tariff bill have increased the duty on some and put a duty on others before on the free list. But our Free-Trade been made by Mr. D. E. Offutt, of home. . friends are no more satisfied than before. They cry now that the necessaries of life are to be taxed, &c. Truly, the Cobdenites and the Clevejandites are hard to please. Nothing but complete stagnation of our industries and ruination of farm, factory and fire-side would seem to bring joy and gladness to the advocates of British Free-Trade.

## Death of Gen. Crook.

Written for THE REPUBLICAN. MY PET GOLDFINCH.

Beautiful bird of my native land. Beautiful work of God's own hand, Thy tuneful strains and happy lays emind me of my youthful days,

When through the meadows green I strayed And with my young companions played, Sang from the highest bush or tree;

The blackbird's notes, so sweet to hear, Rose on the air both loud and clear. The little linnet, sprightly bird, Among the feathered choir was heard: His flute-like notes, so full of glee,

Enriched the varied melody. The lark, "that soars on highest wing," Among the clouds was heard to sing; As if he'd reached the gates of heaven, -Offur will buy white oak Where praise to God in song is given.

> But my little pet from over the sea, Is more than any of these to me; Though in a narrow dwelling pent, To sing for me he seems content Reantiful bird from over the sea. A lesson may I learn from thee; Where'er I am to be content, White for my God my life is spent,

OAKLAND, Mp., March 25, 1890. ED. REPUBLICAN: - On Sunday evening a number of our people listened to a sound, plain talk from Rev. J. M. Davis, directed to the boys and young men. It has occurred to me that with equal propriety the girls and young ladies might have been included, and the subject more elaborately treated. Especially am I impressed with this idea since Monday last, when so many people of Oakland, the surrounding country -Latest styles, newest patterns, and stranges congregated here to pay whom the whole country honored. Not only before the arrival of the funeral train, but while the face of the dead hero was uncovered that people might look their last upon him, a number of girls and young ladies rendered themselves conspicuous by their loud talking and boisterous laughter, distinctly audible -Corn at the Mill 44c per long above the noise of hundreds of

> steaming of the engine. The loud considered, and at such a time. I regret that my criticism cannot

end right here. After reaching levity and frivolity continued and it did seem as if they desired to "pile -Examine our well-selected stock Pelion upon Ossa." Before the quisite floral offerings were ruthlessly and wantonly despoiled of choice buds, flowers and palms-and shall we write it-used for personal decoration! O tempora! O mores!

If this line of conduct proceeded from thoughtlessness, (I am sure it was not from ignorance of the procharity about it, and hope that the OBSERVER.

## Last Excursion to Washington.

## ORDER NISI.

Annie M. Ward, by her husband and next friend George W. Ward, Piaintiff, vs., George W. Ward and others, Defendants, No. 436 Equity. In the Circuit Court for Garrett County.

ORDERED, This 25th day of March, in the year eighteen hundred and ninety, by the Circuit Court for Garrett County, sitting rary thereof be shown on or before the day of April, 1899; provided a copy of order be published in some newspaper ished in Oakland, Maryland, once in of three successive weeks before the 18th lay of April, 1890.

True Copy-Test: E. Z. Tower, Clerk.

Order of Publication.

The object of this suit is to procure a decree vacating and annuiling the following deeds: Samuel Selby, 3d, James and Thomas Cook to Wm. D. Rogers, recorded in Liber 33 follo 617 of the Land Records of Allegany county—Wm. D. Rogers to Morgan N. Garland; Morgan N. Garland to Olivia M. C. Larkin; Olivia M. C. Fowler and S. L. Fowler to Jas. B. Fowler; James B. Fowler to Wilson W. Fowler; James B. Fowler to Jas and No. 14 folio 733 of the Land Records of Garrett county. The bill states the plaintiff has title to a tract of land in Garrett county, Md., called "Recourse" or Resurvey on Recourse," and that the above mentioned deeds purport and pretend to convey said land to the defendants, and are a cloud upon the plaintiff's title and are false, fraudulent and pretended deeds, and prays for a decree vacating and annulling the same.

It is thereupon this 5th day of March, 1889, ordered by the Circuit Court for Garrett county in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in Garrett county, Md., once in each of four successive weeks before the lith day of April, 1880, give notice to said absent defendants of the object and substance of this bill, and warning them to appear in this Court on or before the 28th day of April The object of this suit is to procure a decree

ubsent defendants of the object and substance of this bill, and warning them to appear in inis Court on or before the 28th day of April next, to show cause, if any they have, why a fecree ought not to pass as prayed.

## A HAPPY APRIL FOOL.

Why Philip Keith Thinks It a Pretty Good Sort of a Day.

"Well," said Philip, "do not punch from yours. Here I was writing these gether, for Miss Mary, Lewis' cousin-

on the table. table. The two men were in one of the writing-rooms of the Union League Club, and the hour was, perhaps, five good-bye. or a little after. The sunlight was still bright on Fifth avenue, and the ceaseless roll of passing carriages was heard. It was just the glorious day and hour when fashion was abroad, and something of D. Harrington Lee's feelings might be surmised as he drew from his pocket a ragged scarlet object and exhibited it to his friend, saying: "Would you love the First of April if you had walked up Fifth avenue with

that pinned to your coat-tail?" Philip shouted as loudly as any member is ever allowed to shout in the reading-room of the club, his mirth, doubtless, modified by his sense of the surroundings, not from any lack of humor in the cause. There in his hand was a bit of flannel, from which dangled many long ends of the same material.

"A crab, I think," he said, after a moment's examination-"one with the meat picked out. Where did you catch "Catch it? Somebody will eatch it-

there will be a lively racket if I ever having a ride into Westchester before passed on; I had seen enough of the min tended almost entirely by his mother find out who has played this joke on him that afternoon, and begged me to I had been anxious to call upon. me. Jay and Leonard were in the office go with him. I shouted at the idea, when I left, and they would, of course, have taken it off if any of the office went home to dinner. boys had pinned it on."
"Unless they did it themselves,"

wickedly suggested Philip. Dan's eyes blazed. "I never thought of that. You see, I took first a Broad-"I replied, emphatically way car to Brentano's, went in there for ple looked at me very curiously. Mrs.

SPAIN'S YOUNG KING.

The Baby Ruler and His Cat, and the Beg-Stories of the little King of Spain are in order now that his recovery has been assured, and several new ones have come seeing my friend, Tom Maxwell, a has been brought up in a strictly family way, and very much as any other young person of good birth in his kingdom. His mother has very sensibly forbidden the lugging in of the royal features of his life any more frequently than the absolute necessities of the strict rules of the Spanish court etiquette required, and except on the occasion of state ceremonials young Alphonso has been atand by the stalwart peasant nurse who has been his companion from his earliest babyhood to his present comparativeiy mature age of four years. During his illness she and the Queen were constantly at the little fellow's bedside, and about the only other living creature so over children, and we were soon among constantly in the room was a cat. The young King, before his sickness, had begun to tire of his baby playthings that catch me up as usual—only said: Fretty and some pleasant word.

"In a little side room was a poor child, Maltese cat that he saw somewhere form of a street car and broke his arm."

"In a little side room was a poor child, Maltese cat that he saw somewhere about the palace. The animal at once form of a street car and broke his arm.
He was taken to St. Luke's.'
"To St. Luke's!' I exclaimed; 'where is his family? I thought they were all back from Europe.'
"I don't know any thing about them,'
"I don't know any thing about them,"

Derched in a high chair, and sunering from some skin disease. A nurse was without a second look, but the doctor stopped to speak to them both. I heard him say:

'Is Miss Lent still indisposed? I fear,

Wiss Gordon, you are overtaxing your like the King insisted that pussy should said Joe; 'I hardly ever see Maxwell now. Some one told me he mentioned your name and wished to see you.'

"'Oh no, doctor, not a bit; you know month the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the control of the faithful cat was constantly in the fa I am strong, was the reply.

"There was something very femiliar be sick chamber. Naturally the animal became a great favorite, and one of the high ladies at the court made for it an increase." see my lost Mary Gordon in a nurse's ambroidered cushion upon which its lept.

Another story from the sight room and pulsive little object. To the doctor's amazement we were grasping hands, and questions and answers followed in stories of royal infants, George

"Joe shrugged his shoulders and said:
"If you won't drive with me you had better go up to the hospital and see Maxwell." With that he went out.
"I tried to go on with my writing, but I thought of that poor chap lying in the hospital. Suppose he wanted me to do some legal work for him, or to write to who was ill.

amazement we were grasping hands, and questions and answers followed in quick succession. She was a graduated trained nurse when I met her, and, by some strange and unusual good fortune, she had obtained a position at St. Luke's in the place of one of the sisterhood, who was ill.

A STYLISH HAT

is unquestionably quite an essential factor in the make-up of a fashionably-attired lady. But how much more essential to good looks, and especially to her enjoyment, is good health, without which she cannot is good health, without which she cannot look well, feel well or enjoy life properly.

The trying ordeals which fashionable society imposes on its devotees are enough to severely test the physical strength and endurance of the most robust. Irregular and late hours, over-rich and indigestible food, late suppers, the fatigue of the ball-room, the bad air of the illy-ventilated, over-crowded theatre, are each, in themselves, sufficient to upset the system and ruin the health of the delicate and sensitive. Combined, they can hardly fail, if persisted in, to seriously impair the health of the hardior sugar to sour or ferment in the stomach and cause distress. It is as peculiar in its composition as it is marvelous in its remedial results. Therefore, don't be put off the sooner succumb to these deleterious influences. They become pale, haggard and debilitated, and constantly experience a sense of lassitude—that "tired feeling," as company express is The least exercise. sense of lassitude—that "tired feeling," as so many express is. The least exertion fatigues them. Various neuralgic and other pains harrass and distress the sufferer. Headache, backache, "bearing-down" sen-

sations, and "female weaknesses" follow sations, and "female weaknesses" follow and sorely afflict the sufferer.

As an invigorating, restorative tonic, soothing cordial and bracing nervine, for debilitated and feeble women generally, Dr. Pierce's Favorite Prescription has no equal. In fact, it is the only medicine for the peculiar weaknesses and aliments inci-dent to females, sold by druggists, under a positive guarantee from its manufactur-ers, that it will, in every case, give satisfac-trers, that it will, in every case, give satisfacpositive guarantee from its manufactur-ers, that it will, in every case, give satisfac-tion or its price (\$1.00) will be promptly refunded. It improves digestion, invigor-ates the system, enriches the blood, dispels aches and pains, produces refreshing sleep, dispels melancholy and nervousness, and builds up both the flesh and strength of those reduced below a healthy standard. Centains no alcohol to inchriste; no syrun Contains no alcohol to inebriate; no syrup

#### KILLED HIS HORSES.

Taken all in all, I think it is one of the farm.

Taken all in all, I think it is one of the farm.

Taken all in all, I think it is one of the farm.

To the stomach, liver and bow Pierce's Pellets excel. One a dosc. Expecting to have a number of hogs to winter on an adjoining farm and not having a silo, I dug a pit in the field, cut and packed sixteen wagon frames of green clover into it, most of it perfectly wet and green. (The rain at the time was excessive.) This was put up to feed hogs, but losing all my hogs by cholera in the fall I determined when opening the pit, if in good condition, to feed the silage to horses and cattle. I omitted to say, after packing it in the pit we covered the mass with wheat straw and returned four feet of dirt on it. In this way it remained until in December, when it was opened and found to be in good condition, the bloom and leaf of the clover perfect in form, in color a dark brown. The horses and cattle ate it ravenously: all seemed to be doing well on it for about four weeks, when we found two of the horses down in their

stalls and before midday they died. We sent a man on another, apparently well, for medicine. She was taken sick on the road and died about midnight, and within the week I lost nine-all except a very old mule and two sucking colts. I sent immediately to Dr. Clements, who is employed by the general Gov-ernment and has his laboratory in the John's Hopkins Hospital, of Baltimore. He came and dissected and took to his laboratory different parts of the intestines, and after examination he pronounced the cause of death from eating

the clover silage-from excess of nitro-

gen caused by exposure to the air. I fed cattle on it at the same time and saw no perceptible effect on them but one, and that was slobbering like the horses, but this I attributed to second growth of some of the clover. But this in the cows soon passed off. My silo at the home place a wooden structure, above ground, forty feet by twelve feet, thirteen feet deep, double-lined with tarred paper. This keeps in elegant condition, but my experiments in putting the cut corn, in half-inch lengths, in a pit like the clover experiment, turns out the best silage I have ever seen.

I would like you to publish this letter to put brother farmers on their guard as to how they use the clover silage with horses.—Breeder's Gazette.

## POULTRY PARAGRAPHS.

Don't be "chicken-hearted," nor too greedy, in weeding out the culls. Don'r crowd the fowls. Success depends in a great measure upon this. HENS do not eat their eggs unless

broken in the nest. Never use stale or frozen eggs as nest-eggs. In buying poultry for breeding purposes go to some reliable breeder who has his reputation at stake. It may cost a little more for the birds, but the buyer

can depend on what he gets. Culls are expensive at any price. To MAKE a good, warm breakfast for forty fowls boil a heaping half-peck of potatoes, mash them, add one quart each of shorts and bran, a teaspoonful each of salt and pepper, and finish by

stiff dough. FowLs need far more care during damp, rainy weather than during the clear, cold weather of winter, or the dry, warm weather of summer. Dampness | Farm and Fireside. engenders numerous disorders, many of which are difficult to cure. Therefore, it is better to use preventive meas- as we advise against reckless pruning, ures than to administer medicines when a tree should be pruned to make it servetoo late .-- American Agriculturist.

BARLEY AS A FARM CROP.

A Western Farmer Gives His Experience with it. This cereal has been extensively cultirated from remote antiquity in Europe and Asia, and in fact its range of cultivation is wider than that of any crane, or basket and hook holder, der them from growing a crop that can pounds of fruit in basket with ease, and few farmers understand fully the value of barley as a feed, especially for hogs. farm feed crops, it will be found to hold stuffed in his hole. a prominent place, as will be seen by the table given below. The five crops given are those upon which the general farmer depends largely for his feed supply. The table shows the proportionate feed

ing value and manurial also. Manurial Value. Flesh, Fat. 25 27 30 23 25

This table was taken from the American Home and Farm Cyclopedia, and I suppose is approximately correct. It will be seen that barley holds its own the value of oats in this respect. But an open fire-place, gather for it all the unfortunately a lack of knowledge is pine cones and twigs and sprigs and cedar you can lay your hands on, and er. A good many people who were born dry them. In the long winter evenings on a farm and have lived on a farm all throw them on the blazing logs, and their lives seem not yet to have learned they will make such a cheery sparkle

A new process for burning coal without smoke has lately been discovered. It consists in sprinkling water containing a special preparation of resin over the coal, and the result is that there is the coal, and the result is that there is since the coal, and the result is that there is since the coal, and the result is that there is since the coal, and the result is that there is since the coal, and the result is as intense as feet long, Fig. 1 showing the trough coke. An authority vouches for the fact that it works admirably, and in its fire is a remarkable improvement on

coke. For a luxuriant growth of green in winter, put some lumps of charcoal in the bottom of a suitable vessel, a hyacinth glass will answer, and fill it with water. Put in thrifty slips of ivy or tradescantia. If sand is used place the stems firmly in it. As the water evaporates fill with fresh. A beautiful effect is produced by simply placing a handful of the heads of wheat in a vase of water.

-Boston Commonwealth. How the Post-Office Has Grown. From the seventy-five post-offices over which Postmaster General Benjamin Franklin presided, the number has grown to 58,999 in 1889. In 1874 the number was 34,300, and the gross revenue \$26,500,000. The gross revenue for 1889 is \$57,175,611. The 58,999 offices at present in existence are divided as follows: First class, 102; second class, 517; third class, 2,043; fourth class, 57,176. The grand total of employes at present in the postal service is 150,935. The total expenditure of the department for the fiscal year, ending June 30, 1889: Revenue, \$56,148,014.92; total actual and estimated expenditures and liabilities, \$62,491,198.35; deficiency in revenue, \$6,843,183.43. The estimated revenue for the fiscal year to end June 30, 1890. is \$60,618,830.87. - Mechanical News.

## Purify Your Blood

At the coming of spring the blood should be purified, as impurities which have been accumulating for months or even years, are liable to manife themselves and seriously affect the health. Hood's Sarsaparilla is undoubtedly the best blood purifier. It expels every taint of impurity, drives out scrofulous humors and germs of disease, and gives to the blood the quality and tone essential to good health.

Hood's Sarsaparilla "Every spring for years I have made it a practice to take from three to five bottles of Hood's Sarsa-parilla, because I know it purifies the blood and thoroughly eleaness the system of all impurities." W. H. LAWRENCE, Editor Agricultural Epitomist, Indianapolis, Ind.

Purifies the Blood "Last spring I was completely fagged out. My strength left me and I felt sick and miserable all the time, so that I could hardly attend to my business. I took one bottle of Hood's Sarsaparilla, and it cured me. There is nothing like it." R. C. BEGOLE, Editor Enterprise, Belleville, Mich. Hood's Sarsaparilla

Sermon by the Corpse.

Whoever heard of a dead man 1. Furthermore, the dead wife of the that, in most cases, the "bargain "Pretty soon she came back to me len Thorn had resided at Larch mont. summer he watched with pleasure the yachts sailing and steaming about the sound.

Eight years ago his wife, the partper of thirty-seven years of his life. was carried to the grave. But to him she was still alive, and often at evening the sweet sound of her beautiful voice pealed forth, singing the hymn:

#### We shall meet once more On that beautiful shore.

Lately Mr. Horne has been laid up with pneumonia, and he expired at the age of seventy-seven.

He had left explicit instructions as to his burial and the services to be held over his remains, and yesterday his dining-room and parlor were filled with mourners who had come

to pay respect to his memory. Shortly after 1 o'clock the cermony commenced, and from the table was heard the sound of an angelic voice singing that beautiful hymn;

A few more years shall roll And we shall be with those we love

In the land beyond the sun. For some time a feeling of superstitious awe prevaded the apartment. as many distinctly recognized the voice of Mrs, Horne, but when they perceived that it came through a phonograph they grew more composed, though many wept as they recall-

ed the owner of that sweet voice. As soon as the hymn was over Charles Horne, a nephew of the deceased made some alterations in the machine and juserted a roll that contained the furneral sermon of his uncle, uttered by himself. Seldom had a more impressive one been listened to. It sounded so weird that two ladies fainted and had to be carried out.

The well-remembered voice of the deceased ciergyman told of how at the time that his audience would hear him he would be in that land.

He went on to say he would have have been made plain.

It is usual at funerals to eulogize dceeased man's faults.

On this occasion the virtues of the dead man were left alone, and instead there was a long list of faults enumerated, for which the mourners were asked to pray for God's pardon. There was a stop, and the nephew put in another roll. The voice took up the address where it had left off. ceased wife, and prayed God that the speaker might be considered worthy individual. to become a member of that portion of God's kingdom where she might

be enthroned. At this point of the address the voice terrible sounds of a strong man weeping and unable to restrain himself, broke out with terrible realistic force, fate. and; caused a shudder of horror among those who were present at this extraordinary service. The next as efficacious as those before.

upon his hearers to join him and his sheer force of will. wife in singing the hyun, "There is

a Better Land." The nephew arranged two instruwere unable to proceed.

In the voice of the deceased.

The end came without a hitch, the in the sweet by and by we may all meet in that beautiful land."

The Rev. Thomas Horne was a familiar figure to the yachtsmen of ished .- New York Ledger. Larehmont, and on any summer day he might be seen with his green speciaties, broad straw hat, and sun reading his book,

The weekly Mail and Express has agreed with the Grant Monument Association that the entire revenue of the paper from yearly subscriptions of two dollars each will be turned over to the Fundor the erection of a NATIONAL MONUMENT to General Ulysses S. Grant at Riverside Park, New York City. In other words, if you send Two Dollars to the Weekly Mail AND EXPRESS you will receive the paper for a year and your money will be paid over to the Grant MONUMENT FUND. You will thus receive a full equivalent for your money in a first class weekly newspaper and at the same time you will be helping to forward a noble and worthy cause. The Weekly Mail and Express has further evidenced its earnestness and sincerity in this work by subscribing TEN THOUSAND DOLLARS to the Monument Fund.

The following letters are self explanatory

The following letters are self explanatory LETTER FROM EX-GOVERNOR CORNELL. LETTER FROM EX-GOVERNOR CORNELL.

New York, Nov. 23, 1889.

Proprietor of the MAIL and EXPRESS:

It gives me pleasure to assure you that the members of the Grant Monument Association appreciate, approve and accept your generous offer to aid, through the medium of the Weekly Mail and Express, in the erection of the grand memorial at Riverside Park in honor of the illustrious soldier and patriot, Illysses S. Grant.

Ulysses S. Grant. ALONZO B. CORNELL,
Chairman Executive Committee of the
Grant Monument Association.

LETTER FROM MRS. GRANT. NEW YORK, Nov. 28, 1889. The arrangements made between the Weekly Mail and Express and the Guant Weekly Mail and Express and the Grant Monument Association meets my hearty approval. The offer of the Weekly Mail and Express is patriotic, and should it be responded to promptly by the citizens of America the monument will speedily be built at the very site suggested by my husband, and selected by me as the last resting place of his precious remains, the spot where I hope my remains will be beside his, and where our children unite with me saying, "Here only shall be his tomb."

Julia Dent Grant.

JULIA DENT GRANT. ANOTHER LETTER FROM GOV. CORNELL. GRANT MONUMENT ASSOCIATION, NEW YORK, Dec. 18, 1889. GRANT MONUMENT ASSOCIATION,
NEW YORK, Dec. 18, 1889.

DEAR SIR—It gives me profound satisfaction
to ack nowledge receipt of your esteemed tavor
of this date inclosing check from the Week y
Mail and Express for TEN THOUSAND DOLLARS, payable to the order of the Grant Monument Association, as a contribution toward
the erection of the Grant memorial at the
Riverside Park, in the city of New Yors.
Such a contribution coming at this time, is
doubly valuable. It will stimulate the renewed efforts recently entered upon to complete the Fund necessary to construct what
we confidently believe will be the grandest
personal memorial in Christendom, Faithfully and cordially yours,

Chairman Executive Committee.

To Col. Elliott F, Shepard.

To Col. Elliott F. Shepard. Will you not help in this work by subscrib-ing at least Two Dollars to the Grant Monu-ment Fund?

THE GREAT FAMILY NEWSPAPER. THE GREAT FAMILY NEWSTAPER.

The weekly issue of the Mail and Express is not a mere re-hash of the daily of the same name, the matter thrown together without regard to the order or sequence of things; it is a live, independent, fearless, progressive journal, with an individuality and a being of its own. It is skillfully and carefully edited with a view of making it just what it claims to be.

EVERY INSTRUMENT FULLY

GUARANTEED! Having decided to make a specialty of selling the above named instruments, I desire to inform the citizens of this and adjoining counties who may be desirous of purchasing a really first-class instrument at a moderate price, to call and examine my line of instrument and get prices on same before going elsewhee. I can assure all of one thing—no better instruments are made for the money than those I handle. This is no idle boast, but a fact which time and observation has abundantly proven. I buy at first hands and do not charge two prices for my goods. A reasonable profit on the investment is all I sak. ask.
I can also furnish all kinds of Musical Books, Sheet Music, and Organ Stools, and Musical Merchandise generally at most reasonable prices. Give me a call for anything in the musical line.

Place of business—Railroad street, next to B. & O. depot, Oakland, Md. J. M. LITZINGER, Oskland, Md.

To waltz again! That stupid Sidney Brown-He'd like once more to drag me from my seat I am so glad and thankful to sit down; He almost killed me with his clumsy feet.

No, I don't mean to dance again to-night; Such wretched music; and the floor is poor; The room's too hot. Besides, I'm just a fright What, Helen, what? O, darling, are you sure

You are jesting? Look again and see-I would not look for worlds. O, tell me true. The dear, dear fellow! Yes, indeed! 'tis he, Ah, now he sees me—he's delighted too!

How well he looks-a prince 'mong other mer Ah, Harry, so you managed, after all— Of course I'm dying for a waltz, and then I'm glad you came. It's such a lovely ball -Domestic Monthly.

#### WAS IT KLEPTOMANIA? How the Identity of the Thief Was Revealed by a Letter.

I am a lawyer by profession, and, when occasion demands, an amateur de-

In 187-, following my graduation from a law college in the East, I started for practice of my profession.

For a time I had little to do, more than earning a bare subsistence. But my patronage continued growing, until at the end of two years I had earned the reputation of being the best lawver in the place. This distinction also gave reached a figure sufficiently large to me this morning." warrant me taking a life partner to share my good fortune.

Mabel Briston, a handsome young lady of eighteen summers, and daughter of a retired merchant reputed to be worth a half million, attracted my atwealth, her sweet disposition and unaf- coldly. fected ways alone being the charm I sought. It was love at first sight on my part, and I felt that she returned the afme succeeded another, until my visits became a settled thing. Finally, I pro-

posed, and was accepted. Robert Briston had risen from the ranks of poverty by his own exertions. and expected every young man with So when I called grit to do the same. upon him requesting the hand of his daughter Mabel, my proposition was

met with a firm refusal. "When you have acquired a reasonable amount of wealth, Harry," said he, "you may have Mabel. Just at present you have a fair income, but that is not sufficient. I have no objections to you on any other score, and if you so desire, you may wait upon her as usual."

my mission, I went home rather lowspirited and dissatisfied that night. But a still darker cloud soon came to cast a gloom over my spirits-a cloud with a silver lining.

One morning, while on my way to the office, I saw Mabel turn a corner near by and come in my direction, and, when she saw me, retrace her steps and cross

to the other side of the street. This action on the part of one I dearly loved, made me feel very uncomfortable Had her father turned Mabel against me? No; she loved me too well for that, I knew. Still, it seemed very strange. Entering my office I sat down to think

it over. A feeling of heart sickness than I was up again, preparing to leave Stepping out, I came face to face with Mr. Briston.

"Well, Harry," said he, extending a hand, "I called to have a talk with you." A great wave of joy swept over my soul, as I replied:

"Very well, Mr. Briston; step inside, please," offering him my easy-chair. "I hope you have reconsidered your

"That is not what I came to talk

about, Harry, although Mabel is the one concerned. "You wish some legal advice, then?" "Yes, in a measure. Some curious, and, I may add, very annoying whims, have taken possession of her lately-"She must have had one of them this

morning, as she passed near me on my

way to the office, and never spoke," interrupted. Mr. Briston took off his specs, polished replacing them, eyed me critically.

"You saw Mabel? Why, I left her at home only an hour since. "Yes, sir, I did, and I know she

"Young men should never worry; it makes them grow old so much the faster. | intended to do. But to the object of my visit." "I'm all attention, Mr. Briston." "Very well. Now, Harry, I'm worried

far worse. I fear she is given to-to kleptomania, and---'What! Mabel?" said I, indignantly.

"How dare you accuse your daughter of "That is what I came to talk about." he replied, calmly.

'Surely, you do not mean it, sir," said I, in a husky voice. "There must be thing, nor had the clerk. some mistake.

"No mistake about it. Smith, the dry goods dealer, and Brown, the jeweler, she had apparently forgotten. I watched have both called on me and laid charges her closely, and saw her abstract a piece of theft against her -- the taking of bits of of lace from a box, when the clerk had utes."

other nick-nacks from Smith's, and a the articles bought, and left. The clerk costly brooch from Brown's. Now what went through the same operation of ex-I was too stunned to think of any

thing, and told him as much. "Well, I don't know what to think them for the articles stolen, but that won't stop the infernal gossip now

"I'll call on Mabel at once, Mr. Bris-"Do so; and if you succeed in stopping his thing you may have her. "Thank you, sir. I'll do my best."

Then we parted. I found Mabel in tears. "Why these tears, Mabel?" I askedmoving her hands from her face and mprisoning them within my own.

She gave me a quick glance, quietly withdrew her hands, and looked away from me. "Mabel," I repeated, "can you not con-

"Did papa call on you this morning?" she asked, her eyes upon the carpet. "Yes, Mabel."

"Then he told you all?" "Yes. "And do you believe these charges rue, Harry?" her lips quivering. "No." I thought it best to prevari-

cate just then.

"O, Harry! how good of you. I have ne friend to stand by me," said she, hiding her face upon my shoulder. "Now tell me, Mabel, what foundation have they for these charges?" I asked, gently stroking her fevered head. She raised her face to mine, and looked me straight in the eye. "I do not know,

Harry, any more than you do. I never heard a word about the thefts until papa told me last night." "It is strange, very strange," said I, abruptly. "Smith and Brown declare the articles were stolen. They are both honorable gentlemen, and could have no

motive in preferring false charges. the West to seek a good location for the Have you offended the clerks in any way? "O, no; at least, not to my knowledge. I have always been kind and considerate, more so than the majorfty of

The boat is shaped like a spindle, and consists of an inner and outer shell, the inner one revolving on journals fitted at each end of a horizontal shaft that runs through the axis attention. He looked over the open boxes, still upon the counter, and returned them to their proper places upon the shelves. Mabel had not taken any thing, nor had the clerk.

Remaining awhile I was surprised to see Mabel return to purchase something she had apparently forgotten. I watched expired, wrote upon one of her cards:
"I have been gone just thirteen minutes." Leaving this card on the table,
therefore the cards are the cards and the card of the cards.

Budget. DRESS AND FASHION.

Novelties at Home and Abroad-Hints on Many Subjects. Yokes and guimpes of velvet go with

velvet sleeves. Jewelry, real and imitation, is more vorn than ever.

Large-flowered and small pompadour flowered brocades are among the new

Feather boas and stoles and triple capes of cloth will be much worn with wool gowns.

Many of the new silk petticoats are conceited young parson. "Then what trimmed with flots of ribbon and cascades and ruffles of lace. Small bonnets are worn on dressy occasions and in the evening, larger ones

> Tartans, Scotch colors in broad stripes, and bordered robes are the pronounced novelties in woolen stuffs. Heliotrope velvet slippers, with pink silk stockings, are a new fancy of those

> who like that sort of thing.
>
> Narrow side panels of silk are sometimes introduced in the plaited or plain skirts of wool, tartan or striped gowns. Yellow jonquils and purple violets are favorite flowers for combination in cor-

sage bouquets just at the moment. Home gowns for the early spring are made very simply, without bustles or into Arizona, as we are the first to lead loopings, and with a slight train in the

Spanish colors, Spanish styles. Torreador hats, and red, black and yellow millinery stuffs are features in spring

fashions No bustles are worn, but the French gowns have very small cushions of hair under the plaits in the back of the skirts. White cloth gowns made in dressy

styles, and braided with gold and silver, are now in favor for ball dresses here and abroad Birds, bees, butterflies and other insects in the acts of flight are embroidered in jet and tinsel all across the bod-

ices and skirts of new ball gowns. Triple capes matching the dress, or of dark blue or green or black cloth, or white or scarlet for evening wear, or of drab or gray for the street, are the favorite light wraps for informal occasions. The fronts of many gowns of tartan, cheviot and velveteen are made of silk to match, forming a kind of draped tab-

lier between the sides of the outer skirt of one or the other above mentioned materials. Now silk petticoats, flounced with lace and pinked-out ruffles, are the latest fad in underwear. They come in glace, plaited and barred, striped and plain silks, and are "taking" at once

with the girls of the "400." A clasp or slide of jet or jeweled metal, two and a half or three inches long, is an almost necessity of a lady's wardrobe effects at present. It is used to fasten the broad soft sash, belt, or surplice draperies of a lady's bodice, be- with the course of the Kicker bobs up ing placed in a perpendicular line di-

rectly in front under the bosom. The fashionable finger nail for men. as well as women, is extremely long and pointed, forming almost a vandyke. has a clawlike effect, which is not very reassuring to the opposite sex, but, then, it is English, quite English, although it came first from Paris to London, and now it has reached New York. The borders of robes take a wider

range of designs than ever. They are broche, woven in vandykes, turrets, blocks, tartans, horizontal and perpendicular stripes, and palm leaf and other Oriental designs in Greek, Roman, and Egyptian figures in mediæval renaissance, conventional forms, in lace patterns and leaf and flower forms .- N.

#### Y. Sun. THE ASTOR FORTUNE.

The Largest Legacy Ever Bequeathed to a Single Individual. John Jacob Astor has just died, leaving behind him a fortune estimated at \$150,000,000, though even he himself could not tell within a number of million dollars just how much he was worth. His fortune was so immense that it was utterly incomprehensible This vast sum is entirely beyond the comprehension of the human mind; and, as far as all practical personal enjoyment for John Jacob Astor was concerned, \$130,000,000 of it was absolutely useless. A man can not possibly use more than twenty million dollars. All that Mr. Astor could do with his extra \$130,000,000 was to simply allow it to accumulate, and what is the use of accumulating a superfluity. An aggregation

of 130,000,000 pebbles would have been

just as useful to John Jacob Astor as the

last \$130,000,000 of his fortune.

It used to be said that there were but three generations from shirt-sleeves to shirt-sleeves. That is, the grandfather starts out in poverty, works for a living fortune. The son and accumulates a takes this fortune and increases it. The grandson receives it and squanders it, and is obliged to take off his coat and go to work in his shirt-sleeves, as his grandfather did two generations before. However this may have been with the rich men of a previous generation, it is not true in reference to such fortunes as Mr. Astor's. The most riotous, prodigal and reckless living could not consume the interest on such a fortune, to say nothing of the principal. In spite of the most wholesale extravagance, such a fortune would go on increasing,

despite the efforts of a most improvident and prodigal heir to lessen it. No one has ever impugned the honesty of John Jacob Astor, though, of course, no man or family ever earned \$150,000,-000. It is a physical and intellectual impossibility. It is this fact, probably, that has created the strong and constantly growing public sentiment against vast fortunes accumulated in the hands of single individuals. It is felt that this vast wealth, to be equitably distributed, should be scattered more generally through the vast community which cre-Hence there have been schemes proposed for taxing legacies: laws have een advocated to compel the confiscation of a man's property, exceeding a certain amount, to the State, in the event of his death. Other legal enactments have been proposed to compel a man not to bequeath a sum exceeding \$10,000,000 to any single individual.

The problem of large fortunes is one of the most serious questions of our time.—Yankee Blade. THE ARIZONA KICKER.

A Few Specimen Bricks of Western Edi-torial Enterprise,

We extract the following from the last ssue of the Arizona Kicker: "A STRAW .-- We have just closed a bargain with Henry Shane, the wellknown contractor and builder, for a onestory addition to the rear end of our office, to be 11x14 in size. This room will be used as a gunsmith shop under our own personal management. This will give us, under one and the same roof, a great weekly paper, a job and book office, a grocery, a feed store, a hardware store, a butcher shop, a boot and shoe store, a signal station and a gun shop. Three years ago, upon our arrival in this town, we slept under a wagon for the first three nights, and the

first money we had was a borrowed dollar. "Is it any wonder that our mooneyed, lantern-jawed, mule-eared contemporary down the street gnaws a file extr lecte had been he d facts of h dence orde

all day and has the colic all night?" "ALWAYS AHEAD. - Next Monday morning an artist and engraver from Chicago will arrive in town to accept of a position tendered by the Kicker. are the first to introduce a real artist the way in all other good things. Hereafter all matters of local importance, but more especially street rows attended with loss of life, will be illustrated in the highest style of the art, thereby in-creasing the value of the Kicker to subscribers by at least 100 per cent., while the price of subscription will re-

main at the old figures." "THE GALLED JADE .- It has so happened, every time we have been obliged to kill a man in this town in selfdefense, that the coroner and every body else was in a great hurry, and that the body was buried in the most convenient place. Last week we were struck with the idea of getting them all together in one common spot, and we bought an acre of sand lot of Colonel Hawkins for a ground-work. Our greeneyed contemporary got a hint of what was up, and he went blowing around town and did his best to head us off; he failed, however, and during the thaw we had the five bodies taken up, removed to what is already known as 'The Kicker corral,' and each grave designated with a white headboard with the name painted neatly thereon. In the spring, we shall see that each grave is overed with trailing arbutus-that is, if arbutus will trail in this country. The names as they appear on the headboards, are: 'Mose, Pete, Jim, Sam and Jack.' We shall probably add a couple more to

the list before the ides of May, whatever that is." "THEY DON'T ENTHUSE .- Every now and then some one who is dissatisfied with a proposition to run us out of t county by establishing a new weekly, in opposition. He goes blowing around, zets out a prospectus on a brokenbacked type-writer, puts his own name lown for \$5, and that's the last of it. We've seen twenty such cases in the last

three years, and they no longer make our hair stand on end and chills canter ip and down our spinal column, "Two weeks ago we felt it our duty to caution the mayor of this town that he was riding a high horse, and that he nust come down to a mule or we'd take measures to make him. He carried an old shot-gun around for two or three lays, telling everybody he had camped on our trail, but it finally got too neavy for him and he sold it for \$3 and got out the usual prospectus. We hear that he has thus far succeeded in aising \$4 and a dog towards establishng a great newspaper here. By way of encouragement we'll add a second dog,

and we hope the mayor will push his oroject for all it's worth." "Notice.-Parties addressing letters to the Kicker will please add: 'United States of America, Western Hemisphere,' to the usual directions. The postmaster n this town is never certain what counry Arizona is located in, and this will greatly facilitate his labors of distribuion. The only qualification he has got for the office is his ignorance of orthogcaphy and chirogaphy, and his theory as

to why jackass rabbits were created bobtailed. "Nor Guilty .- As predicted in our last issue, Colonel McClugg was not held for the shooting of Dan Tompkins. As we were an eye witness to the whole affair, we felt it our duty to go before the coroner's jury with our testimony. Our blink-eyed contemporary down the street says we did this hoping to increase the circulation of the Kicker, and he is partly correct. We never let slip an opportunity to increase our subscription list, and are happy to announce that three members of the coroner's jury subscribed and paid for a year in advance, while the undertaker who furnished the box has given us a six inch ad

"The Colonel was taking a drink at the bar of the Gray Wolf Saloon when Tompkins hit him on the chin with an onion. It was a brutal and uncalled-for thing, and Tompkins pulled his gun to back it up. The Colonel jumped behind a barrel, pulled his gun and both fired together. While he only lost a lock of hair, Tompkins got it plumb center and fell dead. This should be a solemn warning to all his class not to monkey with a gentleman when putting away an afternoon sustainer."- Detroit Free Press.

-The left-handed man was undoubtedly born to be a curse to the good morals of an office. In all other vocations he is as good and useful as any other man. Particularly is this true in base ball, where the left-handed "twirler" can, as a rule, command more salary than an every day right-hander. But in an office he is a failure, especially if Le handles correspondence. everlastingly sticking pins into the papers from his left-handed standpoint, which reverses their position and plows into the fingers of the next right-handed man who undertakes to remove them. He makes the discovery (after it is too late to prevent an oath) that the documents came direct from a left-handed fiend .-- Chicago Tribune.

For the first time since he set out the confident smile left his face, and his of humanity beneath his window and features grew set and stern as he quickdenounced society, civilization, law, ened his pace. Rushing to his room he nervously unlocked his door, threw open his desk and found-O, joy!-fifty twocent stamps and a pile of writing-paper Then he lighted a cigar, sat down and envelopes. Seating himself though for a long effort he drafted the

though for a long effort he drafted the following letter:

Mr. Mayor: Will you kindly inform your advisers that I, Richard Frothington, pronounced by Messrs.—(here he inserted his list of names)—to be the meanest man in New York City, intend to take up my abode in your town at once unless I receive by the next mail the sum of fifty dollars. I inclose the full text of my credentials. I am a blight to any community. Positively no reduction for cash.

He worked away for hours writing letters, addressing envelopes and cudgeling his brains for the names of growing towns in the West and Southwest. Finally his task was completed to his satisfaction. He mailed his letters, pawned his cane and sleeve-buttons and ate a hearty dinner. When his cigar was smoked out he returned to his room, sat in meditation for awhile, and then, weary with the sustained effort of the day, went to bed and was soon sound

How he existed for the next few days it is hard to tell. "I lived on my uncle," fact that even his overcoat fell a sacriflee to his vulgar craving for food-and "I ought to have thirteen cents left, he began to fear that his syndicate was richer than I am. ing and What Came of It. Nearly three-fourths of a century ago quiet village in Northern Vermont was startled by seeing posted up at different places papers headed in large "EVILS OF INTEMPERANCE;"

the above subject. Such a thing had never been heard of before. Since the origin of the village the people had gone to the "tavern" for rum, and this and Even "the parson" got rather too joyous at times, yet his good feelings were overlooked, and he still told of the Sariour's love

But all were not happy here. Many homes showed the blight resulting from too much indulgence in drink, and impoverished wives and children could easily be found, yet none seemed to see any remedy, and so the foul blight still remained untouched. It was thought to be the misfortune of the family result-

ing from the frowns of Providence On the night of the lecture the house was crowded by a motley mass, all eager to hear what could be said. Here were the rich and poor, the tavernkeeper and his victim, the red-nosed father and his suffering, squalid family. The speaker told in plain and simple language of his life-how as a drunkard he was wedded to the intoxicating family were driven out as outcasts. While thus homeless and friendless, his flery appetite, and give him a clean Christ. Jesus heard and blessed him, and in time he was enabled to buy back his old home, and now his life

blessed by a happy family and a com-fortable home. I will not attempt to follow the speaker through, but his words sank deeply into the people's hearts, for all saw in his picture of life their own true condition, and when the speaker told of the happy change resulting from casting aside the drink habits, many determined to try the same experiment.

At the close, a pledge was shown, and all invited to sign it who wished, and many crowde I forward and signed their duced by the alcohol that any particu- names. A number of others called at wounded; property loss, \$100,000. father is lying very ill. It is thought

Every dwelling in Bremen, Muchlenburg County, was destroyed. Six persons are reported killed and nine badly injured.

In the country between Thomburg and Clay 17 deaths are reported, and one woman and child are missing. At West Louisville not a business house was left standing, and but one dwelling house can be seen. The loss here is estimated at \$100,000

In Ohio County more than 50 buildings were destroyed, including a church at Duke, Robert's flour mill on Rough Creek and a half dozen schoolhouses, Thirteen people, mostly children, were killed and the property loss was from \$60,000 to \$70,000.

More than 100 houses in the bottom lands between Evansville and Mount Vernon, Ind., were demolished, the farmeres only escaping with their lives and loosing all their household property.

The water supply is running very low. Every effort is being made to complete a temporary standpipe, and it will be finished by to-morrow. But before that time, probably tonight, the city will be without water. Strong appeals are being made for all to observe the strictest economy in its use, but they do not seem to be effective. Enough water will be reserved in any case for protection against fire.

The total private subscription now amounts to \$78,000. This added to the \$20,000 from the city makes \$98,-000 at disposal of the relief committee. The ruins are still under police guard. All streets are now open and

the electric cars running. Business

TERMS OF SALE—As prescribed by the decree of this Court:—One-third of the purnase money to be paid in cash on the day of sale, or the ratification thereof by this Court, and the balance to be paid in two equal installments in nine and eighteen months from the day of sale, said deferred payments to bear interest from the day of sale, and to be secured by the bonds of the purchaser, with security to be approved by the Trustee, or all the purchase money can be paid in cash on the ratification of the sale by the Court.

LUCIEN FRAZEE,

TOHN A. WOLF, CARPENTER AND BUILDER, East End Oak St., Oakland, Md

sighed in passing Its sorrowful, lonely way,

Light mists arose to herald The daybreak cool and gray. Soft couched 'mid the olive branches A bird in her tiny nest.

Feeling her young ones nestle Closely against her breast. Stirred in the early twilight

Fluttered a little way
Where, close to the rock-hewn chamber, Droopeth a lily spray. A-down thro' the vine-wreathed garden, In the fragrant early gloom

Two came a weary, seeking Their dead in the guarded tomb But the chamber closed at even

The stone was rolled away. A-near, like a radiant presence One stood with an angel face, And spake: "Had ever the living With the silent dead a place?

" He is not here: He is risen."

And lo! in the day spring fair
"Tis said, in the Easter legend, A bird song filled the air A song of the tiny birdling From the nest in the olive tree, As if for the Christ arisen

It fell on the weary spirits Like the touch of a perfect calm.

And the whole earth husbed and listened.

To the world's first Easter psalm.

It must be but a fancy.
But it fills our eyes with tears,
And ever the sweet bird music

Ringeth across the years. Even to endless ages,

To people yet to be.
Shall come the song of the birdling
From the nest on the olive tree.
—Marion Colburn, in Youth's Companion.

## EASTER BLOSSOMS.

The Romance of Two Boxes of Flowers.

fail, and be the next day?" "Certainly, 'And here's my card.

which I should like to have you put in the box with the flowers. "All right, sir." The foregoing conversation took place

florist. The first-named gentleman, having tender regards for a certain young lady, had several days before Easter determined upon a visit to the horticulturist's to make sure of a choice pick from the many fine blossoms on sale there.

He was exceedingly particular, as most young men under similar circum- part of the church. The edifice was stances are, and had ordered several dozen Jacqueminots, her favorite flower. He paid the florist's fat bill without a murmur and departed, self-satisfied and happy in the thought of the surprise and delight with which his fair inamorata would receive this thoughtful compli-

He lived in another world, almost, hardly able to wait until Sunday when he could call and tell her the old, old story that is ever new.

At the florist's Saturday all was bustle numerous orders to fill and deliver, enough to keep Bill, the errand boy, ually thronged with a heterogeneous collection of humanity with a great diversity of tastes waiting to secure their modest little parcels of nosegays. The order in which we are particular-

ly interested had been as carefully packed as the great rush would allow and Bill was receiving instructions as to its delivery, and was told to step lively, as another large box was awaiting delivery to its destination at the other end of town. He started at a lively gait, but as the distance increased between him and the store his speed correspondingly decreased. However, he was making good headway when some one sang out:

"Hello, Bill! Rather hustlin' to-day, ain't you? Jimminy, but yours is no What's you got in the boxposies? Let's have a peep, won't yer? The guvnor 'll never know" (this with a sly wink and cunning chuckle meant for the group of boys on the corner, and indicating that he was proficient in all the questionable arts of the street

Bill, although acquainted with Dan, and, boy-like, admired his questionable accomplishments, knew his mother disliked him and was averse to his having day p. m. Were they not received?" any thing to do with him. He also knew his employer objected emphatically to his loitering when sent on an them this morning," said poor, confused errand and really meant to keep on without stopping, when Dan said:

"Can't you hole up a minnit, or is yer gettin' so high-toned yer can't talk to afternoon with them and when he re- hands, took a silver piece from his yer old fren's what used to be good turned he said he had delivered them pocket, gave it to the boy and was enough to assocerate with? I'se got all right." somethin' to show yez what 'll make them eyes o' yourn water with enwiousness. But yer can's see it till we all has whole affair, and in his anger and indig- The church was decorated much as it one peep at the flowers. 'Well, I wish I dared, but the boss wouldn't like it," said Bill, hesitatingly. A shout of derision greeted this, and

was done.

Dan said, with a sneer: "So, softie, you's afraid, be you? The Guvnor'll never suspect nothin'. Come on; here's a nice quiet place where we's

can all have a show." He hesitated and was lost. He removed the wrappings with trembling fingers, guarding his charge with jealoffered. It was a large box, and in try-A watch and a | ing to keep the boys from crushing it in | ed to occupy the best position to see. It outer edge giving a little push and the next fellow giving a still harder push, until, seized with a sudden and mischievous impulse, two or three of the boys gave a tremendous shove against those standing next to Bill, who vas holding the precious box, and despite all they could do down they went and the box shot out into the street, distributing its contents all along the pavement and gutter. A lively wind was blowing at the time, and the

HIS FRIENDS EACH GRABBED A FLOWER

way it sent those blossoms flying was a caution. Bill, dazed and speechless with terror at the accident, seemed unable to make a move, and before he could recover his scattered senses his friends had each grabbed a flower and ran. After the first fright was over he be-

gan to consider what was to be done to OU will be sure to send them Saturday afterwithout nothing about it unless found out. And Jack, in blissful ignorance of the careful to have fate of his present and what its loss them packed so would, in the days to come, mean to him that they will and his adored, waited with impatience keep fresh until the coming of Easter. Sunday came at last, however, with

warm southern breezes and a cloudless sky; one of those bright days when a 'young man's fancies" are supposed to lightly turn to thoughts of love." That morning Jack made his toilet

with particular care and was ready for church a full half-hour before time for services, a thing of which he was seldom between Jack Storrs and Smith, the guilty. He thought to take it leisurely and reach the church none too early, but love is impatient, and as he approached the church the bells were yet chiming forth their sweet, glad Easter greeting to a saved world.

Jack was a modest young man, fond of seeing and not being seen, and so settled himself in a pew in the back most beautifully and artistically decorated and festooned with rare plants and flowers. The pulpit platform was one great bank of blooming foliage. It was a sight both refreshing and lovely and Jack could not help enjoying the scene, though his thoughts were far away.

The organ pealed forth in response to the animated touch of the enthusiastic for the remainder of the week, being organist, the choir and congregation rose to join their voices in one glad burst of hosannahs of praise to God in the highest whose Son had died and today is risen, but still the one Jack most and confusion. Not only were there wished to see came not. He had been casting furtive glances in the direction of the door, and as the great concourse busy all day, but the store was contin- of people was singing the last line of street to the florist's, evidently trying the hymn he was rewarded by seeing to avoid detection. her enter. But-was it possible? Could he believe his eyes?

Yes; they had revealed only too faithfully the true condition of affairs. The confusion of thoughts that came rushing upon him made his brain whirl round and round, and ere he could regain his composure she had passed up the aisle to her father's pew, never deigning a look or smile in his direction, although he was certain she had seen him.

The agony of that long and, to him, almost endless hour! Will he ever for get it? The air was stifling; he could hardly catch his breath. And how he hated himself and Lydia and every body

But finally the last hymn was sung, the last prayer said, and he was breathing the fresh air once more. As he became more rational he began to suspect that perhaps, through some oversight, the florist had not filled his order. No sooner had he reached this conclusion than he started with haste

in that direction. "Storrs? Storrs? Why, most as suredly, sir. Box of flowers to young lady in B. street, to be delivered Satur-"Well-er-I couldn't say positively. That is-I mean she did not wear

THE EASTER MESSAGE.

Once more the promise of the spring, The quickening and awakening Of sap and shoot, And tender root.
Once more the miracle of birth
Along the length and breadth of earth; Once more the breath Of life for death.

Released again from winter's doom Of frozen days, from Lenten gloom, We seem to stand In some new land,

And fresh the breeze that blows abroad
That brings the message of our Lord,
The Heavenly breath
Of life for death.
Oh! spirit foided in thy sleep,
Oh! soul long buried fathoms deep
Beneath the old
Material mold Material mold. Fling off the load that, year by year, Has vailed thy sight and dulled thine And as the lark Doth, soaring, hark To Heavenly sounds, so hearken thou To that low voice that calleth now

Across the dark, Oh! wake and hark. The night goes fast! Oh, wake and pray, For 'tis the dawn of Easter Day, When Heaven doth lift Above the drift Of self and sense; when budding earth

Renews the parable of birth; When Christ doth wake With us to break
The bond of sense, which is our pall,
Doth wake and wait while He doth call. Oh, here and now Awaken thou

-Nora Perry, in Youth's Companion The Imperious Yawn. Two rosy lips each other press And two deep dimples deeper make; Two eyes, with struggling lids, confess "Tis hard to keep themselves awake;

Two rosy lips more tightly drawn— The little lady will not yawn.

Two rosy lips that slowly yield, Two cyes, whose drooping ilds are sealed
As flowers close when falls the dew;
Alasi her "will not" all is gone—
The little lady needs must yawn. -Henry Moore, in St. Nicholas

FIRESIDE FRAGMENTS.

-Apple griddle cakes are made by adding finely chopped, rather tart apples, to the usual batter.

-Plaster of paris is an excellent ma terial for sealing catsup and fruit bottles or jars, and is more easily applied than sealing wax. -Persons subject to headaches should

abandon the use of coffee, and also of strong tea, as the use of these beverages often contributes to keep up the disease and in some cases alone causes it. -To clear coffee, use the white of an egg stirred into the ground coffee and a little cold water. Put this into the clean boiler and add boiling water from

water and allow the coffee to settle. -Cheese Fondu: Put a tablespoonful

the others from their shafts. To kill the rancid odor, wash through a warm water, to which you have added chloride of lime-a spoonful to a gallon of water -and dry in an open oven.-Rural New Yorker.

-Corn Waffles: One cup each of corn meal and flour through which has been sifted one heaping teaspoonful of baking powder, two tablespoonfuls of sugar and ne teaspoonful of salt; add the beaten yelks of three eggs, one and one-fourth cups of milk, the beaten whites, and last a tablespoonful of melted butter. Bake in gem pans in a quick oven.

-Mutton Steaks: Make a batter o dried bread crumbs, a pint of milk and one egg; put it in a china soup or pie dish. Have ready in a frying-pan somand lard mixed. Dip each steak, pre viously cut from the loin or leg, into this batter twice, and fry quickly. Send to table surrounded with unmashed tur nips, cooked until tender, and masked in drawn butter that has horse-radish grated into it.-Leeds Mercury.

-Sweetbread Pie: Cut some sweet breads which have been parboiled into two or three pieces and let them stew for fifteen minutes in a little white stock, with a small white onion chopped fine, a piece of butter rolled in flour wounded vanity, a sudden flame of pepper and salt to taste, and a dozen anger, often undoes the most substan- nushrooms. Put them into a pie dish

spoonful of butter, one-half cup each of molasses and sugar, and one teaspoonful each of cinnamon and ginger; just let it come to a boil, then when cool add onewhen my heart is so heavy and sad?
I'm obliged to you for your kindness and sympathy, old fellow, but really I can't."

Thus ended the matter for the present, and Charley went home for the rest of upon what he is able to do. And yet night.

The season the season the season defends and included the matter for the present of the present cinnamon, add more flour, roll out thin, and you have delicious spice cookies. Household.

MAKING ROOMS CHEERFUL.

How to Render House Surroundings Pleas ant and Desirable. We are so influenced by our surround ngs that it is very desirable they should be as pleasant as possible. It is not always in the power of the house-mother to live in the locality she prefers, or to change its features to suit her tastes; but she may so furnish and arrange the interior of her house that it shall be Nasal Passages, charming and restful. The charm of a cozy home resides inherently in the mistress, and not in what the furnisher and upholsterer can do to make a house com what blessedness would reside in a fur niture store! Not till loved faces have carpet is its inanimate web dear to us; not till chairs and sofas have been consecrated by holding the forms of our friends do these soulless objects, however costly, have to us other than a mere commercial value. Unassociated with human feeling and sympathy, the most expensive and elaborate interiors are like roses without scent; like marbles without life. Every thoughful person knows all this well enough; but, for all that, we are too apt to fancy that possessions like these bring happiness, while we suffer to lie unused such as are at hand, and potent to yield abundant pleasure, if we value them justly.

A bird singing in the window, an ac quarium on the table, plants growing and blooming, domestic pets moving about as if at home, give life and brightness to an apartment, and afford con stant opportunities for pleasantest oc cupation and companionship. Books people a room, and pictures on the walls, if selected with taste, are ever fresh sources of enjoyment. You may gauge the refinement and cultivation of a family by these infallible tests, unless they have been selected by some outsider. Bits of embroidery, crocheted or knitted work, and a thousand tasteful devices may contribute to the charm of a room, and make it irresistibly attractive. The room in which one lives takes on the complexion and prevailing states of the mind of the occupant. If one is sunny-hearted, cheerful, tasteful and intelligent, these qualities will be impressed on his surroundings, and you will know him by them just as yo would know a crab by his cast-off shell. There are lovely rooms in which there is not one piece of fine furniture, one bit of elegant upholstery, but where the taste of the occupants has found beautiful expression in calico, ingrain, and wood-engraving, and such resources as bounteous Nature bestows on us allferns, and flowers, and sunshine, and domestic pets.—American Agriculturist.

#### FARM AND GARDEN.

SMUT IN OATS.

What Causes It and How It Can Be Pre-

Included in the quarterly report re ceived from the Kansas State Board of Agriculture is a preliminary report on smut in oats, from which is here presented a summary of the whole matter, together with an illustration. Figure 1 in the illustration shows a head, or panicle of oats, with all but the uppermost grains smutted; figures 2 and 3 show small panicles with all the grains smutted.

The report in question is briefly summarized as follows:
Out smut is caused by a minute para-

site plant called Ustilago segetum. The parasite is carried with the seed oats, and seed from smutted fields will produce a smutted crop. It is doubtful whether the disease is ever occasioned by the use of manure which contains smut from straw or grain. The disease

SMUTTED GRAINS. vented by soaking the seed fifteen minutes in water heated to one hundred and thirty-two degrees F. The other fungicides used, when decreasing the amount of smut at the same time also interfered with the germination, and reduced the vigor of the plants. Seeds from clean fields (if the adjoining fields were not smutty) will great part by hauling the first of the produce a crop of oats free from smut. | manure to the upper side of the field, The natural enemies, both vegetable the lower ground being covered late in and animal, are in this case of little practical importance, since the seed can this way, I think very little of the sub-be both easily and effectively treated. Stinking smut, to be distinguished from the black smut (but like it preventable), and especially injurious to wheat in extensive portions of the State the present year, is also due to a minute vegetable parasite belonging to the group of Fungi.-N. Y. World.

The Ayrshire was considered good satisfactory, so many would not practice for beef making as well as deep milk- it, and so many who did put the bands in ers. In this country they seem to have place, neglected to examine them and been more thought of as the cow to sup-ply factories for cheese making. Their favor. A better method is to turn hogs milking capacity is great, as a class, and and sheep into the orchard. They will in the milk classes have run the Hol-stein closer in a contest for milk than By discreet thinning, using a forked any thing else, the Shorthorn so sel-dom putting in an appearance. We the wormy fruit, and the increased size have noticed that many animals of this of the remaining fruit will pay for the breed have been hard handlers, but of thinning. recent years they seem to be coming back to a more flexible hide. This ing trees with the arsenites two weeks should be encouraged in the breeding.

after the trees bloom, and then two and four weeks later. Enough poison lodges made with the greatest care. The in- on the apples to kill the worms; but it dication for a milk getter should be is all washed off long before the fruit is

At the same time bear in mind that a this remedy most excellent. Use one robust and healthy animal is essential pound of London purple to one hundred for the purpose of breeding dairy cows, gallons of water; draw it through the for much depends on the sire for this orchard in an open barrel with a float to purpose. Dairymen , who supply the prevent slopping, and distribute by people of cities with milk should see means of a fountain pump. The practhat their cattle are perfectly healthy, | tice of this method makes it less necesand if the patrons are satisfied that such sary to place close wire screens over the is the case, the call for milk will be in- cellar windows in May, June and July. creased.

The Ayrshire will make a finequality with the Shorthorn and Red Polls, as throwing away time and effort. their milking character far exceeds their capacity for profitable beef-making. We will not claim the Ayrshire as strictly a breed for both purposes, though some claim them to be, but their business is favorable for making them such. Let breeders keep up their abundant milk supply that they may be able to compete favorably with their rivals, the Holsteins.—Ohio Farmer.

## FARM HINTS.

In breeding ducks, do not allow more than one drake to every fou: ducks; this is the best proportion to insure fertile eggs.

THE pea as a pasture crop for sheep has never received the attention that it deserves. A better green food for sheep does not grow. EARLY in the spring a top-dressing of

one hundred pounds of nitrate of soda per acre on wheat will make it grow rapidly and yield better grain. THE garden, the truck patch and the orchard should furnish the farmer with fully one-half of his living, if proper

care is taken with each to secure the best products in good season. Do NOT disturb the onions or onion sets if they are frozen. The handling goes around the picker's waist. This

they were originally stored. THE men who make the most money from farming are not the ones who work seed. It is more important to secure the hardest or the most hours, but those good seed than to prepare for its recepwho manage with the greatest wisdom. EVERY farmer ought to grow all the germinate may cost the farmer the loss feed for his stock, the grain included, of an entire crop. The seed is some-He thereby saves transportation and thing that the farmer should carefully ly what be is feeding.

SHEEP MANURE.

Its Value on the Farm-Best Methods of

The droppings of sheep form the bast manure made on the average farm. In well-littered barns both the liquid and solid droppings are saved, which is not possible in the well-ventilated floors found in most cow and horse stables. The droppings of swine may have greatto the tillable land as that fed to hogs.

save and absorb the droppings from the beginning of the season, but give a good sisters.

stratum of straw next the floor which All the available young men are is quite an advantage when you come to solicited to part with just one single remove the manure. Clover chaff makes excellent bedding, as it is fine and has wonderful absorbing powers. It is best to re-bed the sheep frequently. It gives greater bulk to the manure, which, contrary to the general rule, I believe to be a benefit in this instance. If these matters have received careful attention the sheds will be ready for cleaning about the first week in February. I know men who are very successful with sheep who clean the barns but once a year. From the constant trampremove the manure. Clover chaff makes hair from their upper lip to swell the know men who are very successful with sheep who clean the barns but once a year. From the constant tramping the manure becomes almost as hard as so much wood. In the wet days of harvest this is dug up and thrown in long ridges under the barns. It soon heats and moulders down until it can hard and moulders down until it can hard did not first touch her lips, and made in Toledo, Ohio, by F.

J. Cheney & Co.

There are many men who contract debts in the East and then go West to settle.—
The Missouri Pacific railway has placed in effect the following low rates between heats and moulders down until it can be scattered on the wheat ground the following August.

I tried this plan one year, but the strong smell of ammonia that pervaded the sheep barns when the manure began to heat soon convinced me that I was losing a valuable part of the fertilizer. After giving the question some study, and trying several other plans, I posed, the counts in the vicinity of adopted the practice of placing the Manhattan in 1888-9 showing a loss of sheep manure on the fields which are eleven and one-third per cent. The to be plowed for corn. It is hauled on financial loss from this source to the the sod at the beginning of our rotation people of the State is perhaps over a of corn, oats, wheat and clover, and its million dollars annually. In ordinary effect is noticeable throughout the cases the disease can be entirely pre- whole series. The corn is our most valuable crop, and coming first, it receives the greatest benefit from the

manure. The only objection I find to this method is that heavy dashing rains, when the ground is frozen, will wash away a part of the strength of the manure. I obviate this difficulty in spring before the plowing begins. In -Country Gentleman.

## THE CODLING MOTH.

Remedies for This Pest-Arsenites Alone Will Remove It.

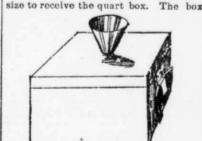

A correspondent sends us what some writer-he does not state who-says about the codling moth. There is noth-Some Points of Excellence in This Breed of Cattle.

fit to use. Three years' trial proves Fires, or bottles of sweetened water, or vessels of sour milk, so often recor of beef, and the cows, if healthy and mended to destroy these insects, will do thrifty, will fatten readily when their no good whatever. What our corremilking days are ended. If we consider spondent says he wishes to impress is this breed as a general purpose class, it that the arsenites alone are a remedy can not be allowed as in comparison and that everything else is simply

Handy for Berry Picking.

The berry-picking arrangement shown herewith is used on the fruit farm of A. G. Tuttle, of Baraboo, Wis. (at least as nearly as can be sketched from a description). H. M. Dunlap, of Savoy, Ill., thus describes it: "A little device that interested me was a picking-box, or form into which the berry-box was placed while being filled with blackberries or raspberries by the picker. The box was made of tin, of a suitable

BERRY (CANE) PICKING BOX. has a hinged cover, with a funnel-shaped hole through which the fruit is dropped into the berry-box within. There is a slot on one side for the strap which dition is detrimental. Allow them to gradually thaw and keep them where they were originally stored.

box prevents loss in picking berries, and, being held by a strap, both hands are left free to gather the fruit."

THE mainspring of farming is the tion in the soil. The failure of seed to middlemen's profits, and knows precise- examine now, before spring opens, by testing it in boxes of earth under glass MUSTACHE SOUVENIRS.

Young Men's Upper Lips. The girls have a new fad. It would be extremely difficult to guess what it is, for it is destined to cause young men with handsome mustaches no end of trouble before it runs its course.

The novelty seems to have originated with the young ladies of Manchester, er chemical value, but they are allowed to go to waste. There is no other porfrom the hirsute adornment of young tion of our corn crop that returns so men's upper lips as a token of rememsmall a percentage of its manurial value | brance, but it is feared that it is really a collection of mustache hairs properly The sheep barns should be thoroughly labeled and classified by young ladies cleaned before the vinter season be-gins; then start the winter's work of and by the display of the favors received that they may show to their lady friends, saving the manure by hauling a heavy at the hands of many gentlemen aclayer of bedding. This will not only quaintances create jealousy in the minds (or hearts) of their less fortunate

hair did not first touch her lips, and sent through her whole being a thrill, which, even then, it was delightful to remember. This latest fad is much preferable to collecting locks of hair, and then, hair collecting is so common an idea. The girls want something later, and this is the result.

It is said, however, that there are a number of the Manchester boys who are at present clean shaven, because their the Wabash.

On April 22 and May 20 the Wabash Railroad will sell tickets at one fare for the round trip to points in Kansas, Nebraska, Indian Territory, Texas, New Mexico, Colorado, Wyoming, Utah, Idaho, Montana, North and South Dakota, Northwestern Iowa selft. At any rate, the collection of mustache hairs just now is all the rage there, and it will probably last until something clse is hatched by a fertile brain to take its place among the fads of the nineteenth century.—Cor. fads of the nineteenth century.—Cor. Boston Globe.

Edward H. Sincell vs. Olivia M. C. Fowler, James B. Fowler and Wilson W. Fowler, No. 499 Equity. In the Circuit Court for Gar-rett County in Equity. No. 499 Equity. In the Circuit Court for Garrett County in Equity.

The object of this suit is to procure a decree vacating and annuling the following deeds: Samuel Selby, 3d, James and Thomas Cook to Wm. D. Rogers, recorded in Liber 33 folio 637 of the Land Records of Aliegany county—Wm. D. Rogers to Morgan N. Garland; Morgan N. Garland to Olivin M. C. Larkin; Olivia M. C. Fowler and S. L. Fowler to Jus. B. Fowler; James B. Fowler to Jus. B. Fowler; James B. Fowler to Wilson W. Fowler, recorded respectively in Liber No. 2, folio 74, No. 2 folio 76, No. 11 folio 730 and No. 14 folio 730 of the Land Records of Garrett county. The bill states the plaintiff has title to a tract of land in Garrett county, Md. called "Recourse" or "Resurvey on Recourse, and prate and pretended to convey said land to the defendants, and are a cloud upon the plaintiff title and are false, traudulent and pretended deeds, and prays for a decree vacating and annulling the same.

It is thereupon this 5th day of March, 1878, ordered by the Urcuit Court for Garrett county. In Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in Garrett county. Md. once in each of four successive weeks before the lith day of April, 1890, give notice to said absent detendants of the object and substance of this bill, and warning them to appear in this Court on or before the 28th day of April next, to show cause, if any they have, why a decree ought not to pass as prayed.

OAKLAND, GARRETT CO., MD.

IF WE KNEW. Could we but draw back the curtains That surround each other's lives, See the naked heart and spirit, Know what spur the action gives, Often we should find it better, Purer than we judge we should; We should love each other better If we only understood,

Could we judge all deeds by motives. See the good and bad within. Often we should love the sinner All the while we loathe the sin.
ould we know the powers working To o'erthrow integrity. We should judge each other's errors With more patient charity

If we knew the cares and trials, And the bitter disappointment, Understood the loss and gain— Would the grim, external roughness Seem, I wonder, just the same! Should we help where now we hinder Should we pity where we blame?

Ah! we judge each other harshly, Knowing not life's hidden force; Knowing not the fount of action Is less turbid at its source. Seeing not amid the evil
All the golden grains of good:
Oh! we'd love each other better

If we only understood. -Woman's Work.

## HE MARRIED FOR LOVE.

Varying Fortunes of the Most Unlucky Fellow Alive.

Mr. Franklin William Lee was undoubtedly the most unlucky fellow alive, according to his own ideas. Not that any thing very dreadful had ever happened, but an endless succession of petty misfortunes followed him through life, and made him thoroughly miserable about half the time.

When a child his toys were always broken, through no fault of his own, just as he began to enjoy them. If he planned to go anywhere, rain or snow prevented or he became ill or something happened. At school he was always being punished for some other boys misdeeds, and falling into disgrace in various ways. When a youth, if he went for a drive, the buggy broke down or the horse ran away. When the sidewalks were icy he was sure to fall down and make a spectacle of himself on the crowded pavement. When he invited a pretty girl to said the victim of ill-luck, "that Anasthe theater, he must needs write to his tasia Brooks was the only girl I could tailor or some creditor and send each ever love. She seemed to encourage me. note to the wrong destination. At a but for weeks I held myself back, beparty the most disagreeable and inelicause I didn't want to make her miseragible partners invariably fell to his lot. ant and what ever he did, Franklin William Lee's abominable luck followed him like the ghost of Banquo, and turned every joyous occasion into one of bitterness and

Accordingly, when Franklin William was about to come into possession of a snug fortune by the death of an eccentric uncle, he was perfectly prepared to find misfortune even in this. Being of an emotional turn of mind, the unhappy young man would have torn his hair if it had not been cropped so closelywhen he heard the provision of the aforesaid uncle's will, which stipulated in no measured terms that he should marry before his twenty-fourth birthday or forfeit every penny of the fortune.

As Franklin William was an orphan who had just lost his patrimony through the failure of a bank-the crowning stroke of his ill-luck-this conditional fortune seemed not only attractive but of his companion's fabulous wealth, and absolutely necessary. uncle had never married but was by no number of very desperate flirtations. As means averse to matrimony, and had resolutely maintained that every real or fancied affliction of his life resulted Franklin William did not lack for femifrom his early disregard of the Scriptural nine society. But the very scarcity of assertion that it is not good for man to be alone. He had been repeatedly heard to remark that every young man ber of forlorn maids was so great that should marry upon attaining the age of twenty-one, and it was even rumored that he favored having a desert especially set apart for bachelors, where they should dwell until brought to their senses. Finding that his nephew had already attained the age of twentythree, however, the generous uncle kindly stretched his views and his will sufficiently to give the young gentleman six months of grace and then died content with great hopes for the result.

After Franklin William had become fully satisfied that there was no way of gaining fortune's favors without matrimony, he sought his boon companion, Mr. Lorenzo Hopps, a disinterested young man of slender purse, who was obliged to live in very dingy, con-tracted lodgings in order to dress stylishly and maintain a certain position in the society of the flourishing town where the friends dwelt. Mr. Hopps received Franklin William effusively and the latter related his predicament without delay.

"It's just my luck," he concluded, tragically. "I can't even enjoy a fortune like any other man. Yes, it's just my

luck all over!" "And very good luck I call it," said Mr. Hopps, stroking his tender mustache. "It's a thing any one but you would jump at. It's not such a misfortune to marry, is it? Especially if you're rich in the bargain." "But I'm not handsome, I'm not inter-

esting and I ruin every thing I touch.' cried Franklin William, woefully. "I'm a regular Jonah."

"O, no, you're not," expostulated Mr. Hopps. "Yes I am. I never go on a pleasure

party that something doesn't happen. Why, the last time I went to the theater, the stage caught on fire and there was a panic, and Miss Simpkins and I were nearly smothered. And the last hop l went to, didn't I step on Miss Jones' dress while waltzing and tear half the "That's 'rue," admitted Mr. Hopps,

shaking his head. "Everbody knows I'm a forerunner of money because nobody'll have me. What Yes, it is."

woman would ever feel safe with such an unlucky fellow for a husband?

"Lots of 'em," responded his friend 'Keep up your courage and don't be so odest. We'll fix things. To begin with: let your riches be known and cut dash in society.

As Franklin William was not averse to this plan, he thanked his friend and went out feeling a trifle better. After this he looked upon every young woma he knew as a possible wife, and tried vainly to fix upon some fair damsel from whom he might learn his fate. As the general belief was that he had already come into his fortune, he soon became a favorite everywhere, and nearly beggared himself in the attempt to shine as a man of fashion. But the weeks and even the months passed on without any result, although Franklin William's misadventures were as numerous as ever.

Mr. Lorenzo Hopps, who appeared fully as anxious as his friend concerning the outcome, was therefore overjoyed, at a large boating party one afternoon, to observe that Franklin William seemed about to take the momentous step. The boats had been made fast to the bank, while the young people were strolling about in confidential couples under the trees or preparing the lunch. Mr. Hopps' fair companion had sent him to the river after water, and he was just stooping to fill his pail when he noticed Franklin William and Miss Anastasia Brooks, a very pretty young lady, sit-ting alone in a boat and talking so earnestly that they took no notice of

Mr. Hopps crouched and waited with reathless silence. He saw Franklin William Lee seize the young lady's hand, and then dropping it, rise excitedly to his feet, saying, in an uncon-sciously loud voice: "Miss Brooks—Anastasia-I'm sure-you must have seen-

that I have always been-" At this moment the unfortunate uitor forgot that he was in a boat, and, suddenly losing his balance, fell over

into the water. Miss Brooks screamed, but had sufficient presence of mind to retain her grasp upon the boat, which fortunately did not upset. An instant later Franklin William scrambled out of the water, dripping and disgusted, and was left by the fire to dry. Everybody said they were so sorry for him, except Miss Brooks, who kept a handkerchief pressed to her face for some time, although she

was certainly crying. The next day Mr. Hopps called upon his friend and found him very miserable. "I made up my mind some time ago," ble with such an unlucky fellow for a wait any longer. Besides, the time is getting dreadfully short, for I'll be twenty-four two months from to-day.

"Yes," said Mr. Hopps, "So you pro osed and put your foot in it?" "I went in all over," answered Frankin William, with woe-begone literalness. 'And I had only just began to tell her hat-what I wanted. She won't kno what I was driving at.

"Well, you can try her again any time. "No. I shall always be an object of ridicule in her eyes now. I can never speak to her in that way again. "I suppose," and he heaved a deep sigh, "I'll have to go away from here and look out

for somebody else. Thus it happened that Franklin William and Mr. Hopps, by dint of borrowing and scraping, continued to spend two weeks at the seashore where Mr. Hopps industriously circulated stories The deceased inveigled that young gentleman into a young men were scarce at this particular resort, as at all summer resorts. male escorts, instead of being in his favor, operated against him. The numhe was obliged to accompany a whole bevy of fair ones instead of one particu lar girl wherever he went, and with from two to a dozen continually demanding his knightly services, Franklin William found himself as far away from

matrimony as ever. "Come," said Mr. Hopps, finally, one moonlight evening. "Our funds are horribly low, and we'll have to leave here inside of two days. Now, what

have you done?" "Nothing," said the unhappy seeker after wedded bliss. "You see how it is yourself. How can I ask a girl to marry ne when there are seven of 'em, al talking to me at once. It wouldn't be polite to ask one without asking the others-I mean it can't be done and that's the end of it. The only girl I've had five minutes conversation with alone since we came here, is Miss Wilson, the Chicago grain man's daughter.

"She's just the one you want," cried Mr. Hopps, "you've danced a lot with her and she told me she thought you quite awfully swell."

"Did she?" inquired the victim, twisting his small mustache. "Yes, and by the way, there she goes now, on the piazza-all alone, too.

Now's your chance."

"But I don't love her." "That's nothing." "And she may refuse me." "I don't believe it," said Mr. Hopps.

seizing his friend by the shoulder and pushing him forward. "Go on. Re member your birthday and make a desperate effort." At the mention of his twenty-fourth birthday, which had become a sort of horrible nightmare in his mind, Frank-

lin William started after the grain man's daughter, with grim determination, like an Indian warrior going to the stake. She was disappearing around the corner and he hastened to overtake her. "May I share your promenade, Miss Wilson?" he inquired, in his most dulcet

"Why, good evening, Mr. Lee," said Miss Wilson. "Certainly, you may. I am looking for mamma. Isn't it just too sweet for any thing to-night?" "Yes. calamity, said Franklin William, in despair. "And now I'll lose all the and wondering how he should begin.

There are other animals of the same species in other parts of the world. is six feet in total length, and about three and a half in height. In general form it resembles the hog; but the legs are rather longer in proportion, and with a note to the effect that May the nose is prolonged into a small, movable proboscis. The fore feet have four toes, and the hind ones three only. The eyes are small and lateral, and the ears long and pointed; the skin thick, and covered with scattering, short, ucky one. "How am I different from silky hairs: the tail short and slightly ther men? Haven't I a right to marry hairy. The teeth resemble those of a f I want to? There's only one of two horse. It is the largest animal of South America, and is found in all parts of that continent, though most abundant in Guiana, Brazil and Paraguay. It shuns the habitations of men, and leads a solitary life in the interior of forests, and you know it," gasped Mr. Hopps, in moist situations, but selects for its abode a place somewhat elevated and dry. By traveling always the same rounds, it forms beaten paths which are very conspicuous. It comes out only in the night or in rainy weather, and re-sorts to the marshes. Its ordinary pace is a sort of trot, but it sometime lops, though awkwardly, and with the head down, and, besides, swims with tively and then said, with determina- facility. In the wild state, it lives on "There is one chance left, you fruits and young branches of trees, but when domesticated, eats every kind of food. Though possessed of great strength, it makes use of it only in defence; and its disposition is mild and timid. The flesh is dry and of disagreeable taste; but the skin is tough, and might be applied to many useful purposes .- N. Y. Ledger.

#### THE BREATHING CAVE. One of the Most Extraordinary Phenomena

In the range of mountains in Western North Carolina, known as the "Fork Range," a most singular phenon exists. It is the "Breathing Cave." seriously contemplated blowing his un- the summer months a current of air comes from it so strongly that a person pertinacious, and on the evening of the can not walk against it, while in the hird day the victim rang the front door winter the rush of air inward is just as

The cool air from the cave in summer By the time he had pacified Miss is felt sometimes for miles in a direct At times, when the change from innear him, and the delicate trifle fell halation to exhalation begins, the air is filled with hairs of the various animals; "Just my luck, Miss Brooks," burst not infrequently small day bones have out Franklin William, standing aghast been carried for over a mile from the mouth of the cave as though shot from an air-gun. The air has been known to change quite suddenly during exha-lation from cold to quite hot, accom-panied by a terrible roaring and gur-aling sound. gling sound.

Many scientific men have visited the

place, but the phenomenon still remains Miss Brooks smiled and blushed very unexplained; the residents of that sec-prettily, indeed. "O, you haven't asked tion fear a volcanic eruption. Something is wrong, sure. - Nashville Ameri-

#### MISCELLANEOUS.

for the use of persons traveling, the table of which is fixed in such a way that it remains steady in spite of the swaying of the boat or train. -Phonograph closets are very common

now in the offices of business men. A man goes in and talks to his machine and after a while the typewriter goes in and the machine talks to her.

-An English religious paper publishes the following advertisement: "A lady wishes to hear of a good school for girls, where the birch rod, now coming into fashion again, is used in the old way." -South Georgia barbers have a rule

that is universal. A stranger is required

to pay fifteen cents cash for a shave,

while a resident pays ten cents cash for

a shave, and can even get credit if he wishes it at that rate. -It came out in an English court lately that 100 wornout horses had just been shipped from that country to Germany and Belgium to be used in the manufacture of sausage, and that such shipments

were a regular thing. -Although Connecticut is but ninety niles long and seventy broad, it is so well supplied with railroads that you can travel in its cars close upon one thousand miles, it is said, without crossing its borders and without "repeating."

-When a lady living in Chelsea, sent to London for a doctor, she apologized for asking him to come such a distance. "Don't speak of it," answered the M. D.,
"I happen to have another patient in the neighborhood, and can thus kill two

birds with one stone." -One of the best shooting territories in this country east of the Rocky mountains is found in and near the Okifinokee Swamp, which covers a large area in Charitan, Ware and Clinch counties, Georgia and Baker County, Fla. It includes numerous lakes, the haunt of wild fowl, and forests of timber, the abode of large and small game in great

-The White House stables are a pretty group of brick buildings situated on a lot south of the mansion and sheltered by a row of box-trees. There are four orses for the use of the President's family, three bays and a gray. One of the bays is named John and he is of a remarkably gentle nature and extremely fond of eating sugar from Mrs. Harri-

son's hand. -The Cherokee Indians, an organized nation with chief officials elected by he people, a legislative body in two branches, and a judiciary, maintains a hundred public schools in as many districts, and two seminaries or high schools, which cost \$100,000 each; they also have an orphan and an insane

asylum and a penitentiary.

—There are now five buildings and fourteen rooms along the line of the New York Central devoted to the use of the struction. No intoxicants find a place in them, and they are substitutes for the saloon. They have been erected or eased by the men themselves, aided by the railroad, and especially by Cornelius Vanderbilt.

## RESPECT FOR AUTHORITY.

A Duty Which the Intelligent Teacher Owes to the Nation and His Pupils. Now that instruction in civics is in the air, may it not be in order to suggest that a good point to begin is by eachers, parents and all persons connected with the instruction of children and youth, persistently inculcating the duty of respect for men in public station, until proved unworthy, with at least decent fair play in the judgment of the character and services of public officials? The standing abomination of our po litical press is its vulgar, wicked habit of holding up political opponents to the moral condemnation of every body, as not only wrong in their political policy, but unworthy of personal respect. No man in Washington to-day in high office is exempt from this foul smirching of character and conduct by journals of great influence, widely read, and edited by men who would resent a reflection of the same kind on themselves as a deadly personal insult. Of course the well-informed dismiss this wretched twaddle for what it is worth, but the mischief comes lower down. Every bright American boy or girl reads the newspapers, and it is almost impossible to mention the name of an eminent statesman in a company of smart youngsters without hearing the epithets so freely bandied about in the newspapers applied even in a more positive way than by their grown instructors. What is to be hoped of a generation coming up to responsible citizenship with this contempt for public men and unbelief in official honesty? If it be said that there is much to justify this feeling, we reply that the present low tone of public life is largely the result of this habit of indiscriminate abuse and uncharitable judgment. Thousands of our most capable men are kept out of public life by the unwillingness to face this fire of scathing invective, leaving important places to be filled by the political hack with hide impervious to assault. worst of it is that the journals that assume to represent the higher culture are often the most cynical, intolerant, and reckless in their dealing with character and reputation. Let us begin at at the beginning, and teach children respect for authority, with charity, jus tice and moderation in dealing with the character, which is the most precious treasure of every man who serves the

#### State.-Education. What He Was Doing.

The distinguished literary man, in ne of those intervals of leisure that the tired brain needs now and then, was in his study with the door locked. He was rimming his corns with a razor.

Some of the greatest men on earth are troubled with corns. "My dead" said his wife, softly, as she tapped at his door, "shall I come in?"

"I am rather er particularly engaged now, Alvira," he replied, somewhat shortly. "Would you mind telling me, Henry, the nature of the article you are work-

ing on?" she inquired.

SCIENCE AND INDUSTRY.

-An Englishman has invented a desk -The application of hydraulic power to the manufacture of steel seamles boats is one of the latest things in England. These boats are thought to be in very particular superior to those made of wood, and can be made at about the same cost.

-Engineers use kerosene to remove the scales which form on the inside of boilers. The oil is poured into an empty boiler and the water then turned on. The oil, floating on the water, then comes in contact with the scales before the water does.

-The system of sinking shafts hrough quicksand and other waterbearing strata by freezing the soil with brine cooled by refrigerating machines is a practical success. The freezing extends thirteen feet each side of the vertical pipes which are driven down tocarry the fluid, and the frozen material

works like soft sandstone. -Physicians in Italy, etc., believe malaria to consist of a fungus floating in the air and soaking in the water, and likely to enter the system in much larger quantities through the water drank, than through the air breathed. Hence, in malarious districts all drinking water should be boiled and then fil-

tered. -Compound locomotives are to be the railway engines of the future, in the opinion of Mr. T. Urguhart, of the London Institution of Mechanical Engineers. In competitive trials a com pound locomotive consumed 22 per cent. less fuel than an ordinary locomotive running under exactly the same conditions.

-In a French village of about 400 inhabitants, eleven of the seventy-four deaths in eight years were from cancer. Dr. Arnaudet finds that six of the cases. of cancer were in a single neighborhood, among persons who used as a beverage cider diluted with dark-colored water from the swampy ground, and that in five of the victims the disease attacked the stomach. These facts are given in support of the view that cancer is contagious, the swampy water seeming to have served as carrier of the contagion.

-A chemist of Bockemheim, Germany, has discovered a new alloy, which is said to resist the attack of most acid and alkaline solutions. It contains 15 parts of copper, 2.34 parts of tin, 1.82 parts of lead and one part of antimony -being, in fact, a bronze with the addition of a little lead and antimony. It is claimed that the alloy is much better than ebonite vulcanite or porcelain for vessels or fittings liable to be acted upon by chemicals.

-Considering all the achievements of cience on this globe and among the celestial spheres, it seems strange that there is a part of this earth not yet explored. In other words, we weighed the planets and marked their orbits, but we are unable to make a man of the world. It is idle to imagine that Arctic exploration will be abandoned. The quest for the North Pole will go on to the end of time, if not crowned with

-A very simple apparatus for obtaining an electric spark is made by a German physicist. Round the center of a ommon lamp chimney is pasted a strip of tin foil, and another strip from one end of the chimney to within a quarter inch of this ring. Then a piece of silk is wrapped around a brush, and the inerior of the chimney is rubbed briskly. In the dark a bright electric spark may be seen to pass from one piece of tin foil to the other each time the brush is withdrawn from the chimney. Many other experiments can be tried with this ap-

## THE BLACK SWAN.

The Graceful Water Bird Is No Longer a Rara Avis. At one time the black swan was unknown or regarded as a freak of nature. In the "Antiquary" Sir Walter Scott

makes one of his characters say: "What! is it my rara avis, my black swan?" But since the discovery and opening up of the Australian continent it has become more common, for it is found in large flocks in the south and west of Australia. One writer says that they have become so abundant that he has seen flocks of them being driven in the streets of Sydney as if they were a flock of geese. They are found to be very prolific and are tamed with great ease, and it has not been found difficult to keep and breed them in captivity, but the experience has been that the time of their breeding is uncertain, because the seasons are entirely reversed on the northern half of the globe to what they are in the southern hemisphere.

The black swan is more slender in build than the common swan and not quite so large in body. The plumage, as the name denotes, is entirely black on the body, only a few flight feathers being white. The eyes are bright red, as is the beak, but the latter has a white tip. The feet are black. The young when hatched are of a whitish gray in the down .- Country Gentleman,

The Child of the Future. It is a dreadful point about these microbes that the only way to avoid having them in a virulent form is to have them in an artificial or attenuated form. The children of the future will not run through the present gamut of infantile disease, but they will probably be subjected to inoculation with various microbes every few months. First, they will be vaccinated for small pox; when they have recovered from that they will be taken to a Pasteur institute to have a mild form of rabies. Next they will be given a dose of the comma bacilli to prevent cholera, and so on through all the ever-growing series of disease microbes. O, luckless child of the future! you will never be ill and never be well; your health will be awfully monotonous, you will never know the weariness of the first night of measles. when it was so nice to lie in mother's lap and feel her cool hand on your forehead: you will never know the joys of convalescence, when oranges were numerous and every one was kind to you because you were not well; and your end will be to die of debility. How glad we are that we live in the present, with all its ups and downs of health to lend variety to life and death,-Hospital.

#### THE BOWSERS.

Mr. Bowser Takes a Turn Playing Hired Girl.

dilapidation the ashes he had wiped off as much forwhich the table eign substance as he could with the presented, I brush-broom used about the stove. I felt called upon tried hard to keep my face straight, but to reply: "Well, as you and Mr. Bowser looked up with an in-

been feeling very miserable for three or be the poorest one I ever had. She has no order or system, no taste or skill, and I won't keep her a minute after I pie-tin for the butter-dish, and I had to can get around."

"If this is her style I'll go out and discharge her." "Wait. If she was to go now you'd

have to cook your own meals." out and ask her what she means by such

nduct, any how." "But I wish you wouldn't. She may flare up and leave us in the lurch." "Let her flare! When the time comes that we can't boss our own house we'll

leave it!" "Mr. Bowser, please let the girl alone for me to deal with," I entreated. "I'll just speak a few words to her,

you know," he replied, and as I went into the sitting-room he went into the I'll ever cook for you, and we have had kitchen. In about two minutes I heard a crash

of crockery and the bang of a door, fol- the other women who employ help, and lowed by the sound of the girl's feet on the back stairs, and five minutes later she came down with her bundle and skipped out without a word to me. Mr.

"LOOK HERE, MRS. BOWSER. Bowser came in soon after that, coat off. sleeves rolled up and a roller towel tied around him, and he explained: "I simply asked her if she thought

this house was a saw-mill, and she called me a mastodon and flew for her bundle.

"Well, you and all other housekeepers have my deepest sympathy. I used to think it was you. fault that so many girls came and went, but I want to apologize and take it all lack.'

"But what shall we do?" "Do? Why, I'd run the kitchen until after breakfast and then get a girl." After he had been at work for a few dear, dear, dear! (Bursts into tears.) minutes I crawled out to see how things were going. He was washing dishes. He had the teapot, milk p'tcher, butter dish, napkin rings, two pie tins and the crockery all heared toget'er 'n a dishpan, and while he was washing them with a dish-towel he was wi; ing them on one of baby's old skirts taken from the hamper in the stairway. There were streaks of dishwat r clear lown to his heels, and a dozen new g ease-spots had appeared on floor and table, but he insisted that I go right ba ': and leave dat wouldn t do us no good. He'd only him alone, and I had no i-structions to show us a new pad ock what he bought give. He had every thin, dore up in dis arternoon. That padlock, Mr. Pres-

down he said: "Every thing out there is as slick as a oin, and breakfast is all planned for. That girl would have been sloshing around until ten o'clock before she had her dishes done. I'd like to be in your place about a month. I'd make some of em wonder why they were ever born!" "But every house has just such trouble."

"Then you women ought to league together to protect yourselves." "What are you going to have for "Never you mind, Mrs. Bowser, If I

don't get you the best breakfast you have seen in a whole year I'll give up that I don't know nothing about a About midnight I heard him mutter-

ing in his sleep: "Take two eggs-saleratus-five minutes-greased rag-one tablespoonful to

each person. It usually takes me all of twenty minutes to get Mr. Bowser out of bed in the morning, and the task is never accomplished without resort to fiction as to the lateness of the hour. On this particular morning he slipped out before I was awake, and he had been working in the kitchen a full hour before I got down. No man can be made to believe that there is a right and a wrong way to sheets or table-cloths. Mr. Bowser had set the table just as any other man would. The cloth was wrong-side-to, the teaspoons in the celery dish, the sugar-bowl running over, and the meatplatters and bread-plates had changed duties. Some of his slices of bread were two inches thick, and some almost as thin as paper, and two of them bore indisputable proofs that he had cut his

finger while cutting his bread. brought in the meal. He had his cut finger in a rag, black on his nose, flour on his ears and his face had that color peculiar to red paint. He also went lame in his left leg, caused, as I after-

falling on his foot. When he had every thing on the table he looked around hir with a self-satisfied air and proceeded to do the honors. Poor Mr. Bowser! He had put the steak into a spider without butter or grease, and it was as black as T THE supper coal and rather more tasteless. When table the other he poured the coffee the grounds insistevening, when ed on filling half the cup, and the eggs Mr. Bowser he had fried in some rancid lard the girl aplained of had set away and that could not be apthe biscuit and proached nearer than two feet. He had the tea, and attempted to bake some potatoes, but called atten- they were hardly warmed through. ## Not so, Governor.

At the conclusion of the legislative proceedings on Monday night last Governor Jackson is reported as having said "it has been a good Legislature no one can deny. Party pledges have been redeemed, and the people seem to be satisfied with the work of the Assembly." If the Governor uttered such a statement he was never more mistaken in his life. The late Legislature has called forth more angry comment than the worst Legislature that Maryland has ever been afflicted with, It simply seems impossible for one in Gov. Jackson's produced none. A great demand osity of some of the members of the position and possessing the intelligence he is believed to possess, to make such a bald inaccuracy, in the 1875. At that point American comface of well-known facts. It was clear to every well-meaning and right-works at New Albany, Ind., began thinking Democrat that the late Leg-islature had determined not to redeem a single pledge. Their action ing, American competition has resembled duced to about 35 cents a square foot Senator Allison said: "In my opin. at Annapolis for party preferment the price of plate glass that formerly and private plunder. It required the united effort of the most powerful and industrial basiness men of the development of that industry united effort of the most powerful and influential business men of Reltimore city to hold them. The development of that industry is necessarily slow. But our news the dominant Republican sentiment the dominant Republican sentiment of the most powerful and the development of that industry is necessarily slow. OUR WASHINGTON LETTER.

(From our Regular Correspondent.) WASHINGTON, April 7th, 1899 .-Senator Hoar, chairman of the Senate committee on Elections, has been requested by the members of that committee to prepare a Federal eec Representative Lodge's blanket ill on the same subject which is mw committee on Elections. From views committee it is probable that the till to be prepared by Mr. Hoar will be order to observe the workings of such

a law. Representative McComas' bill to prevent gerrymadering of Congressional districts, and which also provides that Representatives to the Fifty Second Congress shall be elected from districts composed of the same territory as those from which the Representatives in the Fifty-first Congress. The House committee on the election of President and Vice President and Representatives has, by a party vote, decided to report the bill favorably. The democrats on the committee, bitterly opposed the reporting of the bill and members of that party will do all they can to defeat the bill in the House, but as the Republicans are solid in their support of the measure its passage is reasonably certain.

Gen. Lewis A. Grant, of Minnesota has been appointed assistant Secretary of the War under the recent act of Congress creating that office. He is a Vermonter, but since the war has resided in Iowa and Minnesota. conduct before Richmond and in the

Senator Hiscock's select comittee cost of one poor little cent for the to consider the World's Fair bill, and but little was accomplished because the Chicago people did not satisfy the committee about their guarantee The effect of protection on tin fund, Another meeting will be held plates will be the same as on plate this week when Chicago folks will attempt to satisfy the enormous curicommittee. The committee does not seem disposed to hurry the matter at all and some of Chicago's friends

here are getting alarmed. The Iowa Republicans in Congress do not take any stock in the newspaper stories saying that the prohibition it will not be repealed. "Senator Wilson: "I am quite sure the moverepealed or modified." Representative Dolliver: "From my information I don't believe the law will be

repealed." Representative Lally: "In my opinion there will be no change in the law," Representative Reed: "I don't think the law will be repealed by the present legistature," Representative Conger: "The law will not and should not be repealed." Representative Kerr: "I don't think there is any danger of repeal." Representative Struble: "I

Representative Henderson has introduced a joint resolution providing for the election of United States Senators by the qualified voters of the several states instead of by the legislatures as at present. REAL ESTATE.

Under and by virtue of a decree of the Orphans' Court for Garrett County, sitting in Equity, and passed in a cause on the docket of said Court wherein Singleton Switzer et al, are Plaintiffs, and Jennie Stuck and others are Defendants, the undersigned Trustee will sell at Public Auction, to the highest bidder,

On SATURDAY, the 19th Day of APRIL, 1890,

at the hour of 2 o'clock P. M. of said day, on the premises hereinafter described, all that real estate situated in Selbysport district about 4 miles West of Selbysport, of which the late Howard Stuck died, seized and pos-sessed, containing about

ONE HUNDRED AND SIXTEEN ACRES OF LAND, and being the same property which is more particularly described in a deed from the Frostburgh Perpetual Building Association to Howard Stuck, dated the 8th August, 1883 and duly recorded in Liber W. H. T., No. 8, folio 24, &c., one of the land records of Gar-rett County.

Said property is improved by a

DWELLING HOUSE. and small outbuildings. and small outbuildings.

There is about 65 acres cleared and in cultivation, and it is well watered.

TERMS OF SALE—As prescribed by the decree of this Court:—One-third of the purnase money to be paid in cash on the day of sale, or the ratification thereof by this Court, and the balance tobe paid in two equal installments in nine and eighteen months from the day of sale, said deferred payments to bear interest from the day of sale, and to be secured by the bonds of the purchaser, with security to be approved by the Trustee, or ait the purchase money can be paid in cash on the ratification of the sale by the Court.

LUCIEN FRAZEE, Trustee.

SHERIFF'S SALE. Under and by virtue of a writ of fleri facias issued out of the Circuit Court for Garrett county, being No. 5 Judetals May 7, 1890, at the suit of Uriah M. Stanton vs. Henry M. Lin-

the shift of that M. Salton vs. Henry J., Infinger, I., the undersigned Sheriff of Garrett county did seize, levy upon and take into execution by an actual entry upon the premises on the 4th day of February, 1890, all the right, title, interest and life estate of the defendant Henry M Lininger, which he is entitled to in the following described real estate left by his wife, Mary Lininger, now deceased, said land being situated in Election District No. 5, Garrett county, and being known as Military Lots Nos. 2482 and 2485, except 20 acres of said lots adjoing Lots 2575 and 2577, as described in the deed from Lewis Lininger and wife to the said Mary Lininger dated 30th Dec., 1875, and recorded in Liber W. H. T., No. 2, folio 370, one of the land records of Garrett county, the said land hereby levied upon being about 80 acres of Lots 2482 and 2485 and as described in recorded in Liber W. H. T., No. 2, folio 570, one of the land records of Garrett county, the said land hereby levied upon being about 89 acres of Lots 28%2 and 28%5 and as described in the aforesaid deed in which the defendant holds a life estate as aforesaid; and I hereby the Double Notice that on

SATURDAY, THE 12TH DAY OF APRIL, 1890,

in front of Mrs. Taggart's Hotel, in the town of Oakland, at the hour of 20'clock P. M., of said day, I will proceed to make sale of the life estate of the above named defendant in the real estate as hereinbefore described, at Public Auction to the highest bidder for cash, on the day of sale, to satisfy the aforesaid execution and costs.

Said property is partly improved, and is sit-EDWARD N. CASTEEL. Sheriff of Garrett county.

#### VALUABLE STOCK FARM FOR SALE.

I am authorized to sell the valuable stock farm, commonly known as the "Willink Farm," situated about four miles from Oakland, and containing 465 acres. About 209 acresare cleared and under a good state of cultivation. The improvements consist of

LARGE DWELLING HOUSE.

Tenant House, Barn and other out-buildings Tenant House, harn and other out-the and a young orcherd.

There is also a five-foot vein of excellent coal on the tract. The farm will be sold for \$10,000 dollars, in easy payments.

The improvements coat more than the price asked. This is considered to be one of the best stock farms in the county. JAS. A. HAYDEN,

Twelve reasons why you should become a member and also to get your friends to do so: 1. It is based on sound business

principles - purely fraternal and strictly mutual. 2. It is ever ready to assist you in times of sickness or accident, having the money and the members.

3. It pays you 5, 10, 15, 20 or 25 dollars a week in case of sickness; its treasury is inexhaustible, and no interest is charged on money advanced.

4. It stands to-day the pioneer and the best of all Fraternal Orders of this character. 5. It don't promise to pay in install. ments of 3, 5, and 7 years, but it will

(as has already been done) pay you 6. It is growing rapidly every day, thus protecting you and your family

without question. 7. It has brought joy and comfort to thousands of homes in time of sickness and distress.

8. In eight years it has made an enviable record, which other organizations have attempted to use to push their own plans. 9. You enter into no unknown or

untried Order, but into a fraternity of 60,000 members, 10. No Insurance Company has been able as yet to crush it, as its members have full confidence in its management, and every obligation

has been honestly met. 11. You join an Order whose plan is original-in all others the plan is -borrowed from the IRON HALL.

12. You enter into an Order which has paid claims for sickness and final benefits, aggregating over \$3.491.864. \$218.982. has been paid by the order

### WHAT KATE DID.

How a Dear Little Girl Helped Restore Her Mother's Sight.

When it first flashed through her busy brain and spread itself out in all sorts of pretty shapes and possible colorings, it nearly took her breath away. It was at recess, while all the other girls were coaxing the boys to let them coast down the famous incline behind the school-house on the "Lions," "Antelopes," "Puritans," "Dexters" and "Lightning Expresses," or whatsoever their sleds happened to be named, and Katie had the whole warm school room to herself in a high, big, springless wood-wagon. in which to think. Even Miss Hyacinth had gone to Farmer Bassett's, across the it's steamin' hot-I'm nigh about fruz road (it had come her turn to board stiff! round with him) for something she had forgotten, and Katie and the old clock themselves. I doubt if Katie's heart, when she first thought of it, didn't distance the beating of the prim wooden clock, which, with its "Home of Washington" painted in ghastly, chalky white and fearful emerald greens on the lower gentleman in the wood-wagon. half of its glass door, stood in solitary splendor on a bracket-shelf just back and above Miss Hyacinth's orderly desk. But Katie's thoughts were upon neither heart-beats nor clock-beats, so absorbed was she in the charming idea that was dawning into a sweet and real possibility with every second's hurried flight.

All afternoon she found herself having to do battle with it-for it crept between herself and the personal prokept the divisor and quotient from pleased, but was in some way very, very slipping into the dividend, and hid even the big straw-colored map of Africa!

You see, Katie was a very ambitious little girl, and very much of a Yankee, getting on in the world, was concerned; and though she went to school regularly, she managed between times to do many nearer, still nearer, until-could it beodd tasks for the childless neighbors in that searsely settled section that brought into a pile big enough to pay the famous Dr. Optic to perform an operation on the dear, dark eyes of her mother, whose one cry was to look once again upon the face of her only child!

It was their own good doctor who had unknowingly shown her the possible way in which to earn the twenty dollars, which, he said, he would persuade the great man to accept for the difficult and

That was only yesterday, when, so chilled through from his long journey to see a patient out of town that he felt must head our horses this way as long he must stop to warm himself at Mrs. Keene's kitchen fire, Dr. Saltus had gladly accepted the cup of hot coffee Katie offered him (it being noon and Katie having her mother's and her own new silver dime into the cup before he handed it back, had said:

"I fear I shall never be able to pass this house hereafter without thinking of that cup of coffee, Mrs. Keene; so, if I should become a regular customer you must not be surprised. Your little daughter brews most excellent coffee, and there's nothing more grateful to a man aiter a long, cold ride."

So little ever happened at the home of the Keenes that, after the doctor had kindly looked at Mrs. Keene's poor eyes and told her that a very speedy restoration to sight was possible, had left the house, clambered into his buggy set on runners and driven away, Katie could think of nothing but what the doctor said.

She saw his kind face in the very bottom of the bright dish-pan instead of her own round, rosy little one, when, the dishes washed, she wiped out that useful utensil before hanging it on its own particular peg. All that evening she thought at intervals of their unusual visitation, and at night she dreamed that she was offering coffee to a whole army of gray-haired doctors, who, all quaintances what a splendid road it was and severally, dropped a dime into their emptied cups with a little metellic clang but it was really only Jack Frost trying to split the little mug of water she had placed upon a stand near her bed's head that made her dream of that sort of a

All the way home from school next day her project full-fledged and her busy brain teeming, Katie counted so many chickens before they were hatched that she had become, in imagination, a person of great wealth and distinction. little frame house of the Keenes, she Nor did the sight of a small frame house that stood in such a "poverty-stricken fashion," as she had always before thought, close up to the very road itself. tend to daunt her gay spirit. For now there was a splendid reason why the It would seem as if there was no end house should set upon the road-side; to the doctor's popularity, if all were and I am prone to believe that the friends of his who drew rein in at the

A large waiter was quickly covered nickels and dimes and even quarters of with a clean square of linen, and a larger a dollar, that should grow, gradually, bowl of sugar and a bigger pitcher of milk was placed in the center between the four steaming cups. Then, her very gladness dancing in her starry eyes, Katie made her way to the sleigh.

"I never enjoyed a cup of coffee more in all my life, little girl-who made it? "I did, sir," said Katie, pink with pleasure.

"Father," said another voice, "fifty cents isn't a particle too much for this delicious treat; is it mamma?" "No, indeed," said the first speaker, who wasn't mamma at all. "And we

as the snow lasts. Good-bye, little girl, till we see you again." Fifty-five cents! I'm afraid the mists that swell up in folks' eyes at joy as at sorrow must have blurred Katie's luncheon ready). and, slipping a bright own just then, for, without her being in the least aware of it, Dr. Saltus had driven his big black horse close beside her, and was himself looking curiously at her from under the hood of his buggy

top. "Has it become the fashion?" he asked softly; but even at this gentle

question Katie started. What, sir? Oh, it is you, doctor? "I'm inclined to believe so. Why that ign and all this coffee drinking?" Katie told him. And somehow while she was speaking something got into his eye-an object that seemed to re-

quire a good deal of brushing out with the folds of his pretty, pale-blue, silk it was captured by a privateer, as the handkerchief. And, when Katie had angels in the old North Church, Salem finished, he said in a voice rather different from his usual tones, "bring me your first regular customer, you know.' It seemed that "bowlfuls" were to the little caterer very profitable things. This first one netted her a quarter of a dollar, and the doctor said that she needn't be a bit surprised if a good many city folks took to driving out this way.

for sleighing. The twilight of that happy day deepened upon a joyful couple-a mother to whom the world was no longer dark, but full of rosy hopes, and a glad child who felt that this first day was but a promise of like days to come, and to whom the silvery snow yielded a silver harvest.

Miss Hyacinth was let into the secret and as long as the snow lasted and the sleighing carnival wakened the echoes of the silent country round about the allowed Katie to manage so that all her lessons were done in the morningsboth studying and recitation-and her afternoons were her own in which, as her teacher said, she could "receive.

NANTUCKET'S SWEET BELL.

How It Was Brought from Portugal to The subject of church bells is a re ninder of the beautifully sweet-toned bell in one of the church towers of Nantucket. It has something of a history. It was cast in Portugal and was intended for use upon a convent, being dedicated "To the good Jesus," in somewhat lengthy inscription in the Portuguese language, cast in raised letters upon its side. There are various romantic stories concerning the means by which it came to be hung in the belfry of a New England church. One says that it was taken from a floating wreck by a Nantucket crew; another is to the effect that street, are said to have been taken. The real truth is said to be that a Nantucket a bowlful-good measure, mind-I'm sea captain at a Portuguese port heard the bell as it was being tested, fresh from the foundry, and, being captivated by its exquisite tone, induced themakers to part with it and cast another for the convent. He brought it to Nantucket in his ship, and it has ever since hung in the church steeple. for he meant to tell his numerous ac

A simple dress of black brocade is made with straight, full skirt, the sole ornament being a small pointed apron, composed of pendant strands of cut jet The bodice in Louis XV. oval shape, is finished at the sides with square pocket pieces of similar jet strands, and a trimming of jet finishes the front of the coat.

A feature of the medium length coats and the long coats this season is a revival of the seam below the waist, used in coachmen's long coats. These coats are made of fine kersey cloths, medium wide wale diagonals, and fine faced cloths, and are usually double-breasted with high military collars and a seam directly down the front to meet the cross-over seam below the waist.

Among all the draped, shirred and puffed bodices, the plain tight-fitting corsage, laced behind, is finding its way back again; the front is fitted as closely as can be by a seam down the middle and by darts; the lower edge is pointed ever y week, and it's high time you set at the front and at the back; the front of the skirt is usually slightly draped, framing the point of the bodice, and the rest in straight plaits, alternately wide

and narrow.-Home. THE PEGU JAR TRAP. Why the Burmese Are So Successful in Catching Rats.

Rats may readily be induced to jump or drop into any receptacle, especially as it affords them adequate concealment, and they do this without one lingering suspicion of their inability to reach the only existing outlet when the time for retreat approaches. Thus traps on this principle may readily be designed, and are obviously preferable to our rat-traps where the vermin are numerous. This method was thus explained by our correspondent, who spoke of the trap as being "most successfully used in Burmah, where the rats are a perfect pest. This jar trap was set for three nights. On the first occasion I saw seventy-two rats turned out. On the second night only nine rats were caught, and on the third night not one was caught. The trap was then put away for some weeks, when it was again successfully used, but I am unable to say to what extent it then succeeded. The or 2 feet deep and 14 or 15 inches broad, and a hole was punched in the shoulder just large enough for a rat to enter. There was about six or seven inches of paddy (rice in husk) in the jar, which was then buried to within about eight inches of the top. The mouth of the jar was then closed with a board and a stone. A quantity of old timber joists and straw were in the out-house, and no end of rat-holes everywhere around.

"I incline to the opinion that my blue-legged Burmah servant very 'judic-iously' punched the hole with an old nail and a hammer, for, though it was by no means regular or quite round (it seemed at first sight too small), it just admitted a hungry rat. I do not think the rats, after they had eaten all the grain, could have gotten through the hole, they seemed so filled out; otherwise, with such a lot in the jar, some could have got to the hole and pulled through, I imagine. A moving mass of frightened, screaming rats is a bad taking off' for a jump, I admit, but an old fellow now and then might have hit the hole. I doubt if he could, however, have got through." It is important however, in traps of this kind, to see that the inside of the vessel is so smooth as to afford no foothold for the rats, or they will readily escape climbing the sides.—London Field.

A CHEEKY BOOK-AGENT. A Conductor Tells How He Put Him Off in

the Mud. "No one knows, except a conductor, the ways attempted by some people to deadhead their way on a train," said a ticket-puncher, as he handed back the reporter the remainder of a pass.

The reporter asked what made the conductor drop such an insinuation just then.

"O, some people are cheeky, and will do their best to beat you. A conductor is expected to have about twice as many eyes and ears as ordinary people. He is expected to know personally or in an indirect way every dead-head between New York City and the Golden Gate. If a 'particular friend' of the superintendent, general passenger agent, and director, or even down to head train dispatcher, comes along the conductor is asked to pass Mr. So-and-So on account of another Mr. So-and-So. This dead-beat business becomes a well-worn chestnut in the course of time. One-half of these unknowns, but all-important, would-be free riders never have any pass. They will come in, and, with as much assurance as cheek will warrant, ask to be passed. Then, again, there are others who are intimately acquainted with the conductor, and, of course, ask to be deadheaded. We 'never do this kind of business' don't work in any case, but then it is a veritable nuisance which ought to be abolished. Why, you would be astonished at the methods resorted to by some fellows who are professional 'deadheads.

"I remember not long ago striking a cheeky book agent. He boarded the train, and was dressed in the height of style, silk tile and all. It was a dark rainy night and the mud was fearful. When I came to Mr. Book Agent he went common Pegu jar I used was about 11/4 into his spacious pocket-book-his ticket seemed to have slipped out. He fumbled through a lot of well-worn papers, blank receipts, but no ticket could be found. Finally looking up, he said: 'Just wait a moment: I have placed it in my va-lise.' Slowly he opened the big valise filled with circulars, dirty linen and the other necessary outfit of a book vender. I went through the train and came back to the bewildered agent, who was still overhauling some back number papers in search of something he did not have. 'Ticket, please,' I said. 'I have lost it. said he, 'and can not find it.' 'Pay your fare, then,' said I. The truth was he was 'busted' and hadn't a cent. His station was several miles ahead of us, and as there was no regular stopping place between where he got on and expected to get off he would make his lost ticket racket work like a charm. The conductor, he thought, would not stop the train to put a 'gentleman' off in the rain and mud. He was fooled. Pretty soon we came to a water station out in a big field where the mud was shoe-top deep. It was raining torrents, and our unfortunate passenger had no umbrella. When the train came to a standstill I requested him to move out. A scene followed and trouble was threatened. It was a disgrace he thought to put a gentleman off in the rain. But he out into the dark rain and mud. He was elegantly dressed, and his clothes all the beasts of the field, but the army must have been ruined before he found shelter."-Cincinnati Times-Star.

And the smiling landlord mixed the drinks And pocketed his fee. Another day the comrades

That made them all complain. "Thermometer at ninety, And such a blazing sun! Let's have a drink to cool us off'No sooner said than done.

There stood the smiling landlord-In his buttonhole a flower: He mixed for Tom a "whisky-straight," For Dick a "whisky-sour;" And when he found that Harry Preferred a brandy-smash.

He mixed it with as good a grace—
And pocketed the cash.

A boy looked on and wondered How drink could warm men up one day, And one day make them cool. "It doesn't stand to reason. The thing can work both ways."
The smiling landlord answered him:
"No matter, if it pays.

"The whole thing's in a nutshell-When people want to drink,
It warms them up or cools them off,
Just as they choose to think.
It pays—that's all I care for."
The boy thought: "Yes, that's so;
But how it pays the other folks, Is what I want to know."

Twas easy to discover, For the downward road is quick o men that drink for heat and cold, Like Harry, Tom and Dick Their business went to ruin, And they to want and shame; But the landlord mixed his liquors, And sold them all the same

And so the boy learned wisdom:
"He sha'n't grow rich on me;
For I'll quench my thirst with water, God's own free gift!"-thought he. He kept his word, and prospered, In honest, sober ways; And, rich in health and happiness,

His life shows how it pays. -Mary E. Bradley, in The Better Day.

"DRUNKEN CHARLIE." How He Reformed and Made a Pleasant Home for Wife and Children. Charlie was an Englishman, a mekept by a little woman named "Nannie," and got a penny's worth of tobacco. She said to him: "Don't you remember the nice house you used to live in, Charlie? Would you like to know how Charlie did not answer, but turned to leave the store. Nannie called him back and asked: "Would not you go to the temperance meeting and sign the pledge? I will if you will." "If you These words rang in Charlie's ears all day long. Charlie knew Nannie was strictly temperate, and still she had said: "I will if you will." Next night they were both at the meeting. Charlie sat in the back corner where he could not be seen. At sign my name." When the looking about earnestly, said quietly: meeting was over Charlie went to said you would if I did." "I know I tassels as far as the eye could see. did," said Charlie. "Will you promise to keep it secret for one month?" After and fell into a long heap and turned inthe secretary of the Temperance society flow out far over the land. and made him promise to keep the seto his employer about his pay. He said: lie? By my books it appears that I owe you ten pounds and six shillings?" 'Yes," said Charlie, "and you promised out along the land. And these three

the secret, and his employer gave him and joined them, and rolled on. £11 and told him he hoped he would continue in the same way, and that he York and I saw great orchards. There would have many friends. Charlie thanked him and went straight to a veg-table store, and when he went in the into a long heap, and rolled off like a marketman brought out what no one else would buy. Charlie told him he did not want such stuff. He wanted They looked as big as the earth. They you don't want that, Charlie; it costs too so I came where I could see the other tled the silver. It made the buttered open his eyes. He weighed the leg of whisky.

"It rolled over the land like a great "It rolled off men, women and tled the silver. It made the butcher was turned into a river of beer and me and send them to my house in just half quiet, and rich, and green, and happy. an hour." Then he started for the coal-All behind it was ruin and wreck. And yard and asked the keeper if he would I heard an awful cry of people wanting

came in. "Where will you have this mutton?" "I guess you have made a mistake; it does not belong here." "No, I have not, it is for 'Drunken Charlie' -for that is the name he always went by-and he laid it on the clean, white table. As he went out the baker came in. "Where will you have this?" it don't belong here." "Yah," said the Dutchman. "Dis vos Drunken Charlie dat paid for dis bread, if I don't be mistaken," and he turned the contents of his basket on the table. Then the coal cart stopped in front of the door, and the coal man asked: "Where will you have this coal, madam?" don't belong here," said Charlie's wife; "there must be some very great mistake." "No, there is no mistake about it, for I was told to leave it at Drunken Charlie's." And he turned the cart up and dumped the coal in front of the door. The poor woman did not know what to think of it all, and she said aloud: "How I would like to cook some of that mutton and some of those potatoes for my dear husband's supper, and have some of that bread and sweet crackers for the children!" Just then the milliner's girl came to the door and asked: "Will you try on this bonnet?" "But it don't belong here; I haven't had a bonnet for fifteen years. "But your husband has bought it and paid for it half an hour ago." She mauaged to get it on her head and went out. As Mrs. Charlie went to put it away her chanic by trade, and could earn good husband crept out of his hiding-place wages, but he had become addicted to and threw his arms around her and told One day he went into a store her they were all hers, and that she would never want again. They wept together and rejoiced together, and soon they prayed together and read the Word of God, and with His grace Charlie kept the pledge, and his home became the you can have that nice house back again abode of sunshine and happiness.-Rev. and be as happy as you once were?" E. Payson Hammond, in N. Y. Witness.

shillings; but you may have it for

eighteen." Charlie paid for it, and told

her to send it to his house in just half an hour. He then started home as fast

as he could go. He went in the back

way, and got behind an old piece of car-pet that hung over the fire-place that

had not been used for a long time. And

he heard his wife say: "Now children,

your clothes are all mended and clean,

and you can go to the Sunday-school

but you shall have better when your father is a reformed man." When

Charlie heard this the tears rolled down

his cheeks. Just then there came a loud knock on the door. The vegetable

man now came in. "Where will you have these things?" "They do not be-

long here," she said. "Yes they do."

And he turned them out in one corner of

the floor, and went out as the butcher

to-morrow. They are not very good,

TWO GREAT RIVERS.

How Can We Keep the Hops, Etc., from Turning into a Destructive Flood. Frank Lane is a bright boy of twelve. He belongs to the Loyal Temperance Legion, and the rest of the boys regard him as a fine orator. He has many original ideas and an easy flow of words. When Frank has a speech as part of the programme at the legion, the other boys are sure to be on hand to hear. Yesthe close many signed the pledge.

Among them stood Nannie who said; "I speech. He went to the platform and

"Last night I dreamed. I dreamed his home, as if he was ashamed that a great, white, flying horse came to to be seen by any one. Next day me and I got on his back and rode out Old Homestead. he went into the little store to get his | into the air. We flew down to Texas, tobacco. "I thought you was going to sign the pledge," said Nannie. "You growing. They shook out their green

"Then we flew a little north, over pledge, but, strange to say, Charlie, as on miles of corn-fields. The corn stood of old, went staggering every day to his straight as soldiers, and tall as a man. work. At night he staggered home. It In a little while the corn picked itself was quite easy for him to play the and husked itself, and fell into a long

drunkard, he had been one so long. heap, and turned into a great river of purpose. When the month was at an end he spoke corn and began to flow out over the land. "Then I flew on my horse still farther "Yes, Charlie, I will pay you every cent North, over North Dakota; and I saw that is due you in hard silver." He field on field, all standing thick with found that he owed Charlie ten pounds rye; and it waved in the wind like the and six shillings. "How is that, Char-billows of a great green sea. Then the rye reaped itself, and threshed itself, and fell into a river of rye, and flowed

to pay me all in hard silver." "Hadn't rivers united, and rolled on and on. you better let me keep part of it for you, Charlie? You know you was Michigan; and I saw whole farms will soon spend it all for drink." "No I won't, for I am a temperance man now, and I haven't drank a single drop of liquor for one month."

And the barley reaped itself and threshed itself, and fell into a long see you come staggering to heap, and turned into a barley river, your work this very morning, Charlie?" and rolled off across the land. And it will side, knitting a stitch above to secure met the river made of the other three it. Then put in another thread of wool

> "Then I flew over Northern New were thousands of trees full of apples.

"Then I saw two great buildings. one-half a bushel of potatoes and a were full of windows and chimneys, and basket of turnips and carrots, and asked fires roared in them. The great river him to take them to the house in half made of five-the hops, corn, rye, baran hour. He then paid for them. He ley and apples-rolled right into these went to the butcher's next and asked two great buildings. My flying-horse him the price of a leg of mutton. "Oh, took me way up over these buildings much." "Yes, I do," said Charlie, and side, and there I saw the river that he put his hand in his pocket and rat- had just rolled in, rolling out. But it

asked it to be sent to the house flood. It carried off men, women and in just half an hour. He next went to children. It swept down houses, and baker and said: "Please send barns, and shops. It carried away a dozen loaves of bread clothes, and books, and furniture. It pound of crackers, a dozen sweet buns, the Johnstown flood. All before it was send him a ton of coal. He answered: to be saved from these rivers of whisky "Yes, if I can see the money." "Here and beer! Then my horse flew back to it is," said Charlie. "I can pay for it my home with me, and left me, I supnow." He did so, and said: "Send the coal to my house in just half an hour." my home with me, and left me, I supnow." I supnow. I my own bed. And I wondered what On his way home he said: "My wife has | we should do to keep the beautiful hops not had a new bonnet for fifteen years." and corn, and rye, and barley, and ap-And he went into a milliner's, who said ples from turning into a flood to destroy to him: "This is not the place, Charlie, every thing. And why it is we must let Next door is where they sell it." "I people have a trade of turning good

don't want any of their rum. I want a things into bad things." new bonnet for my wife; she hasn't had This was considered Frank Lane's best FIRESIDE FRAGMENTS.

-A house is no home unless it conain food and fire for the mind as well as for the body. -White woolen goods may be cleaned

by rubbing in dry starch or flour. Shake thoroughly. -Moths like warm, dark, stuffy corners, and always avoid light and a breeze, if possible. They are hardy beyond belief, especially buffalo moths.

-Wash and peal parsnips, lay in milk until ready to use, season, dip in flour and fry in clear lard or butter. If the parsnips are old parboil before frying. Some prefer egg batter to the flour; this, of course, is left to taste. -Thread of all kinds should be kept

as much as possible from the air, which rots it. If one buys thread by the quantity, which is the economical way of buying it, only so much as is needed for daily use should be taken out, and

match; put in pan, sprinkle with spoon of sugar and a little butter; place in oven in pan; cook half-hour, stirring often so as not to burn; when nicely colored drain off the butter, turn into the broth, boil slowly ten minutes, add a spoon of parsley cut fine, well washed; serve at once. This will give you a nice family julienne soup.

-Kidney Toast: Chop fine four veal kidneys with half a pound of calf's liver; season with pepper and salt. Make a little butter hot in a frying-pan and toss them about until cooked but not overdone. Remove from the fire and stir in the beaten yelk of one egg and half a teaspoonful of lemon juice. Spread on toast and serve at once. Stewed or boiled tomatoes, and hot Indian meal muffins, go nicely with this excellent dish.-American Agriculturist.

-Roast Fillet of Veal: Take the one out of the joint, and make a deep incision between the fillet and the saddle. Fill it with a forcemeat of veal stuffing. Bind the veal up in a round form, and fasten with skewers and twine. Cover the veal with buttered paper, and put in a moderate oven. Roast with melted butter, and allow two hours for a six-pound fillet. When done, take up, pour over melted butter and brown gravy.-Household.

-Meat mayobe saved in very warm weather if, as it is cut out, you have a kettle of boiling brine. Dip each piece of meat in this for about one minute: take it out and lay it aside to cool, and while cooling have a quantity of pulverized nitre (nitrate of potash) dust and sprinkle over the flesh side of each piece about a dessertspoonful, which will be absorbed by the meat in about half an hour; then pack the meat down. I have too much experience down side up, with plenty of fine salt— with retorts.—Burlington Free Press. say one inch deep-all over the meat. In a week or so overhaul and re-salt .-

PRETTY HOME-MADE RUGS. How Ingenious Ladies Can Produce Some Very Pleasing Results.

To make a rug, plenty of perseverance is needed, for it is a large contract she had promised to do so he went to to a great river of hops and began to to make one of ordinary size; but it is very pretty work, and can be done with ease by even those ladies whose eyeeret for one month. He then signed the Missouri, and I saw corn-fields-miles sight is failing. Purchase from some carpet dealer a supply of scraps of tapestry and Brussels carpeting; pieces that are too small to be worked up into hassocks are quite large enough for this

Cut these into strips of any length their size allows, but let them be of uniform width, say three inches. Ravel these out, rejecting the linen and collecting in a box the little crimped worsted threads. Then provide yourself with a pair of the largest sized steel knitting needles and a ball of the coarsest crochet cotton, either white or colored. Set on ten stitches and the needles. After knitting the stitch take the wool which shows upon the wrong side, and turn it toward the right and repeat the process. The back of the strips should be something the appearance of that of a body Brussels carpet, while the front should be like a sort of

thick, long napped plush.

The colors may be used without semilection, making sort of "chene" effect; or carpets may be chosen for raveling which show only shades of scarlet or blue; or brown carpets may be used for the center of the rug, and border of scarlet or blue sewed on all around.

After doing a little of this work, many ideas as to the arrangements of colors, will suggest themselves, and a little practice will enable the knitter to produce some very pleasing results. When the strips are all finished they must be sewed together at the back. It

is only for convenience that they are knitted in strips. The rug, as a whole, would be cumbersome and unwieldy to handle. Brussels or velvet carpet hearth rugs, are made with a strip of this knitting for the border, giving a very pretty finish.-Dorcas.

-A certain young lady-native of Belfast-wishing to please an absent friend Christmas, sent her to her home in Idaho a daintily-embroidered silk table scarf. In due time a letter came with grateful acknowledgements and saying: "A thousand, thousand thanks for the lovely present you have so kindly sent me. It is exquisitely beautiful, and came just in the nick of time for me to wear to our Christmas ball. It is very, very becoming to me, and you souldn't have chosen better colors. It is a new thing here and has made a great hit-for the girls are fairly wild one for fifteen years. How much is speech.—Julia McNair Wright, in Young over it and everybody is that one in the window?" "Twepty Crusader. over it and everybody is having one."-

Talks With Edison.

The following extract is from nent atoms of himself under complete atom in me-call it atom No. 4320-'Go be a part of a rose for awhile.'

"I was a country blacksmith for fancy, an imaginative way of expres- The tenth census of the United filty-three years," called out one of sing the constant desire which exists States, taken in 1880, showed the claimants, as he mounted the in the inventor's mind for a more ulation of over 50,000,000. If he platform and looked complacently intimate knowledge of the nature of been estimated by competent afther ready learned so much. This desire extent by the great store of all sorts ten years. of materials-animal, vegetable and mineral-collected in his labratory where he experiments upon and combines their various properties as a composer plays upon the instrument of his orchestra. Indeed, in this large and imaginative aspect of his mind, Edison distinctly reminds me of men having creative musical or poetic or artistic gentus. The mingled abstraction and fire in their faces and eyes are noticeable in his, at times, when he emerges from some private room in the laboratory where he has been in deep inventive work.

The above remark about the atoms, too, recalls a statement which he once made to me regarding his conception of matter. "I do not beme it seems that every atom is pos- pay a fine of \$100. An improvement sessed by a certain amount of primithis year over the former methods of tive intelligence. Look at the thous-In vain the chairman attempted to and ways in which atoms of hydro- tribution, in advance, of several ments, forming the most diverse substances. Do you mean to say that find it already filled out, and so will Atoms in harmonious and useful relation assume beautiful or interesting shapes or colors or give forth a pleasant perfume, as if expressing their satisfaction. In sickness, death, decomposition, or filth, the disagreement of the component atoms immediately makes itselffelt by bad odors. Gathered together in certain forms, the atoms constitute animals of the lower orders. \* Finally they combine in man, who represents the total intelligence of all the atoms." "But where does this intelligence

come from originally ?" I asked. "From some power greater than

ourselves." "Do you believe, then, in an intel-

ligent creator, a personal God?" "Certainty," said Mr. Edison. paved the streets of a city with gran- my mind, almost be proven from said he emphatically, "don't you

The Next Census.

The taking of the next census o "Talks with Edison," by George the population, wealth and industry Parsons Lathrop, in Harper's Maga- of the United States will begin on ried swiftly through the sulphurous zine for February. In addition to Monday, June 2nd, and will be clos air that overhung the bottomless pits being extremely practical in his ed so far as the process of the enu thoughts and processes, Edison has a meration is concerned within 15 days rich imagination of a creating sort, in cities and towns and within 30 and moods of ideal dreaming in his days in rural communities. The Inferno, side by side with the tough particular line. One day at dinner country has been divided into 175 he suddenly spoke, as if out of a deep districts, for each of which a superrevery, saying what a great thing it vision has been appointed, who it would be if a man had all the compo- turn has subdivided his district into sections, each of which contains as control, detachable and ajustible at nearly as possible, 4.000 inhabitants. will. "For instance," he explained, according to the figures of the last "then I could say to one particular census. For each of these an enu merator is appointed, and there wil probably be 40,000 of these assigned to as many sub-divisions. The first census of the United States, taken in 1790, is contained in a volume of 56 pages, and its cost was only \$25,000. horses during his earthly existance, different substances, and I should The total population enumerated 10 years ago by not very exact methols Of course this was only a passing was something less than 4,000,00. things concerning which he has al- ity that the present enumeration would indicate a gain of something is gratified to the farthest practicable more than 15,000,000 within the last

The work by the enumerator is by no means an easy one, and my one who has undertaken it under the impression that he will have an easy time next June will find that he has been mistaken. The enimerator as a rule comes into direct contact with only about one in seven of the population. He carses with him schedules of the population, of agriculture, of manufacture, of mortality and vital statistic and schedules relating to the desf, blind, the insane and criminal. At the close of every day's labor he must, as has been said, report by postal card to the supervisor and to Superintendent Porter. He will meet with many curious experiences, and his most useful facullieve," said he, "that matter is inert, ty will be tact. Every citizen is acted upon by an outside force. To compelled to answer his questions or taking the census has been the dis the enumerator at many points will

It is a curious fact, as shown by the last census, and in fact by MI, that while there are perhaps 1,500,006 women of the age of 29 or 39 or 49. there will only be about 65,000 of the age of 30 or 40 or 50. The inference is irresistable: they do not like to acknowledge having turned the corner of a decade. It would of course be unreasonable to presume that once in every ten years there is such an alarming decrease in the birth of girl babies.

A bashful young man escorted an equally bashful young lady to her home. As they approached the dweiling of the damsel she said entreatingly: "Zekil, don't tell any The existence of such a God can, to one you saw me home." "Sary," mind: I am as much ashamed of it as you are !"

> Fond Mamma-"Way, what have you in your apron ?"

Little daughter (breathlessly)-'Oh, mamma, such good 'uck! Dolly Dimple's cat had six kittens and her mamma would not let her keep but one, so she gave me the other five !" -Judge.

To be angry is to revenge the fault of others upon ourselyes.

A fresh mind keeps the body fresh, Take in the ideas of to-day, drain off those of vesterday.

Adversity is the trial of principle. Without a man hardly knows wheth-

Order of Publication.

Mary Virginia Albright, Plaintiff, vs. Henry
A. Albright, Defendant. No. 500 Equity. In the Circuit Court for Gar-rett County.

The object of the above suit is to procure a divorce a mensa et thoro, by the plaintiff from the defendant. The bill states: lst, That on or about the 10th day of Octo-ber, 1883, she was married to the defendant, Henry Albright, in Garrett County Mary-land, and with whom she lived as his wife land, and with whom she lived as his who until about two years ago, when the said defendant abandoned and deserted her, and that she had by said marriage two children, both of whom are still living, and are infants, to wit. Helen M., a daughter, 5 years old, and kohert M., a son 3 years old, and that the plaintiff has been residing with her mother in Garrett County ever since her husband deserted, and has had the care and support of her two infant children.

her two infant children.

2nd, That for some years prior to her husbands leaving her, he failed and refused to render any support to either her or her children, and that by his continuous drunkenness and victous conduct toward her, madeher life almost unbearable, and that she is informed he is now residing somewhere in the State of West Virginia, and has not recognized her or rendered her or her children any support since that time.

3t. That a short time here his decention.

any support since that time.

3d. That a short time before his desertion of herself and children, he treat-d her with great crueity, harshness and brutality, at one time striking and beating her, and that she now bears a scar upon her person where he struck her when drunk, and was coulinguously using profane and abusive language to her and the children. and the children.

4th. That ever since the said marriage your oratrix has behaved herself as a faithful, affectionate and chased wife towards the said Henry Albright, and her eather conduct has always been above reproach.

5th. That the said Henry Albright sentirely insolvent, and never had any property, so far as your oratrix is informed, and for a long time prior to his leaving her, he did not even render any support to either she or the children, but on the contrary, the support and care of said children, as well as herself, has been thrown entirely upon her and her Iriends.

6th. That the said Henry Albright has re-

6th. That the said Henry Albright has re-6th. That the said Henry Albright has re-cently made his threats of coming to take her children away from her and that she is lead to believe that he will make the attempt un-less he is restrained and prohibited by the or-der of this court, and that he is making these threats in order to annoy her, and make her life as miserable as possible, and that his character is so low and degraded that she would never consent to allow her children or either one of them to be under his control or influence.

Influence.

It is thereupon this 21st day of March, 1890 ordered by the Circuit Court for Garrett County in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in said County, once in each of four successive weeks before the 22nd day of April, 1890, give notice to said absent defendant of the object and substance of this bill, warning him to appear in this Court in person or by solicitor on or before the 8th day of May next to show cause, if any he has, why a decree ought not to be passed as prayed.

#### THE GOLDEN TIME.

When is the golden time? you ask-The golden time for love The time when earth is green beneath,
And skies are blue above;
The time for sturdy, health and strength,
The time for happy play. When is the golden hour? you ask, I answer you: "To-day."

To-day, that from the Maker's hand Silps on the great world-sea,
As staunch as ever ship that launched
To sail eternally.
To-day, that wafts to you and me A breath of Eden's prime,
That greets us, glad and large and free—
It is our golden time.

For Yesterday hath vailed her face, And gone as far away
As sands that swept the pyramids In Egypt's ancient day. No man shall look on Yesterday. Forever gone her toils, her prayers, Her conflicts and her pain.

To-morrow is not ours to hold, May never come to bless Or blight our lives with weal or ill, With gladness or distress. No man shall clasp To-morrow's hand, Nor catch her on the way; For when we reach To-morrow's land,

You ask me for the golden time, I bid you "seize the hour." And fill it full of earnest work. While yet you have the power. To-day, the golden time for joy, Beneath the household eaves; To-day, the royal time for work, For "bringing in the sheaves."

She'll be, by then, To-day,

0

To-day, the golden time for peace, For righting olden feuds; For sending forth from every heart Whatever sin intrudes. To-day, the time to consecrate Your life to God above; To-day, the time to banish hate,

The golden time for love.

( -Margaret E. Langston, in Golden Rule.

# A CAPTIVE IN BORNEO.

Remarkable Adventure of a Mar Who Fell in with Pirates.

By Superior Skill In Woodcraft and the Art of Writing He Astonishes the Natives, Is Promoted and Gets a Dusky Wife.

I always keep a sharp lookout for men who have had adventures. They are to be found in the oddest, most unlikely places and occupying all sorts of conditions in life. As a rule, the most quiet and unostentatious persons, if they have seen any thing at all, have seen the that he was not in the race. Expert as most of the world. The conductor of a he was in Borneo, he could not have certain street-car in this city has not led such a prosaic and uninteresting life as his present employment may lead you to suppose, or else he is a gifted romancer of the Munchausen stripe, and I have

been sadly deluded. Henry F. Murchison-that is not his real name; so don't look for him-who and fell to the ground with a mighty may take your nickel, or help you to alight any day, if you are of the proper sex, speaks convincingly of his seven years' captivity in Borneo and he tells his story so well and clearly, being a man above the average in education and intelligence, that I give it, without re-

vision, in his exact words:

When I came to myself the blood was still trickling slowly down my face. The blow from the heavy crease which I had sought to ward off had got home and descending on my unprotected head, had deprived me of my senses. It was some time before I could move, for I was very stiff and sore, and indeed badly wounded. It was almost dark where I had been thrown under the hatches of the junk which effected our capture. A solitary ray of light penetrated from forward and found its way aft. Guided by its feeble rays, with difficulty I groped my way to the forward hatch, and ascending the companion stairs, in this vessel nothing but a rude ladder. I gained the deck and looked about me. The crew of the junk were holding high carnival astern. The blood of recent conflict was yet unwashed from the deck. I glanced over the starboard quarter. Hull down, and wrapped in lurid flames that shot up into the fast darkening sky, was the bark in which we had sailed from Boston three months before. A lad of eighteen, I was the sole survivor of her crew, ruthlessly butchered by the pirates. For what dreadful fate was I alone reserved? Overcome by the awful calamity which had overtaken me, as the dreadful scenes through which I had fish, which abounds on those coasts, passed that day recurred to my mind, what little strength I had gave out, and falling to the deck I again relapsed into unconsciousness.

Two weeks had elapsed before I once more became cognizant of what was pared a special exhibition to illustrate going on around me.

Early one morning I was awakened by the crowing of barn fowls. In a dream of delight I lay and listened. Surely I was home again in the farm in Wisconsin! A glance around the rude hut in which I lay dispelled the illusion. Rising from my couch of leaves, I pushed aside the mat which hung at the entrance. Men and women in primitive costume thronged around me. A tall man, who seemed to be in authority, apparently moved to some degree of compassion, explained the situation to me. I was a prisoner among the Dyaks

At first I was so overwhelmed by my miserable situation that I did nothing but long for death. Finding, however, that I was treated with tolerable kindness, hope began to revive within my breast. Nourishing food and rest did wonders for me. My wounds healed, my old-time vigor returned, and with it the desire for life-and liberty. This are a fraud, and shall go back to woodlatter, however, seemed, for the present at least, a very remote contingency, I was so closely watched, night and day, that there seemed to be no chance of

The town where I was confined was might have contained, perhaps, 3,000 post where they flogged Maki yesterday toak and other merchantable woods; spade under his robe."

when dull, they eked out an existence by piracy on the high seas and frequent marauding expeditions against their weaker neighbors. Being a strong, active lad, I was assigned a place in the wood-cutting gang. Their method of elling trees was very primitive. The wood-cutter sits in a squatting attitude beside the tree he wishes to fell, and nacks it with a kind of adze at a height of about two feet from the ground. It was the slowest method I had ever struck, and after a day or two at it I determined to show them how trees were felled where I came from. In their stores I found a good Green River axe, taken no doubt from some American vessel years before, for its edge was dull and it was rusty from long disuse. I then told the man in charge of my gang that I had a new way of cutting wood, and he reported it to the old chief. I was sent for by that worthy whilst I was sharpening my new-found

"I have heard," said the chief, as he regarded me with a threatening look, 'that you have a way to cut wood which is better than ours, Is that so?"

very evening.

I replied that their way was a slow and tedious one as compared to mine. "Come, boaster, then," said the chief, we will test the truth of what you say. If you have lied, it will be the worse for

He led the way to where two large trees-a kind of native oak-grew. Indicating that I should fell one (the larger of the two), he directed his most expert wood-chopper to attack the

I only asked a few minutes' time to put my axe into better condition, pointing out that it was still dull. The request was granted. I will give you while I am smoking

one pipe." said the old chief; "then you will have to make the trial, dull axe or sharp axe." I set at work at once with my piece of

sandstone, and before the old chief got through with his pipe, I had an edge on the axe like that of a razor. I then anounced myself ready to undertake the ontest.

My opponent was a great, brawny fellow, weighing close on to 200 pounds. The contest looked like an unequal one; but in reality it was nothing of the sort.

At a signal from the old chief we set to work, America vs. Borneo.
I will say this for the Dyak. He chopped like a Trojan. The perspiration poured off his black face, and the way in which, in his cramped position, he made the chips fly, was something to

wonder at. Before he had been at it five minutes, however, it was quite apparent to all

consin. Crash, bang, thud, went my good Green River axe through the yielding wood. I was back again in the old land, a hardy boy at work in my native forests. The tall oak swayed, toppled crash. Then I turned to inspect the work of my opponent. He was about played out, and was still chopping feebly, for he knew he would be punished if he rested; but his tree was not

half way through. The next morning I was made fore man of the gang, but was soon recalled from work of that kind and given lighter tasks, for the old chief took a liking to me. He was a pretty decent fellow for a pirate. To amuse him, I made a board and men and taught him play checkers, and we used to sit gambling away our tobacco and drinking arrack by the hour together, until I almost forgot I was a prisoner, and sometimes really enjoyed myself. I will do myself the justice to say that whatever influence I had over the old man I exercised for good. It was at my instance that the barbarous system of punishments in vogue when I first landed became greatly abated. My first real step in the direction of reform, however, was in teaching his son to read. When once its advantage had been impressed upon him, I had hopes that the old chief would permit the establishment of a school where the young Dyaks, at least, could be given some sort of an education.

I knew the old ones were hopeless. After about three months' steady work I got the alphabet and its uses through young Tum's skull, and an additional six weeks made him a tolerably proficient reader. To enable us to write, I made a pen from the feather of a goose which was as good as could be desired: thin bark was our paper, and the cuttle supplied us with our ink. I now thought the time had arrived for me to show the old chief the power of what he had always regarded, as had his six wives, as a species of fetish, and one day I prethe advantages of writing and reading, which was the best and most convincing I could think of at the time. I arranged with the old chief that his son Tum should be blindfolded and led off into the woods, and that the chief should hide any thing he chose in any place he liked, and then tell me, and I should send a "fetish" to Tum informing him of what had been done. Tum was then

to find the hidden article. The old chief assenting to this arrangement, Tum was sent off into the woods with a strong body-guard. The chief then took my axe-head and caused a pit to be dug at the foot of the great post in the center of the town. Into this pit he threw the axe-head, covered it up, and covered over the spot a number of bags of rice which entirely con-

cealed the freshly-turned earth. "Now," said the old chief. "if your fetish tells Tum where the axe-head is. there is something in it: but if not, you chopping."

Paying no attention to this little pleasantry on the part of the old gentleman, I sat down and wrote on a piece of bark to Tum as follows:

"Tum: Your father has hidden my for more things are showed unto thee situated close to the sea shore, and exe-head in a pit at the foot of the great inhabitants. When trade was good the for stealing. Take away the rice sacks population did a thriving business in and dig it up. The old man has got the

guarded all the way." "The 'fetish' again," I said, smiling. Then Tum went straight up to the the oil shipped by it, but on all oil carpost and throwing aside the rice sach, and over the railroads. During 1878 rewent to work at the ground. In a few bates to the amount of \$8,960,840 were

thing. "Come with me at once and show me the fetish. Teach me how to write," roads. A barrel of oil weighing 390 he said at last, "and I will make you a pounds was carried 400 miles and the great chief."

"What made you hesitate so, Tum," I asked, "when you first came up?" "What do you write 'pit' for," growled occasion an opposition oil company Tum, "when you mean 'hole?"

I burst out laughing, but there was good logic in Tum's argument. How the company having agreed to ship the many of us confine ourselves to good. old Anglo-Saxon? "Come with me," said his father. 'You can have six wives, just like me.

I will choose them for you this very evening. You are a wonderful man." I replied, modestly, that one would do for the present, and as in all likelihood I should never get off the island, I chose for a partner a young girl who had nursed me during my sickness, and we were married with great public rejoicings. After a time I really became quite attached to her, for she was a very intelligent creature. I loved her as

"I get off at State street," I chipped in just here. "Let me go."

"Not until you have heard how I es caped," said the conductor, as he rang up one fare and scooped in three nickels. "I don't want to know any thing more about you," I protested. shall be late at the office." "Besides, I

New Orleans with strap-oil and Chinese "No! No!! No!!!" The street-car conductor may be and probably is a first-rate fellow in private life; but if he thinks you are guying

him when he's on duty, he will fill you up to the brim .- Austyn W. Granville, in Chicago Journal.

A CORSICAN VANDERBILT. Some of the Wonders of Count di Borgo's

Fairy Chateau. The Vanderbilts need not imagine wealth who can build palaces nowadays. What do Cornelius and William V. think of the Count Pozzo di Borgo, who, own- than long-continued, strong emotion. ing a whole mountain in Corsica, has Even pleasurable emotions are exhausterected or is still building a chateau on its heights for a summer residence. The private road leading to it is nearly six miles long, and wonderfully constructed, while half way up the mountain stands the family burial chapel, as large as a country church, and is a marvel of ially those that come of sore bereavearchitectural beauty. The chateau has ments. been building these four years, and it can not be finished for three years more. The Count possesses an unrivaled view on all sides, from over the Mediterranean, then Ajaccio, which seems miles below, and all the valleys, all the surrounding mountains on the other. From these heights visitors look off into space and the light-headed ones come pretty near taking a drop overboard into the magnificent scenery. The lower terraces where this Count has his stables resemble fortifications. They are all built of granite, and the stone for the house has been brought from Paris. Count Pozzi di Borgo's ancestors were Napoleon's greatest friends, and afterwards his greatest enemies. One of them fought a vendetti with one of the Bonapartes. Of course the Vanderbilts have no such romance as this to build upon, but it is a comfort to know that far away in Corsica is a new summer residence which can take the shine off Newport's palatial cottages. We had begun to fear Europe held nothing like them and America would burst with her own importance. - Bostop Herald.

STANDARD OIL METHODS.

How the Millions of the Great Monopoly The Standard Oil Company is another Alustration showing the modern facilbark and study attentively, whilst he looked over inquiringly at me. What if ities of gigantic combinations. The company began in a partnership, during been taught-in a fit of sudden embar- the early days of the civil war, between muel Andrews and John Rockefeller. The chief noticed Tum's hesitation, A drews had invented a new process by s extracted from petroleum than had I looked at him as much as to say: been possible under the old method, and by virtue of this advantage the company soon became prosperous. In time, as it gained strength, it absorbed some rival empanies, crushed others, and finally stood at the head of the business. Then it extended its operations still further. It ran its own acid-works and glue factories, made its own barrels, and controlled the disposition of kerosene through the country. Not satisfied with this, it began to exercise a control over "Who told him that?" he exclaimed the railroads, which finally enabled it to crush out all effective opposition. Vanderbilt once said that there was but one man in the country who could old man. "But will it tell him what he dictate to him, and that was Rockefeller. The Pennsylvania railroad entered into a written contract with the Standard Oil Company, by which it agreed to "Marvelous, truly," said the old chief, charge double rates for all oil hauled by other shippers. When this contract was exposed in the courts a new agreement was made by which the Standard Company was allowed a rebate not only on

minutes he was able to hand the axe-head to his father, who was unable to paid to the company, and for the seven-teen months ending March 31, 1879, the speak for very wonder, but kept turning | rebates amounted to \$10,151,218. Similar it over in his hands as if it was a living secret agreements were entered into with the New York Central, the Erie and the Atlantic and Great Western empty cars returned for 80 cents, while 90-pound can of milk was carried 60 miles for 45 cents. On one had 10,000 barrels of oil carried by pipe line to the side of the Erie track, oil, but an agent of the Standard Company appeared on the scene, stopped the shipment, and the oil was still waiting to be shipped when the matter was investigated in the New York courts some months later. This was but another illustration of another method by which the Standard Oil Company used its influence over the railroads to crush out its rivals. It compelled the railroad companies to refuse to ship oil for other producers, and when complaint was made to President Scott, of the Pennsylvania railroad, he said that all he could do was to ask the Standard Comardently in those days as I love her pany to allow him to carry the oil over his own road. The passage of the interstate commerce act has put an end to this despotism over the railroad companies, but the facts indicate the unlimited power of this trust. By the exercise of this absolute despotism the Standard Oil Company was enabled to crush out all effective opposition. Now its power is not less-it is merely turned

Change of Scene the Best of All Rem-"I am a woman of strong constitution, forty-six years old, and have always had good health until recently. After repeated bereavements, many cares and much hard work, I have fallen into a very depressed state. For more than a year I have found it difficult to sleep, or

"Is there hope that I may entirely recover? If so, what are the best means to be used? Is it best to take medicine or not? Is it best to go into company and to church, or to stay at home? As I am but a type of a very large class of women, I thought you might be willing

to give us some hints." The explanation of the above condition is a very simple one-the undue expenditure of nerve-force. It is like they are the only people of mighty the persistent spending of more than one's income; it must end in bankruptcy. Nothing exhausts nerve-force faster ing, but they are seldom long-continued.

Indeed, it is difficult to keep them up. But the depressing emotions of grief, anxiety and care tend to perpetuate themselves. It is difficult even for a strong will to throw them off, espec-

The case is rendered still worse the fact that, in this condition, the cere bral arteries are apt to become enlarged, and so to carry too much blood to the brain, to the inducing of wakefulness. Now there is nothing like sleep to restore lost nerve force. It is the

nightly restorer of the daily waste. Further, the above causes draw newe force from the stomach and digestive tract, and thus lessens its power to nourish the nervous system. Of course, cheerfulness in such a condition of general depression is not easy, and a direct attempt at it is of little worth at the best.

The tendency in such cases is to look on the dark side. Suitable treatment, however, is sure to remove the trouble, and that, too, somewhat readily. The prime thing is to remove the cause. Grief must not be cherished. Faith in God should lighten the burden of care. If hard work must still continue, means should be found to lessen it for a time. The greatest benefit would come from

a change of scene and surroundings for a few weeks. It is indispensable that sleep be secured in full measure. Less blood must go to the brain. A foot-bath, quite hot, just before retiring may prove a help, and so sometimes may a hot cloth on the stomach. The food should be nutritious and ample, but easy to be digested.

It will be a help, rather than a hindrance, to go to church and into pleasant company. There is aid in all innocent liversions .- Youth's Companion.

The hundred and twenty-fifth house meper of an old widower of Pleasantile. .'a., gave him a thrashing the SNAKES IN IRELAND.

Good St. Patrick's Work Undone by From Ireland comes the news that nakes have appeared in that country. It seems that about five years ago a showman named Wilson came from America with a show of living wild animals. He landed his show at Queenstown, and gave exhibitions up through Ireland with more or less success. But one night at the little town of Amraugh, in Tipperary, Mr. Wilson got very drunk and attempted to clean out his own show. The constabulary force sought to interfere, and (whether as a means of self-defense or in a spirit of humor, I know not) Mr. Wilson turned all the wild animals loose. Of course this created a terrible uproar, and for a week the neighborhood was in a state of wild excitement. The wild beasts were duly either captured or killed, but for three years no trace of the den of snakes let loose on that memorable night could be found. Meanwhile Mr. Wilson went to prison for two years.

Two years ago the people in the neighborhood of Amraugh began to miss poultry and pigs. Several vagabonds tell under suspicion, were apprehended, and were locked up. But the depreda-tions continued, and finally a farmer's lad testified that upon returning late one night from a merry-making he had seen the evil one in the guise of a serpent making way with a pig across a field. The village priest took the lad in hand and questioned him closely, but nothing could shake the fellow's testimony. About this time other people detected similar flends in the act of like depredations, and at once arose a hue and cry that the spot was a damned one, and had been given over to the devil for his diabolical practices. Special prayers were said and the devil was publicly denounced, but the depredations continued, and presently from Castelraine, a town twelve miles disnt, came word that his satanic majesty had begun operations in that locality, his victims in this instance and in this place being sheep, not poultry and pigs. In this dismal emergency the Bishop was most properly appealed to, for the parish priests were at their wits' end and their parishioners were well-nigh crazed through fear. The Bishop promised to investigate the affair, but instead of resorting to conventional ecclesiastical methods, that holy and sagashrewd detectives from Dublin, the inholy work by proxy-not in the guise of ternal instincts especially, nor can one dragons and serpents, but in the person seriously believe that the Englishman of certain lawless characters too lazy to was the happier for the fowl's miswork and just knavish enough to steal. | placed affection. If the young physician The detectives, laboring under this is right, we may perhaps expect to see heresy, made their investigations quiet- depilatories as popularly recommended ly, and in the course of a fortnight re- as the contrary kind of nostrum. ported to their employer that the dep- while a dozen advertisers offer to make had indeed been committed by serpents, a way of making the thin fat. Baldness, the detectives themselves having seen according to the doctor, is the result of and watched the same upon three dis- fatty degeneration and persons naturtinct occasions seize, kill and carry off ally lean can not, by taking thought, their prey. The serpents were described as dark of color and fully fifteen Sitting up late in an atmosphere of gas feet in length. They killed their vic-

tims by coiling about their bodies. The story was discredited by the clergy and laity until, as good luck would have it, a correspondent of the Freeman's Journal (at Dublin) recalled the significant, not to say portentous. circumstance that the numerous and divers species of snakes which had es- rose in their profession by baldness: yet caped from the Wilson show about three years previous had never been captured. Then of a sudden the mystery was cleared up and bands for the exterminaof the monsters was speedily organized and Ronsard. There is reason to be among the vengeful peasantry. Three of the snakes were shortly thereafter seen, pursued and killed in the bog east of Amraugh; the largest of the snakes measured four feet; in the maw of each was found a pullet. About a month thereafter a fourth snake was killed near Castelraine; this snake upon being cut open was found to contain very many little snakes which immediately glided into the grass and escaped before the astonished rustics could apprehend them. Subsequently, stimulated by the advertised reward of half a crown and a special dispensation for every snake, alive or dead, the country people caught eleven of the smaller snake -none measuring more than seven inches in length. Then the snakes seemed to disappear, and, no further depredations being noted, the excite-

ment gradually died out. But it is now reported, after a lapse of two tranquil years, that snakes have suddenly appeared at and around Ballingal, an agricultural region thirty miles north of Castelraine, the country seat of the Earl of Densloe. These snakes are of a strange species; though none have been captured, they are said to be of enormous length, breadth, thickness, voracity and ferocity, and to make a noise when moving like the clatter of dice in a box; they kill by biting, and they have created great havoc among the flocks of his Grace the Duke, as well as in the coops and sties of the peasantry. Simultaneously serpents similar to the Amraugh and Castelraine varmints have appeared still further to the eastward, and have caused such a panic that the country folks are afraid to venture out of doors after nightfall.

The theory is that in five years the eptiles let loose by the wretched Wilson during his ribald drunken frenzy have multiplied so numerously that a militant union of Church and State will be necessary to restore the island to the virgin condition in which the good St. Patrick left it .- London Cor. Chicago News.

-The annual report of the Peabody Trust for the maintenance of good homes for the working classes in London shows the birth rate in the houses kept by the trust to be 8.72 per 1,000 above the rest of London, and the death rate nearly 1 per 1,000 below the average, while the infant mortality is only a little over half the average. trust has spent over \$6,250,000 in providing buildings for 20,374 persons. The average earnings of each family are about \$5.75 per week, and the average weekly rent about \$1.20. The rate per room is 52% cents per week.

PLEASURES IN BALDNESS.

An English Journal Gives Some Comfort. for Lost Hair. "That bald Cæsar, the famed Roman

vight" is known to have disliked being bald. Hence, his detractors declared, his love of the laurels of victory. Certainly it were a seemly thing if our elderly Generals could dine out and go to the play in such laurels as they may happen to have won; for baldness, though indispensable to a young doctor or solicitor, and highly desirable in a statesman, is not coveted by the sons of Mars. A young physician, in a letter to one of the papers, very touchingly bewails the limness of his purse and the thickness of his ambrosial locks. The "high and dome-like forehead," which he admired in the busts and effigies of Shakespeare, seems to this youth a feature indispensable in his profession. Yet he, of all men, should have the remedy at hand, and be skilled in the depilatory art. He has only to purchase or mix the antidote to those prescriptions for lengthening and thickening the tresses which are advertised in the beautiful decorations of our hoardings. It has been subtly remarked that many wise and wealthy persons remain bald, and hence it has been inferred that the inventions of Mrs. Allen and others are not invariably sovereign. But, perhaps, the wealthy and wise are intelligent enough to keep the advantages which nature or the wearing of ill-ventilated hats has given them. They know when they are well off, like the poet and orator, C. Licinus Calvus, who, after the manner of the living skeleton, was probably "proud of the title." The young doctor values a head denuded at about five hundred pounds a year, and, really, if he is acquainted with his business, he ought soon to possess that "shining place," where, as the elderly riddle quaintly remarks, "there is no parting." He thinks that a flowing beard has also its market value, yet he does not seem to have remarked that the owners of flowing beards are usually very bald men. It is as if nature could not support the growth of so much in two places at once. By leaving the chin unshorn the head may be brought, as it seems, into the desired condition. "Even the lower animals," he maintains, have an admiring affection for the ornament which he desires, and he illustrates this by the waggishness of an ostrich. The benighted bird attempted to hatch the head of a sleeping Englishman—in South Africa, we presume. This was flatterious man enlisted the services of two ing, but embarrassing on the whole, for the ostrich is a bird with a strong sense tellectual center of Erin. The Bishop of its personal dignity. "Hell has no fancied that the devil was doing his un- fury like" an ostrich duped, in its maredations at Castelraine and Amraugh | the fat thin, nobody has yet discovered may do a good deal, and the tall hat of modern life is also valuable to persons who covet an appearance of precocious wisdom. Every kind of dissipation is also recommended; but this prescription has obvious disadvantages, and is even uncertain. It is not recorded that Mr. Bob Sawyer and Mr. Benjamin Allen no young men ever did more to deserve this gift. To be early gray seems rather the privilege of poets than of physicians, if we may judge by the cases of Shelley lieve that Byron would have been bald had he lived a little longer, and it is a matter of curious speculation whether his success would not have waned with his curls and when his days were really in the yellow leaf. On the other hand, he was just the man to wear a wig. The poet, in the following stanza, celebrates a sage who, perhaps alone among mankind, agreed with the young doctor:

"There was an old person of Bristol Who had a bald head, and a pistol: He shot at all the Aldermen Because they were balder me And then blew out his brains with the pistol."

-London Saturday Review. THE INFINITESIMAL.

In Importance It Is Second Only to the the Infinite. If the revelations of the telescope in the world-crowded realms of space till us with amazement and awe, the wonders disclosed by the microscope in the minutest atoms that float in the water or the air, or go to make up the solid

aggregate of terra firma, no less compel our admiration. The waters and ice of almost the whole Antarctic Ocean are literally embrowned with tiny animalcules. To the unscientific these little creatures are merely speeks of mud or dust, but when magnified they are seen to be animals. Very insignificant animals, you will say. But what are they doing? Simply shoaling the Antarctic Ocean-laying the foundations of a great island or perchance a continent. Recent explorations in that region show that they have already formed a submarine bank four hundred miles in length by one hundred and twenty in breadth. Small as these creatures are, they are engaged in a

vast business. A large portion of every soil is composed of particles which either are or have been alive. Some years ago the inhabitants of a district in Sweden were threatened with famine, and in the hope of staving off the evil while the crops were growing, they eked out their scanty supply of grain with earth. They found this mixed diet almost as nourishing as the unmixed meal. Animal life it is well known, can not be sustained by inorganic matter. How then could mere dirt be nutritive? The microscope solved the mystery. The "dirt" was found to consist of shells of infinitesimal creatures, which under chemical analysis proved to be formed of nutritious

Verily, there is wisdom in the precept, "Despise not the day of small things."— N. Y. Ledger.

#### A PEDDLER KICKER.

Householders Have at Last Found a Protector.

The Householders' Mutual Protective and Beneficial Association has mapped out a vigorous policy for the new year, says the Philadelphia Record, and expects soon to inaugurate several important reforms in domestic economy. The last meeting of the association was held on Saturday evening, January 4, and at

"IS THE LADY OF THE HOUSE IN?"

that time an important report was re ceived from the committee on front-door and back-alley nuisances.

For six months the committee had been considering measures for the relief of tormented housekeepers from the fiends who pull the door-bell or bang at the back gate, and the remedy that has been devised is calculated to strike terror to the hearts of those against whom the movement is directed.

The report of the committee on frontdoor and back-alley nuisances contained two separate recommendations, accompanied by plans and specifications. The first suggestion dealt with the front door and its abuses. After enumerating the various classes of book agents, peddlers, sewing-machine salesmen and venders of matches and feather dusters, the report advised the adoption of an automatic catapult for the abatement of the nuisance.

The device consists of a powerful spring concealed beneath the mat upon

"YES, THE LADY IS IN nocently steps upon the mat and pulls the bell. When the maid opens the door he sweetly asks: "Is the lady of the house in?" and the maid as sweetly replies: "Yes, she is in," at the same time touching an electric button on the door post, which releases the powerful spring and away sails Mr. Book-Agent in a parabolic curve to the opposite side of the street. The committee reported that a device of this character could be

THE NOISY BACK-GATE BOY.

put in place for eighteen dollars. The principal defect in the apparatus is the necessity for calling the hired man to set the trap again after it has fired off a peddler, but the association's engineer hopes to remedy this. The second part of the committee's

report deals with the back-gate problem, and suggests the use of a powerful spring on the alley gate that can be re-

stage thunder with his heels and the gate the cook has only to step to the door, pull the string, and the opening gate fans the boy, basket and all, across

the alley and against the opposite fence. The cost of the back-gate apparatus is figured at six dollars each, with all the attachments, and the device is calculated to convince any noisy boy or prowling tramp on the first trial.

The report of the committee was unanimously adopted by the association, the city.

What He Thought of Them. Enthusiastic Proprietor-What do you think of the new hotel?

Prospective Guest (diffidently) -Rather fine. E. P. - Fine? Grand, I think! Did you notice the fresco work in the dining-room and the new furniture in the hall?

P. G .- Yes, I noticed them E. P. (persistently) - Well, what do you think? P. G. (gloomily) - Oh, I suppose I'll have to pay for them before I leave.-

Lippincott's. A Gifted Butcher Boy. "Who put those eggs on the mat?"

butcher boy.-N. Y. Sun.

said the cook, opening the door.

Husband (on the inside)-I suppose if some people would see me now they would say I was henpecked, but I don't care. I hain't got no objections to holdin' the baby awhile to relieve an overworked wife. - The Jury.

Very Timely.

Stranger-I have here a poem, sir, on any more.

Stranger - Then, perhaps, sir, you more than \$25. will allow me to continue. My poem is on "The Beautiful Mud." Editor-We'll take that, young man.

Judge. Extravagance. Farmer Oatley (reading from newspaper to his wife)-It is estimated that he recent dinner given by Mrs. Bunderblank was served at a cost of at least ten dollars a plate. Gee whiz, Marthyl what must the victuals have cost? Mrs. Oatley-Lands sake, Joshua! and

such folks always has a different plate for every thing they eat. -The Jury. "Another Thing, Ye Know." English Snob-Why do you go around with that dawg? I hate a dawg, doncher know?

American Dude-But not that dawg. You would love that dawg. His mother was owned by 'is royal 'ighness. English Snob-Aw, noble bwute! Do you mind if I pat him on the 'ed. -Texas Siftings.

Tommy's Naivette. School-Mistress-Tommy, what did you disobey me for? Tommy-'Cos I thought you'd whip

School-Mistress-What did you want me to whip you for? Tommy-'Cos pa said he would if you didn't, and he hurts.—Harper's Bazar.

The Ruling Passion "Papa, what do you intend to give me for a birthday present?" asked a young

girl of her father, a well-known New York magistrate. "Give you?" said the magistrate, whose mind was evidently on something else, "give you? I'll give you six months."—N. Y. Ledger.

Easy to Please. Tramp-Have you got something for Farmer-No, I guess not; there is not much work just now.

Tramp-I don't need much. You would be surprised to see with how little work I could worry along.-Texas Siftings.

Why It Was Postponed. Charley Jones-Well, did you propose to Miss Binks at the Tompkins reception last night as you intended? Bobby Smith-No; the conservatory was occupied at the time I wanted it.

"That so? Who was in there?" "Miss Binks and Tom Robinson."-Time. What Was Wanted. Tobey Wedd (nervously, just before the ceremony) - Say, Fred, see that every thing goes off all right. I'm so afraid there will be a hitch in the pro-

ceedings somewhere. Best Man-A hitch! Of course. I'll see that there is.—Lawrence American. Binks' Arithmetic. Johnny-How many days are there in year, papa?

Mr. Binks-Let me see. Your mother was born in '48, and she is now 26 years old. Three tum five is fifteen, one to carry-oh, ah! Yes, there are 462 days in a year.-Lawrence American.

But It Is Such a Good Canan Fangle-What do you think of this piece of newspaper advice: "Tell your wife every day that you love her?" Cumso-I don't think that the papers

ard's victims. But never mind these dumb, gaunt wraiths, we are dealing not with emotions, but with statistics. Let us count ing rapidly and begged me to give up the cost of these dens to those who sup- drinking. I promised her that I would,

ky, absinthe, ale, beer and the wines. and I thought I was saved. Multiply this by 14,000 and we have an expenditure of \$76,650,000 every year, within the specified area.

Snow" on hand now, and we don't want the paltry sum of \$15. Therefore, the and may God have mercy on my soul." average expenditure for liquor must be

Now, at the least computation, four fifths of this population, embracing the majority of women, all the children and the total abstainers among men, never patronize the saloon. Therefore the remaining non-abstainers, one-fifth in number, expend on the average \$100 annually for strong drink. That is just so much taken out of the necessities of life and expended on luxuries(?).

Let us suppose this \$76,650,000 applied to the rent, food, fuel and clothing of the class from which it is chiefly drawn. What would that mean? It would mean the abolition of dire poverty. It would mean wholesome apart ments, nourishing food and decent clothing. Properly spent it would mean the extinction of mendicancy and pauperism. It would also mean the rearing of children in decency, so that the next generation would be far above the present. It would mean the beginning of a new era.

Widening our observation from the metropolis to the entire country we find that 200,000 saloons withdraw 400,000 men from productive industries and absorb outright \$100,000,000. These stupendous facts tell their own story and draw their own moral.

Let us suppose these millions of dol lars spent for beneficence, for the building of beautiful homes and for the endowment of schools devoted to science, art, industries, education and religion! What might not be the status of the United States could this money only be withdrawn from the endowment of paupers, lunatic asylums, hospitals, prisons and potter's fields! What stands in the way of this

change? What, excepting a want of compre bension of the first principles of Christianity? What, except that that ignorance which is the root of selfishness, and selfishness which is the root of greed, and greed which is the root of politics, still control the civilization of the nineteenth century .- Union Signal.

INTERESTING FIGURES.

Remarkable Decrease in the Use of Alco hol in London Hospitals. A very interesting report has been presented to the British Medical Temperance Association by Drs. Morton, Moir and Pearce, on the administration of alcohol in hospitals. The com

mittee have drawn up a series of tables comparison between the amount expended under this head in 1863 and in hospitals of which no previous record crease of 39 per cent. in the expendi-

spitals showed an increase in the quantity of alcohol consumed. In the maining 65 the decrease ranged from Tumber of Saloon Dens and What They 30 to 83 per cent. In the London Fever Hospital while milk has risen from Even those most conversant with the \$150 to £650 per annum, the disbursewils of intemperance hardly estimate ments for alcohol were at the rate of aright their magnitude. spects. THE MILITIA REVIEW.

Why It Threw General Viscount Mel-ville in a Towering Rage. There was to be a review of the Lanarkshire militia when the commander of the forces in Scotland was General Viscount Melville. He was a strict dismost particular as to detail. It was said he could detect a missing button on a private's coat. He was the inspecting officer. The review was to take place in the park of the palace. Luncheon was prepared for the whole county. large party was invited in honor of Lord Melville, who arrived at the palace the previous day to meet Lord B., the Colonel of the militia regiment. There were few people as popular as Lord B. His geniality equaled his hospitality, and ing of my age. Barring a few who were his residence was a house widely known and highly considered; but he was very forgetful, and despised all those mili tary details which Lord Melville considsidered of the first importance-so much so, that at dinner the General expressed himself very strongly as to the attention the Colonel should give the next day to the equipment of the corps, and, above all, to his own personal appearance. "Trust to me," said Lord B; "you will see how well I shall turn out o-morrow.'

However, it was evident that the commander in chief was full of doubt; nor were his apprehensions unfounded. The next day was beautiful. Crowds assembled in the park and at the entrance of than wine or brandy. A public water supply is also being generally intropurple with rage. There we all waited half an hour. At last appeared the Colonel, and in the most motley guiseno cocked hat, his sash slung rather than tied round his waist, his trousers There occurred lately in Arizona a without straps, half way up his legs, alamity kindred in character to the He jogged along in perfect indifference Johnstown disaster of last year, only as to his appearance. Lord Melville was less in extent, through which upwards too overcome with indignation to speak full of instructive figures, instituting a of forty lives were lost. A storage dam when Lord B. said: "Well, General, I

Low-muttered anathemas were the only reply to this salutation. However, command from a paper which he did not even try to conceal. Lord Melville dashed about in a frenzy. At length the last maneuver and final blow came. The regiment formed square. "Make ready, present, fire!" was the word of command. Not a sound but the click of

"Colonel, what does this mean?" shouted the General. "They have no powder," replied the

Colonel. "No powder, Colonel, for a field day!" "The fact is, General, sometimes the horses don't stand fire; mine is very fidgety, and I thought it just as well the review should go off without on accident."-Blackwood's Magazine.

### FIRESIDE FRAGMENTS.

-Clothes that have been sprinkled

will not mildew for days, even in summer, if kept away from the fire. -For mint sauce wash and chop small bunch of mint; put in coffee cup; fill three-quarters full of vinegar; fiil with water almost full; sweeten with sugar; mix; serve in sauce boat.

-Nothing removes impurities from floors, etc., so rapidly as boiling hot soda and water, applied with a long handled scrubbing brush and rinsed off once with clear water and dried with a clean cloth.

-Bouillon: Five pounds of juicy beef cut in small pieces and simmered slowly for two and one-half hours in two quarts of water, Remove every bit of fat, strain through a cloth, season with salt, no pepper.
—Forcemeat Fritters: Two cups stale

bread soaked until soft, one onion chopped fine, salt, pepper and a little sage to season, one tablespoonful dripping. Form into cakes and brown on greased griddle. Serve hot. -The Home. -Milk Soup: Four potatoes, two onions, two ounces of butter, one-quarter ounce of salt, pepper to taste, one pint of milk, three tablespoonfuls tapioca. Boil slowly all the vegetables with two quarts of water. Strain through the colander. Add milk, sweet-basil, and tapioca. Boil slowly and stir constantly

for twenty minutes. -Yeast Buns: One and one-half cups of warm milk, one cup of sugar, one cup of yeast, thicken to a batter, let it rise over night, or until it is light, then add one cup of sugar, one egg, one-half cup of melted butter, a little salt and nutmeg, two cups chopped raisins or currants as you prefer, add flour as for bread, put in a baking tin in small cakes, let them rise again, and then

bake. -As drops of oil on creaking hinges of doors and on machinery silence co plaint of too much friction, so kind words, pleasant deeds, polite attentions, etc., lubricate the whole domestic economy. What a difference is thus occa-sioned in the running of farms, households, and every sort of business! Even a nail or screw can be driven home much more easily and perfectly by ap-

plication of a little oil. -To Broil Spring Chicken: Split a half-grown spring chicken down the back, twist the tips of the wings over the second joint, wipe dry, spread out, and break the breast-bone with the out the season the business of trapping. rolling-pin. Put on a greased gridiron over a clear fire, rub with clarified butter. Turn often to prevent scorching. pepper. When thoroughly done put on a hot dish with melted butter and a little mushroom catsup. Garnish with

squares of toasted bread. -Knitted Portiere: It is the easiest ing imaginable to do if you can coll you want. Cut it in strips about a half spread by domestic animals. Cats, an inch wide, and sew together. Mix being the most common household pet, with it any strips of colored silk. The children's old faded sasnes or hair ribbons are made useful by dying them of cases where these domestic animals orange, red, or any other color. After you have wound your strips into balls like carpet rags, get a pair of bone knitting needles about three quarters of a yard long, knit the plain stitch until these circumstances Miss Pussy can you have a very handsome portiere.-N. Y. Observer.

> EXCELLENT ADVICE. Three Suggestions Made by Goethe, the

Great Poet-Philosopher. Goethe's advice to a friend, to whom, ne was writing, is well worth remember ing and accepting, viz: "Make sure each day to see some beautiful object, to read some great truth, to perform some good deed." The first suggestion, "Make ciplinarian, an excellent soldier, but sure each day to see some beautiful object," is to the most of us neglected. To be sure there are many so situated who could not if they would, comply with this advice, but how many, on the other hand, pass along through life scarcely noticing the beautiful skies, the fleecy floating clouds, the starry firmament, the glorious sunset, the glistening snows, the flowers and green-swards, and all the varied beauties of nature, which are free to all. Then, too, the beauties of architecture, which so delight the eye of one trained to appreciate them, or one having a natural taste for symmetry, might be enjoyed far more than they are. And the developing of talent and sentiment in that direction would do much toward the larger cultivation of that art.

It is a fact that very few Florentines leave their beautiful city, so filled with gems of architectural beauty, and with works of genius, to make new homes for themselves elsewhere, even when they could better themselves financially by so doing. The question being asked of an Italian lady as to the cause, the instant reply was: "Ah, a Florentine must see something beautiful every day! Florentines would not be happy without a sight of their dear Duomo and Campinile, and the towers and the churches They love their old city, "La Bella

And the second suggestion, "Read some great truth." might be adopted by nearly all. A great truth read and pondered every day would no doubt be helpful, stimulating to higher thought, to broader conceptions of life and its opportunities, and preventing us from too much introspection, and keeping many who now devote too much of their time to gossip and small talk to get rid of that unfortunate habit.

The third injunction of the old German philosopher, "Make sure each day to perform some good deed," would be so easy for every one to follow, but alas! alas! in this selfish world how few, how very few the number of those who have such a purpose before themat the dawning of each new day. What a sweet and lovely world this would be were that advice followed by every one.

Like the falling of a gentle rain upon the hard and arid soil on which no bright flowers bloomed but which soon responded to the heavenly blessing and responded to the heavenly blessing and made the plants to blossom, so the influence of good deeds would permeate all society, leaving beauty and fragrance everywhere.

Good to remember is this advice given long ago, "Make sure each day to see some beautiful object, to read some great truth, to perform some good deed."

# OUR WASHINGTON LETTER.

(From our Regular Correspondent.) WASHINGTON, April 14th, 1890 .-The Senate to-day concluded the ANNUAL LEVY FOR 1890. Montana contested election case by voting to seat the Republican Senators. This action was anticipated

from the first.

Secretary Windom gave the Republican caucus committee, which has for several days been engage in preparing a silver bill which would receive the support of th Republicans in both Senate an House, his views on the subject Saturday. He still believes that the bill prepared by him and which now in the hands of a House cor mittee, would prove entirely satisfa tory if enacted into a law, but he e pressed his willingness to suppo any other measure that would appea to offer as good a solution of th question. The committee is to repo to a Republican caucus to-nigh which will probably decide upon the outlines of a silver bill to be pushe through Congress at once. The ult silver men are clamoring for outrig and absolute free coinage and the i dications are that the bill agree upon will give it to them, in effect not in name.

It has been proposed to put th Fish Commission under the contro of the Agricultural department, be Fish Commissioner McDonald is bi terly opposed to it. He wishes to re tain his present independent position of not being under the control of an department, and making his repor directly to Congress. But it strike most disinterested people that th Commission ought to be under the supervision of one of the Government departments, and the Agricultural would seem to be the proper one.

Secretary Proctor is out of the city to-day, and Gen. Grant, the newly appointed assistant secretary of War, is acting Secretary.

The friends of Chicago here are happy. The Senate committee has

THE REPUBLICAN. made a favorable report on the World's Fair bill, with several minor amendments, and in all probability it will be passed by the Senate this

# TRUSTEE'S SALE OF VALUABLE -REAL ESTATE.

Under and by virtue of a decree of the Orphans' Court for Garrett County, sitting in Equity, and passed in a cause on the docket of said Court wherein Singleton Switzer et al, are Plaintiffs, and Jennie Stuck and others are Defendants, the undersigned Trustee will sell at Public Auction, to the highest bidder,

On SATURDAY, the 19th Day of APRIL, 1890,

at the hour of 2 o'clock P. M. of said day, on the premises hereinafter described, all that real estate situated in Selbysport district about 4 miles West of Selbysport, of which the late Howard Stuck died, selzed and pos-sessed, containing about ONE HUNDRED AND SIXTEEN

ACRES OF LAND, and being the same properly which is more particularly described in a deed from the Frostburgh Perpetual Building Association to Howard Stuck, dated the 8th August, 1883 and duly recorded in Liber W. H. T., No. 8, folio 24, &c., one of the land records of Garrett County.

Said property is improved by a DWELLING HOUSE.

and small outbuildings. There is about 65 acres cleared and in culti-vation, and it is well watered. vation, and it is well watered.

TERMS OF SALE—As prescribed by the decree of this Court:—One-third of the purnass money to be paid in cash on the day of sale, or the ratification thereof by this Court, and the balance to be paid in two equal installments in nine and eighteen months from the day of sale, said deferred payments to bear interest from the day of sale, and to be secured by the bonds of the purchaser, with security to be approved by the Trustee, or all the purchase money can be paid in cash on the ratification of the sale by the Court.

LICIEN ERACEE LUCIEN FRAZEE. Trustee.

# TREASURER'S TAX SALE.

Under and by virtue of Sec. 53 of Art. 12 of the Code of Pub. Local Laws entitled Garrett County subtitle "County Treasurer," the un-dersi-ned, Ross Compton, as County Treas-urer for Garrett County aforesaid, will offer at Public Sale to the highest responsible bid-der for cash, in front of the Court House door, in the tewn of Oakland, Garrett County, Maryland,

ON TUESDAY, THE 6TH DAY OF MAY,

in the year 1890, at the hour of 11 oclock A. M., all that piece, parcel or tract or part of tract of land situate, lying and being in the Fourth Election District in said Garrett county, known and designated as an one-undivided half interest of, in and to a certain tract of land known and designated as

"SAINT CLAIR."

which said tract of land is contained within WHITE OAK LUMBER CUT TO ORDER,

Said land will be sold for the payment of the State and County Taxes due and in arrear thereon for the years 1888 and 1889. ROSS COMPTON. Treasurer.

**ELECTION NOTICE**,

Notice is hereby given to the qualified voters of the town of Oakland, that an elec-ion will be held on

MONDAY, APRIL 21ST, 1890. for the purpose of electing a Mayor and three Councilmen to serve for the regular term of two years, and two Councilmen to serve out the unexpired terms of Dr. J. H. Manowg and P. M. Stemple (resigned.)

J. W. HART City Clerk.

I've toiled and tried and worrled. I've gone the cook-books through, Till my brain is tired and flurried, And my hands and patience, too, I've had the best instruction From the ablest cooks in town,

And my ples are crisp and dainty And delicately brown. But apple minee or pumpkin, Of any form or shade, Are nothing to my husband So I'll give the struggle over, And throw my pride away, But as sure as I'm a mother I'll be avenged some day.

My bonnie lads are growing

And they'd not be afraid

What pies their mother made. -Cicily Corwin, in Good Housekeeping.

### DAISY'S FARM.

The Sterile Land That Proved a a Valuable Legacy.

Daisy was engaged, and her betrothed was receiving the merry congratula-tions of the family, consisting of her urcle, her aunt, and nearly a round dozen of cousins.

Wharton Hill, a young lawyer, slowly winning name and fame in his profession, was being vigorously hand-shaken and noisily welcomed by the Truemans, when Ned cried:

"Perhaps you didn't know Daisy was an beiress, Wharton. "Ned-don't!" said Daisy, reproach-

"A landed proprietress," cried Tom "I do not refer to the paltry six hundred a year she draws from her father's estate, but to her own property."
"Her farm, in fact!" said Suc.

Yes, her farm," echoed Ned, coming to the front once more. "When you are tired of law you can start gentleman farming upon your country-seat. After they were all gone, having jested a long time on this subject, Wharton was surprised to see tears in Daisy's

soft, brown eyes. "What is it, darling?" he asked. "They don't mean to hurt my feelings," Daisy said, gently, "but they will But, as she said, covering her dismay

est about my farm; and-and-I don't "But do you really own a farm?" "It is not a valuable possession, as you I was a baby, soon after mamma died, I was very ill, and the doctors advised my father to send me to the country for change of air. There was an old servant of father's family, who had married a farmer and was left a widow with a small farm. Such a farm, Wharton! The

house has only three rooms, and looks as if a high wind would utterly demolish it: the land is so poor that it was slow the home Margaret had: You may judge that she was very glad to receive the liberal price father paid for me, and my own mother could not have given me more loving care. Every year father came to take me away, and every year was persuaded to leave me, until I was | eight years old, and a marvel of rugged health and perfect ignorance. Then I was put in boarding-school, but I still spent my summer vacations with old Margaret, and my trunk was always half filled with comforts for her. Having no one in the world who claimed kindred with her, no one else but me to love. Margaret loved me with her whole heart. Six years ago, after father died, and I came here to live with Uncle Tom. Margaret died and left me her farm. It has been a joke in the family ever since. The place is so utterly valueless that we

can neither sell it nor rent it, and it represents only the love of an old woman for her nursling. Some time we will visit it. You have not told me its locality."

"It is in Pennsylvania, nine miles

from anywhere, father used to say, be-

cause it is nine miles off the railroad.

But you can always hire a wagon or carriage at G -- to go over to Corn's Mill: and my farm is very near Corn's Mill." After this explanation, Wharton bore the jesting about Daisy's real estate with perfect good nature, and declared his intention of erecting a palatial country seat upon the place, when he became a millionaire and Judge of the

Supreme Court. Being people of modest desires, and having an income of about six hundred dollars apiece, Wharton and Daisy saw no reason to delay their wedding, and were married with a large assemblage of true friends around them. They went to housekeeping in a little house, modestly furnished, and were fair speci-

mens of "love in a cottage." But Wharton Hill was ambitious. Having studied his profession under great difficulties, often going hungry to buy needful books, often losing his night's rest to pore over knotty points. he was both fond and proud of his life work, and strove to win a good position therein. His love for Daisy, true, honest love, was never allowed to interfere with his pursuit of fame in his profession, and after he was married he attacked his studies with fresh ardor, spending his time in his office, when not actually engaged in the court-room. Little Daisy, whose life was affection,

found time often hanging heavily upon her hands, as Wharton became more and more popular and the number of his clients increased. But she was always ready with loving welcome when he did come to his home, and she knew that much of his ambition and ardor

The third year of her married life was nearly over, and her only child Tom Trueman Hill, was eighteen months old, when Wharton, ever busy and full of energy, began to complain of racking pain in his head, and loss of mem-Often in the midst of an argument thy thread of his speech slipped from his media, and cost a great mental struggle to be resumed.

He fought the symptoms bravely, but Daisy was full of terror at the change in him. He grew haggard and restless, appressed with vague fears of loss of

At last, much against his will, he arstrongly urged, consisting of two words | tate,

"The brain is overworked," he explained, "and no medicine will avail while he persists in study and practice. Get him away, if you can. H'm—this is May, a good time for a country trip Take him to the country, Mrs. Hill." Wharton rebelled. It was ruin to leave his office, where cases of importance were in his hands. He must work, or they might all starve. He would de cline some of the practice offered him; would take little trips during the sum

ner; would, in short, temporize.

And then Daisy-little, brown-eved Daisy-whose voice was as soft as a flute, who was scarcely larger than a well-grown child of twelve, "put her foot down." Such a mite of a foot! It was absurd to imagine it had any weight in the world's machinery; but it was down, and Daisy kept it there. Tom na Scuta, in N. Y. Ledger. was a lawyer, and Tom could take Wharton's cases for the summer months. There was her farm-a poor place to be sure, but at least a house, and with some furniture in it, and surrounded by beautiful scenery, possessing the purest of air and water. With six hundred a year they would not starve, and there was a

nest-egg in bank in case of emergency. packed trunks, arranged her household, enlisted the entire Trueman family on ant of no value to her.

And Wharton, finding those queer at issue to Tom Trueman, and, accompanied by wife, child and nurse, took up his journey to Corn's Mill. It was early morning when a rickety old wagon containing the party and baggage en-

tered an inclosure that had once been a fence, and the family took possession of Daisy's Farm. The prospect was not encouraging. The house had not improved in years of emptiness and neglect, and even Daisy's heart sank at the broken roof, the tumble-down doors, the shaky windows.

with a brave smile, "there they were, and they must make the best of it!" Jennie, the nurse, proved a treasure, and the women were soon busy "putting will see when I tell you about it. When to rights," while Wharton took Tom on

an exploring expedition over the estate. There was a queer glance in his eyes as he came back in time for dinner, but he only said: "I can't quite trust my own head yet

Daisy, but-is there a post-office at Corn's Mill?" "Yes, the mail goes out twice a week." "Give me a sheet of paper and an en-

velope, that's a dear." . Wharton, that is "I'll only write a dozen lines, dear" The dozen lines being written and failing source of amusement roving ground with a short cane, often kneeling down to examine the earth, so turned over. Daisy hinted at planting some

"I don't suppose they will grow if we do."

vegetables, though she said, despond-

"Never mind beans and peas now, love. Wait till we have an answer to my letter.' A week later, when June was young

the answer came in the person of two men, one white-haired and absent minded, the other young and emphatically business-like. Wharton gave them cordial welcome, and after partaking of a substantial luncheon, the three started out upon the farm.

Little Daisy, intensely happy in the knowledge that Wharton had not had one dizzy turn since their arrival on the farm, that he had the appetite of a animation, was busy baking a batch of pies, when the three gentlemen returned to the house. She could see them from the kitchen window as they came over the neglected path, and saw that Wharton's eyes were full of exultation, his face flushed, his carriage erect. He looked like some one newly laden with good tidings, and all three were talking eagerly and earnestly.

Daisy wondered a little, and scorched one of her pies. While she carefully pared the burnt edge of crust the kitchen door opened, and Wharton, heedless of her big calico apron and bare arms, ushered in the strangers.

"Mrs. Hill," he said, bowing with great deference, "accept my congratulations upon your great good fortune." "In scorehing my pies?" laughed

"In owning fifteen acres of coal land." "I don't understand," Daisy faltered "The farm, my dear, your legacy from our old nurse, is one solid bed of coal, and there is no mine within nine miles of it. Nobody knows how much lies be yond your fences in the vacant land about us, but in my mind's eyes I see this a colony of miners.

"Are you sure, Wharton?" "I suspected it the first day we came but having no experience, I wrote to one of my clients in Pottsville to send me an experienced hand to test my suspicions. These gentlemen confirm my opinion.

"There is no doubt about the coal, ma'am," said the old gentleman, "nor "The question is," said the younger

ized to make you an offer if you wish to good aide of so many and severe mas-dispose of the property." dispose of the property.' "Time enough for that," said Wharton. "I will return with you to Potts-

PAWNING A JEWEL

A Smart Young Woman's In Scheme for Beating a Money-L "I feel awfully ashamed of it now, said a demure little brown-eyed because the pawn man was real good to me. It was this way: My friend Ada showed me a pendant, a circle of beauti-Wharton pshawed! Wharton fumed. ful small, white diamonds about a ruby All in vain. Resolute little Daisy that glowed like a flaming-red heart; it had fire enough to melt a rock. Ada engaged her one half-grown girl to ac- said it was a shame that the ruby was company the party as child's nurse, and not genuine, because it made the pend-

"I don't care, said I; it looks so much like a real stone that I do not believe And Wharton, finding those queer like a real stone that was bogus. Why, feelings in his head increasing, the any one could tell it was bogus. Why, of Quillia saporaria—was lately exhibited to the Linnean Society of London. finally submitted to fate, in the person as you often find in rubies.' But Ada of Daisy, explained the various points said as long as it was not genuine the pendant was of no value to her, unless she had the diamonds set over.

> "Why not pawn it?" said I. " 'I couldn't,' said she. 'I'd be frightened to death. Besides, how do you do it?" "'O, just go in and ask him how much he'll give on it.' said I, though I had never been near a pawn-shop. I was in too deep to expose my ignorance now. "Would you dare do it?' said she.

"Certainly!" I replied, bravely. "Will you do it for me, dear?" "Now, that took my breath away. To out my friend up to mischief was one thing, but to be up to it myself was an-However, I could not admit I was afraid now.

"She made me start at once. rent down town, and while she waited in a store I climbed the stairs to the lice of a swell broker with my heart eating until I was nearly suffocated. sat down in the private office, and, with a face as long as the statue of misery, I handed out that pendant. "'How much?' said the man.

"'Ye-es,' I said, half-heartedly.

"'I don't know,' I replied. He disappeared and came back and said '\$150.' real, as I had expected him to do, and the pendant therefore worth about \$600, posted, Wharton seemed to find an un- but the sum offered was about double the real value of the pendant; so I about the farm, poking holes in the looked sorrowfully at the gem for a moment and then said:

" 'Can you do no better for me?' "'Nope,' said he. One more long look at that memento of better days, and then I said in a voice suffused with

" 'I'll take it.' The broker had been watching me losely, and I think he was moved by my apparent distress, which my fright elped me to assume, for when he brought me the ticket and money he aid in the gentlest way:

"My dear lady, if you wish to redeem

will send it to you and spare you the pains of coming here. He was so kind that I'm sorry I cheated him, even if he did want a \$600 pendant for \$150." The reporter related this story to a eputable Maiden lane jewelry manuacturer. He said that the secret of the plow-boy, and was cheerful and full of girl's success lay partly in the fact that the bogus jewel had a flaw in it and that it was set with superior, if small, diamonds, but chiefly in the bearing of the girl. She showed to his eye that she was not accustomed to the air of a pawn-shop, and so he was more easily and each should have as much of a deceived. It is a regular though small story as possible connected with the branch of the jewelry business to make worked off on pawn-brokers through just such means as were employed in

this case.-N. Y. Evening Sun. SHREWD MR. PAULET.

An Englishman who Knew on Which Side His Bread was Buttered. William Paulet, first Marquis of Winremarkable man in several ways. He was born in humble life, but entered into court service and gradually rose from one post of honor and trust to another. He was comptroller and treasurer of the household to King Henry VIII., while under the boy king who suc he was Lord Treasurer, the office being considered the highest in the State. In cognition of his services, the King ennobled him, and finally made him Marquis of Winchester. It has not been claimed for him that he had great ability: he is described, however, as ossessing unusual sagacity. Through the bloody reign of Mary he held his high office, and when Elizabeth and Protestantism succeeded, he contrived to still retain his place. In fact, while every body about him met with misfor-tune and disaster, Paulet was undisabout its lying so near the surface that his death. He left an enormous fortune, but also many and voracious descendturbed and prosperous up to the hour of ants, and it was not long before they had dissipated it. When Paulet was stranger, "whether you will sell out or had open the mine yourselves. -A process has been invented by means of which photographs can be printed almost as fast as a newspaper and without dependence on sun or light. They are said to be of the first quality -It is reported that a French manufacturing firm has brought out a new fabric made of the fiber of ramie-that upon me when she left me all sle owned is, alfa or esparto grass—and called ramie linen, which is said to combine the qualities of linen and silk, with

double the strength of linen. -Physicians state that adiet of twelve to fourteen ounces of chemically dry food, digestible and with the ingredients in proper proportion, is sufficient for the daily needs of an average-sized man on moderate work. Most persons eat liter-

ally twice as much. -If it were possible to rise above the atmosphere which surrounds the earth, we should see nothing but an intense and sharply defined ball of fire, while every thing else would be wrapped in total darkness. There could be no difference of light without an atmosphere or some similar medium for it to act upon, but if the air around us extended to a height of 700 miles, the reve of the ference of light without an atmosphere to a height of 700 miles, the rays of the sun could not penetrate it, and we should be left in darkness.

-A Chilian bark possessed of remarkable and valuable properties-the bark An extract of this bark has been used for cleaning silk, wool and gloves, but it is how stated to be capable of solidifying the hydrocarbon oils, even benzoline, and thus ensuring safe transport. A small quantity of citric acid restores the oils to their liquid form.

-Glass blowing by machinery is being performed successfully in Ellen-ville, N. Y. The machine consists of an iron upright, around which revolve arms fitted with molds for shaping the glass. A pipe supplied with a current of air and readily manipulated by the operator, does the work of blowing. The machine is said to be capable of turning off 100 dozen perfect bottles a day. It costs but about \$200, and will take the place of two skilled men, who command from \$5 to \$7 a day each.

-In the course of long investigation, Prof. Ponfick, of Breslau, has made the important discovery that a large part of the liver-even as much as threefourths-may be removed without serious disturbance of the animal functions. Surgeons had before known that the whole of the liver is not absolutely esconsiderable part of it would not be Free Press. serious, and now may be enabled to perform operations hitherto believed to be impossible.

-Water as an extinguisher of the flames of blasts in mines has been applied in a novel manner, namely, as a powdered solid, in a form of explosive devised by a chemist in Cologne. This substance, called grisonite, consists of so. You don't know the difference b certain explosive agents with which tween a horse and a donkey, I don't bewater containing salts, like carbonate of soda and sulphate of magnesia, are did I?" she replied meekly, and Jones incorporated. Grisonite, with fifty per cent. of carbonate of soda, contains thirty per cent. of water, and, with sulphate of magnesia in like proportion, twenty-five per cent. It is also tained, by experiments which have been made under the most dangerous conditions, that the flames are quenched, this at any time send us word and we and that the material is both safe and efficient.

WASHINGTON SPOONS.

A Fad That Is Taking Strong Hold on People of Means. Of late the fad of collecting odd silver spoons has taken a strong hold on people who have plenty of money to spend. Lots of people who have re-cently returned from Europe are showing admiring friends the collections they made while abroad. No two spoons should ever come from the same town, story as possible connected with the place where it was bought and the manewels like this pendant, which are ner of getting it. It should be marked with the name of the place and the date. It is rather a pretty idea and the one's travels and experiences. Washington jewelers have noticed the demand and are not to be behind in answering the call. One of them has something quite original in this line. you something novel in spoons, something characteristic of the city, you know?" the would-be-purchaser is shown a lot of Washington spoons. These are rather large and heavy and have a into the bowl. The head is a good one and is a much prettier setting for a spoon than one would at first suppose. Then there are others that are exact similes of teaspoons that belonged to Mrs. Washington. These are odd and decidedly popular. Others still have genuine coins of a century ago set in the bowl, and a set of a dozen punch spoons have a set of small gold coins rom as many different countries. All Science Monthly. these different kinds of spoons have Washington and the date of purchase engraved on the back. These Washington spoons are especially popular with foreigners and almost every stopping for any length of time in this city takes something of the sort home with him.—Washington Star.

She Knew the Name. To show how history repeats herself, et us repeat a bit of history. John Quincy Adams being President, George M. Dallas (who used to tell the story with great gusto) was one evening re lieving the boredom of a ball by talking over things with Charles J. Ingersoll. "A political career," exclaimed Mr. In gersoll, "why it's chasing the will o' the wisp. You wade the bogs and then, when struck. you succeed, what have you got? Nothing; absolutely nothing. And as for fame, why look around you; in all this brilliant assemblage, among all these beautiful creatures, I dare wager what you please that you can not find one that knows who is President of the United States." No sooner said than "done." Next to agree upon the lady oracle. She know, O, dear, yes; of course. Adams Squinchy.—N. Y. Tribune

"I should say said no more. - Western Rural.

NORTHERN LIGHTS. How Nature Displays Herself in All He

Grandeur in Arctic Lands.

Auroras are most frequently seen in the cold and in the northern temperate zone, rarely in the southern temperate zone, and hardly ever in the tropics. The places where they most frequently appear lie between the sixtieth and seventieth degrees of north latitude. In the form of an oval, they include the geographical as well as the magnetic north pole, which is to be found on the peninsula Boothia Felix, Iceland, the Kara Sea, Northern Siberia, Behring Strait, Hudson Bay, Labrador and Greenland. Northern lights have been seen as far down as the twenty-fifth degree of north latitude. In full splendor, however, they may be seen only in the northern polar region to the seventy-fifth degree of latitude. Here Nature is displayed in all her grandeur. When the sun has set, and the gray veil of twilight is cast over the earth, spoons make pleasant mementoes of the northern horizon grows darker and darker. Soon there may be distinguished a segment of the sky more somber than its background; this is hemmed in by white concentric arcs of light. Colored rays shoot forth therethester, who died March 18, 1572, was a In answer to the question: "Haven't from in all directions. They interlace and intertwine until they seem to be woven into one fluttering band of color, And anon it changes to a sea of fire! The rays leap upward far above the zenith, form there a flaming crown, and medallion head of the first President set | then sink back, to begin anew the wondrous play. The most beautiful descriptions and trustworthy observations we owe to Nordenskiold and Ekama. All explanations which have been attempted as to the origin and cause of northern lights are based on analysis by the spectroscope, on the determination of the elevation, and on observations of the peculiar behavior of the magnetic needle. - Wilhelm Stosz, in Popular

Difference in Brain Weights. Sir J. Crichton Brown has been lecturing at Birmingham on "Brain Growth, and giving figures as to the average weight of brain enjoyed by different races. Thus we have the following figures: The Scotch, 50 ounces; the English, 49 ounces; the Germans, 48.3 ounces; the French, 47.9 ounces. It is hard for the Englishman to find himself thus beaten by less than a head, but he must console himself with the reflection that, after all, it is quality as well as weight of brain which tells in the long run. -London Globe.

Dissatisfied Any Way. Jones has a son who is badly stage

"Unhappy boy!" exclaimed the irate parent: "and you actually propose to dishonor my name on the boards of a theater ?"

"Why, tather, I would take an assumed one. "Well, sir, now would that help it?

Supposing you were to succeed, much credit I should get if no one knew that I was your father. -Judge.

Those fellows who dote on their girls sometimes find matrimony a powerful anti-dote.—Binghamton Leader.

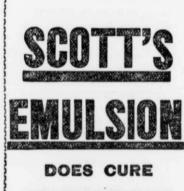

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most. healthy and agreeable substances, its many excellent qualities commend it to all and have made it

the most popular remedy known. Syrup of Figs is for sale in 500 and \$1 bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Do not accept any substitute.

### FARM AND GARDEN.

TO HAVE BETTER ROADS.

An Awakened Interest on This Impor-tant Subject in Various States. Up in the little State of Rhode Island the people are waking up to the impor-tance of having good roads. A State Road Improvement Association has been formed and it is already doing much good. At a recent meeting of this body the following letter from Mr. Scott A. Smith, treasurer of the Providence Oil company, was read:

Good roads already exist in various parts of the older States of our country, and if they are to be made and maintained in Rhode Island much exact inmaking and maintaining roads. It may be stated as an axiom for us that there is not so much difficulty in making good roads as in maintaining them. I speak from personal observation in saying that in France, where there are som of the best of modern made roads, there exists a system of maintenance which is carried to that degree of perfection for which the French are so justly re nowned in all their methods relating to public affairs. To particularize: Each section of a road is under constant surveillance and needed repairs are at once made. Further, the destruction of wellmade roads by the use of heavily loaded wagons having narrow tires can not happen, as such matters are regulated by well formulated laws, and the necessary obedience to such laws is en-

loads are moved in Europe, on good roads in wagons properly tired, the feel-

With good smooth roads, those now living may see carriages propelled by storage batteries and going at a speed over country roads which is not now dreamed of by users of

In conclusion, if the Romans could make roads which have endured two thousand years, why can not we make and maintain good roads possessing as we do facilities for such work wholly unknown to the Romans?

COOLING ROOM.

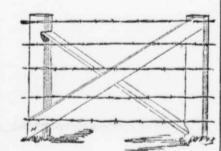

Its Value to the Dairyman and Fruit-Raiser.

There is more attention being given to the construction of cooling rooms where the temperature can be maintained at a proper degree for the pres ervation of dairy products and fruits. We have frequent inquiries about the construction of such rooms. In most sections of the country there will be a scarcity of ice next summer. No ice has been made in many sections, and all that we shall have will come from the North. A room can be so constructed that it will serve for the preservation of both dairy products and fruits, and that will keep the temperature at a low degree in summer and at a comparatively high degree in winter. When the house or room is constructed for ice an apartment is made above the room for the storing of the ice. That is the principle that applies to the cooling room when ice is used. The sides of the cooler are made so they will not conduct heat, and an apartment above holds the

Whether ice is used or not-of course it should be when at all practicable—the construction of the room is the same. It is to be made with double walls with a space between of from six inches to a foot, and this filled with some non-heatconducting material. The roof ought to be double also; so should the doors and so should the bottom. Following these directions, we shall get a room that will be pretty cool in summer even without ice, and pretty warm in winter. If the structure can be erected on the north side of a building so much the better .-Western Rural.

IMPROVED SLOP-BARREL.

Here Is a Sensible Suggestion-Try It for

Yourself. The ordinary barrel used to receive slops has several unpleasant features. When the slop is poured into the barrel it is likely to splash on the clothes, or in the face. When the slop is to be taken from the barrel, if the bucket is dipped in to be filled, there is another chance of being splashed, and the chance of being splashed is less, but the dripping is increased. Those features with fog, and carried some of it into port are removed by the devices shown in

CONVENIENT SLOP-BARREL

essary obedience to such laws is enforced under the civil system of laws without any of the embarrassments which exist in countries governed by what is termed common law.

This agitation of the subject of good roads has come none too soon. To one who has seen with what ease heavy loads are moved in Europe, on good roads in wagons properly tired, the feelraised and allowed to rest against the ing exists that we are a generation, if top of the bucket, hence it catches the

slop.—American Agriculturist.

A DISCUSSION.

The Theme Being: How Long Should a Cow Go Dry?

I was in a farmers' institute the other day and a question box was part of the programme. One query read: "How long should a cow go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that they did not let their cows go dry?" Several dairymen arose and said that t long should a cow go dry?" Several dairymen arose and said that they did not let their cows go dry at all, but Leader.

Love may be blind, but he knows when the parlor lamp is too high.—Binghamton Leader. not let their cows go dry at all, but milked them up to the time of calf drop
Miss Larkins was billous and feeble and sick.

And it seemed as if nothing would ever relieve milked them up to the time of calf dropping. They claimed to have the best success by this method. Other farmers said let them go dry three, two or one month prior to calving. The gentlemen who took part in the discussion were all practical dairymen, belonging to that progressive class who are generally held up for emulation in dairy matters. Two-thirds of the assembly had come to the institute to learn; they were simply a listening audience of interested but silent farmers. You know a great many qualities of Dr. Sage's Catarrh Remedy are lent farmers. You know a great many farmers are a little abashed when they

They can talk freely enough person ally to a friend or neighbor, but they are constrained when it comes to a little formality. By the way, I think that every means should be employed at institutes to remove all sense of embarrassment from the timid and diffident ones, so that those who come to listen will feel free to speak as well. About two-thirds of this assemblage took no part in the spirited discussions, but respectfully listened to the debates, and went their way. I do not believe there was a farmer there who came out of mere curiosity; they left their rural homes, and traveled in some cases many miles, to learn something advantageous to their craft. Now, reader, don't you think that it would puzzle the learner a little as to what course to pursue, to have farmer A jump up and mention a method in dairving which experience has taught him to be the right way, and then have B's experience flatly contradict A's, and C's refute both A's and B's?

Now these different men might have all had success by adherence to contradictory principles of drying off the cow, but surely only one way could have been the right one, and those who camb to learn were hefogred by the discussions. to learn were befogged by the discussion instead of being enlightened. That was how the case impressed me, any-

The subject may seem trivial to some, and yet it is very important. My own experience has been that a cow should have some rest from lacteal secretion prior to the parturient period. It is nature's law that there should be a suspension of action in the milk functions for a space of time between every period.

PAIN from indigestion, dyspepsia and too hearty eating is relieved at once by taking one of Carter's Little Liver Pills immediately after dinner. Don't forget this. for a space of time between every period of dropping a calf. The length of sus-pension should be long enough to allow the pregnant dam to physically recuper usefulness, and for the strength and vigor of the offspring.

FISH-BALLS are allowable in Lent.—N. O.

Good Roads. In the historical sketch of its road, published by the Pennsylvania railroad, in the ground. This way of bracing the end post will hold as many wires tight as are ever used.—Charles F. O'Neil, in Farm and Fireside.

Farm and Fireside.

Factor and track foremen were satisfied with an excellence far below the ideas of perfection entertained by the managers, and to remedy this the latter adopted the plan of having each su-A gailon of milk varies in weight according to the quality. A gallon of mile of sample track, not limiting him as to cost, but requiring that it be made a standard gravity of 1,030 would weight of a standard gravity of 1,030 would weigh a standard gravity of 1,030 would weigh pervisors and foremen then passed over 8.589 lbs. It is usually taken to weigh these sample miles, carefully examin-8½ lbs. The weight of milk depends ing each, and at the conclusion of this on the cow more than on the food, for a inspection the most experienced super-cow giving rich milk will yield milk of visors acknowledged that they had lover specific gravity as the proportion never before known what a perfect track of butter increases in it. But the difference is very slight. There will be a of the majority of people in regard to very slight difference between the gravity of milk made on summer past-tle realizing conception of a perfect ure or good winter feeding, but the road and its economic advantages over

by local applications, as they can not reach the diseased portion of the ear. There is only one way to cure Deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces. Deafness Can't Be Cured which is nothing but an inhamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by Catarrh) that we can not cure by taking Hall's Catarrh Cure. Send for circulars, free.

CURES PROMPTLY AND PERMANENTLY LUMBAGO, Rheumatism, Headache, Toothache, SPRAINS. Neuralgia, Swellings, Frost-bites, BRUISES. THE CHARLES A. VOGELER CO., Baltimore, Md.

BEAUTY WITHOUT PAINT.

"What makes my skin so dark and muddy? My cheeks were once so smooth and ruddy. I use the best cosmetics made:" Is what a lovely maiden said.

'That's not the cure, my charming Miss,"
The doctor said—"Remember this:
If you your skin would keep from taint,
Discard the powder and the paint." "The proper thing for all such ills Is this," remarked the man of pills: "Enrich the blood and make it pure-In this you'll find the only curo."

For cleansing, purifying and enriching the blood, Dr. Pierce's Golden Medical Discovery has no equal. It cures all humors from a common Blotch or Eruption to the worst Scrofula. Salt-rheum, Scaly or Rough Skin, in short, all diseases caused by bad blood are conquered by this powerful, purifying, and invigorating medicine. Great Eating Ulcers rapidly heal under its benign influence. Especially has it manifested its potency in curing Tetter Eczema, Erysipelas, Boils, Carbuncles, Sore Eyes, Scrofulous Sores and Swellings, Hipjoint Disease, "Fever-sores," "White Swellings," Goitre, or Thick Neck, and Enlarged Glands.

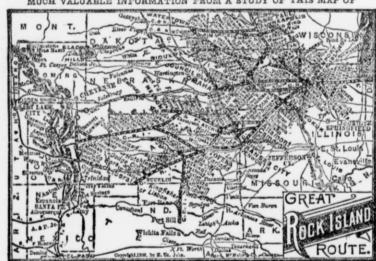

SYMPTOMS OF CATARRE.—Headache, obstruction of nose, discharges failing into throat, sometimes profuse, watery, and aerid, at others, thick, tenacious, mucous, purulent, bloody and putrid; eyes weak, ringing in ears, deafness, difficulty of clearing throat, expectoration of offensive matter; breath offensive; smell and taste impaired, and general debility. Only a few of these symptoms likely to be present at once. Thousands of cases result in consumption and end in the grave.

By its mild, soothing, antiseptic, cleansing, and healing properties, Dr. Sage's Remedy cures the worst cases. This infallible remedy does not, like the poisonous irritating snuffs, "creams" and strong caustic solutions with which the public have long been humburged, simply palliate for a short time, or drive the disease to the lungs, as there is danger of doing in the use of such nostrums, but it produces perfect and permanent cures of the worst cases of Chronic Catarrh, as thousands can testify. "Cold in the Hend" is cured with a few applications. Catarrhal Hendache is relieved and cured as if by magic. By druggists, 50 cents.

"Mrs. D., mamma wants to know if you will lend her your silk umbrella?" said a little girl, the child of a neighbor, the other morning. "Why, won't a cotton one do as

"No, she sald your silk one." "Tell her," said I, in a burst of indignation, "that I can't let her have it!" and I snut the door in perhaps a "slammy" way.

My silk umbrella! What next? retary. They have borrowed my groceries, tea, coffee, sugar, salt, flour, matches, soap, starch, even to coal and kindling, flat-irons, tubs, boiler, etc., until I hardly know where to look for friend. anything when I want it. They have had clothes-lines, pins, ironing boards, etc., until I had to send for them when they were needed at home; and now my umbrella, and my silk one! Oh! what a nuisance it is to have such a neighbor!

They come for a pail of flour and when they return it (if they ever do) we find an inferior article-tea, sugar or coffee, it is the same. Your boiler is unwashed, outside and in, with perhaps a leak from carelessness in using. Your wash tubs sent home with the dregs of dirty suds about them. Your flat-irons, that you are so careful to keep smooth and clean, are covered with rust. Your ironing board the clean covering is soiled and scorched.

One never knows if they are in the house or not, as a borrower gen- ington?" inquired the President. erally thinks it trouble enough to go to go for it.

I had one neighbor who borrowed favor (for which I was grateful) and vitation and then answered: even forgot to return the tea, coffee and sugar she had borrowed.

dation about me!" That is always the way with borrowers! They will use you for their benefit, and then when you refuse one thing asked for, they will forget all favors in the past, and no word is too bad to say of you.

Those who borrow of their neighbors should be willing to return in like, but it seems to me that it requires a great deal of "never" to ask one for such favors who lives to herself, and never borrows, preferring, if need be, to go without, before troubling any one for what she can-

TARIFF LITERATURE FOR ALL. The American Protective Tariff Leaguz is publishing a most valuable series of Tariff documents. These are prepared with a view to state the facts and arguments for Protection, whether in the interest of farmers, laborers, merchants or professional men. Each issue of the series appeals to those engaged in separate industries, and presents indisputable facts—comparisons of wages, cost of living, and other arguments showing the benefits of Protection.

Any single one will be sent on receipt of 2 cents in stamps except "Wages, Living and Tariff," which will be sent for 4 cents.

The whole list will be sent for 30 cents or any twelve for 20 cents, or any five for 10 cents, postage paid. Order by number. The American Protective Tariff Leagues publishing a most valuable series of Tariff

EVERY INSTRUMENT FULLY GUARANTEED!

Having decided to make a specialty of selling the above named Instruments, I desire to inform the citizens of this and adjoining sounties who may be desirous of purchasing a really first-class instrument at a moderate price, to call and examine my line of instrument and get prices on same before going elsewhere. I can assure all of one thing—no better instruments are made for the money than those I handle. This is no idle boast, but a fact which time and observation has bundantly proven. I buy at first hands and do not charge two prices for my goods. A ceasonable profit on the investment is all I ask.

ask.
I can also furnish all kinds of Musical Books, Sheet Music, and Organ Stools, and Musical Merchandise generally at most reasonable prices. Give me a call for anything in the musical line. ea-Place of business-Railroad street, next o B. & O. depot. Oakland, Md.

J. M. LITZINGER, 9 21 '89 Oakland, Md. B. & O. R. R. Time-Table

The following is the new time-table on the B. & O. R. R., which went into effect May 12th, 1889:

GOING EAST

-Accommo

The fast trains, with the excep tion of those mentioned, make stoppages only at the First Class Stations. Tickets should always be procured before taking the cars, passengers saving thereby from 10 t. 25

WM. M. CLEMENTS, Manager. C. K. LORD. General Passenger Agent.

Order of Publication.

Mary Virginia Albright, Plaintiff, vs. Henry A. Albright, Defendant. No. 500 Equity. In the Circuit Court for Gar-rett County. The object of the above suit is to procure a divorce a mensa et thoro, by the plaintiff from the defendant. The bill states: Ist. That on or about the 10th day of October, 1883, she was married to the defendant. Henry Albright, in Garrett County Maryland, and with whom she lived as his wile until about two years 190, when the said defendant abandoned and deserted her, and that she had by said marriage two children, both of whom are still living, and are infants, to wit. Helen M., a daughter, 5 years old, and Robert M., a son 3 years old, and that the plaintiff has been residing with her mother in Garrett County ever since her husband deserted, and has had the care and support of her two thant children.

her two infant children. her two infant children.

2nd. That for some years prior to her husbands leaving her, he failed and refused to render any support to either her or her children, and that by his continuous drunkenness and victous conduct toward her, made her life almost unbearable, and that she is informed he is now residing somewhere in the State of West Virginia, and has not recogaized her or rendered her or her children any support since that time.

any support since that time.

3d. That a short time before his desertion of herself and children, he treated her with great cruelty, harshness and brutality, at one time striking and beating her, and that she now bears a scar upon her person where he struck her when drunk, and was continuously using profune and abusive language to her and the children. and the children.

4th. That ever since the said marriage your oratrix has behaved herself as a faithful, affectionate and chased wife towards the said Henry Albright, and her entire conduct has always been above reproach. stways been above reproach.

5th. That the said Henry Albright is entirely insolvent, and never had any property, so far as your oratrix is informed, and for a long time prior to his leaving her, he did not even render any support to either she or the children, but on the contrary, the support and care of said children, as well as herself, has been thrown entirely upon her and her irlends.

irlends.

6th. That the said Henry Albright has recently made his threats of coming to take her
children away from her and that she is lead
to believe that he will make the attempt unless he is restrained and prohibited by the order of this court, and that he is making these
threats in order to annoy her, and make her
life as miserable as possible, and that his
character is so low and degraded that she
would never consent to allow her children or
either one of them to be under his control or
influence.

Influence.

It is thereupon this 21st day of March, 1890 ordered by the Circuit Court for Garrett Courty in Equity, that the plaintiff by causing a copy of this order to be inserted in some newspaper published in said County, once in each of four successive weeks before the 22nd day of April, 1880, give notice to said absent defendant of the object and substance of this bill, warning him to appear in this Court in person or by solicitor on or before the 8th day of May next to show cause, if any he has, why a decree ought not to be passed as prayed.

# TRUD K-MAN ON ANTIFET THE STAN TRYIT. WOLFF & RANDOLPH, Phiadelpha. Ayer's

Sarsaparilla The Best

# **Blood Medicine**

So say Leading Physicians and Druggists, and their opinion is indorsed by thousands cured by it of Scrofula, Eczema, Erysipelas, and other diseases of the blood.

"Aver's Sarsanarilla has wen its reptitation by years of valuable service to the community. It is the best."—R. S. Lang, Druggist. 212 Merrimack st., Lowell, Mass. W. P. Wright, Paw Paw Ford, Tenn., "In my practice, I invariably prescribe Ayer's Sarsaparilla for chronic dis-

efficacions in the treatment of all disorder of the blood."

L. M. Robinson, Pharmacist, Spina O. certifies: "Ayer's Sarsaparilla has always been 2 great seller. My customers think there is no blood-purifier equal to it."

"For many years I was afflicted with scrofulous running sores, which, at last became so had the doctors advised amputating one of my legs to saye my life. I began one of my legs to saye my life. I began one of my legs to save my life. I began taking Ayer's Sarsaparilla and soon saw an improvement. After using about two dezen bottles the sores were healed. I continue to take a few bottles of this medicine each year, for my blood, and am no longer trou-bled with sores. I have tried other reputed blood-purifiers, but none does so much good as Ayer's Sarsaparilla,"-D. A. Robinson, Neal, Kansas.

Don't fail to get Ayer's Sarsaparilla hance."

"I see that you are not to be con vinced."

"Nor you, I suppose." "No; my motto is, slow and sure." "And mine, nothing venture, noth-

ing have." "Well, the future can alone decide which of us is right," So the two cousins separated.

I am bound to confess, though my own feeling is that John was right, that circumstances seemed to justify Stephen in his course. It so happened that the particular glasses of goods of which he had bought so largely, rose rapidly, owing to a state of things which needn't be explained, and as his stock was large, his profits were also very large. Indeed, notwithstanding his personal expenses were three times as great as his cousin's, his balance sheet show-OF SOMERSET COUNTY. PA. ed, at the end of the year, a clear profit of £5,000. my business in your hands," Stephen left the office abruptly angry and mortified. He was glad eventually to accept the clerkship, being utterly wrecked in business, John Warren is at this time, his uncle being deceased, the head of the great firm, and a very rich man. Stephen is a dissappointed man,

"How much better is a man than a sheep?" was the question the Gospet better is a man than a hog?" is the question it has to confront now, forced

upon it by unprincipled politicians, Our Government has spent more money investigating the diseases of hogs than in investigating an the diseases affecting the human beings, and now the question of an alcoholic commission is before Congress, the disposition shown to treat the subject as its importance demands is so manthoughtful observer that a hog, in the scale of an average politicion's judgment, weighs a thousand times more than a man, especially if the hog as a marketable animal, controls votes by the thousand. If as many hogs died annually from a specific disease as human beings do from the effects of alcoholic, the efforts and money which Congress would be willing to expend would be unlimited-the interest would be intense-the concern manifested would be all-absorbing-the death of a hundred thousand hogs would stir the nation and its representatives to the depths of their moral and political being. "How much better is a man than a hog?" As an American citizen, we must hang our heads in shame before the question, -Baltimore Methodist.

A school-teacher, on seeing a young scholar misbehave, said to him: "I am sorry you did this, because I had formed a yery good opinion of you." The boy went home and confessed to his mother that, if he had known what a good opinion his teacher had held of him, he would not have done wrong. Had this teacher said: "I've had my eye on you for some time, and now I've caught you," the boy would simply have been confirmed in his suspicion that no one expects a boy to do anything but the wrong thing. It ought to be a simple matter to show a child or a man that our first impulse toward him is that of trust rather than distrust, And when one has gone wrong he will be better helped by our showing that we appreciate the fact that he has gone wrong in spite of the good we belieyed him capable of rather than in accordance with our suspicious of him, - Sunday School Times.

The Lapps are a very religous people. They go immense distances to hear their pastors. Every missionary outside, burried in the snow, As soon as the family arrives at the little wooden church and the reindeer is secured, the father excavates a little bed in the snow and the mother wraps baby snugly in skins and der would give me a chance to right my-posits it therein. What Came of My Not Attending Aunt Durgin's Tea.

You never heard about Aunt Durgin's tea? Well, it was a very important tea to me; it was the turning-point of my

You see I was young, about sixteen. and Aunt Durgin was quite old and She had plenty of money to live on, and do a good deal for us girls-a lot of us there were too. She was really fond of us, I know, now; but she was so worrying, always lecturing us and finding fault that we didn't love her very much, I'm ashamed to say. Her money was in an annuity which ceased with her death, so what she did for us must be done during her life. Every year she gave some special advantages to one of her nieces; and it seems-though I didn't know itthat she had about decided to give me the benefit that year.

If I had known!-but it wouldn't have made any difference; it took a shock to

I remember every moment of that day as if it were yesterday; the result of it seemed to burn every smallest event into my brain. I can even remember the pattern of forget-me-nots on the dress I

Mother was going out that afternoon, door, she said:

"Be sure to get to Aunt Durgin's in "O, of course!" I answered, carelessly. "You know she's very particular; and I'm especially anxious to have you please her to-day," she went on. "Why to-day more than usual?" I

asked. "I've been trying to please her ever since I wore bibs; but I don't think I shall ever do it unless I get a charm to turn myself into an old woman at "She's more fond of you than you

think," said my mother-and I remember well how care-worn she looked as she started down the steps-"though she doesn't show it." "Humph! I should think not!" I said, standing in the door. "She names me

but to-blame." "Well, mind you give her no cause tonight," said mother, opening the gate; "and oh! did you remember to get those pebbles off the roof for my Chinese

"No, I forgot," I said, "but I'll do it before I go out;" and the gate and the door closed at the same instant. "But I can't guess," I said, as I went

slowly up the stairs again, "what's up to-night in particular." With my mother's unusually serious

be sure that ruffles were all in order, and nothing should be wanting to delay me at the last minute. I even looked at my shoes to see that the buttons were was time to dress, and those I intended "grand passion," and that was for My father-dear, impractical man that he was; with a soul full of poetry and music—lacked the "push" to Time was passing, too; it was already for that matter. So he spent his life trying to drill music into stupid pupils; and of course, with his head in the clouds, he made little money. We were was hoarse, and at intervals I walked but, thanks to his gentlenness and my

the tran-door. I don't know how it happened; I sup-pose I had not opened the spring-door mysterious sounding knocks and voices. quite wide, and my jarring the roof as she thought. She knew no one was started it-but suddenly it fell with a in the house except my father downbang, pushing down the step-ladder by which I reached the roof. I could have down with a wild face, and met my flash, it is found that the impressions which I reached the roof. I could have grown with a wild lace, and met my jumped down into the attic, but I could not get back; and I thought it safer to lie on the roof where I could attract somebody's attention.

The which is declared and the met my mother in the hall. She declared in the met my mother is uppear widened out on the negative, endowing the negative to have moved during the time the flash was in extensions.

My mother laughed at her, and west istence.

My first thought was: "Dear me! if I up to the third story. She too head muffled knocks, and what sounded like to utilize to a greater extend the banana which she could not account for the second was more serious: · How was going to arouse anybody? The only ersons in the house were my father giving a music lesson in the back-parlor, and our one maid busy with her work in the kitchen. Every one knew I was going out to tea, and so no one would be surprised at my absence.

There was an old chair on the roof, for we sometimes went up there in warm he matter over.

Then I began to find that it was very cool, and every little cold I took had a nost annoying trick of settling in one tooth, ulcerating, and puffing up my face like a pumpkin. I took off my white apron and tied it over my head. Then I went to work to rouse the

household. In the attic, nearly under the trap door, was a shelf, on which were packed away many things. I laid down on the roof, leaned over, and found I could reach it. First I pulled out a curtain stick, and then I thought I was safe; I could surely make noise enough with that. I got up and pounded on the roof, and even on the skylight. hoping to attract somebody; though I knew Biddy wouldn't come up for hours, and my father was so absent-minded that I hadn't much hopes he would no-

When I grew tired of that amusement | fainted away went to my storehouse again, and this time pulled out an old fire-escape. It was a long piece of webbing that would reach to the ground, with a piece of iron to the edge of the roof at the back, flung

of tenement houses on the street behind us. Women began to be interested in my proceedings. First one woman appeared at her window, hands resting on the sill, sleeves rolled up, and frouzy head stuck out, staring wonderingly at me. Then another window blossomed dozen staring at me in dumb amazement couldn't hear any thing. Then I began so tragical to me. to wave my arms and beckon to them. They only stared the harder, and now room and then another head or two would appear beside her; but the idea that I was trying to communicate with them never seemed to occur to them.

Then a new thought struck me, and I thought if father saw something moving before the windows he must notice it. But not a word did I hear from that.

Then I tried the front, though I dreaded exposing my plight to street. I might have spared myself the anxiety, for no one noticed me except ome little boys playing in the street. I called, but I could not make them injunction in mind, I went up to my and then one would see me and point up, and two or three would stare a minute and then return to their play. couldn't make them understand that I

wanted any thing.
Up to this time I had been too excited all right; for Aunt Durgin had an eye to get cold; but now I began to suffer. like an eagle for any thing out of place. Once more I returned to my attic, and There were still two hours before it pulled out a piece of carpet. It was dusty and not over-nice for a covering, to give to my practicing; for I had one but I could do no better, so I wrapped it around my shivering shoulders, and I must have looked more like a crazy crea-

get on in those days-or in these either, late; I was getting desperate. Should I have to stay here till Biddy came up to bed? I pounded more vigorously than ever. something. But to go on.

I opened the door (it stood straight with a joy I never could have bileved But let me go back a little and tell

how things went on in the house. About wrap to Aunt Durgin's, I went back to two hours after I had gone-as ever one supposed-Biddy went up to her stairs. She was superstitious; she man

voices, which she could not account for or loca te. She went into all the rooms; of the branchless plant, and is capable she looked in every closet; she saw the spring door closed, and she never ineness. In Central Africa this fiber is thought of any one being up there. She was a little startled herself, though she did not think it was spirits, and she got father up there. He went to please her, though he poohed and said it was nonsense, etc. When evenings, and I sat down on it to think he got there the noises had stopped; probably that was when I was coaxing the street boys. So he said "Nonsense!" more emphatically than ever,

and came down. When the two policemen with their clubs pounded on the door and demanded admittance, and Biddy went to the door, she was scared again; and they walked right in.

"What do you want?" asked my father, meeting them in the hall. "We want the mad woman on your roof," they said. "Good heavens!" cried my mother,

"a mad woman! That's what we heard! how could she have got there?" They all went up the stairs in procesion, the policemen leading. When the door opened, and the head appeared above it-my relief, after the

strain I had been under was so great that for the first time in my life I The policemen dragged me down some way, my head still tied up in the

apron, and the old carpet trailing after ne. They were about to carry me down in one end. Now I thought I could the next flight, preparatory to carrying surely make some body see. I dragged it me off to the station, I suppose, when mother happened to eatch sight of my

Of course she took me in charge, and the policemen turned upon the crowd who had followed in from the street, drove them out, and we were left alone. When I came out of my faint, my nerves were all unstrung; I couldn's control myself: I laughed, I cried, I out with another frouzy head, and so it went on till I had as many as half a thing seemed so absurd and ridiculous, to be a prisoner on one's own roof for -at least I suppose it was dumb. I hours. And yet it had sometow been

More tragical indeed than I dreamed; for that very evening the blow fell and then one would look back in the Mother dispatched father at one to Aunt Durgin's to explain; but the answer he brought back was crushing. Aunt had talked her plan over with my mother, made her promise secrecy, and invited me to tea, to talk it over began to walk back and forth and saw and make her offer. It was-oh, itwas

my fire-escape across the house. I -to have a year's study abroad! The one thing I wanted! When I did not come, she thought it was because I did not want to be bothered to take tea with an old woman-she was always so suspicious; so she sent for Cousin Jane, who lived very near her, and made her the offer to go abread. That was the news that father brought. Jane didn't want to study, so she had year of travel, and Aunt Durgin died before the end of it. So you see, my dear, if I hadn't been so careless that once, my life would have been very different, and I shouldn't have been a common music-teacher all my days.—Olive Thorne Miller, in N. Y. Independent

### LIGHT PRODUCES SOUND. A Wonderful Discovery in Science Made Within a Year or Two.

One of the most wonderful discoveries in science that has been made within the last year or two is the fact that a beam of light produces sound. A beam of sunlight is thrown through a lens on a glass vessel that contains lampblack, colored silk or worsted, or other substances. A disk having slits or openings cut in it is made to revolve swiftly in this beam of light, so as to cut it up. thus making alternate flashes of light and shadow. On putting the ear to the glass vessel, strange sounds are heard so long as the flashing beam is falling was now much too late for Aunt Dur- on the vessel. Recently a more wonderful discovery has been made. A beam of sunlight is made to pass through a prism, so as to produce what is called the solar spectrum, or rainbow. The disc is turned, and the colored light of the rainbow is made to break through it. Now, place the ear to the vessel containing the silk, wool or other material. As the colored lights of the spectrum fall upon it sounds will be given by different parts of the spectrum, given by different parts of the spectrum, and there will be silence in other parts. For instance, if the vessel contains red worsted, and the green light flashes upon it, loud sounds will be given. Only feeble sounds will be heard when the red and blue parts of the rainbow fall upon the vessel, and other colors make no sounds at all. Green silk gives sound best in red light. Every kind of material gives more or less sound in different colors, and utters no sound in others. The discovery is a strange one, and it is thought more wonderful things will come from it - Art Journal

### SCIENCE AND INDUSTRY.

-A method of expanding hoops and electric current has been devised. -Experiments recently made by Dr. Luderitz in the Berlin Hygienic Institute indicate that all kinds of bacteria are killed by coffee.

-On a branch road of the Canadian I Pacific, near Sudbury, Canada, is a nickel mine that produces more nicke. than the world's market calls for. The output is said to be 4,000 tons annually -The conclusions reached by modern neteorologists are that cyclones of great intensity are ascending spiral whirls of sive taste. wind having a rotary motion in a direction in the northern hemisphere oppo

watch. -It has been calculated by H. O. Tumlirz that the light reaching the pupil of the eye in each second of time represents a quantity of work which would require one year and eighty-nine days to raise the temperature of a gramme of water one degree centimeter

(1.8 degrees Fahrenheit.) -Scientists say that the duration of a lightning flash is not infinitesimal, but that the flash lasts a measurable time. For example, if one sets a camera in garnet, fligree gold or passementerie is rapid vibration and exposes in it a plate so as to receive the impression of the chowing the negative to have moved

They closely resemble the ordinary ter". wooden handles, but are said to be more agrable than the latter, and have the added advantage of never splitting when driven into sockets, as the paper will yield more than is possible with wooden handles. The bore of one-sixteenth inch may be increased to threefourths inch without injury to the handle.

# LIVING BY POLITICS.

A Trade Pursued by Two Hundred Thousand American Citizens. The countless minor offices of the United States are filled by a distinct class known as "professional politicians." These men live by politics, receiving place as reward for political work. Their control of public office is monopolistic. Mr. Bryce estimates their num ber at two hundred thousand, but this is probably an underestimate. They constitute a guild, although they are not organized under formal articles of association. With them office-getting (or keeping in office) is an industry, and the fees and emoluments are accepted as payment for partisan services rather than for the exercise of official functions. The influence which the office holders wield is altogether out of pro portion to their numbers or to their intellectual attainments. But they possess this advantage over all other classes—they are unified and organized. They make the management of primaries and conventions the serious business of their lives, and acquire a skill and experience in "wire-pulling" which ordinary citizens cannot hope to cope with. The politics of the country is in the hands of these men. The people elect, but can not nominate, being reduced to a choice of candidates selected by the politicians of opposing parties. These politicians dictate nominations, high and low, and afterwards foreclose a lien upon public place which they claim to have earned. All others, those who can not show a certificate of this character, are excluded.-Oliver T. Morton, in Atlantic.

The First Sewing Machine. Elias Howe, the inventor of the sewing machine, was born in Spencer, Mass., July 9, 1819. His father was a farmer and miller, and Elias remained at home, assisting him, till 1835, when he went to Lowell and found employment in a factory, afterward working in a machine shop at Boston. There he developed his idea of the sewing machine. His first machine was completed in May, 1845, and he secured his patent September 10, 1846. He made four machines, but received so little encouragement for them that he went to England, where he struggled with poverty for two years. He then returned to America, to find that others had appropriated his idea. For more than five years he was constantly engaged in lawsuits, but finally secured his right to priority of invention, and other manufacturers of sewing machines paid him a royalty on their patent. He now amassed a large for-tune, estimated a \$2,000,000 from the sale of his machines. He died in Brook-lyn, New York, October 3, 1867.—Boston

### FRESH FASHION NOTES.

Charming Novelties for Spring and Sum-mer-Sacques for Infants. Black underwear has come to be regarded as an essential to a black toilet,

whether for street or house Kid moccasins appear in the imported baby baskets for young and fortunate orsels of humanity.

They are light, shoes, laced and tipped with the bright gilding.

Tiny sacques for infants, lined with colored silk, retail at \$7, the edge being finished with hand embroidery. One vard of embroidered French flannel and half a yard of rose-colored silk will uffice for the wee sacque and save the ouver two-thirds of that figure. The full yard of flannel must be purchased in order to get the needlework .- N. Y. World.

# JAPANESE HOT SPRINGS.

They Are Surrounded with Quaint Garden A people who so delight in social bathing naturally make the most of the hot springs which are found in so many parts of the empire, and surround them with quaint gardens and other pretty and characteristic details. Several of the attractive watering places lie within such easy reach of Yokohoma as to render them familiar to all foreign residents as a pleasant object for a delight ful excursion, and in Japan such excur

sions imply innumerable minor points of interest. Thus my own recollections of visiting ertain boiling springs near the base of Fuji-Yama in the month of August are as a kaleidoscope wherein blend the quaintest medley of processions of pilgrims, tea house scenes, driving along beautiful sea coasts, and watching pretty girls devour raw little octopi and other extraordinary food, or passing beneath stately avenues of pine and cryptomeria past whole fields of lovely tall white lillies, grown as we grow potatoes for the sake of their roots, and then past ponds devoted to the sacred lotus, whose magnificent rose or lemon colored blossoms peeped from among the great blue-green leaves, rising to a height of three or four feet above the water. And on and on, through villages where for two and one-half francs while he crowds of children, and grown-up folks too, were celebrating a quaint mythological festival in such pretty fanciful fashion as seemed to suggest some fairy tale rather than a page of prosaic life.

And then we halted for the night at

the charmingly-primitive tea-house of the same size, and as a rule the crown Sengoko-yu in the heart of the beautiful | which fitted the original king for whom forest, to which water is brought in it was made never fitted any of his sucbamboo pipes from boiling sulphur springs at a higher level, and is cooled in rude but effective baths. One of surd than a very small crown cocked on these was given up to our exclusive use, the bead of a very large king, except, drained, refilled, and screened in deference to our foreign prejudice, and here we reveled in peace and boiled away all falls over his ears. There was, it is true, the aches and fatigues of our long day's journey. Then our courteous hostess herited rights shown by this custom of arrayed us in cool Japanese dresses wearing an ancient ancestral crown, but from her own wardbrobe and treated us it need not be supposed that any monto an excellent Japanese supper.

On the following morning we repeated the sulphur bath with full appreciation of its merits, and then climbed through the forest to visit the sulphur springs-3 dreary region where, in a hollow be tween dark, wooded hills and red bluffs of crumbling rock, pools of boiling sulphur, alum, and iron, and clouds of steam red, broken ground. It is a desolate

"I presume, madam, you mean fowl," said the sprig in a re-proving tone. "Very well," said the lady, a little nettled, "be it so; take away the fowl and let the fool remain." -Sewing machine agent-"Good morning, reverend sir. You know something, do you not, of a society in this place known as the Tattletown sewing circle?" Reverend-"I do, young man, I do." Sewing machine agent-"Then you can tell me, no doubt, what kind of sewing they particularly devote themselves to?" Reverend-"I regret to say, my friend, that they devote themselves most assiduously to sowing the seeds of scandal.—Richmond Dispatch:

#### CONCERNING CROWNS. The Emblems of Royalty Worn by Kings

and Queens. Many years ago it was the correct for a monarch to wear the identical crown worn by his predecessors. A king never was formally crowned on the day when he succeeded to the throne, but the eeremony was always postponed for a week or two in order to have the crown thoroughly renovated. In the days when the French had kings the monarch was so liable to be upset by a revolution that he was unwilling to delay the ceremony of coronation, and it often happened that a new French king would send out the prime minister with the crown within twenty minutes after the previous king's decease with orders to have it blocked waited. But there is no doubt that the custom of handing down the same crown from generation to generation had its disadvantages.

In the first place, it rarely happens that two kings have heads of precisely cessors, but was always either too large or too small. Nothing looks more ab perhaps, a crown which is much too large for the wearer and continually a certain reverence for antiquity and inarch really liked it. No matter how carefully a king might

have his father's crown acoured and repaired he always felt that he was wearing another man's clothes, so to speak. As for Queen Victoria, it is well known that she ordered an entire set of new crowns when she came to the throne, remarking as she gave the order, that she rise ceaselessly from a bare expanse of had as much affection for some of her relatives as any body need have, but as spot, in curious contrast to the loveli- for wearing any thing that had been on ness all around, for no vegetation grows | the 'ead of that 'orrid King William she near the sulphurous pool. -- Cornhill | would go to her grave bareheaded first

The Visitor to Duluth Hears It Constantly.

The Echoes of the Famous Harangae Still Heard Around Buluth-Grands father Lickshingle's Experience.

HAVE just got back from Duluth," said Grandfather Lickshingle yesterday, as he entered the office somewhat stained. "It's a great town, that Duluth, but it is mighty unfortunate for the visitors to the place that

Proctor Knott ever made that speech of his about it." "How can that famous speech affect the visitor to Duluth now?" asked the

"Well, sir," continued grandfather, "that speech has been the bane of my existence for the past two weeks, and I believe if I had remained in Duluth a little longer it would have been the death of me. They work that speech on a stranger just as the people of Greens-burg, Ind., used to work their guests with that tree which grew on the top of the court-house."

The reporter had never heard of this Indiana phenomenon, and grandfather enlightened him.

"The thing was this way. The people of Greensburg were surprised to find that a small tree was growing on the roof of the court-house in that town. They never could account for it exactly, but the theory is that some boy had fired an acorn on top of the court-house and it had lodged and taken root in one of the cracks of the slate roof. Anyhow, from a small bush it grew and grew until it got to be several feet high. Of course it was a great curiosity in the town, and people came in for miles to see the oak tree growing on top of the court-house.

"When a stranger struck the town the very first man he would meet would begin to tell him of the great curiosity they had around at the court-house, and would wind up by marching him around to see the tree growing on the roof. You would meet another friend, and about the first thing he would say would of sleeping innocence. Duluth! 'Twas be something like this:

"'I suppose we have one of the most tiling of the roof,' and then he would grab you by the arm and prance you the unsalted sea."'

founded tree and feel mortally offended if you didn't walk around with them to stranger in Duluth," concluded grand funny speech. Of course, there never would have been a race-horse called Proctor Knott if this speech had not fernal Proctor Knott racket, and I said been made, but that's no reason why a at once to the barkeeper: man who goes to Duluth on business "'I will shake you for the drinks, my can't be given a chance to transact his friend, but I will make it a condition hounded around town by a lot of people who want to prove to you how far Proctor Knott was off his base when he ridiculed Duluth in his speech.

"Stranger in town, I suppose?' in quired the landlord of the hotel where I stopped. I told him I was. 'Duluth's quite a city now,' he went on. 'Last census gave us 35,000. Got ten newspapers, and when the Government findockage front of twenty miles. How many bushels of wheat do you suppose were shipped in here in the last but that I am not.' four months? A fraction over 15,222,447 bushels. Think of that! And yet this is the place that Proctor Knottridiculed another, and then said: so unmercifully in his great speech before Congress. His mock heroics over the town of Duluth, that he claimed to have never heard of, were simply kill-

Standing in the halls of Congress' and the landlord stood up erect to be better able to give me a correct idea of Mr. Knott's great effort-'standing in the halls of Congress, thus, Proctor Knott said: "Duluth! The word fell upon my ear with a peculiar and indescribable charm.

THE LANDLORD STOOD UP ERECT. like the gentle murmur of a low fountain stealing forth in the midst of roses, or the soft, sweet accents of an angel's

whisper on the bright and joyous dream of sleeping innocence. Duluth! 'Twas the name for which my soul had panted as the hart panteth for the water brooks. But where was Duluth? Never in all my limited reading had I seen the celestial name in print or heard even the winds whisper of this zenith city by the unsalted sea."

"'And in that way he went on for one hour ridiculing Duluth,' said the landlord, as he wiped the perspiration from his brow and sat down again beside me. Now, look at Duluth, with its great blocks of buildings, its bursting warehouses and elevators and its mills and factories. How many bushels of wheat do you suppose -'

"Fifteen million two hundred and twenty-two thousand four hundred and forty-seven bushels and some pecks,' I answered promptly, for this thing had been sprung on me several times before. | hugged to death.

"'Just so,' said the landlord, 'and yet Proctor Knott stood in the halls of Congress'—and he rose grandly to his feet again—'and yet, I say, Proctor Knott stood in the halls of Congress,

"I asked the landlord at this point if he wouldn't kindly hold that paragraph until I walked around to the post-office and got my mail.

"When the postmaster handed me out here during the past four months?"

the town that Proctor Knott lampooned and I could see through the glass boxes that he had the attitude—'I say Proctor WE T Knott stood in the halls of Congress and for an hour ridiculed Duluth like this:
""Duluth! The word fell upon my ear

with a peculiar and indescribable charm like the gentle murmur of a low fountian stealing forth in the midst of roses, or the soft, sweet accents of an angel's whisper in its bright and ioyous dream

"AND YOU ARE KNOTT YOURSELF!"

TEMPERANCE EDUCATION.

Extracts from a Tract by Frances E. Wilthough they were given him for that

most painful and humiliating is given ives of drunkenness, should be an insult that sobriety out-ranks industry upon the map of character. But gentleness remains to be considered. It is the perfect flower of strength, the ornament of industry, the fragrance of integrity. But gantleness can not live without native air. For gentleness is "gov-ernor" of character's great engine, the when you have "boxed the compass," you shall find sobriety the virtue that dominates all others, since the clear, sense the universe to us. We get no not his prison. Perfect obedience to its cosm-the mirror of the universe-nay of its Croator. In his ignorance he be gan to use strong drinks, and honestly called them "a good creature of God. But the attractive ingredient in all these beverages is alcohol, a poison that has this changeless law, that it acts in exact proportion to the quantity imbibed upon the brain and nervous system precisely as fire acts upon water, lapping it up with a fierce and insatiable thirst. This affinity of alcohol for moisture is like a feverish and consuming passion, and the blistered nose, burnt brain, and parboiled stomach of the drinking man are nature's perpetual object lessons to illustrate the fact that alcohol must be the rodoubtable enemy of an organization made up as the human being is, of seven in every eight parts of water. Put with this fact one other, viz: That alcoholic beverages are the only ones on earth that have no power of selflimitation. One glass says two, and two say three, until, as a general rule, from the power of self-perpetuation in this appetite, the life of a drinker of alcoholics has but two periods, in the first of which he could leave off it he would, and in the last, he would leave off if he could. But how shall the young and thoughtless avoid this supreme peril of their youth unless they about it, and how shall they learn

> to their intelligence. In my geography should be laid down the maelstrom of moderate drinking, and the Niagara of drunkenness; in my grammar, the conjugation of the verbs 'to be" and "to do," as related to a boy's life proceedings, should be no more irregular, and in my arithmetic the knotty problem of life should be the one on whose solution most of study was expended. \* \*

> I believe this systematic instruction, which both forewarns and forearms them, to be the road out of bondage for the children of America. No other institution of the Republic reaches them all. Powerful as are the forces of the pulpit and press, the former does not attract all ears, and the latter is largely influenced by the saloon in finance and the saloon in politics. But to the school-house door come white and black, native and foreign-born; inside its walls are invested their formative years, and the laws of their being, as set forth by science, must appeal to their self-love, an attribute upon which we may always confidently base our calculations. The German, who learns that the laws of nature take sides with local abstinence, will gradually cease the cry of "fanaticism." His boy comes home from school and tells him that in time of pestilence and sunstroke the beer-drinkers pay forfeit and the total abstainers get off scot free; that these last are at a premium with the life insurance companies; that they win in the athletic games; that they are the successful explorers and victorious soldiers, and that chemistry, physiology and hygiene prove that this must always be so. Mein Herr scoffed at the crusading women, but the dignity of science will do much to silence him, and it will convince his children. I beseech you then, as the truest guardians of the State and the most intelligent and helpful friends of the child in our midst, who is also in the market place, and who is sure to be auctioned off to the forces that bid highest for him, stand by the mothers of the Nation in their brave and tender, loving labors to save "The little soldiers newly mustered in To the army of temptation and of sin."

THE King of Samoa, whom the famous Samoan conference held in Berlin a year ago restored to his power, has issued teach except they be sent? This, then, this decree: "No spirituous, vinous or is the rationale of scientific Temperance | fermented liquors or intoxicating drinks whatever shall be soid, given or offered Nature's way of bringing order out of to or bought or bartered by any native JAS. SATURDAY, APRIL 26, 1890.

A dispatch from Annapolis to the Baltimore Sun dated the 21st inst,

In his charge to the grand jury today Judge Miller referred to the the good woman whose name he thus charge of malfeasance in office preferred against Mr. Stevenson Archer. No charge of embezzlement will be made here, as the State's securities were taken in Baltimore city. Judge Miller said that malfeasance in office is a common law crime, punishable by fine and imprisonment, "If onehalf that is said of Mr. Archer is true," continued the Judge, "there will be no difficulty in finding an indictment against him for malfeasance in office." The same witness who testified before the legislative investigation committee and who also gave testimony before Governor Jackson have been summoned before the grand jury.

### The Democratic "Shorts."

The list of Democratic State Treasurers who have stolen and mismanaged the funds entrusted to their charge during the past few years is an interesting one. It includes eight State Treasurers, every one of whom was given the opportunity to rob the people by the Democratic party. The following table contains the name of each one of these Democratic "shorts"

The Secretary also thinks that the careful in business as the storekeeper, and his equal in intelligence and genfund for the payment of the floating debt of said town, and the improvement of the public streets in said town and said fund shall be used for no other purpose,

Sec. 5. And be it enacted. That the proceeds arising from the sale of said bonds shall as soon as received be retained and sec. Sec. 5. And be it enacted. That the proceeds arising from the sale of said bonds shall as soon as received be retained and kept as a fund for the payment of the floating debt of said town, and the improvement of the public streets in said town and said fund shall be used for no other purpose,

This party of "shorts" is also the same party that shricked itself hearse over the alleged corruptions of the Republican party in its management of the national finances, and which was continually screaming for a sight of the books. The Democracy finally obtained such a sight and found

the account standing as follows: The Republican party in account with the nation after twenty-four vears:

Service shortage... Total snortage It is no accident that these defalcations have all happened in States where there is no respect for the rights of legal voters. A people cannot knowingly do a wrong without debasing its own moral sense, and when the Democratic party of the South consents to the robbery of the ballot boxes it encourages the men it elects to responsible offices to think that they will not be punished if they filch from State treasuries .- Phila.

# Dana to Cleveland.

NEW YORK, April 17 .- In reply to Mr. Cleveland's sharp criticism of Editor Dana the Sun to-morrow will contain the following article under the head :

"REMARKS TO A COWARDLY LIAR." "The stuffed prophet of William street, in a rage of wounded vanity, is thus reported: 'There is only one thing,' Mr. Cleveland resumed, and a tender expression lit up his face, 'that I care anything about in these attacks; they are not confined to myself. It seems that the senile Dana does not confine his warfare to men. Women are not free from his distardiy assaults. Mrs. Cleveland has not escaped. It is bad enough for Dana to print his lying statements regarding myself, but it is infinitely more cowardly and distardly for him to include, as he has done, my wife in his attacks. Nothing could be more contemptible or so far removed from all instincts of manhood."

"To no habitual reader of the Sun is necessary to say that this is a cowardly lie. It is not the less a lie because it is uttered by a man who attacks; they are not confined to my-

THE REPUBLICAN. States. It is not less cowardly because it proceeds from a husband whose inferiority in social, moral and intellectual qualities is recognized by

## Secretary Rusk's Remedy.

WASHINGTON, April 21,-Secretary Rusk is about to issue an address to the farmers of the county explaining how the depresssion in agriculture can be remedied.

He attributes the present state of affairs in part to carelessness in culture, and says that in these days a farmer must be as well trained and

Lightning Rod Sharpers. The season for lightning rad swindlers to make their appearance amongst the farmers, is approaching. Farmers should be careful what documents they sign. A couple of weeks ago a party of the sharks were traveling through Huntingdon county and working their scheme by representing to the farmers that they were only required to sign a document to pay a small sum as the difference between the old and new rods. Afterwards a farmer learns to his sorrow that he signed a negotiable note for about ten times the amount to pay for the exchanging of the lightning rods. Farmers should keep a sharp lookout for them.

CHAPTER 573.

AN ACT
To provide for the assessment of the unclaimMilitary Lots and tracts of land in Allegany
and Garrett counties, and for the collection
of State and County taxes thereon, by seliling the delinquent lands and turning the
net proceeds into the State Treasury.
WHEREAS, Under the Acts of 1781 and 1787
and 1788 upwards of two hundred thousand
acres of "the reserved lands westward of Fort
Cumberland" were laid out in fifty-acre Lots
and gratuitonsly awarded to the officers and
Soldiers of the "Maryland Line" for their services in the Revelutionary War, and
WHEREAS, It appears from the Assessment
Books that upwards of one thousand of these
Military Lots are not now assessed, and never
have paid any State or County Taxes during
the past century, owing to the difficulty in
ascertaining the names of the last owners
who are non-residents of the counties in
which the Lots are located, and
WHEREAS, Many of those lots have been AN ACT

which the Lots are located, and
WHEREAS, Many of these lots have been
taken up under escheat, and other warrants
and patented by the State and subsequently
disowned by the patentees, for the alleged
reason that living, but non-resident heirs of
the soldiers had been discovered, therefore,
SECTION 1. Be it enacted by the General Assembly of Maryland, That the Newspapers
selected to publish the Laws passed at this
session shall publish the following notice,
daily, for thirty days, in all daily newspapers
so selected, and weekly for ten consecutive
weeks in all the weekly newspapers so selected.

(Form of notice to be published.)

(Form of notice to be published.) (Form of notice to be published.)
Notice is hereby given to the legal heirs, assignees, devisees and representatives of all Officers and Soldiers who served in the "Maryiand Lâne" during the Revolutionary War, that unless their claims of Military Lots "lying westward of Fort Cumberland' are legally established on or before the first day of April, 1891, in such manner as to secure the payment of State and County Taxes thereon, all their right shall be forfeited to the State and all such lots, as have not been patented or claimed by legal heirs, shall be advertised and sold to the highest bidders for cash and the net proceeds paid into the State

SEC. 4. And be it enacted, That this Act shall take effect from the date of its passage.

A BABY'S THOUGHTS.

O pshaw! I wish that I could talk I'd sauce So far as I have looked around I don't see what

They smother me with blankets, but I wouldn't

For when I do they always pile them on me twice as thick.

If I could talk I'd tell them all a pointed fact or They know a baby's helpless. I'll cry, that's what I'll do

Some puregoric, castor oil and lots of awful

I'm going to make my nursey take a whole lot the stuff. And sometimes when I tell them there's a pin a-sticking me. They say I've got the colic and they dance me

on their knee. There's some folks say a baby is a very constant care. Well, some folks never guess one-half we babies have to bear.

# WONDERFUL CLOCKS.

Marvelous Machinery Used for Keeping Time.

Clocks Made Wholly of Ice, Straw, Paper or Hardened Bread-Minute Time Keepers, One of Which a King Wore On His Ear.

Five hundred and eleven years ago. in February, 1379, Henry Vie, or, as some authorities give his name, Henry de Wyck, the "Nuremberg Wizard," set King of France, Charles V. was King ful timepiece more than a year and a minutes, breathing out its final sound in half), and Nuremberg, "the cradle of a tone of despair. The inventor, whom Europen invention," was the mistress the surgeons had blinded while the of all the high mechanical arts. Legend- clock was wrecking itself, stood erect ary accounts and casual allusions of and cried out at the top of his voice: various authors to mechanical contrivances for the measurement of time establish the fact almost beyond a shadow is complete." of a doubt, that the clock was known some years, perhaps centuries, bafore the historical effort of the ingenious and two and a half centuries, when it was deft-fingered De Wyck.

It is known that Frederick II., who died in 1251, was at one time presented by the Sultan of Egypt with a timemeasuring contrivance provided with wheels and a bell. Pante, who died lifty-eight years before De Wyck, set question to decide with any degree of his wonderful "time-teller" going on the regal palace of the French King, in what its past and present condition. It three separate passages of his works alludes to a striking clock. So, too, Calmet, who wrote in 1120, speaks of a striking clock used by the Cisterian have become a mere legend in the short monks. History is history, whether right or wrong; making it worse than heresy for a writer to go beyond certain prescribed limits.

As all the "authorities" concur in givname, and still more uncertain nativity, which clearly should be divided equally between several inventors who in the wake of the night of the Dark

Conradus Dasipodius of Strasburg. who perfected his wonderful astronomical clock in 1573, is believed to have been the first to apply his skill to the

marvelous in clock-making. The best description of it is that of a traveler who spent five hours a day for twenty-one days carefully inspecting every part of it before attempting to give to the public a pen-picture of its conderful intricacies. Although couched in the peculiar language of the times, and abounding in odd and unseeming expressions, the description is other-

wise remarkably clear. He says:
"At Strasburg I spent almost a full month, putting in a half day each day osities to be found in the strange clock invented by one Conradus Dasipodius. Before the main part of the clock stands royal ear. a globe, which shows to perfection the motions of the heavenly bodies. The heavens are carried about by a mover once every twenty-four hours; Saturn, by his proper motion, is carried once about every thirty years; Jupiter in twelve. Mars in two; the sun, Mercury and Venus in one year, and the moon once each month. In the clock itself there are two tables, one to the right, the other to the left. These show the eclipses of the sun and moon from the year 1573 to the year 1624. A third table occupies the middle of the space in the clock's interior. This table is divided course of the year and the day thereof, shows the year of our Lord and the equinoctial days, the hours of each day, the minutes of each hour, and the seconds of each minute, besides Easter and all other feast days and the dominical letter. The third part of the table has a geographical description of all Germany and France, a plat of Strasburg and the names of all those who assisted in building the clock. In the middle planet passes, and also statues of each utes. There is also the skull of a man

"Rejoice, proud citizens, in my work:

san in 1842. From the above accounts it is safe to conclude that there is really a wonderful astronomical clock in the Strasburg cathedral, but it would be out of the space of three centuries.

It is a well-known fact that the great emperor, Charles V., was a skillful watch and clock maker, as well as a diplomat and ruler. After his abdicaing to this Nuremberger of uncertain tion, Charles retired to the monastery of St. Just and occupied his entire tim the honor of being the original clock-maker, I shall follow a time-honored delighted beyond measure at his success precedent and accord to him esteem as an artisan, in what was then, as now, the most skilled of the handicrafts. That he was head and shoulders above and toiled in the dawn which followed the common bred tradesmen may be inferred from the fact that at that early date, when the art of watch and clock making was in its infancy, he constructed a striking clock small enough to be worn as an ear pendant, and which for perfectness has never been equaled. This wonder is still preserved among other monastic relics at St. Just and is viewed by hundreds of ambitious young clock makers, who wish to become perfeet in their art, each year. It is less than three-fourths of an inch tall and only half that wide, yet it has forty-two distinct pieces, including wheels, screws and springs, to say nothing of the nineteen pieces of which the case and alarm are formed. Charles kept his clocks arranged around the sides of his cell on shelves and his watches on a plush covfor three weeks, studying out the curi- ered table in the center of the room, all except his marvellous pendant clock. which he continually wore in his ex-

Before its destruction by the French soldiers in 1693, the Heidelberg clock occupied a prominent place in the dome of the Town Hall. As the hamme struck each hour the figure of an old man, almost life-size, opened the door and walked out in full view of the streets below, removed his hat, bowed and returned to his niche. As he closed the door a cock flapped his wings and crowed; Father Time made some blind strokes with his scythe while some soldiers dressed as French and Germans fought on a platform below. At midnight and noon the chimes played national into three parts. In the first part a airs, and once each twenty-four hours the statue of Apollo and Diana shows the life of man was illustrated with figures depicting the seven ages. The astrobeing turned once about in the course nomical charts and diagrams were said of twelve months. The second part to have been even more intricate and complicated than those of the Strasburg clock. The French soldiers debated the matter long and earnestly before destroying such a marvel, until they saw the French soldiers in the automatical fight on the clock's platform overcome by the German troops, after which they willingly ruined both clock

and hall. Early in the present century a Lonframe of the clock there is an astrolabe don clockmaker of great wealth caused showing the signs through which each a marvelous piece of clock work to be contructed and given as a present to the of the seven planets upon a round piece | Emperor of China. It Does Not Amount to as Much as Some Would Have Us Believe. The time being one in which fiction has triumphantly asserted its supremacy over every other form of literature, it is not strange that it has occurred to more than one thinker to inquire how far the conventional views of the influence of fiction upon morals and life is the correct one. There are those who hold that the aim of narrative is simply to entertain, and there are those who hold, on the other hand, that its true function i to instruct, a view in which they find themselves much supported by the fact that so much of the greatest teaching of the world has been done in the guise of parables. There is perhaps a third school who hold some sort of a moderate and very likely most rational view, but nobody ever pays much attention to moderate views, so that these do not really count for much. The age is one of which we hear every day that it is exceedingly materialistic, and to this is not infreently added the charge that even art has come to be looked at from its utiliitarian sides, so that one expects to find that flction has come to be the vehicle of instruction in the practical details of life. To be logical, novels nowadays should be simply disguised treatises upon some practical phase of life-and

out one in a frame of mind to receive instruction. We have never been able to believe that there is much good in the strictly practical realms of human affairs. The utilitarian is so far outside of the province of art that art does not of the province of art that art does not touch it even when it strains after it, but only gets outside of its own domes without compassing that of the other. If good is to be done by fletion it must If good is to be done by fiction it must be done in the realms which belong to broverbially an absent-minded man, and must be toward the imaginative, the inthere be a conscious and obvious intention to teach it all goes for little. Fiction must lead by being, not by preach-

Whatever may be theory, however, in

But, quite aside from what fiction might or might not be theoretically, is the question what it is in its influen As a plain, every day matter of fact, fiction is usually a matter of amusement, pure and simple. People read and forget what they are, what encompasses them, and the things that wear life out if looked at too long or too closely. In other words, it may as well be accepted as a fact that fiction is what George Ellot was fond of calling "opium eating;" it is one of those things which dis-guise the taste of life and transform one from a mortal into a dispassionate being so far as realities are concerned, by absorbing the attention upon un realities. Of course, if meanwhile fic tion is what it should be, and appeals to its readers through its proper sphere, its influence may be high and good; but the conscious purpose of the reader is only to be amused. It follows that the fletion which is intentionally didactic is least of all likely to effect its purpose. It is precisely when they do not know that they are being preached to that people are most influenced. The age is one of unbelief and doubt, and it is to comfort themselves in their restlessness that people so generally take to the reading of fiction. If the tales they read repicture for them the same world they are trying to escape, are they so likely to be elevated and cheered as il they are shown the ideal and the possible! Theories are all very well, but in the presence of the great fact that mankind can only be led by its inclinations, not even its convictions proving in the long run a very powerful tractor, is it not wise to reach them through their preferences; in other words, to reach them in the only way in which they can be reached effectively?

Idle wishes are those which begin and end with themselves. They lead to no effort, they develop no energy, they inaugurate no plan of action. It would probably astonish most of us could we realize truly how many of our wishes were of this character. Sometimes they relate to a past which is irrevocable. Men wish that they had inherited prop-erty, or a healthier constitution, or better tendencies - that they had been brought up under better auspices, or

A Word About Idle Wishes.

trained with more care or wisdom-that they had made different decisions, or pursued different courses, or been led by different advisers. Such wishes, while they naturally glance upon us as unavoidable regrets, should be but the passing guests of a moment. Save as they may suggest improvements for our -Farm and Fireside. -The metal of a politician is known

GENUINE COURTESY.

Instances of True Breeding in the Hum bler Ranks of Life. It is not always in court circles or mong the aristocracy of a land that the truest courtesy is found. In the huarbler ranks of life are often seen instances of true breeding that would put to the blush some of our upper five hundred. Nearly fifty years ago, when John Williams' "Rarities of Mechanical In-genuity" says that it run continually birds fluttered with renewed activity, the small lady wagged her head, while from Kentucky, was stumping that State "Rhineland Tales" makes a statement a small gold dog at her feet barred for the election of his friend, Henry strangely to the contrary. It says: lustily. The maker spent five years in Clay, to the Presidency, he stayed for a constructing this unique rarity, and few days in Danville. claimed to have been at a moneyed out- Grass region.

The Whigs from near and far were gathered in force in the little city, and the distinguished men of the neighborhood, together with these visitors, were invited to a "big dinner" at the house

the sun that it was noon.
"Why," he said to himself, "I must hasten, or I shall be too late for Mr.

-'s dinner!" He had forgotten that the dinner was appointed for the next day. Taking a slort cut through the woods, he soon arrived at the farm-house. He noticed annusual commotion in the yard, where the slaughter of turkeys was engaging theattention of a crowd of little darkies, and thinking he must be late, he has tend his steps.

M. and Mrs. S-- were standing on the tront porch, watching the turkies and the darkies, when Mr. Crittenden approached. Mrs. S -- understood the situation at once. "Blass my heart, husband," she said,

'yonder's Senator Crittenden! He's coming to dinner, sure's the world! He thinks it's to-morrow. What shall we "Invite him in." said the old farmer.

'and give him the best we have.' At that moment the dinner-horn sounded, and the visitor reached the steps. Mr. 8 -- advanced to meet him. but before he could utter a word, the Senator said:

"I hope I have not kept your dinner waiting, Mr. 8--. I was walking in the woods, and did not notice the hour." "Indeed, no," was the instant reply "It is only just ready. Walk in, sir walk in! I am glad to see you under as a matter of fact such some of them are. | my roof."

He took his visitor's hand heartily, introduced him to his led the way into the dining-room three stalwart sons, and smoking on the board were the traditional hog and hominy, with the potatoes and corn bread of Kentucky farm-life.

its own domain. The reach of the tale must be toward the imaginative, the intellectual or the ethical. Even then if thoroughly enjoyed his dinner, and denot occur to him. On the contrary, he Highted the heart of his hostess by telling her that her corn pones tasted just as his mother's used to do when he was

a boy in Woodford County. After dinner, and an hour's conversa tion over cob pipes on the front porch, he arose to take his leave. As he shook hands at parting, Mr. S-- said:

"Don't forget, Senator, that you are to come and dine with me to-morrow." "To-morrow!" echoed his visitor, cov ered with confusion. "Bless my soul, sir. I thought it was to-day, and of course, you was not expecting any one What a stupid blunder on my part!

"Not at all," was the courteous answer. "It has only given us two pleasures instead of one, and I only wish it might occur often."

The next day forty gentlemen were entertained at the old farm-house in princely, if semi-barbaric, style, but the Senator declared that he enjoyed none of it as he had done the simplicity of

the day before. "And, sir," he said, telling the story to a friend in Washington, "I have never seen any where in any court circle more ease, more self-possession or more true courtesy, than was shown by that old farmer and his family. They apologized for nothing; there was never an intimation that I was unwelcome, or even unlooked for, or that any thing was amiss. It was the height of goodbreeding. I was proud of my people Youth's Companion.

Homely Women of Portugal. The Portuguese men are rather below the medium height, of olive complexion, and have brilliant black eyes. For the most part they are very handsome. The women, on the contrary, are excessively homely, but dress in very good taste. Both gentlemen and ladies copy the Parisian fashions. The prettiest women are the fisher maids, who go about the streets barefooted with their baskets of fish on their heads, after the fashion of the Egyptian women with their pitchers of water. Some of these girls are remarkably pretty, and, strange to say, their feet are small and delicate looking and their forms are graceful.-Kan-

-A newspaper man lately discovered a remarkable family in Farmington, Me. Calling at the home of Jonathan Scott Ellis he found Mr. Ellis, who is ninety-six years old, seated by the stove and reading a newspaper without glasses. His wife's sister, Miss Lydia Ballard, who will be ninetyseven years old in April, was seated in a rocking-chair near by and knitting vigorously. Another sister-in-law, Miss Hannah Ballard, eighty-four years old next October, was clearing up the dinner-table and washing the dishes. Mrs. Ellis died three years ago at the age of eighty-eight. The old folks prefer to tive by themselves and to do all their own work, and Father Ellis refers to his

### WEBSTER'S UNABRIDGED ANCIENT EDITION

A so-called "Webster's Unabridged Dictionary" is being effered to the public at avery low price. The body of the book, from A to Z, is a cheap reprint, page for page, of the edition of 1347, which was in its day, a valuable book, but in the progress of language for over FORTY YEARS, has been completely superseded. It is now reproduced, broken type, errors and all, by photo-lithograph process, is printed on cheap paper and filmsily bound. A brief comparison, page by page, between the reprint and the latest and enlarged edition, will show the great superiority of the latter. These reprints are as out of date as a last year's almanac. No honorable dealer will allow the buyer of such orable dealer will allow the buyer of such to suppose that he is getting the Webster which to-day is accepted as the Standard and THE BEST,—every copy of which bears our imprint as given below.

For If persons who have been induced to purchase the "Ancient Edition" by any misrepresentations will advise us of the facts, we will undertake to see that the seller is punished as he deserves. G. & C. MERRIAM & CO.

DIGGING A WELL.

A Device by Which a Difficult Job Can Be Made Easy. Any farmer who has to dig a well dreads the task, for it is a disagreeable

and heavy job to dig the dirt and stones and raise them with the accumulated water that must be kept out of the way. I had occasion to dig one eight or nine years ago, and I struck a large volume of water, which came in, in great quantities, before the well was nalf way down. I put up a frame, as shown in Fig. 1, and with the aid of a horse, the work was reduced to a minimum. To put the plan in practice, put up two posts, one near the well and the other far enough away so that there will be room for the well and a place for a wagon or cart; the space between the two must therefore be from 12 to 16 feet. Bore two holes, say 12 to 15 inches from the top of each post, for an iron rod like that

FIG. 1 .- DIGGING A WELL.

on which the hay-carrier in the barn runs On top of each post make a mortise and in it insert and spike fast a round pole of sufficient size to hold the posts stiffly apart; put in the iron rod and screw the nuts up tightly. Then put on the hay carrier. Guy the posts on each end with ropes well fastened or pegged to the ground, and also put a good brace against each post so as to make the contrivance very strong and well stayed.

Saw a molasses barrel in two; firmly nail or bolt to the bottom of a half-bar rel a 11/2 or 2-inch oak-plank 6 inches wide, and cut axles from the 4 or 3 inches extending over the sides of the bottom for the bail to work on. Cut a 3 or 4-inch piece of hickory or other tough wood and halve it; bore a hole through each end for the axles to go through; then bend it over the barrel and put on the axles, and pin them in

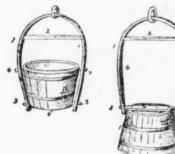

FIG. 2.

place with wooden linch-pins. Nearthe top of the bail put a stiff brace, for when the tub is loaded the bail will press tightly against its sides so that it can hardly be upset, and it should be upset easily. Fasten a wooden block on one side of the tub for the bail to rest against when the tub is full, and bore a hole through the top and put an iron bolt to stay the bail. In unloading, pull out this iron bolt, give the tub a light push and it will upset into the wagen beside the well. With every thing in good working order a well can

be dug very quickly. In the figure shown 1 represents the well, 2 the posts, 3 the beam at the top, 4 the braces, 5 the ropes, 6 a hay-carrier, 7 the bucket, 8 and 9 the pulley rope. In Figure 9, 1 is the bail, 2 the brace, 8 the axles and 4 the iron boits.-Rural New Yorker.

# FARM STOCK.

Ir will not do to keep a young and exercise, even if only turned out on a

PPOFITABLE feeding must be steady feeding-in spasmodic feeding the feasts may do actual harm, and the short rations surely entail loss. Do not cram one day and starve the next.

It is a mistake to use a check-rein and hard bit to hoist the head of a horse up out of the natural position especially when at work or hauling a load. The suffering it causes the animal is intense.

"FEED more oats this year," advises Rural New Yorker. "There is no reason why oats should not be fed with profit to all kinds of stock, cattle, sheep, pigs and poultry. We do not mean fed exclusively, but fed in combination with other grains and fodders." BRIGHT oat straw is one of the best fod-

ders we have for horses, and preferable to poor hay at all times. The best way to feed is to run it through a cutter and mix bran and ground oats with it. It should be slightly moistened so as to make the ground feed adhere to it. THE future development and useful-

ness of your cows will be greatly influenced by the treatment given them while calves. Oats and clover hay are the best feed for growing stock. They are both very eneap, and it will pay to feed liberally for the next six months. ond and, perhaps, third and fourth

In feeding and fattening hogs it is important to have a lot as near of the same size, weight and quality as possible; it will sell for a better price than a lot of various sizes and weights. If when fatted there are a few small ones, or one of extra size, the lot will sell for more in the average if you take these for the benefit of all. out and kill for home use or dress for near market, or sell wher a shipment is Rusr and rot do more for the implebeing made of hogs that average with ment maker in winter than wear and tear do in summer.

A PRESSING NEED.

A National Labratory for the Investigation of Diseases of Animals.

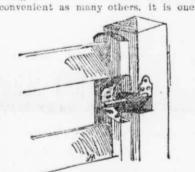

It is not to the credit of the genius of our advanced agriculture that scientific investigations of the diseases of animals have been carried on in only two of our State experiment stations in addition to the work in the Agricultural Department at Washington. It is becoming day by day more apparent that scientific investigators work to greater advantage when they have as checks the results of the investigations of collaborateurs. Our most experienced pacteriologists and pathologists have et much to learn in the study of germ diseases, and the opportunities for mistake in their conclusions are so great that substantial advance is best assured through comparison with results worked out by others in the same field. When Nebraska summoned Dr. Bilinvestigation which would redound diectly to the great material good of the stock-raiser, and now that the results of his three years' labors in this field are beginning to be understood by the farmers of that State there is a unaninous demand for the continuation of the work which he inaugurated and which was brought to a close by his retirement. At the Missouri State Univsrsity, Dr. Paul Paquin, one of the ablest of the younger generation of vet-erinarians, has begun what promises to be a brilliant career as an investigator eptions our State experiment stations

our experiment stations "Satisfied as we have been for years of the great value of Pasteur's discovand well dressed. His gold watch chain gleamed in the light, and the diamond of her engagement ring sparkled like fire.

"I guess I must have stood there admiring of them fully ten minutes. Why, it seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed and off intruding on their love seemed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding on their love seemed almost as if they were alive, and I feltalmost as if ashamed of intruding the well on Tuesdays, April 22d and May 20th, Home Seekers' Excursion Tickets at Haif Rates to points in the Farming Regions of the West, Northwest and Seuthwest. Omo is waking up in the matter of road improvement. In one day recently four bills were introduced in the Legislature each having reference to an improvement of the roads of a single county. They do not seem, however, to have progressed so far as to contemplate a general law which will operate

SIGHTS A DIVER SEES.

Love's Billing and Cooing at the Bottom of Lake Michigan. Old Ned Barron, one of the best vet eran New York divers, narrated the following pathetic reminiscence to a Chicago Times man: "A few seasons ago I was sent for to come on and try to recover the bodies of a young man and young woman who had been drowned in the lake, off Milwaukee.

"With a party of friends they had been enjoying a sail on a little yacht. A sudden squall came up and the vessel was capsized. The young man was a good swimmer, and tried hard to save the girl, but, crazed with terror, she clung to him and hampered his efforts until he became exhausted, and both sank together in full view of the others of the party, all of whom had gained a hold on the bottom of the boat and were soon rescued.

"The drowned couple were to have lings to her State University it was been married that very week—in fact, with the intent to set in motion lines of they were buried on the day set for their wedding. They were well-to-do, nice people, and the whole story made me awful sad, so that I really wished I hadn't been told it all.

"Well, I went down, and walked around the bottom of that part of the lake for almost three days. Toward sunset of the third day I had almost given up work for the day, and I had come up around the end of a big ledge

of rock, when I found them. "The weather had been fine, the sun bright and the still water was unusually clear. I was about forty feet below the of animal diseases, but with these ex- surface; the rock was probably one hundred feet in length, sixty feet wide, have not ventured into this field which and the outer edge was rough and so sadly needs investigation. Prof. jagged. Well, the two of them were Liautard, editor of the American Veterjust like sitting down together on he inary Review, has this to say on the end of the ragged rock, on which she subject in the February number of that lady's dress had caught and held tlem magazine, which the Breeder's Gazette fast. She leaned up against his clest, commends to the serious consideration with one arm around his neck, and her of those charged with the conduct of long, beautiful light hair hung over her neck and shoulders.

"He was holding her tightly with one arm around her waist, while the other eries, and of the immense benefits was stretched out as if grasping for which might be derived from their something. Their eyes were wide open,

Adolphus paused—with pallid cheek— "Why, boy, don't look morose! It's biliousness! I've had it! Here— Pierce's Pellets: Take a doso!"

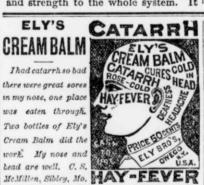

Dr. Pierce's Pleasant Purgative Pellets are sugar-coated, easy to take, and gentle in action, cleansing and regulating the system without wrenching it with agony. They are gently aperient, or strongly cathartic, according to size of dose. Unequaled as a liver pill. Smallest, cheapest, easiest to take. As a laxative, only one tiny Pellet necessary for a dose. Cures Sick Headache, Bilious Headache, Constipation, Indigestion, Bilious Attacks, and all derangements of the Liver, Stomach and Bowels. Put up in vials, hermetically sealed, therefore always fresh and reliable. Being purely vegetable, they operate without disturbance to the system, diet, or occupation. Sold by druggists, at 25 cents a vial.

For "run-down," debilitated and overworked women, Dr. Pierce's Fa-vorite Prescription is the best of all restorative tonics. It is a potent Spe-cific for all those Chronic Weaknesses and Diseases peculiar to Women; a powerful, general as well as uterine, tonic and nervine. It imparts vigor and strength to the whole system. It Street, Buffalo, N. Y.

nausea, indigestion, bloating, weak back, nervous prostration, debility and sleeplessness, in either sex. It is carefully compounded by an experienced physician and adapted to woman's deli-cate organization. Purely vegetable and perfectly harmless in any condition of the system. It is the only medicine for women, sold by druggists, under a positive guarantee of satisfaction in every case, or price (\$1.00) refunded. This guarantee has been printed on the bottle-wrapper, and faithfully carried

A Bishop's Surprising Expressions. Bishop Paret, of Maryland, a Bishop of the Episcopal Church, gaye expression to these remarkable sentiments at a business man's prayer meeting in Baltimore:

"Why is it that the field of religion is left to women? To my mind there is one reason patent among others, and that is that mon-troupe version of God's Gospel known as the revival system. It teaches the idea that before men can worship God they mu-t be worked up to some certain convulsions of feeling, &c. On account of this pernicious idea I have seen some of the saddest fruits.

"I remember a certain member of the Supreme Bench of the United of man's nature. What is a revival States, now dead. He was a learned of religion except the stirring up man, but had gotten this idea of emotional religion into his head and earthly love shall be replaced by the died without being baptized or confirmed. I pray God he will be forgiven for the error into which he had fallen.

that men cannot accept. This idea of sentiment is a false one. I cannot feel like a woman. I cannot pray like a woman. Nor is it required to aim to fill your prayers with fictitious feelings that have no response in the

Yet is not emotion the very essence of religion? Is not emotion ter from 1895 is just made public. At that which distinguishes religion the approaching session of the Genfrom a mere system of ethics? To be eral Assembly of Louisiana, meeting religious is not merely to obey the May 5, a proposition will be submitmoral law, but to obey it from the ted by Mr. John A. Morris to pay love of God, not because the intellect | the State \$12,500,000 for the purpose assents and commands, but because of maintaining a lottery for a period the heart, the emotions, are inflamed of twenty-five years. The Judge of the Supreme Court of whom Bishop Paret speaks could not bring himself to that state of feeling. He was probably a moral man, righteous in all his dealings, but he could not make his sole motive for so doing the emotional love of God. His intellect and not his heart was stitution of the name, Germainia the controlling influence with him; and therefore he rightly concluded appeared. The bill is printed upon that he was not a Christian. He did not have the religious spirit. Without any religious belief at all, though | the forged signature of W. S. Rose he utterly repudiates the personality of God, a man may be of blameless morals.

"Except ye be converted, and become as little children," says Jesus Himself, "ye shall not enter into the kingdom of heaven." When Mary annointed His head with precious ointment, and His disciples "had indignation" at the waste, He rebuked them saying, that "wherescever this gospel shall be preached in the whole world, there shall also this, that this edy. Price 50 ets. gospel shall be preached in the whole woman hath done, he told for a memorial of her." The expression of Mary's simple love and honor was

pleasing to Him. "Why is it that the field of religion is left to women ?" asks Bishop Paret, and he answers the question by saying, because religion is made emotional. "I cannot feel like a woman. I cannot pray like a woman." But the teaching of religion and of its most reserved expounders as that he should so feel and pray, of Garrett and adjoining counties.

that he should become as a little child, feeling rather than thinking. Hence it is that women, being more completely than men under the sway of the emotions, are more apt than they to find satisfaction in the field love; and, as Jonathan Edwards 215 Empire Nurseries, Rochestrick. of religion. They obey because they says, that is the essence of religion.

Wherever the Christian religion has spread, and at all times when it has gained most hold on men, it has been preached, not as a system of intense emotionalism or go through morals, but as a supreme affection. The appeal has not been to men's heads, but to their hearts, to the feminine rather than the masculine side WHITE OAK LUMBER CUT TO ORDER of man's nature. What is a revival anew of human emotions so that love of Jesus?

Wonders

Are wrought by the use of Ayers Hair Vigor in restoring gray hair to its original color, promoting a new growth, prevent-ing the hair from falling, keeping it soft, silky, and abundant, and the scalp cool, healthy, and free from dandruff or humors. The universal testimony is that this prep-aration has no equal as a dressing, and is, therefore, indispensable to every wells, therefore, indispensable to every well-

furnished toilet.
"I have used Ayer's Hair Vigor for some "I have used ayer's Hair Vigor for some time and it has worked wonders for me. I was troubled with dandruff and was rapidly becoming bald; but since using the Vigor my head is perfectly clear of dandruff, the hair has ceased coming out, and I now have a good growth, of the same color as when I was a young woman. I can heartily recom-mend any one suffering from dandruff or loss of hair to use Ayer's Hair Vigor as a dressing."—Mrs. Lydia O. Moody, East Pittston, Me.

Ayer's Hair Vigor

bald, but it also caused an entirely being growth of hair. I am ready to certify to the statement before a justice of the peace."— H. Hulsebus, Lewisburgh, Iowa.

"Some years ago, after a severe attack of brain fever, my hair all came out. I used such preparations for restoring it as my physicians ordered, but failed to produce a growth of hair. I then tried, successively, several articles recommended by druggists, and all alike fell short of accomplishing the desired result. The last remedy I applied was Ayer's Hair Vigor, which brought a growth of hair in a few weeks. I think I used eight bottles in two years; more than was necessary as a restorative, but I liked it as a dressing, and have continued to use it for that purpose. I believe Ayer's Hair Vigor possesses virtues far above those of any similar preparation now on the market." -Vincent Jones, Richmond, Ind.

THE AMERICAN WOMAN. She Is Beginning to Realize that Life's Main Object Is to Develop a Soul.

Although as yet but a small proportion

of American girls go to college, no one

will deny that the standard of education

for women has been greatly raised of

Twenty-five years ago a girl must be taught to do worsted work, whereby she might perpetuate the most monstrous and awe-inspiring "cruel" (in more senses than one) dogs and cats and the most impossible flower pieces; she must acquire such proficiency upon the piano as to enable her to render the "Battle of Prague," the "Maiden's Prayer," and the "Bird Waltz;" she must be taught water-color painting, the results of which still exist in many houses and are enough to give the observer nervous exhaustion for a month after being brought face to face with them; she must learn French enough to use certain wellknown idioms and quotations in not too inapt a way, and she must be able to write long and gushing letters to dearly beloved friends in a flowing, delicate hand. But that was about all the aver-

need. More might make her masculine. The brave girls who have been in a sort pioneers in the acquisition of a collegiate education have changed all this. They have proved that a woman may retain all her charms of manner and dress and grace and refinement, all the light and airy fascinations of the old school, and yet have mastered the more grave and serious parts of education.

age fashionable girl was thought to

The demands of society now require that a woman shall have more than a superficial knowledge of the affairs of the day. She must do more in the way of reading than simply glance down the columns of her evening paper. She must keep up, at least partially, with the scientific, political, educational and literary movements of her time. If she paints, she must do it extraordinarily well, or keep her efforts hidden. If she plays or sings she must have a good voice, a good method and a good technique, or even her best friends will not suffer that accomplishment to be pa raded before them. She should read and speak in several languages.

The girl of the period, too, must learn and, if she is very fashionable, must belong to an athletic club. She must learn to develop and keep healthy her body as well as her mind. A larger capacity and even after that they was a dretful and a broader understanding are demanded on all sides.

Twenty-five years ago the inane young and a small waist, who knew not too much of any subject, who had no capac ity for thought or ideas, who possessed only mediocre mental attainments and a thin veneering of refinement, but who was always dressed elegantly and aimed above all things to be "lady-like," was the ideal being held up as an example by all mothers for their daughters' emulation. How is it now? Do intelligent mothers cling to this idea? Not at all. Even the mother who had but a superficial education of her own sees that if her daughter is to compete with girls of her own age, she must be educated in every possible direction.

In these days of cooking schools and go to housekeeping without knowing a beefsteak from a sausage, or without having mastered the science of bread-making. It is fashionable now for a woman to "look well to the ways of her

It is not to men alone, either, that women must be able to talk. Witness the many women's clubs in this city-The New England Women's Club, the Political Class, the Castilian Club and the Woman's Press Association, for instance. At these it is always in order to hear bright and lively discussion of the topics of the day. Women, when the topics of the day. Women, when with other women, have ceased to confine themselves to their children's or ailments, their domestic troubles and petty neighborhood gossip as subjects of conversation.

In short (and heaven be praised for women's minds are broadening. Women are beginning to realize that the main object of life is to develop a soul. -- Boston Globe

#### TAKING DOUBLE TOLL. A Scheme Which Benefited No One But

the Gate-Keeper. "When the toll-gates were in operation on the turn-pike," said a farmer, there were two men who laid in with miserable for each other, and neither knew of the other's scheme.

One said to the toll-gate keeper: 'Here's a dollar for you. Now, every time A passes through the gate you ask him what's the matter; tell him he looks thin and wan, and ask him who his doc-

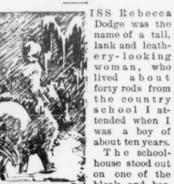

"The next day A came along, and the toll-gate keeper went through the formalities as directed, and A was considerably exercised and looked at himself frequently in the glass during the day. The next day A had occasion to go to town again, and stopped and chatted with the toll-gate keeper, told him he thought he felt a change in his physical condition, and perhaps his clothes didn't fit him as well as they used to, etc. 'Now,' said he to the toll-gate keeper, 'I wish you could make neighbor B feel

as though he wasn't well. Here's a two "The toll-gate man nodded all rightand three or four days after B came along, having forgotten about his barn with the toll-gate man as to A.
'Hello, Mr. B,' said the toll-gate keeper, 'Mrs. B was at our house and she told mother she was worried about you; that you didn't look well at all, and you couldn't seem to remember things as you used to. What's the matter with

you? You do look kinder gaunt.'
"'I dunno,' replied B; 'how much
more did A give you than I did? Pretty
cheap work for you, ain't it?'
"'After that A and B didn't speak as they passed by, and the toll-gate keeper was \$3 better off."—Poughkeepsic (N. Y.

### MISS DODGE.

How the Children's Enemy Became their Savior and Friend.

woman, who lived about forty rods from the country school I attended when I was a boy of about ten years. The schoolhouse stood out on one of the bleak and bar-

prairies, and was unprotected by hill or tree. It was a shabby, unpainted and unintractive homes dotted the prairie for miles around it.

We had but four months school each year, beginning usually the first of November, so that the entire session was held during the coldest and snowiest season of the year, when the thirty-five or forty boys and girls who made up the school were not needed on the farms. Miss Dodge lived alone in a little log-

and-frame house. She and an elderly brother had come to the West a number of years before my story opens. The brother died a year or two later, and Miss Rebecca was left alone. She hired a man during the summe months, but from October until April

she had a solitary life. She fed and cared for her horses and ows and pigs herself, and did so much other out-door work properly belonging to a man's duties, that she could not help appearing masculine in her man-

Miss Rebecca did not like it when the school-house was built so close to her

"I jist know how it'll be, with a passel of boys and girls whoopin' and yellin' around all the time like a pack of wild Injuns, and doin' all they can to pester the life out of a body!

"I lived in the house nighest to the chool-house once, back East, and the children was a perfect torment the hull ento row and drive and ride, to play tennis fruit, and break my winders with their doorin' time. They'd hook my flowers and balls, and come racin' all over my primroses every day till I had three or four of em took up for committin' a trespass: noosance, with all their racket and carryin' on!"

The pupils all knew how Miss Dodge woman who could smile sweetly upon felt toward them, and it did not tend to an increase of affection for her on their part.

The first day of every term brought Miss Rebecca to the school-house for the purpose of giving the teacher his or her orders" regarding the pupils' conduct while on the play-ground.

"I jist come over to say," she would begin, standing grim and erect before us, "that I want you to make these young ones keep their place on the playground, and not let 'em come 'round t pester me. I don't want one of 'em to set foot on my place unless they con over fera pail of water; and I don't think there's any use of 'em drinkin' water doorin' school hours, anyhow. It's only a habit they've got into. Boys and girls parlor lectures, girls do not marry and didn't do so in my day. But I want 'em to know that I ain't goin' to be bothered

> And out Miss Rebecca would stalk arrayed, it might be, in one of her brother's old coats, worn over her short and skimpy skirts, and with a man's hat set back on her iron-gray hair, which she always wore short, to save herself the trouble of "doin' it up," as she

said. Sometimes, when we were playing ball on the play-ground, a more vigorous stroke than usual on the part of some o the boys would send the ball into Miss Dodge's yard, and woe to the boy who climbed over the fence after it, if Miss

Rebecca saw him. "Hi, you there!" she would scream in her highest and most shrill notes. "What you doin' on my primises? Git yourself right back there to where you belong, or I'll make you wish you had; and don't you ever dast to set foot on

And one dreadful day, Tom Greenwood, a big, fat but cowardly boy, gave the ball such a whack with the ball club that it went flying over the fence and crashing through a pane of glass in one one of the toll-gate keepers to make life of Miss Rebecca's little windows. The teacher's bell rang at that moment, and we ran into the school-house, with Miss

Dodge in swift pursuit. "I know who done it—I know!" she little brother, three girls named cried, as we ran to our seats. "It was Barnes, Wilfred Long and his sister you, Tom Greenwood! I see you, and I b'lieve you done it a-purpose! But you've got it to pay fer, sir-indeed you

Tom bowed his head and wept before such wrath as Miss Dodge exhibited. But she seemed merciless, and, as she left the school-room, she walked by Tom's desk and gave him a ringing

slap on the ear. After that the breach between Miss felt well, ate well and slept well, but he Dodge and the school grew wider, although our teacher-a pretty young girl from the East, teaching her first term-talked long and earnestly to us about our duty toward Miss Rebecca, as a woman who was growing old, and whose life had been embittered by many

sorrows and misfortunes. But we were not always kind and just to Miss Rebecca. We said and did things which we ought not to have said or done. Sometimes we did annoying things thoughtlessly, but, again, our mischief was premeditated and inexcusable, as was the case when some of the boys slyly opened the door of her pig-pen, and allowed the fifteen head of hogs she was fattening for market to rush out into the highway; and some of them went so far before poor Miss Rebecca could overtake them all that she spent most of the day getting them

home again. I remember now how pale and tired

she looked as she came up driving the last of the rebelli ers before her.

And while she was gone the l made an onslaught on her flock with icy snowballs, and one old lay dead by the roadside, while

and a broken wing. It had been a wonderfully bri warm day in January; the air balmy as April, and the sky bl cloudless. We had had the fo dows of our little school-room or a cold wave of wind came sweeping in suddenly in the middle of the afternoon, and the teacher had hastily lowered the windows and put more wood into the

The broad bands of sunshine peared suddenly from the floor, and it eemed darker than usual.

It was about this time that Miss Dodge came home with the lastof her ren Western runaway hogs, whose absence the had not discovered until they had been gone more than an hour.

I sat close by a window, and I saw her stop suddenly when she came towhere viting little wooden house, built mostly the dead gander lay. She stooped over, by the farmers whose small and unatpicked it up by the feet and noted how its long neck hung limply down then, giving it a toss, she went on into the house, shaking her fist wrathfully toward the school-room as she valked

> Half an hour later a boy sitting near Half an hour later a me shrugged his shoulders, give a me shrugged his shoulders, give a his slate:

"She's coming!" "Who?" I asked. "Old Miss Dodge. And wor's someody get it now!"

I glanced out of the window and saw Miss Dodge coming swiftly toward the school-house, and before shereached it, nearly every pupil knew, by the looks and signs and sly whispers of others, that Miss Dodge's expected visit was about to be made, and we atticipated a lively time.

Wilfred Long, the boy whihad opened the gate of the pig-pen, looked slightly white and nervous. He we only fourteen years old, and not a vey brave boy,

We were all breathless with excitement when Miss Dodge opened the chool-room door and marked in. To our utter amazemen she said, in a low, firm voice:

"Miss Percy, you mustlismiss school at once and send the hildren home. There's goin' to be a lig storm. I've lived in this country fifeen years, and 1

SHARING HER FIST WRATHFULLS

now the signs. Don't stop to her another lesson, but bundle the children up and start 'em off home right away. My orses are harnessed up, and I'll be round with my big bob-sled in five minutes to take them home that live furhest away. The Dwight, Barnes, Greenwood and Long children, bundle

ip quick as you can." Miss Dodge went running toward her table, while Miss Percy at once dismissed school and began helping the little ones into their cloaks and hoods In a very few moments Miss Dodge

came driving up with a pair of bob-sleds, on which her wagon-bed was placed. The wagon-bed was full of clean straw, and Miss Dodge see med to have out into it every shawl and quilt and blanket and other bed-covering in her house, besides two big buffalo-robes and

The children living near the schoolouse were already running across the prairies toward home. It was growing darker and colder every moment, and

Miss Dodge said: "Jump in-no time to lose! Snuggle down in the straw and cover up best you can. Set close together, and you'll keep warmer. Here we go! G'lang,

Jinny-git up, Charley!" And as she spoke, away we flew over the plain, with the wind whistling around our ears and the sharp, icy snow-flakes flying into our faces.

There were in the sled Ned and Bessie Dwight, Tom Greenwood and his and my brother James and I. Wilfred Long, the boy who had given

Miss Dodge so much trouble, was older than any of us, and he was, as I have said, but fourteen years old. He was very quiet and thoughtful as we rode Miss Rebecca sat upon the high seat,

lines in hand, her scanty skirts blowing out behind her and her gray head bowed She had on an old overcoat of her

head, while her hands were encased in a huge pair of bearskin mittens she had herself made.

"You warm?" she asked, once or twice, looking back over her shoulders "Yes, ma'am," some of us would reply, respectfully enough now.

It was surprising how fast it grew dark and how rapidly the temperature lowered. "Snuggled up" as we were in the straw and covered with robes and blankets, we soon began to grow chilled. The Barnes' farm-house was a mile and a quarter from the school-house. while the homes of the rest of us were farther away, my brother James and I coming from a distance of nearly two

The wind steadily increased in fury, and the snow fell faster. Miss Dodge urged her horses on, but one of them was lame and limped painfully.

We finally lay down flat in the starw and covered up in the blankets and began pinching and teasing each other, not realizing that our situation was at all dangerous, and not appreciating all

Miss Dodge was doing for us. Suddenly we all gave a shrick as we the frozen ground in places where the wind had blown the snow away. "The good land!" I heard Miss Dodge

say, despairingly. "The tongue of the sled is broke! This is a pretty kittle of fish! To our surprise, it was now so dark we could hardly see each other. The wind had risen to a perfect gale and was swept into our faces. Some of us clung

away. In turning a corner a little too ab and the wind had helped to tip it over. It now lay bottom-side up in a little could only sew 'em on in the dark. By ravine by the roadside. One side of the working early and late I can't finish wagon-bed rested on a rock and was more than five shirts a day-when they raised eight or ten inches from the

ground. Suddenly Miss Dodge called out is a dollar and a half a dozen, I consider sharply and authoritatively, her voice rising shrill and distinct above the roar

of the wind: "Git under that sled the last one of you! Skeet under it fast as you can! course I get more stocks than any thing Huddle up close together, and bundle else. up well in the shawls and robes, and mind that you stay there until me or allowed to slight my work, like girls

ing and giggling as we did so. When with me, but good work, poor pay. we were all under, Miss Dodge put her overlooker at our place, though she head down to the opening and shrieked: "I'm goin' on for another sled! Mind, now, that not one of you budges until I stitches has to be just so close together, git back! Stay where you are and I and the hemming in the gussets has to ess you'll be all right."

We were all dressed warmly, and the wagon-bed sheltered us from the wind, must be sewed on hard and tight; and and before many minutes the snow as for the eyelets, they are just the tordrifted entirely over, it making our retreat warmer than ever.

suffered very much from the cold, although we discovered afterward that some of us had frost-bitten toes. We crept up close to each other, pulling the straw and robes and blankets all over us, laughing and joking as we did

But poor Miss Dodge! Years of hardship and exposure had so toughened her that her powers of endurance were very great. And yet that ride to my father's house, less than a mile from the sled, came near being her last. Hastily loosening the horses from the

oken sled-tongue, she turned the lame one loose, and, mounting the other, set off in the direction in which she supposed the Barnes' farm-house to But she could not see, and, after a mo

to her horse and trust to his strength and sagacity to carry her to the farm-I have often heard my father tell how he had reached home from the town, four miles distant, just as the storm broke in greatest fury. He thought he

ment or two, was forced to simply cling

would find James and me safe at home, and was distracted when told that we and not come. It was useless to start out then, and he and my mother were walking the floor, oping and praying for our safety and for the storm to cease, when they heard

the whinny of a horse at one of the ighted windows. Rushing out, father found Miss Dodge elinging to the horse, but too chilled and too near unconscious to speak for some

They got her into a warm bed, and er first words were: "I-think-they're safe. The-children-yours-and-some others-under my-sled-by-the-lone tree-at the

end-in-the road." Then she fainted away, and the sun was shining in at the windows and all signs of the storm, excepting the great drifts of snow, were gone when Miss Dodge next opened her eyes and looked and I tell you it was a satisfaction to about her.

The storm abated its fury at about three o'clock in the morning, when be so short when a girl has her own my father and his hired man hitched the living to make. If I was six inches horses to our big sled and came to look

It was easy to find the place, for the tree spoken of by Miss Dodge was the only one for miles around. Armed with shovels, they soon moved enough of the snow to let come crawling out, stiff and sleepy,

but not much the worse for our expe Greenwood and Long homes, in all of which we found anxious and tearful of the fathers and older brothers were already out with lanterns and torches and teams, scouring the white prairies

in search of us. It was ten days before Miss Dodge could be taken home, a severe attack of rheumatism following her fearful ride that night.

Her stock and house were carefully looked after in the meantime by the fathers and older brothers of those were in her sled that night, and when she was finally taken home, she found the Long. Greenwood, Barnes, Dwight brother's and a shawl wound around her and Carter families assembled in her little home, each of us carrying some gift to prove our gratitude.

But we boys and girls gave greater proof of our own gratitude by our treatment of Miss Dodge in the future, and from that time forth she was one of our warmest friends, and was sometimes heard to say: "I don't mind havin' the school-house

so close to mine. The children are a sight of comp'ny 'round on the playground-they reely ar!"-Zonas Dane, in Golden Days.

That Explained It. Teacher-Come here, Tommy, and sit

down. Tommy-Don't wan'ter. I'd rather stand. Teacher-Why, how is that, Tommy? Tommy-Pa smashed his finger in the door this morning and I laughed .- The

SONG OF THE SHIRT.

A Finisher Tells How Necessity Compels

"I don't know what I am going to do about it," said the shirt-finisher. room-mates vow they won't consent to have the alarm clock go off at half-past went sprawling out in the snow, or on to five in the morning. You see all three of 'em are salesladies, and so they can afford to lie abed till nearly seven, while I ought to be up as soon as I can see to work, though, for the life of me, I can not wake without the alarm. I'd rather sew late at night, so as to sleep the next morning, but my room-mates won't agree to my having a candle, as they say the light keeps them awake, so l roaring around our ears, while the snow am sometimes left in the dark, in the middle of a button-hole, when the gas to the sled to keep from being blown is turned off at half-past ten. I don't sew on buttons in my dreams, as that woman done in the 'Song of the Shirt' ruptly, the sled had tilted to one side (I heard it read at a club meeting), but it would be a great saving of time if I could only sew 'em on in the dark. By are custom shirts I do four-and as the highest pay at the place where I work myself in luck when I can pay my board, three dollars, at the end of the week. For stock shirts I get only a dollar a dozen, and when business ain't brisk, of

" I could do an awful lot more if I was somebody else comes after you! Don't who finish cheap jerseys. The buttons one of you dast to even peek out! Git drop off my jerseys the first time I fasten 'em, but no such work as that is put on work as that is put on We obeyed as fast as we could, laugh-with me, but no such work as that is put shirts. It ain't poor work, poor pay with me, but good work, poor pay. The wears glasses, has got the eyes of a hawk, and in the button-holes the be almost as nice as what would be put on a pocket handkerchief; the buttons ment of my life, they have to be worked so awfully round and smooth. I always I do not remember that any of us dread to get a set of shirts with eyelets in 'em because then I am sure to be found fault with when I hand my work in-sometimes I get 'em too large, and sometimes too small. I don't have that trouble with button-holes, because they

are cut for me. "Supplied with thread and needles That we ain't! We buy our own thread and needles, and it counts up in the end I can tell you. That's all I do buy nowadays, and it often comes out of my board money. As for having my washing done, I told the superintendent of the home where I live that I just couldn't afford it, and so there has been an exception been made in my favor, and I am allowed to go down into the laundry and wash my own duds. It's against the rules for the other boarders do it, though they'd all like to, no The matter how much they may earn. girls in my room are always washing their handkerchiefs and such things, and hanging them behind their washstands where they think they won't be

"Why do I work for so little? Well, three dollars a week is better than no dollar a week, and as I ain't got nobody o look to for support, I have to catch on to any work that comes along. Relations? None nearer than cousins, and they don't amount to much-at least, mine don't. Why, a cousin of nine, whose husband earns his three lollars a day as a painter, invited me o do my washing at her house (that was before 1 got permission to do it at the home) and afterward fell out with ne, and made me pay for the coal I had

burned in heating my irons. "The girls in my room tell me that I could never get a place in a store be cause I am not tall erough; but if I ould once lay up money enough to pay my board for a week or two, I'd tramp up and down the city till I found a place where they would take me. I was in a there was a lot of extra hands needed, bring home my five dollars every Saturday night! It's an awful misfortune to taller I'd be earning almost half as nuch again as I am now, for I ain't one of the stuck-up sort who think they are put behind a counter only to show off their bangs and their bangles. I made lots of sales when I worked as an extra, and I could do it again if the store keepers could only get over my being so short. I get out of all patience when I hear a girl whining and saying she Hurrying us into another sled, full of don't see why she has to work. Why, straw and robes and blankets, father work is what I want, and the only thing drove around to the Dwight, Barnes, that I do want. If I could earn five dollars a week at shirt-finishing, I'd be willing to keep at it till I was too old to doesn't pay enough to keep me that I don't like. On five dollars a week could live like a lady; three for my board; one to put aside for dress, and one for my other expenses. Any girl that's got the knack of flxing things can dress decent on fifty dollars a year, feut it's awful hard to do it on nothing. -N. Y. Tribune.

The Kalser's Way of Driving.

The attendants at the Berlin court whose duty it is to accompany the Emperor on his drives through the city have less of a sinecure than they had inder William I. The first Emperor of lermany always made out a plan of his firive before leaving the palace. The plan was communicated to his body courier, and after it had been executed the Royal procession was taken home. William II. has changed all this. He gives directions to the body courier only during the drive and by means of nods and movements of the hand. Consequently, to prevent all mistakes, the body courier has to keep his eyes glued on the Emperor's carriage window. Several accidents have been narrowly averted by the Emperor's ooachman at four corners, and where he has all but upset the whole imperial cavalcade on the smooth, slippery pavement by unexpectedly signaling "to the right" when everybody else was thinking he intended to push straight ahead .-- N. Y

### REFORM IN WILL-MAKING.

American Laws That Work Cruel Injus-tice in Some Cases.

"They manage these things much better in Germany," said a prominent American-German citizen one day while conversing with a Philadelphia Taggart's Times reporter on the subject of wills. "In Germany a hard-hearted or easily influenced parent can not cut a shild off with a trifle, as they can do in this country or in England. In Germany and also in France a person making a will can not do so in private, as is done here, giving an opportunity for villainy and unfairness on the part of the relatives who are closest to the testator and have charge of his privatepapers. The German citizen, in making a will, is required to go before a judge or notary, who instructs him as to the provisions of the law, and informs the testator that if certain rules are violated, the will is invalid. Thus a husband is compelled to leave a wife onehalf his possessions and his children the remainder, unless they debar themselves from this provision of the law by certain unfilial crimes. For instance, if a child strikes or abuses either of his parents, he is legally disinherited. It is the same if he brings a suit, civil or criminal, against his parents, and in case he marries against the wishes of either parent, they can, on their death, deprive him of just one-half the amount. he would otherwise receive."

In this country the laws concerning wills are very bad, and through them many a rightful heir has been cheated out of his just desserts by the protection the law gives to the arts and connivances of designing and wicked relatives. In this country a will can not be registered until after the death of the testator, and the only assurance that a man has after making a will, that it will fall into proper hands at death, is to place it with a trust and safe deposit company, who accept wills for safe keeping during the life of the testator. As far as the claims of relatives go to a erson's property, a widow is the only one who can enforce such a claim in America, where the law gives her a third of her husband's estate, no matter how his will may read; but beyond that, his relatives have no legal claims on his property, as it is entirely a matter of choice with him whether he leaves

them any thing at all. There is no doubt, however, that this condition of the law relating to wills, works cruel injustice in some cases. A few months ago a wealthy butcher, living up-town, lay upon his dying bed. His nearest relatives were his wife, his only son and his mother. What money he had he earned principally through the help of his faithful wife and his dutiful son, who had stood in the market for him since a small lad. Just previous to his death his wife asked him: "John, have you made every provision for us after you are gone? If you have not here may be trouble." Have no fear of that, Mary," replied the dying butcher. "Every thing is attended to. Satisfied by this assurance, the wife said no more about the matter. What was her rage and surprise to find, when her husband's will was read, that he had cut both her and her son off without a cent, and left every dollar he possessed to his mother. The son was so angry, on learning the news, that he tore the crape off the parlor shutters. The wife contested the will and was awarded her third interest in his estate according to law, but there was no remedy for the son and he went penniless .-Christian at Work.

# NATURALIZATION LAWS.

What Foreigners Must Do to Become Citizens of the United States. Naturalization is a Federal right and is the gift of the Union, not of any one State. The right to vote comes from the State and is a State gift. The naturalization laws apply to the whole Union alike and provide that no alien may be naturalized until after five years' residence. Even after five years' residence store once around the holidays, when and due naturalization the alien is not allowed to vote unless the laws of the State confer the privilege upon him. In Minnesota he can vote four months after landing if he has immediately declared his intention under the United States laws to become a citizen. The conditions under and the manner in which an alien may be admitted to become a citizen of the United States are as follows: The alien must declare upon oath before a Circuit or District Court of the United States or a District or Supreme Court of the Territories or a court of record of any of the States having common jurisdiction and a seal and clerk two years at least prior to his admission, that is, bona fide, his intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince or State, mothers, too distraught to sleep. Some thread a needle. It's only work that and particularly to the one of which he may be at the time a citizen or subject. If the alien has borne any hereditary title or order of nobility he must renounce the same at the time of his application. Any alien of the age of twenty-one years and upward, who has been in the armies of the United States and has been honorably discharged therefrom, may become a citizen on his petition, without any previous declaration of intention, provided that he has resided in the United States at least one year previous to his application and is of good moral character. (Residence of one year in a particular State is |not requisite.) In regard to minors, any alien under the age of twenty-one years who has resided in the United States. three years next preceding his arriving at that age, and who has continued to reside therein to the time of his application may, after he arrives at the age of twenty-one years, and after he has resided five years within the United States, including the three years of his minority, be admitted as a citizen, but he must make a declaration on oath and prove to the satisfaction of the court that for two years next preceding it has been his bona fide intention to be citizen. The children of persons that have been duly naturaliled, being under the age of twenty-one years at the time of the naturalization of their parents, shall, if dwelling in the United States be considered as citizens thereof. The naturalization of Chinamen is expressly

prohibited .-- Chicago Herald.

## TEMPERANCE NOTES.

NATURE OF ALCOHOL.

How It Is Transmitted Through the Blood to All Parts of the Body. When we use the word "alcohol" we require to be clear as to the meaning of the word and the thing. We know now that the term is employed by the chemists to indicate a long series of chemical bodies having certain properties in common and exhibiting the same chemical constitution in respect to the elements which enter the composition of them. These elements, three in number-carbon, hydrogen and oxygen-never vary except in quantity of amount, and one of them, the oxygen, remains always the same, even in amount, in every member of the family. The other two elements, the hydrogen and the carbon, invariably present, exist in different quantities in different members of the family and it is on this difference that the family differences depend. In the first, or primary member of the family, the elements stand in the following form: There is one proportion or part of carbon, four of hydrogen and one of oxygen. This alcohol, called methylic alcohol or wood-spirit, is a light fluid which boils at 140 degrees Fahrenheit, and is so far volatile that I have succeeded in putting warm-blood-ed animals to sleep by making them inhale its vapor.

We have in this methylic alcohol the lightest of the family group. If we pass push it was a slow and laborious task, to the thirtieth of the group we find a solid alcohol called melytic, or by some, melissic, really a wax-like substance. The proportion of oxygen is just the same in this variety as in the last named, but the proportion of carbon and of hydrogen have so greatly changed that the change in the quality of the substance need not to be wondered at. The heavy element, carbon, has increased from one part in the methylic alcohol to thirty in the melytic, and the hydrogen has risen to sixty-

If we go back in the series we shall find another alcohol, the fifth from the methylic, called usually amylic alcohol, fusel oil, or, sometimes, potato-spirit. This is a heavy oily fluid of disagreedegrees Fahrenheit. It differs from the wood-spirit in its weight, being very much heavier. It is composed ot five parts of carbon and twelve of hydrogen, with the usual unit of oxygen.

The variations here noticed extend all through the series, and all through in regular sequence, the carbon increasing one part and the hydrogen two gen to methylic alcohol we should get one part oxygen, and this would be the common alcohol of commerce-ethylicalcohol-the spirit which forms the staple of all the wines, spirits, ales and other so-called spiritous drinks supplied in such large quantities to our communities for drinking purposes.

All the alcohols are products or results of fermentation of one or other fermentable substance. The common or ethylic alcohol is the product of the fermentation of grain and of fruit, and is by far the largest product of any, because, by what has become the almost universal consent of the civilized world. it has been and is demanded as a beverage and stimulant. We may say of it practically that it alone is the alcoholic drink of those who indulge in the use of a stimulant; for although it is true that amylic alcohol and some other alcohols get mixed by accident or carelessness or it may be sometimes by design, with common alcohol, they are not supposed to be present in it, and the general effects of alcoholic drinking are

attributable to it alone. With the few facts above stated clearly before us on the position of common alcohol, from a chemical point of view, we may turn to the study of the effects parties and entertainments. of it on man and other living things subjected to its influence. For all living things it has a certain physical affinity, for the simple reason that all living things contain, and, as a rule, are largely made up of water, for which the alcohol has a strong affinity. Itself a mobile fluid, it mixes with water in all proportions, and with the utmost readi- D. Wright. ness; in fact, it is by virtue of this readiness that it is received into the body. No one would ever learn to drink alco hol under any circumstances, unless it it is in wine, beer, brandy, rum, gin, the lower classes. Derangements of whisky and other spirits. When in any the stomach, formerly the most frequent it is again diluted by the addition of more water, because if it were not so diluted it would create burning sensation in the mouth and throat and would inflict serious injury on the stomach. Diluted with water it enters the body of man or animal with the water, and soon diffuses through the body wherever there is water in the tissues. Thus, for a short time after a portion of alcohol has entered the body, and before has had the opportunity of being removed, it can be de-tected in all the fluid secretions. late Dr. Percy discovered it the brain. I have found it in the same fluid, in the blood, in the urine, in the fluids which have the serous mem divides which have the serous mem fluids which have the serous membranes; and, in short, in all the fluids derived from the blood. With some of and on the last corner a graveyard. affinity, especially with the tissues of the liver and the brain. So close is its affinity for the brain-substance that it becomes a most difficult, nay, even an impossible task, to distil from brainmatter all the ethylic alcohol with

temperature the vapor of it could be pipe."-N. Y. Witness.

made to enter the lungs in sufficient quantity to be absorbed from the lungs and to produce by its diffusion through the blood its specific effects. Lastly, I have known it to be absorbed by the skin in so distinctive a manner as again to prove its transmission through the blood to all parts.—Benjamin Richardson, M. D., F. R. S., in N. Y.

#### THE TRAFFIC IN GIN.

It Degrades the People of Africa More Than Did the Slave Trade.

With the stoppage of the slave trade the gin traffic only received a more powerful stimulus. To its propagation all the energies of the traders were dehuge demand, and it was increasing out of all proportion to the taste for better things. It required no exertions on the part of the merchants to set it agoing. and once started it grew and spread of itself without any danger of its stopping. The profits, too, were enormous drink had to be assuaged, no matter what the price. Yet in all conscience might be hung the signboard of Hogarth's picture: "Drunk for a penny, dead drunk for two pence," only the "clean straw for nothing" would have to be left out. With the traffic in useful articles it was entirely different. To and the profits were uncertain, which did not suit men who wanted to make

money rapidly. The result of this state of matters is that the diabolical work commenced by the slave trade has been effectually spirits. I, for one, am inclined to beas lasting-evils than the former. The fect; it more effectually blights all the native's energies, it ruins his constitution, and, through the habits it gives rise to, his lands are left as desolate as after a slave raid.

What are the most characteristic European imports into West Africa? able odor and of high boiling point, 270 Gin, rum, gunpowder and guns. What Oliver Newberry purchased 500 barrels European articles are most in demand? The same. In what light do the natives look upon the Europeans? Why, as makers and sellers of spirits and guns. What largely supports the governmental machinery of that region? Still

the same articles. The ships which trade to Africa are loaded with gin out of all proportion to parts each step. If we could add one more useful articles; the warehouses more of carbon and two more of hydro- along the coast are filled with it. The air seems to reek with the vile stuff, and every but is redolent of its fumes. of carbon, six parts of hydrogen and Gin bottles and boxes meet the eye at every step, and in some places the wealth and importance of the various villages are measured by the size of the pyramids of empty gin bottles which they erect to their own honor and glory and the envy of poorer districts. Over large areas it is almost the sole currency, and in many parts the year's wages of the negro factory workers is paid in spirits, with which they return home to enjoy a few days of fiendish debauch.-Joseph Thomson, in Contem porary Review.

#### FACTS IN A NUTSHELL. THE Lutherans in the Baltic prov

inces of Russia have undertaken a vigorous campaign against intemperance, and have already achieved a notable

THE Anglo Temperance Association is making rapid advances in India. The object of the organization is to secure the ultimate prohibition of the sale of liquor throughout India.

It is said that Mr. George W. Childs confidently states that since the introduction of foreign and native mineral waters as a table beverage the use of wine has decreased one-half at dinner Towns and cities receive annually

from liquor licenses about \$1,250,000, while over \$27,000,000 is paid into saloons by the people. For every dollar paid in for license about twenty-one dollars are paid out by the people. The saloon antagonizes all good government and all educational influences.-Carroll

SINCE the establishment of the Vienna free kitchens the number of drunkards is said to have greatly diminished. The medical profession testify to enorwere first largely diluted with water, as mous improvements in the health of creased to one-third of the number of

ten years ago. THE drink consumed by the workingcost \$1,280,000,000, nearly twice the banking capital of the country, more than one-fourth the cost of all the mills and factories, and considerably more than one-fourth of the cost of all the railroads. Think of it! Mr. Powderly says: "The rum habit is the wage earner's greatest enemy." Who can doubt it?

A New Yorker just returned from present in the fluid of the ventricles of tion that he saw there. On the four corstore, then a druggist's store and doctor's office, then an undertaker's office, the tissues it maintains a very close There is something in this combination suggestive of getting rid of a man with neatness and dispatch.

# A Terrible Story from Chicago,

### EW YORK FASHIONS.

The Latest in Gloves-Summer Wraps-Stylish Dress Bodices. Silver, dove and pearl-gray gloves are

very famionably worn in the gay French The slender vine embroidery at the back of the hand is worked in self-colored silk. Other gloves show points or stitching in black, these to orrespond with the elegant carriage and visiting-gowns of gray, trimmed either with rich black passementeries r with borderings formed of velvet stripes or arabesques in applique. There are also imported some lovely pale tints for evening wear among the shades in fawn, dove and pearl. These are made of the softest and most pliable of indressed kid, and the gloves are deliately perfumed. No little fault was found with certain brands of gloves sold the past winter which had hitherto been onsidered of the finest make. It is a very good plan when making a change in glores to have the new brands fitted before purchase. This is easily done, as in many shops the assistants consider no trouble too great to insure satisfaction. Not only is the purchaser insured by this means against faulty gloves, but a glore, however irreproachable, if not put on properly the first time of use, never after satisfies a critical wearer. In it adjustment to the hand it gets a convenience which stays.

tumes of lilk or fine wool are pretty shoulder coes of velvet in plain colors of moss green, terra cotta, marquise brown, malogany and black, that will be in use all summer when a light wrap is needed. These are lined with shot silk, and ae wholly untrimmed. Besides these are Abbe Galant pelerines, made of rictarmure silks, and decorated with very file gold bands in palm patterns, with agrelot fringe below. Prettiest of all re the lustrous silk capes in pale colos of lawn, reseda, golden olive, and gay, elegantly shaped and fitted, and doted all over with pendants of cashmere beads in cluster. The effect of the olored drops on the light silk ground of the cape is rich and dainty. The shot-silk linings follow the effect of th tri-colored bead decoration. Still other summer wraps are made of fancy silk nets and canvasmeshed silk grnadines, with lattice over-patterns of silk and velvet, with bands and grelot fringes to correspond.

These are very rith and elegant. It would seem amost impossible to go far astray in the matter of the dress bodice, the variety of models being now apparently limitles. The vest but-toned to either side of the corsage; the separate and ample Louis XIV. waistcoat, superbly decorated; the round waist, with its Empire sash; the Direc-Greek bodice classically draped; the corsage a la militaire, with its gold gimp, brandebourgs and corded revers; the quaint religieuse waist, with its simple folds crossing the chest: the bodice a la vierge half low, and veiled with a modest Gretchen guimpe of liss or tulle; the jaunty cut-away, with its natty side pockets, fine show of braidings and large gold buttons; the Josephine cuirass corsage, illustrating the mingled grace and

day, and so long as we live we share our fortune together.—Woman's Journal. dignity of a generation long past; the regal fieldic bodice for stately matrons and the low cut bebe waist for sweet sixteen, with its pretty shoulder knots and ribbon adornings at the belt; the yoke waist, the surplice and Breton bodices, the Russian model, with its square fronts and stylish silk short waist; the French guard corsage, whose vest fits like a glove, and the Turkish tea-gown whose vest does not fit at allamong the novel or repeated fancies for next season.—N. Y. Post.

### AMERICA'S DISCOVERY.

How the Expedition Led by Columbus was Fitted Out.

The statement is sometimes made that Queen Isabella of Spain pawned her jewels in order to provide funds for fitting out the expedition for the discovery of America. This is a very old story, first told not long after the death of Columbus, and though it is not true, its origin is not difficult to discover. As every fact about the great voyage is of interest to Americans, especially now that we are soon to celebrate its four hundredth anniversary, we will briefly N. Y. Ledger. give the facts about the raising of the noney.

Columbus went to the Spanish court to lay his ambitious project before the King and Queen just as the last great stronghold of the Moors, Granada, had surrendered to the forces of Ferdinand and Isabella.

In some respects it was an inopporune time. The country was exhausted by the war which had just closed with this splendid success, and the joint monarchs were not inclined to embark ipon any new and uncertain adventure; and what was more important, the treasuries of both Aragon and Castile were early empty. Queen Isabelle, in fact, had been obliged to pledge her jewels to get money for the prosecution of the war against the Moors.

The Genoese navigator pleaded his cause in vain. Both King and Queen istened coldly to his enthusiastic plans, in which the recovery of the Holy Sepilchre from the Turks was strangely ningled. They refused to assist his enterprise, and Columbus in despair left Granada, intending to make a final effort for assistance at the French court. At his audience with the Spanish nonarchs, however, there were two perons who were convinced of the truth of ais daring theories, or at last of the isdom of attempting to prove them to e true. They were, singularly, the finance ministers of the two crowns, St. Angel for Aragon and Quintanilla for

Castile. St. Angel obtained an audience as oon as possible with the Queen, and so all." warm was his advocacy of the theories of the Genoese stranger, so convincing his arguments for assisting him, that Isabella, fired by his enthusiasm, exclaimed, "I undertake the enterprise for my own crown of Castile, and will | Cincinnati drummer, with a shout that pledge my private jewels to raise the ecessary funds."

The minister assured her that this generous measure would be unnecessary, and hastened from the royal presence to send a messenger after Columbus, who speedily returned to Granada. The arrangements for the expedition were speedily made. St. Angel supplied about eventeen thousand

reasury of Aragon. The three Pinzon Brothers, ship-builders at Palos de Mogner, loaned Columous one-eighth of the necessary money, he having assumed this share of the expense in consideration of his receiving one-eighth of the profits. They also furnished additional money and two of the vessels, and all three of the brothers went upon the expedition, two as captains of the caravels La Nina and La Pinta, the other as a pilot. The third vessel, La Pinta, was impressed, to the great terror of the owner and the crew It may be well to add that Columbus repaid the loan made by St. Angel with the gold which he brought back from the New World on his first voyage. A portion of this gold was employed in gilding the vaults and ceilings of the royal saloon of King Ferdinand's grand palace at Zaragoza, or Saragossa, the Aljaferia, where possibly it may still be visible to the American pilgrim .- Youth's Com-

#### panion. WOMEN AND NOVELS. A Word of Advice to the Alert, Practical

Women of America We have thousands of novels every

season sown broadcast over the land and we are asked, "Shall women read novels?" She simply will read them. As well ask if, thirsting, she would not drink of the spring gushing from its source, or the stream rushing past. It may have tonic iron or even a sulphurous flavor, but she will drink or sip "you may depend on't." If you ask, "to advantage?" that is

not as clear and largely depends. Still one need not take dark views and marshal long arguments, "in starched pro-cession of If and But." The old dangers are averted by the very conditions of the time. The higher education has created an appetite for wholesome mental food-the radical temperament is active and one thing follows fast on the footsteps of another; if our girls are reading more, they are dancing, riding, dressing more; going more into music, athletics, nursing, charity, literary work; in short, realities force themselves on the attention to such a degree that few women are in danger of neglecting their duties to waste long hours

n fletitious joys and woes alone. Many women are exiles through life They do not even hear afar the musiof existence, all for which a woman longs instinctively; they are shut out by poverty, by illness, by a monotonous round of prosaic duty none the less well

performed. A repast without bread lacks the essential, but a repast all bread-! The condemnation of novel reading would shut out from such lives the tenderness, the grace, the inspiration of Dickens, Thackeray, MacDonald; of Black, Hardy and Wallace; of George Eliot, Miss Woolson, Mrs. Spofford, Mrs. Whitney; even the divertisement of Haggard. Jules Verne and the "Duchess"-seeing that a little syllabub does not hurt a sound digestion.

Then a word in the ear, oh, keen eyed, alert, practical women of America! Do not "throw away" time in novel reading, but use it wisely in doing that

"When the brain gets dry as an empty nut When the reason stands on its squarest toos seat yourself in the easiest of easy chairs and read a novel, but see to it that it be a good one.-Ladies' Home Journal.

married a professional humorist, and I wish I hadn't." "Why?" asked her friend. "Because he reads all his work to me before he puts it in the paper."--"Well, young man, so you want to

marry my daughter, eh? What do you expect to live on?" "Why, my brains." "But don't you think that your wife will tire of a diet of calf's brains?"-Harper's Bazar.
—He—"Man, you know, was created

only a little lower than the angels.' She-"I wouldn't say that. It sounds so much like a reflection on the angels. you know."-Boston Transcript. -Irate wife (to collector)-"Don't be

insolent, sir. I'll tell my husband and he'll kick you all over town." "Collector, confidently)-"I just guess not. My name's Bill, mum, and he never footed one in his life if he could help it."—Washington Star.
—Mrs. Angelica—"Won't it be just too

lovely for any thing to have wings and harps forever?" Mr. Angelica (a dys-peptic)—"I don't want any of it in mine. We wouldn't be there a week before you'd want my wings to put on your hat."-Lowell Mail. -After the proposal—"Before I go,"
he said, in broken tones, "I have one
last request to make of you." "Yes,

last request to make of you." "Yes, Mr. Sampson?" said she. "When you return my present please prepay the express charges. I can not afford to pay your account."—Harner's any more on your account."-Harper's

-"Did you ever see any of these mind readers?" said young Smithkins to a young lady. "Yes, I have attended some of the exhibitions." "I don't believe there is any thing in it." I allowed one of them to try and read my mind, and do you know he couldn't at "Which is in no way surprising, was all the young lady said .- Washington Capital.

-A passenger on the Springtonic sprang up from his deck chair, where he had been sitting next to a voluble sounded like "Man overboard!" "Where? Who's overboard?" yelled a score of excited passengers. "I'm overbored," he replied. "This fellow has nearly talked me to death, and I want to have him shut up."-Light.

-Miss Summit-"I presume, Mr. Dashaway, that you will welcome the flannel shirt again this season. It must he such a comfort to you or during the hot weather." Dashaway-True; but as a matter of fact, Miss Summit, I can't say that I like the innovation. It is too leveling. When I have on a flannel shirt, how are you going to tell me from-er-well, for instance, from a common brakeman?" Miss Summit (artlessly)-"Do you know, I have often thought of the same thing.

#### -Clothier and Furnisher. A MAN OF FEW WORDS.

How a Dull English Waiter Interpreted His Modest Order. A young man, some years ago, arrived at a certain inn, and, after alighting from his trap, went into the commercialroom, where he walked backwards and forwards for some minutes, displaying the utmost self-importance. At length he rang the bell, and upon the waiter's appearance gave him an order nearly as

follows: "Waiter!" "Yes sir!" "I am a man of few words, and don't like to be continually ringing the bell and disturbing the house; I'll thank you

to pay attention to what I say. "Yes, sir!" "In the first place; bring me in aglass of brandy and water, cold, with a little sugar and also a teaspoon; wipe down this table, throw some coals on the fire, and sweep up the hearth; bring me a couple of candles, pen, ink, and paper, some wafers, a little sealing-wax; and let me know what time the post goes

"Tell the ostler to take care of my horse, dress him well, and let me know when he's ready to feed. Order the chamber maid to prepare me a good bed, take care that the sheets are well aired, and that there is a glass of water in the

"Ask your mistress what I can have for supper. Tell her I should like a roast duck, or some thing of that sort. Desire your master to step in; I want to ask him a few questions about the drapers of this town." The waiter answered, "Yes, sir," and

then went to the landlord and told him a gentleman in the commercial room wanted a great many things, and amongst the rest he wanted him, and that was all he could recollect .- Leeds Mercury.

Women Barbers in London. A lady whom I know is thinking

writes Miss Mantaline) of opening a hair cutting saloon for gentleman, and having a trained army of tady hair dressers to wait upon them. There is no doubt that a staff of lady hair cuttors would attract customers. There is no reason at all why women should not be employed to "barber" men. Women barbers are largely employed to cut women's hair, and a man's hair is easier to cut than a woman's. Of course the women barbers would have to gain profleiency in shaving, and the question is where will they get their experience now that Barnum's bearded lady has left England. The popular theory is that he youthful barber gets his hand in on a sheep's head. But then sheep's heads are expensive, and even shaving a sheep's head would not give the practitioner sufficient dexterity to deal with the blue chin of a strong-bearded Italian. -Pall Mall Gazette.

From the German. Tourists-These are beautiful moun-

ains; but how much more picturesque they would look if there was an ancient ruin on the summit. Hotel-Keeper-Yes; I believe an ancient ruin would draw more tourists.

Next year I am going to have one built.

-Texas Siftings.

#### A Live Issue.

The Western Division, Baltimore City Democracy, held a meeting on Friday night of last week at No. 814 North Gilmor street, Mr. Wm L. Marbury was the principal speaker. He said:

"The recent political situation in Maryland is interesting. To put the case in a few words, the time seems to have arrived when we shall have an asswer to the question of whether the democratic party shall be sacrificed to the desire of the present so-called managers to perpetuate their power, or whether, in order to preserve and to strengthen the party, these managers shall be thrown overboard and new leaders chosen in their stead. The people—I mean the democratic people, those who are democrate from principle—have the power to do this if they will. The present election law, imperfect though it is in some important respects, is yet a long step forward in the direction of fair elections. It is put through the Legislature in spite of the bitterest kind of opposition on the part of the present political managers and all whom they were able to control. The managers not only opposed this law, but every other measure looking to the improvment of the condition of the people. They are not in accord with the national democracy in any of the great issues of reform presented and advocated by our great leader, Grover Cleveland. \* \* \* People\* Maryland is interesting. To put the case in a few words, the time seems of the great issues of reform presented and advocated by our great leader, Grover Cleveland. \* \* \* People are tired seeing the same old crowd moving from one office to another and holding office all the time for twenty years. Recent occurrences have not tended to weaken this feeling, and, as I said before, it seems that the time has come when the choice must be made between throwing over these men and giving the State to the republicans. \* \* A party which has not the sense and the courage to change its leaders at a proper time must expect to go under. This, it seems to me, is the 'condition which confronts' the democracy of Maryland." Maryland."

# The New Tariff Bill.

As it now stands this bill embodies the conscientious efforts of our most skillful and experienced legis lators to apply the doctrine of Protection to American industries with trine declares that the best method of collecting the money required for the expenses of Government is by duties upon imports so levied as to promote the diversification of A merican labor.

With amendments.

SECTION I. Be it enacted by the General Assembly of Maryland, That Section thirty-seven of Article twelve of the Code of Public Local Laws title "Garrett County" sub-title "County Commissioners," be and the same is hereby repealed and re-enacted so as to read as follows:

of the Tariff of 1883, as promised by shall take effect from the date of its passage. the Republican party in its campaign of 1888, and as also demanded by the Democratic party.

The bill as it now stands will doubtless be modified in some respects in its passage through the various stages To provide for the payment of mileage to witnesses summoned to the Circuit Court of its consideration before it can be-

progress steadily toward its adoption, and when adopted, Republicans and Protectionists everywhere need not and should not hesitate in giving it earnest, cordial support. It will be the most complete, most carefully the most complete, most carefully prepared and most impartial Tariff legislation ever presented to the country. It looks to the promotion of all industrial interests, whether

farming, mining, manufacturing and MEETING OF SCHOOL BORD. commercial, with partiality toward none and with a single eye toward the equal developement of all, in behalf of all our people of whatever class or occupation.

We confidently believe that, coupled with the new administrative bill, it will meet the needs of the nation, remove obstructions in the pathway of its prosperty, encourage wider diversity of occupations, stimulate new enterprises and set in motion all over the country the wheels of national progress.

The measure, then, invites and de mands the support of all patriotic men .- American Economist.

NEW ADVERTISEMENTS.

86. He shall be entitled to such compet

the diversification of American labor and industries and defend their prosperity against foreign competition. It is recognized that with the lapse of time revisions of the Tariff are necessary, in consequence of changed conditions and the possibility of establishing new industries. It is also affirmed that to ascertain what alterations or additions should be made, public hearings of the representatives of industry and labor, should be had, and their expert statements be considered and respected.

Members of Congress and the country have in this manner for months been studying the requirments of industry at the present time. The results of this examination are now presented in the form of a new Tariff measure, which is in effect a revision of the Tariff of 1883, as promised by

38. # ANNOUNCEMENT!

NEW FIRM! NEW GOODS! **NEW PRICES!** 

The undersigned will on and after the 1st day of May at the old Bush stand, corner Oak and Third streets open one of the finest and best selected stocks of General Merchandise ever brought to Oakland. Comprising Dry Goods, Notions, Shoes, Hats, Tinware, Glassware, a full line of the very best Groceries, and in fact, every line of goods usually found in a first-class store. These goods were selected from first-class wholesale houses and none of them are auction trash or light weight, and will be sold at the very lowest prices for CASH or its equivalent. All kinds of country produce taken in exchange for goods and the same price to all. Our motto will be to "live and let live," and a poor man's dollar will ty as much as the rich mans, we shained thempt to cut prices or make war on other aerchants, but propose they shail sell at a ir living profit or be undersold by us. All urchases within the town limits will be devered free of charge and promptly. As we re a new firm and desire to build up a trade , it will be our aim and utmost en o please all. Hoping to receive a fa share of the public patronage and that by fair dealing and low prices we may always merit the same, we remain,

And How It Was Effectually Thawed Out at Last.

"Two children!" said Decimus Black. "Coming here! I won't have 'em-and there's the end of it."

Mr. Black stood on the red-brick hearth in front of the big wood-fire, in an attitude of the intensest animosity. an open letter in his hand, a frown

darkening his rugged face. Mrs. Black paused in her occupation of stocking-mending-a pained expression passed over her toil-worn linea-

"But they are your own son's children, Decimus," she pleaded. "And their grandma on their mother's side is dead, and there ain't no one to care for 'em at Hill's Hollow."

"Well, I can't help that," retorted the old man, setting his yellow teeth to-gether. "Do the Hill's Hollow folks think 1 keep a free tavern? I don't like children. I never did. When John James married and had a family he didn't consult me-and I ain't goin' to support 'em! I want that clearly understood. At my age I can't have children racketing about the house. I brought up John James and Esther Anne-and that's all can be expected of

Mrs. Black's countenance fell. In her secret mind she had all the morning been planning what room John James orphans should have, how she would unpack sundry broken toys that she kept in a chest in the garret-sole relics of the only child she ever had had-for their behoof, and what a gleam of sunshine their presence would bring into the silent dreary house. They were no kith nor kin of her, being the grand-children of Decimus' first wife, yet her heart warmed to them with longing tenderness.

"It seems 'most a pity," said she, "not

"We won't argey the question no furder," said Black, sharply; "I ain't goin' to hov 'em here—and that's the long and the short of it."

"But, father, they're on the way here "Then they'll hey to be on the way back, that's all, afore they're twentyfour hours older."

And Decimus Black went out. Five minutes later the ring of his axe at the wood-pile, sharp and sudden, gave the key note to his mood of stern resolve. "Is this the house, Kitty?" said little helped him out of the creaking old ve-"Does grandpa live here? Oh, dear, 1 do hope there's a good fire, be-cause I'm so frozen cold!"

The elder sister, a mite of ten, stood tiptoe to sound the knocker, while little Johnny clung to her, with one hand on the tattered carpet-sack that contained their earthly stores. "Ain't there no one there?" faltered

"I don't know," said Kitty. "I'll knock again."

Still no answer came. Mrs. Black was out feeding her chickens in the barnyard, and old Decimus was performing his nightly task of milking, in the safe shelter of the cow-stable. As it happened, he was the first to re-enter the house and confront the little creatures, who were still patiently waiting on the door-step. "Eh!" said he. "Who be you?

"We're John and Catherine," said the girl. "We couldn't make any one hear. Please, are you our Grandpa Black?" The old man peered up the road. Stage gone?" said he.

"Yes, sir," Kitty answered, shivering. "Wal, it stops at the tavern an hour to change hosses and give the passengers their supper. You go arter it-it's only half a mile-and tell the driver to take you back on the night trip to where you come from."

"Ain't we to stay here?" hesitated Kitty.
"No," said Decimus, "you ain't. We

don't want no children here. Come, start on-it'll be dark pretty soon.' And by way of terminating matters he shut the door in their faces and went back into the house, with a grim

"It's a good thing Be tsy wasn't here," said he to himself. "She'd a-been dead sure to hev made a fuss. Women hain't no judgment nor discretion."

Half a dozen rods down the road Regina Whelpley, the village schoolmistress, came upon two forms crouching among the dead leaves in the angle of the old stone wall.

"Mercy upon us!" said she, with a lit-"Who is this?" And with tears and tribulation the

child told their story. Regina was a tall, straight girl, with eyes as black as coals, a rosy color, and

a true, womanly heart. "It's a shame!" said she. "Two litevery one knows that when Decimus Black makes up his mind there ain't no softening him. Hush! there he goes

She drew the children back into the shadow as the old man trudged past, the visor of his fur cap pulled over his eyes, his hands thrust down deep into his pockets. All three drow a long breath of relief when he was gone.

"Look here," said kind Regina, "I'd take you in myself if I had a home; but I have none. I'm only a country schoolteacher, boarding around. One thing is very cortain, though-you can't go any farther to-night. I'm boarding my week with your Grandma Black now. I know she'll let me take you into my room there, and we can fix up some sort of a bed there for one night at least. Your Grandma Black, sho's a human Christian and not a hoathen sphinx!" setting her lips closely together. "Come, don't ery any more, little boy. I'll take care

of Miss Whelpley leading a child by either hand on her kitchen threshold. may easily be imagined. At the piteous tale she burst into tears.

"Oh, Miss Regina," said she, "what am I to do? lie says -" interrupted the girl. "We can't let Companion.

these two poor little creatures perish of cold this bitter March night because he hasn't any heart! As for getting to the tavern before the stage starts again, they're not able to do it. And, after all, what would become of them at the other end of the route? No, Mrs. Black, we'll give 'em a good supper of warm bread and milk, and fix 'em a bed in my oom for to-night. And if your husband finds it out and scolds you, why you may just tell him it was my fault. I'm not afraid of him, if you are. And to-morrow we'll consider what it is best to do

next." Thus relieved, to a certain extent, of the responsibility, old Mrs. Black set to work with a glad and pitying heart to warm and feed the two poor little children, and did not rest until she had seen them snugly asleep on a floor-bed in the corner of Regina's small apartment.

"It don't seem as if I could ever .et em go again, Miss Whelpley," said the old woman, wiping her spectacle-glasses. "But you don't know what it is to be married."

"No, I don't," said Regina, laughing. But, never mind, Mrs. Black, two sweet children like this will be sure to find a home somewhere." Old Decimus came home at the usual hour from his chat at the village store.

Mrs. Black looked at him guiltily as he entered. "It's a-snowin'," said he; "snowin'

"Is it, father?" "Yes. Where's the lantern?" "What do you want the lantern for?" Decimus Black writhed uneasily. "I stopped in at the tavern on my way

back," said he, "an' they told me the stage went back empty. "Did it, father?" (in a low voice.) "An' I feel sort of uneasy to think what can have become o' them children," unwillingly admitted the old man. "I dare say for't, I can't get the

look o' that boy outen my head. It's jes the way John James used to look at me. John James had dreadful pleasant mother. I must go out and hunt the children up. I wish to goodness I'd never sent 'em away."

At that moment the door at the foot

of the stairs opened. Regina Whelpley stood there, with flushed cheeks and shining eyes.

"If you really mean that, Mr. Black," said she, "Providence has been kinder to you than you had any right to expect. Light the candle, Mrs. Black. Show him where the poor creatures are. I found them cowering under a stone fence, Mr. Black, and I brought them Johnny Black, as the stage-driver here on my own responsibility. Look!" She held the candle high above her head. Old Decimus leaned forward, and saw a big tear plash down from his dim eyes on the blue plaid coverlet.

> "I'm glad on't," said he, "I'm glad on't! It's a bitter March night, and the snow is falling as I nover knowed it to fall afore in March, and if them little ones had perished-" His voice broke down; he turned his

"Father," pleaded the old woman coming close to him and putting one withered hand appealingly on his arm, "they may stay here, mayn't they?" "Yes," he answered, in a husky voice

"they may stay here." So the little wanderers found a home after all, and, to judge by popular report, not an unpleasant one.

"For, I do declare," said Miss Whelpey, the village schoolmistress, "those children rule the whole house. Only think of old Decimus Black, who used o think that children had no business to exist, building a play-room for them in the barn and buying a little pony for em to ride, and taking 'em with him wherever he goes. His heart has been frozen up tight these many years, but it has thawed out at last."

So it had. In the sunshine of children's smiles, the magic influence of which the Great Teacher spoke when He said: "And a little child shall lead them."

-Fireside Companion. PUNISHING A PRINCE.

Anecdote Told at the Expense of Emperor William's Brother. The Empress Victoria, wife of the late Emperor Frederick, of Germany, has always been a careful and keen-eyed disciplinarian in domestic life. notices the slightest variation in the and punishes one as inexorably, as the

Prince Henry, the brother of the present Emperor, had, when a small boy, the greatest objection to his daily bath, and the nursery became every morning the scene of a vigorous and tearful struggle, on his part, against His mother tried in vain to "tubbing." persuade him that baths were inevitable, and that he must submit to tle helpless creatures like you! But them, but she finally gave the nurse orders, one morning, to let him have his own way.

Prince Henry, confident that he had gained a remarkable victory, was exultant, and when he set out for his morning walk, took no pains to conceal his triumph. He indulged in sundry taunting remarks to his attendants, but on returning home, he was surprised to notice that the sentinel at the gate did

not present arms as he passed. On reaching the palace, he found a second sentinel equally remiss, and, knowing, as well as any of his punctilious race, what was due to his rank, the little fellow walked up to the man, and asked, severely: "Do you know who I am?'

"Hes, Hoheit," said the man, standing motionless. "Who am 1?" "Prinz Heinrich."

"Why don't you salute, then?" "Because we do not present arms to an unwashed Prince," replied the man, Mrs. Blask's amazement at the sight who had received his orders from the

Prince's mother. The little fellow said not a word, but walked on, bravely winking back the two big tears which filled his eyes. Next morning, however, he took his bath

EVERYBODY'S BROODER

A Simple Contrivance That Costs But Little and Is EasHy Made. An excellent brooder can be made of

inches high. Take off one side, which will be the front of the brooder. Over this open side lay one edge of a wide board, allowing the other edge of the corn is very heating and keeps the board to rest on the ground, forming an blood too hot. But in the matter of box. Nail narrow cleats lengthwise of ascend. Remove the bottom of box No. water-proof roof.

each of the three sides under the roof thought of straining the animal never and five or six in front. This will afford plenty of air for the chickens when the brooder is closed. Next fasten the side which was removed from box No. 1, with hinges to the lower edge of the front upper box. This can be lowered

when it is desired to close the brooder. When it is preferable to leave it open it can be fastened to the roof by a leather strap caught on a nail or wire hook. Another box still will serve as a

"mother," and need be but half as large as the brooder box. A soap box is good for this purpose. This must be inclosed excepting at one end. Here a door must be hung which can be closed tightly. In the box a pan of hot sand may placed, which will afford plenty of heat for the little chickens and will hold

it longer than water. This box should have a strong post, seven inches high, under each corner should reach nearly to the floor. Hav- and tables, although such things can be No. 1 and covered it with dry, warm stand the newly-made mother in the center of the floor. Next put on box No. 2 which makes the roof, and the brooder is complete. The paper and sand should be renewed every day. When the chicks are two weeks old the mother can be removed during pleasant days, and when they are three months old it may be dispensed with altogether, and two or three low perches put in its

# SWEET POTATOES.

Some Good Suggestions About Their Cultivation and How To Market. In selecting seed reject all crooked and unusually long potatoes, and plant those showing a tendency to become short and larger in the center, with a rapid taper towards each end. Place in a hot bed horizontally one-half inch apart, drench with water, cover three inches with earth, then one and a half inches of sand. When the plants are four inches above the ground, they are large enough to pull for sets.

Ridge the ground with a two-horse plow, four feet or less apart, and with a spade plant on the ridges, eighteen inches apart. Keep free from weeds and grass. A sweet potato scraper, drawn by a mule, will be of great assistance until the vines cover the ground, after which little attention will be required. Digging can be done with a spade, if only a small quantity is grown, or with a plow with the mould-board removed, and a rolling cutter to cut the vines. I use a digger, consisting of two rolling cutters and two plows, throwing the

dirt in opposite directions, and two lifters that pass under the ridge, leavng the hills to be easily lifted by hand. The potatoes designed for table use are separated from the seed and corded in bins in the potato house. Great care should be observed in handling to prevent marking. A slight bruise, or a scratch of a finger nail, imperceptible at first, will become black and unsight ly, and greatly impair the sale. No

vegetable depends so much on its good looks for a quick sale at a high price as a sweet potato. The house is kept as near a uniform temperature of fifty to fifty-five degrees

as possible. The crop is marketable from November to April in barrels and kegs lined with paper to keep out the cold, and shipped to market in refrigerator cars .-Popular Gardening.

Bedding Sweet Potatoes. To obtain strong, healthy plants, pre pare a frame the same as for a hot-bed, but no sashes are to be used. This frame is filled to a depth of about two feet with coarse horse manure well trodden down; this is covered with about eight inches of wheat straw, upon which the tubers are placed in a single layer close together, then covered with just sufficient soil barely to hide them from sight; then upon the soil are placed about eight inches of pine leaves or "shats" as we call them, that can be obtained upon the ground beneath the pine trees. Then, by placing boards upon the "shats" the bed is covered, except a space through the center which is left open to allow the surplus heat to escape so that the tubers upon the outer edges of the bed will sprout as soon as those in the center. As soon as the sprouts appear the "shats" are removed, and from three to four inches of soil are

HIO?

THE ABUSE OF HORSES.

The Noblest of the Brute Creation and Yet Often the Worst Abused By Man. One of the strange things we meet with in this world is the reckless abuse of the horse. Usually a man will be careful with his own property, especidry-goods boxes, says Farm and Home. ally if it is of delicate structure. Select two that the horse is often stabled and fed are four feet wholly in the direction of his injury. square and two Stables are badly ventilated; many feet deep. Place them are not kept clean. The food in thousands of cases is wholly corn and four substantial hay, perhaps bad hay. But corn is the poorest food in the world for the horse. which needs strength-good bone and muscle-and corn does not contain the elements to make them. Besides that, incline across the entire front of the work there is frequently very little judgment used in the use of the horse. this board so the chicks can easily There is something to do, just so much work, perhaps, which we desire to per-2 and saw the sides so that the front form in so many hours; and although it will be two feet high, and the back only may be at the very beginning of the six inches. This will form a shed roof. spring work when the horse is unused Nail good boards across the roof, over- to great exertion, he is pushed through lapping each other like shingles, or sheet the work we have allotted to him, retin will do as well. This makes a gardless of its effect upon the animal. We have a load to draw. The horse is Make three two-inch auger holes in expected to draw it if he can. The

> occurs to some people. The results of such use and management are seen upon every side. Horses become sick from bad stabling and bad feeding. They become ringboned, for ringbone, as one writer says, is often caused by violent efforts the animal makes in obedience to the voice of the driver when dragging a heavy load up some sharp ascent. The entire force is then thrown upon the bones of the pastern; inflammation ensues; lymph is effused; the lymph becomes cartilage, and the cartilage is converted into bone. Then an exostosis is established and a ringbone is the consequence.

The disease may implicate one or nore bones; it may involve one or more oints; it may also be confined to one bone; it may be either partial or complete. It may exist as a slight enlargement in front of the bone or it may quite encircle it.

Ringbone does incapacitate the animal for many uses, besides interfering with the free employment of the muscular energy; no persuasion or brutality can induce a maimed animal to east its full weight upon a diseased limb. The pace may be quickened by the lash, but the horse will, nevertheless, continue to hop when the affected member touches the earth.

Let mankind, therefore, reflect that the horse is given as their fellow-laborer. The life of the quadruped is the property of the master; but who, being sane, would abuse his own property? and around the bottom a strip of flannel | The being who should destroy chairs ing spread a paper on the floor of box mended, would be speedily confined as mad. Yet it has not entered the mind face a living image, to destroy the value or deteriorate the property which is present in the animal, deserves more than the very mildest of punishments. -Western Rural.

## A GOOD IDEA.

A Piggery and Corn-Crib Combined-How It Is Constructed. We give herewith a perspective view

and plan of a small piggery, with corncrib attached. The structure, Fig. 1, is fifteen by twenty-one feet in size, twelve feet high in front, sloping to six feet in the rear. The sides may be covered by vertical boarding, as in the engraving, or, if preferred, by horizontal siding. The siding of the end used as a corn crib is of narrow boards with intertices an inch or so in width to permit free

FIG. 1. PERSPECTIVE VIEW OF PIGGERY. ventilation. The whole is covered with a good light roof of shingles or other material.

The ground-plan is shown in Fig. 2. t provides for two wholly distinct sets of apartments. The middle section contains the nests, separated by a partition, containing a door by opening which the entire structure may be thrown into communication. Each end has a feeding-pen, with trough projecting into the alley far enough to obviate the necessity of lifting the swill over the side of

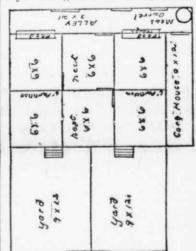

FIG. 2. PLAN OF PIGGERY. the pen. The rear portion of each compartment is separated by a partition only six inches high. By this means, the feed-pen is kept duly clean. The two doors opening into the yards in the rear of each yard is a gate, giving ingress and egress. The entire arrange-American Agriculturist.

EDUCATION does more for a poor farm than fertilizers. It grows better crops and breeds better stock. What many placed upon the tubers. In this manner a poor farm, with its scrawny cattle strong, healthy plants can be grown and foul acres, wants is a heavy apply bantry, is the only true economy.—N.

FIRESIDE FRAGMENTS.

-Simmering at 180 degrees is pro erable in cooking meats, to boiling at

foil from compressed yeast to cover the corks.

—A good way to prepare sweet, tender beef or mutton for invalids is to der beef or mutton for invalids is to slice thin, spread it on a plate, salt it to

turn over. In four or five minutes it is cooked done. Place the steak on a heated platter, and sprinkle with salt and pepper. Pour over it a tablespoonful of melted (but not hot) butter .-

Country Gentleman. tender. When about done heat the milk to almost boiling and stir it in gently, the rice into cups and set it away to

off three-fourths pound, and pound into it one-fourth pound of butter; then add one-fourth pound of pulverized sugar, two ounces of dry and sifted flour, the yelks of two eggs and a pinch of salt. Form it into a rather soft paste, then flour the board, roll it out nice and sleek, stamp or cut into any shape preferred, place them on a greased baking-sheet, egg them over, and bake in a moderate oven. Bake rather crisp. These can be flavored with essence, if approved .-

-Bread Sauce for Game: Roll a pint of dry bread crumbs and pass half of them through a seive. Put a small onion into a pint of milk and when it boils remove the onion and thicken the milk with a half pint of sifted crumbs. Take it from the fire, stir in a heaping teaspoonful of butter, a grating of nutmeg, pepper and salt. Put a little butter in a frying pan and when hot throw in the half pint of coarse crumbs remaining in the seive, put in a pinch of cayenne pepper and stir them over the fire until they assume a light brown color, taking care that they do not burn. For serving put a plump roast quail on a plate, pour over it a tablespoonful of the crumbs. The sauceboat, plate of crumbs and currant jelly should be passed one after the other.—Indianapolis Sentinel.

#### A MOHAMMEDAN WEDDING. Some of the Peculiarities of the Moslem Marriage System.

An "English marriage in high life" without either bride, bride-maids or other palpitating ladies on view, would smack strongly of Hamlet with the character role omitted. What, too, could the assembled gentlemen do, deprived, as they would be, of those pleasant feminine criticisms of the guests and dresses which obtain on such occasions? There are some masculine cynics who consider weddings rather melancholy affairs, even under the best circumstances, but they would be infinitely more so without the presence of lovely woman. That is, from the European standpoint. Mohammedans of good position take precisely the opposite view. The Calcutta native papers lately gave a long and graphic account of the marriages of two young men, the sons of a local magnate. Nautches, illuminations, flags, furniture and decorations are described in the most minute details. But no mention is made of the brides, nor does a single feminine name appear in the lengthy list of guests who attended. Fifteen hundred turned up, including maharajahs, nawabs, mirzahs and syuds galore, and the affair went off beautifully in every way. But poor Nourmahal did not even get a peep at it, unless surreptitiously through some chink in the zenana. It is further stated that all the guests made a point of offering felicitations to the bridegrooms, but no good wishes did they bring for the brides. Yet, odd to say, ail seem to have enjoyed themselves greatly, or the festivities would not have been prolonged until far into the night. Unless, therefore, we assume that Asiatic human nature is altogether different from European, some advantage might possibly accrue to English society from experimenting with the Moslem marriage system. - London Globe.

Economy in the Kitchen. A wise economy is a splendid quality in a cook. Without it even the highest culinary genius may come rather overexpensive. But it must be intelligent economy. What is generally known as attempted cheese-paring, writes "An Old Bohemian," is truly naught but extravagance of the worst possible kind, and in the most openly foolish disguise. Never go in for that sort of seeming saving which consists in the use of rear are hung at the bottom, and can be cheap materials—such, for instance, as let down so that the tops rest in the rancid butter or mutton-fat for pastry yard. Each one thus becomes a plat and frying, or inferior-miscalled cheap form connecting the pen with the yard.
The inside of each may be furnished with transverse slats, if desired. In the articles the cheapest in the end. Let your economy be quantitative, not qualitative. Take it for granted that a litment is snug, cheap and convenient.—
the of what is really good will go a longer way than a great deal of inferior trash. Shun cheap fats in pastry, but always use good butter. If you must employ a substitute, take pure lard. The avoidance of waste in every depart-ment of the kitchen, the larder and

-Among the servants of a family in Lewiston is one young woman of native "old country" wit who never is at a loss for an expedient. She attended a call 212 degrees. Much heat is wasted in at the door the other day, where a raising water to needlessly high temperatures in cooking.

"Hello! Hello!! Hello!!!"

"Well; what is it?"

"Very much better; she had a real restful sleep last night; she is almost rid of her night-sweats, cough and nervousness, and is growing quite cheerful. How grateful we all are to you for that bottle of medicine."

"Don't speak of gratitude. What does the doctor say?"

"He says he never saw so wonderful a change in such a serious lung trouble. He still thinks we are giving his medicines. I don't like to tell him."

"That's right. He's an old friend, you know. I'm sure your mother will get well now; but you won't forget the name of the medicine, will you?"

"Never! Dr. Pierce's Golden Medical Dis-

STOO OFFERED for an incurable case of the proprietors of DR, SAGE'S CATARRH REMEDY.

---A Sensible Recipe.

A New York newspaper offered a prize to the person who would give the best answer to the question. "What Shall We do with Our Girls?" Hundreds of persons entered the contest, which was decided by Madame Albini, the famous songstress. She awarded the prize to the author of the following recipe:

The foundation of society rests on its homes. The success of our homes rests on the wives. Therefore first of all, teach our girls how to be successful wives. Begin in their infancy to develope their characters. Teach them that jealousy is an immortality, and gossip a vice. Train them to keep the smallest promise as sacredly as an oath, and to speak of people only as they would speak to Blotches and Skin Diseases. Price 15 ets. people only as they would speak to them. Teach them to look for the best quality in every one they meet, and to notice other people's faults of Garrett and adjoining counter. and to notice other people's faults only to avoid them.

Train them to do small things well, and to delight in helping others, and instill constantly into their minds the necessity for sacrifice for others, pleasure as a means of soul development.

Once given a firm foundation of character like this, which the poorest as well as the richest parents can give to their girls, and no matter what necessity arises they will be able to rise above it.

Teach them the value of making themselves attractive by good health, physical development, neat dress, and perfect cleanliness. The worthy woman must learn that her worth alone will not keep her husband in love with her. She must be as accomplished, as amiable, as liberal minded, as tactful, as agreeable as her less worthy rivals. She must make home the most delightful spot on earth, and herself the most attractive woman as well as the worthiest. Unselfishness, perseverance, patience, and cheerfulness, must be her constant aids, and above all, tact.

### A Plain Lesson.

The late Archdeacon Allen, of Salop, once gaye a very plain lesson that "God loveth a cheerul giver," which deserves to be remembered. A church was to be erected, and donations toward the building of it were promised by various people, among whom was a nobleman, who failed, however, to fulfil the engagement when the time came for payment. Letters were sent to him on the subject, but brought no reply. The archdeacon resolved on a personal interview, and after some difficulty secured admission to the defaulter's house. He repeated his request for the promised subscription, but the nobleman demurred. At last Mr. Allen said, "Well, my lord, I hold your written engagement and shall put you into the county court and compel you to meet it." Finding his visitor was in earnest, the nobleman at last drew out his check-book, and handed Mr. Allen the promised donation. The archdeacon took the check, tore it into pieces, and threw them into the fire, saying that his lordship had certainly redeemed his large had been county and farmet proceds paid and the testes unther the titles to these untaked land Salop, once gaye a very plain lesson that "God loveth a cheerul giver," them into the fire, saying that his SEC. 4. And he it enacted, That this Act shall take effect from the date of its passage. lordship had certainly redeemed his word, but he must decline the money, for God loved a cheerful giver. To the credit of the nobleman be it said that he subsequently renewed his gift, and in a spirit that left no ground for rejecting it. Let the church take higher ground in the matter of giving than it ordinarily does, and much good will follow .-The King's Business.

### Public Local Law. CHAPTER 573.

AN ACT AN AUT
To provide for the assessment of the unclaimMilitary Lots and tracts of land in Allegany
and Garrett counties, and for the collection
of State and County taxes thereon, by selling the delinquent lands and turning the
net proceeds into the State Treasury. net proceeds into the State Treasury.

WHEREAS, Under the Acts of 1781 and 1787 and 1788 upwards of two hundred thousand acres of "the reserved lands westward of Fort Cumberland" were laid out in fifty-acre Lots and gratultonsly awarded to the officers and Soldiers of the "May viand Line" for their services in the Revelutionary War, and

WHEREAS, It appears from the Assessment Books that upwards of one thousand of these Miditary Lots are not now assessed, and never have paid any State or County Taxes during the past century, owing to the difficulty in ascertaining the names of the last owners who are non-residents of the counties in which the Lots are located, and
WHEREAS, Many of these lots have been

which the Lots are located, and
WHEREAS, Many of these lots have been
taken up under escheat, and other warrants
and patented by the State and subsequently
disowned by the patentees, for the alleged
reason that living, but non-resident heirs of
the soldiers had been discovered, therefore,
SECTION I. Be it enacted by the General Assembly of Maryland, That the Newspapers
selected to publish the Laws passed at this
session shall publish the following notice,
daily, for thirty days, in all daily newspapers
so selected, and weekly for ten consecutive
weeks in all the weekly newspapers so selected.

(Form of notice to be published.) (Form of notice to be published.)

Notice is hereby given to the legal heirs, assignees, devisees and representatives of all Officers and Soldiers who served in the "Maryland Line" during the Revolutionary War, that unless their claims of Military Lots "lying westward of Fort Cumberland" are legally established on or before the first day of April, 1881, in such manner as to secure the payment of State and County Taxes thereon, all their right shall be forfeited to the State and all such lots, as have not been patented or claimed by legal heirs, shall be advertised and sold to the highest bidders for cash and the net proceeds paid into the State Treasury.

Treasury. Sec. 2, And be it enacted, That in order to

# Public Local Law.

CHAPTER 396. AN ACT

To provide for determining the proper loca-tion and fixing the boundary or division line between Allegany and Garrett counties.

Whereas. The true boundary or division line between the counties of Allegany and Garrett as laid down in the Act of eighteen hundred seventy-two, Chapter two hundred and twelve, under which the said county of Garrett was formed, is in dispute, and WHEREAS, It is a matter of the highest importance to the citizens and tax-payers of both counties to have said line properly located and definitely fixed, therefore,

cated and definitely fixed, therefore,
SECTION I. Be it enacted by the General
Assembly of Maryland, That the County
Commissioners of Allegany and Garrett
counties be and they are hereby authorized
and empowered to employ a competent and
skillful civil engineer, not a resident of either
county, nor owning property therein, to survey and accurately locate the boundary or
division line between the said counties of
Allegany and Garrett in accordance with the
provisions of the Acto feighteen hundred and
seventy-two, Chapter two hundred and
twelve of the laws of Maryland relating
thereto.

He stated to a Times reporter yesterday that additional cottages would be erected in the near future and every detail for the comfort and amusement of his guests was receiving careful attention.

The presence of Mr. Harrison and other prominent men at the Park last season called the attention of the country to its many advantages and has given it an impetus that will make it more than ever sought after by the tired and weary of the cities, say well as the gay and pleasure lov.

EXAMINERS' NOTICE.

NOTICE IS HEREBY GIVEN, That the undersigned, appointed by the County Commissioners of Garrett County, to view the lands through which the new public road, from a point on the Hutton Switch road, near bodge's, and running thence through or on the lines of the lands belonging to tames Dodge, Edward Teats, John Connell, Ir., Thomas Spahr, John M. Browning, and Sylvester Rinard to the West Virginia line, near the Thomas place, and examine whether he said new road should be opened, will neet on Saturday, the 31st day of May, 1800, or such purpose, and to determine whether he public convenience requires the said road, and if so, to locate the same, and perform heir duty in the premises.

Public Local Law. CHAPTER 530.

AN ACT To authorize the Mayor and Council of Oak of almost the Mayor and Council of Oak-land to issue coupon interest-bearing bonds for the purpose of providing a fund to pay the floating debt of the Mayor and Council of Oakland and to improve the streets of said town, and to levy a tax on the assessa-ble properly within said town to pay said bonds and the interest thereon. bonds and the interest thereon.

WHEREAS, Frior to the year eighteen hundred and ninety the tax rate in the fown of Oakland for municipal purposes has been limited to the sum of twenty-five cents on each one hundred dollar's worth of assessable property in said town, which sum has been wholly inadequate for the Imperative needs of the town, thereby rendering the creation of a floating debt unavoidable, and preventing the town authorities from making greatly needed improvements to the public streets as requested from time to time by the tax-payers of said town; and Whereas, It is desirable to fund said floating indebtedness and provide for improving the streets of said town, and also to provide for the gradual payment of the debt thus incurred, therefore,
SECTION 1. Be it exacted by the General town, and also to provide for the gradual payment of the debt thus incurred, therefore, Sectron I. Be it enacted by the General Assembly of Maryland, That the "Mayorand Council" be and it is hereby authorized and empowered, in its discretion, to issue coupon interest-bearing bonds of said corporation to an amount not exceeding the sum of ten thousand dollars in the aggregate, each bond to be of the denomination and in a sum not less than one hundred dollars and in a sum not less than one hundred dollars, and all of said bonds to be signed by the Mayor and the President of the Council, and to be attested by the town clerk, whose duty it shall be to affix to each and every bond so issued, he seal of said corporation, and said bonds shall draw interest at a rate not to exceed six per cent per annum, payable semi-annually on the first days of July and January respectively in each and every year until said bonds are fully paid; and the interest coupons attached to said bonds shall be received if tendered in payment of municipal taxes due from the holder thereof; provided, however that no sush issue of bonds by the Mayor and Council of Oakland as above set forth, shall be made until the question of such issue shall have been submitted to the qualified voters of the said town of Oakland by the Mayor and Council thereof by at least ten days notice by handbills or otherwise, of such election, and a majority of such qualified voters of the said town of oakland by the Mayor of mach lisue of bonds.

have determined in payor of such Issue of bonds.

SEC. 2. And be it enacted. That the said bonds shall be sold under and by the aumority of the Mayor and Council of Oakland at not less than their par value.

SEC. 3. And be it enacted. That said bonds may be issued at such time as the Mayor and Council of Oakland in its discretion may determine, to mature at such date as shall not require the payment in any one year of more than one thousand dollars of the principal sum thereof, and said bonds shall be redeemable at the pleasure of the Mayor and Council of Oakland, at or before their maturity and said bonds shall be issued so that none of them will mature before the first day of June in the year nineteen hundred and five.

SEC. 4. And be it enacted. That to redeem said bonds the the Mayor and Council of Oakland is authorized and shall annually levy upon the assessable property in town a tax sufficient to pay the interest upon the bonds so issued under the provisions of this Act, and so much of the aforesaid bonds and said levy shall be designated as the "bonded debt."

SEC, 5. And be it enacted, That the proceeds arising from the sale of said rowers wall.

OAKLAND, GARRETT CO., MD.

### JACK, THE COWARD. How He Displayed His Timidity

By Capturing a Thief. "There must be skating again by this

time. "Of course there is." "Let's go over to Horton's pond." "Hurrah! Let's. It'll be splendid

moonlight." "Boys and girls, come out to play The moon doth shine as bright as day."

"Yes, yes; Come with a whoop, come with a call, Come with a good will, or not at all.'"

A merry lot of school-boys gathered in the village street just as the full moon arose over the snow-carpeted hill

in the east. "I wish it wasn't such a long way out to Horton's," remarked Hal Perkins. "Ho! I don't mind the walk a bit.

said Jack Gurney. "It just gets my blood well up for skating." "The skating does that for me," said Archie Day. "Whoop!-now for a race!"

Along the quiet road rushed the jolly crowd, some following the sleigh track, They hang forlornly behind the carts as they rattle by, and even depend from the ears and noses of the donkeys that draw the carts. They are loosely dressed and of all sizes, from the length of a finger to the height of the ten-foot giant that hangs from the beam of the great scaffold in the open square of the

What does it all mean? On this day the people commemorate the infamous end of the wretched Judas, who be trayed our Lord for a paltry sum of money. They think it is fine fun, only instead of banging all day, as boys in the United States do, they fire off all the Judases at the same moment. which took a winding way among the drifts and hidden stumps, others taking a short cut, struggling through drifts or springing over obstructions.

"Halloo! Hold up!" The suggestion was scarcely neces-sary, for as a farmer's sleigh met them in the narrow road many of the noisy racers had come to a halt. "Going over to Horton's?" asked the occupant of the sleigh.

"To skate?"

"You can't. There's just been another lot o' chaps warned off there. The ice ain't solid.".

"Oh, that's all a varn," came in vehe-"I tell you it's so. Ain't you got any sense? Don't you know how it's been

thawing for a week past?" "Don't you know how it froze last "Yes, I know; but it'll take another just such freeze to put Horton's pond clear up to the point of safety. Come

back, boys. Climb in and I'll haul you "Pshaw!" said Hal, in a tone of great disgust; "I'm not going right back after

coming all this way. "There's a good place to build a fort out there, any way, and we can have some kind of a frolic. And two or three of us have got our sleds, so we can do a

little coasting if we want to.' "Go ahead, then," was the response "but look out for that ice." Again on the quiet air broke forth the shout and laughter as the party rounded

a hill beneath which Horton's pond lay gleaming in the moonlight. "I believe it's all nonsense about it's not being safe," said Archie, stamping on the ice. "See how solid it is!"

Step by step they ventured farther and farther out. "Don't let's all go in a crowd." cautioned Hal. "But see-out here in the

middle it's as firm as a rock. I mean to skate. Come on." "So say we all of us," cried Archie. "So say we all of us," came in a chorus. "Skates on!"

"Aren't you coming?" asked Hal of

Jack, observing that he made no motion to put on his skates. "No," said Jack, "I don't believe it's "Humph!" said Archie. "You mean

you're afraid." 'Well, perhaps that's about it. Yes, I'm afraid unless I know a thing is

"I wouldn't be a coward," sneered Hal. "I've seen it written by wiser folks than you or me, Hal, that there's no bravery in taking risks when there's no need of it.' "Well, I'm thankful to say I'm no

coward. Come on, boys." He dashed away over the ice followed by all except two or three of the younger members of the party.

"Are you sure it isn't safe?" one of them asked, looking longingly after the skaters. "No, not sure at all," said Jack. "But

just think, boys, what a thing it would pe to break into that cold water-and what a thing it would be for our mothers and the other folks at home if-" "That's so," came in hearty acquies-

"Let's take the sleds and go up and try the coasting," suggested one of the

"This is good," said one of the minor ity party as they flew down the hill, ending their slide with a short run along the shore of the pond.

"Good as skating," was agreed. "And no danger of breaking through, either." The moon rose higher and higher, looking down with a beaming smile upon that fellow got in through the keythe rollicking sport. More than once Jack felt sorely tempted to put on his skates and dare the ice, as his companions jeered at him for not joining them.

"There's some trouble down there," said Jack, pausing for a moment at the top of the hill just as he with his small party were ready for a slide.

He could not make out exactly what was going on, but he could see all the boys running towards a spot at which some excitement seemed to center. one of the boys.

"Bring a sled," he heard as soon as the

ound of the scudding runners had eased. He sprang up and seized the

"What if the ice is broken?" suggested one of the boys. But it did not escape notice that Jack seemed to forget his fear of danger

enen there appeared need of his help.

wards the group on the ice. It was not, however, a break in, but an accident of a different character. Archie had been hotly pursuing Hal when the latter met with a sudden fall. His skates had been well sharpened just before engaging in the evening's sport, and Archie in falling over him had received a severe cut in his arm, which was bleeding profusely in spite of their

awkward attempts to bind it up. "We must get him home at once," said Hal, in great concern. boys, let us put our coats on the sled to fix him. Now-two of us at a time take old and we'll go kiting."

But a strong wind was against them and they found it impossible to keep up a very swift pace through the sometimes deep and untracked snow. The returning party, plodding quickly along, was in strong contrast to the noisy one of

earlier evening.
"There's a light in 'Squire Horton's house," remarked Hal, who, having been relieved in his duty of hauling, had fallen a little behind.

"I didn't know they had got home." "They haven't," said Jack; "my father got a letter from him to-day and he said no one would be home till next week." "But some one's there, sure as you

There was no denying this. The arge house, standing alone on a bit of rising ground not far from the road, had forsaken look in its darkness and loneliness when they had before passed it. But there are now unmistakable gleams of pale 12ght appearing first at one then at another of the win-

"Folks must have come home," insisted one of the party.
"It looks queer," said Jack, "I mean o go a little nearer and take a peep in

at that window.' Hal followed him as he went up the broad walk to the front door. But just as he was about to turn aside upon the grass in order to obtain a view into windows within which appeared the puzzling light he suddenly stopped short. "What's that?" he said, turning to

The latter took a few steps forward to look, then turning with a white face grasped Jack's hand and dragged him to a short distance from the house.

"Did you see it?" he gasped. See what?' "That-ghost," he whispered.

"Ghost! nonsense," said Jack, with "Hush-do hush," said Hal, trembling with fright, "You couldn't have seen it or you wouldn't laugh."
"I did see some one all in white, if

that's what you mean," said Jack. 'Yes-all in white. That's what they always wear."
Some of the boys had also turned into Squire Horton's yard, and were now

agerly pointing to one of the upper windows. "Did you see it-did you?" asked one

n great excitement. "See! there it is." Jack and Hal looked and could plain-

evere paroxysm of laughter, resuming times been confirmed by the reports of times been confirmed by the reports of careful observers. Dr. H. I. Bowditch (Med. News) gives a valuable contribution in support of the value of open-air travel to consumptives. In 1808 his father had all the indications of consumption. With a friend he took a tour of New England in a one-horse chaise. The first day he traveled twenty-five miles, but his exhaustion and haemoptysis was so great that he was urged to return home to die. But he pushed on, and every day brought him improved health. After his return home he took regular open-air exercise, and died of carcinoma of the stomach thirty years later, at the age of sixty-five. One lung presented evidence of an ancient cicatrix at its apex, but both were otherwise

healthy. He says that his father married his cousin, who died of chronic phthisis two years before his father. Of eight chiliren, one died at birth, and one at eleven. All the others arrived at adult "I don't 'spose Squire Horton ever had age and married, several being still a ghost visiting in hishouse before and living. Of the ninety-three direct decendants of his father, not one was phthisical. This result was attributed to the journey, supplemented by the following out-door exercise, and careful

regulation of the health of his children. Dr. Bowditch thinks that many patients die from want of open-air treatment. He directs each of his phthisical patients to walk daily from three to six miles; never to stay at home all day unless a violent storm be raging. If them to wear respirators. He forbids standing still on the street to talk to this plan patients may be cured at home, and while still conducting their homes, before we fly to other air hun-

dreds or thousands of miles away. To those unable to walk sufficiently far to reach the best air near home without excessive fatigue, it is advisable to use a horse and buggy, or a team driven by the patient, which is far better. The therapeutic value of a spirited span of thoroughbreds, to one able to manage them, is very great, and these, too, can be added to the effects of the open air proper. Consumptives are only one of many classes of people who would

### be thus benefited. - Detroit Lancet. THE DAYS OF TERROR.

Hundreds of Innocent Victims En Route for the Guillotine. A never-ending procession of victims passed down the Rue St. Honore to the Place de la Revolution-ci-devant Place Louis XV .- where the principal guillotine had been erected. There were as you did, all alone, horses couldn't 's' guillotines, however, in several other parts of the city; and it was no uncommon matter for a person going out shopping in the morning to meet with three or four processions of unhappy beings proceeding to execution. A ganized band of furies usually accompanied them, shouting and howling insults and cries of "Death!" Early in head that would have settled me, bit 1794 protests were made by residents along the lines of route to the guillotines, that sensitive persons were beginning to avoid those streets, and that this did great harm to their commerce. They therefore petitioned that the routes should be at least occasionally changed. Later on another request was made to the National Assembly concerning the unhealthy condition of the Place de la that the most skillful of shipmasters | Revolution, literally steeped in blood, look upon this great body of warm water | which emitted a horrible and dangerous stench.

Strange, however, as it may seem, many of these executions, notably those of important personages, were attended by great numbers of apparently respectable people, and the Moniteur contained ship Ethelbald, which for several years | many advertisements to the effect that "So-and-so hires out chairs to witness the guillotining of, say, sort of escape from striking on Hatteras of any conspicuous person, at so much representing the execution of Louis XVI. shows us a crowd of well-dressed poople, comfortably seated in their that from noon of February 13, latitude chairs, placed on a high and well built wooden stand, and not a few of them are using their opera glasses. ### THE FUR SEAL LEASE. Terms of Agreement Executed With the North American Company.

The lease which Secretary Windom executed with the North American Commercial Company for the taking of fur seals is for a term of twenty years from the 1st day of May, 1890, and grants to that company the exclusive right to engage in the business of taking fur seals on the islands of St. George and St. Paul, in the Territory of Alaska, and to send a vessel or vessels to said islands lime and other minerals. for the skins of such seals. The company is required to pay \$60,000 to the Treasurer of the United States each year during the said term of twenty years as annual rental, and in addition thereto the company agrees to pay the revenue tax or duty of \$2 laid upon each fur seal skin taken and shipped by it from the islands of St. George and St. Paul; and also to pay the Treasurer the further sum of \$7.621/2 apiece for each and every fur seal skin taken and shipped from those islands; and also to pay 50 cents per gallon for each gallon of oil sold by it, made from seals that may be taken during the twenty years. To secure the prompt payment of the \$60,000 rental, the company agrees to deposit with the Secretary of the Treasury bonds of the United States to the amount of \$50,000 face value, to be held as guarantee for the annual payment of the \$60,000, the interest thereon, when it aloud to you. He has plenty of time due, to be collected and paid to the North American Commercial Company, provided the said company is not in default of payment of any part of the

rental. The company also agrees to faithfully obey and abide by all rules and regulations that the Secretary of the Treasury has heretofore or may hereafter establish or make in pursuance of law concerning the taking of seals on these islands, and concerning the comfort, morals, and other interests of the inhabitants, and all matters pertaining to the islands and the taking of seals within the possession of the United States. It also agrees to obey and abide by any re strictions or limitations upon the right to kill seals that the Secretary of the Preasury shall judge necessary under the law for the preservation of the seal fisheries of the United States, and it agrees that it will not kill or permit to be killed, so far as it can prevent, in any year a greater number of seals than is authorized by the Secretary of the

Treasury.

The company further agrees that it The company further agrees that it will not permit any of its agents to keep, sell, give, or dispose of any distilled spirits or spirituous liquors, or opium, on either of the islands, or the the office, and then take it home with waters adjacent thereto, to any of the native inhabitants of said islands, such person not being a physician and fur-nishing the same for use as medicine. It is understood and agreed that the number of fur seals to be taken and killed for their skins upon those islands by the North American Commercial Company during the year ending May 1, 1891, shall not exceed \$60,000.—Washington

SCIENCE AND INDUSTRY.

-An English inventor offers a system by which coal gas compressed to one eighth its natural bulk can be carried about and utilized as an illuminant when

desired. -It has been found by a scientist that red sealing-wax looked red in gaslight and a dirty white color in the light of a spirit lamp. This opens a wide field for the study of colors.

—A Sydney, Australia, paper says that one of the wool companies there has a burring machine, recently imported from America, which effectually removes all burrs and other foreign mat

ter from sheep skins. -The council of hygiene in Paris, it is said, is about to take steps to suppress the use of old magazines and newspapers for wrapping up food. The Austrian government has prohibited the use of such papers and also of colored papers to inclose articles intended to be eaten.

-American inventions have cheapened and faciliated canal construction, both as to excavation and locks, to such an extent that the Nicaragua Canal will be completed in half the time and at half the cost that the same work would have demanded fifty years ago.-Inven-

-A London physician and surgeon recently analyzed a man and gave the results to his class in chemistry. The body operated upon weighed 154.4 pounds. The lecturer exhibited upon the platform 23.1 pounds of carbon, 2.2 pounds of lime, 22.3 ounces of phosphorus and about one ounce each of sodium, iron, potassium, magnesium and silicon. Besides this solid residue Dr. Lancaster estimated that there were 5,595 cubic feet of oxygen, weighing 121 pounds; 105,900 cubic feet of hydrogen, weighing 15.4 pounds, and 52 cubic feet of nitrogen in the man's body. All of these elements combined in the following: One hundred and twenty-one pounds of water, 16.5 pounds gelatine, 1.32 pounds fat, 8.8 pounds fibrin and albumen and 7.7 pounds of phosphate of

#### NEWSPAPER ETIQUETTE. How You Can Make Yourself Solid with the

It very frequently happens that visitors to a printing office do things calculated to annoy some of the employes. For the benefit of those we print a few

rules: When you enter a printing office do not handle the type in a case. If you want to handle it say so to the printer, and he will be glad to leave his work and empty the type upon the editor's table, where you can sit in his easy chair and examine it at your leisure. Never mind putting back the type-the printer can do that after you have finished.

Don't read the proof sheets, clippings or manuscript. If you wish to know what is going to appear in the next issue of the paper, ask the editor to read and will be grateful to you for the chance to quit his work and entertain you. If you want to look over the cash book have the editor go and get it for you.

Your interest will please him. Never ask for a single copy. Discover where they are kept and help yourself to as many as you want. Above all things do not offend the editor by tendering payment for them. It flatters him to think you want to read it and it is cruel to end his satisfying day-dream by the mention of so worldly a thing as money. Besides, he only publishes it

for the glory there is in it. Just help yourself to the exchanges. If any are still in their wrappers take them out, by all means. They contain later news than the others. Before going, make some pleasant re-

mark to the editor about how easy it is to run a paper, and express your surprise that he does not do it better. You would leave an aching void in his heart should you forget to do so. If you are interested in seeing how things look in type, have the printer set up your name in the nicest type in

you for a curiosity. The editor likes

you to have a memento of him. Other

people's forgetfulness is the bane of his existence. Ask the editor, if you are a perfect stranger to him, to supply you with a duplicate key to his post-office box, so you can get his papers regularly. If he be a gentleman he will give you the key without asking; but some editors are not gentlemen.—Chicago Type-FounderIncidents of His Life in a Michigan Lumber Camp.

How He, the Butt of Ridicule and Principal Object of the Rough Lumbermen's Practical Jokes, Became an Acknowledged Hero.

I write the term "dude" was not in common use, nor were the rude men of the woods familiar with that mannerof being known among more civilized communities by that appellation, yet by whatever "handle" the gruff lumbermen

were pleased to allude to the subject of this little narrative, he would have passed among the commoner classes in the city as somewhat of an esthete.

It was up in the pines along the White Fish river, and at that time of year when preparations were being made to go into camp, that Bub (my dude) found his way into the midst of a gang of men who were getting ready to winter near Hay Meadow, twenty-five miles to the east of the river, among some of the prettiest pine that in 1873 grew on the upper peninsula of Michigan. Bub had strayed up from Chicago in search of adventure, and, having met with sufficient to appease his yearn, and nearly exhaust his exchequer, he was compelled to resort to manual labor to obtain the wherewithal to procure the necessities for the prolongation of his (to himself) valuable existence. Accordingly (and perforce), it being the only obtainable employment in view, he closed with an offer of a situation as tail cook to the gang mentioned.

When he arrived at the mill from "The Point," as Escanaba was called, he wore store clothes and a Picadilly collar, but before twenty-four hours had elapsed at White Fish he determined to dispense with all superfluities of costume, and on the second morning after his arrival he appeared in the garb of a common laborer. But it was not such an easy matter to shake off the mannerisms of a lifetime, and that lackadaisical air he wore up from the metropolis stuck to him and went with him into the rough life of the woods. His somewhat natty attire and cityfied ways on his first appearance, before his name had been given, suggested to the old heads at the mill the title of Bub, and all through his stay on the White Fish. Bub

After a multitude of mishaps and some very trying experiences, among which were his unsatisfactory services at the tail end of the commissary department, Bub became somewhat reconciled to the rigors of camp life, and resolved to "winter it out" in spite of his thorough distaste for any such mode of existence. His patience was sorely taxed at times by the pertinacity of the hands in playing tricks upon him and cracking rude jokes at his expense. Occasionally he lost his temper and was on the point of rebelling, but discretion became the better part of yalor with him, and he refrained from any hostile demonstrations. Indeed, little less than hilarity could have been expected from the untutored sons of the forest at some of the ludicrous happenings through his ignorance of the ways of the woods and ally working it loose when there came a his maiden efforts in the culinary line.

It became necessary, among his varied and multitudinous duties, for him to convey to the working ground at the noon hour the luncheon of the hands, and, while they prepared for the welcome bite and sup, to attend to the making of frozen toilers was as precious as a freshly-blown honeysuckle to a bee in spring expedite their labor. On the first attempt of Bub to create from the rather inferior grade of "basket fired Japan" the much-appreciated distillation known to the woodsmen as "old maid's elixir," he unconsciously perpetrated a return joke upon his persecutors which resulted in a grand growl on their part.

He built a roaring fire of pine boughs and soon had the great tin boiler steaming and bubbling away like a miniature geyser. But an essential in the composition of even an ordinary cup of tea had been omitted-namely, the tea. This occurred to him but a moment be-

"SAY, BUB, WHERE'S THE TEA?"

fore the men appeared, and he hastily dumped about half a pound of the article on to the surface of the boiling water and slammed down the lid. In his hurry over his unaccustomed duties he entirely neglected the tea until there came an uproarious demand for "elixir." and he forthwith proceeded to fill to the brim each proffered tin cup. The men indulged in various expressious of approval of the tea treat, but were suddenly silenced by one of their number exclaiming, in disgust and indignation: "Say, Bub, where in the dickens is the This drew each one's attention to his cup, and lo! as clear water as ever offended the sight or taste of stimulant needing man. The tea had all boiled over on the ground. For a moment there was a hubbub, and Bub was the hub of it. He was cussed up hill and down dale until the humorous side of the affair struck them, when they resignedly sipped their hot water and profanely vowed that for once Bub had got "hump" with them, in which frame of mind he allowed them to remain without any further enlightenment.

Numerous incidents of a similar natare occurred during Bub's engagement as cookee, all of which passed off with the same happy conclusion. But the thing which appealed more strongly to the risibility of the lumbermen was his entire unsophistication in the matter of technicalities. It was with the most obliging alacrity that he one day waded several miles through snow about two feet deep in search of a "cross-haul," which, as a favor, he was requested to bring back with him. Upon his return empty-handed he was received by a group of broadly-smiling physiognomies, in which he plainly discerned that he had been sent on a fool's errand. Subsequently he learned that a cross-haul was about as transportable as a section of a turnpike. His pronunciation of different terms found only in the vocabulary of the woodsman at times set

the whole camp a-roaring, as, for in-Bub's time came, however, to distinguish himself, and to say that he covered himself with everlasting glory in the eyes of his mischievously-disposed

friends would be but feebly putting it. It was in the spring, when the iron hand of winter had loosened its hold upon the waters of the river and the thawing snows had filled it to overflowing, affording ample transportation to the boom at the mill for the piled-up logs at nence alone is their safety. the woodland landing. The river men were actively employed in collecting stranded logs and sending them on their ourney down stream. Bub had exressed a preference to aid in the drive, and was allowed to accompany a gang to a place in the river where a jam had formed. He armed himself with a canthook and declared his intention of showing the boys what he could do in the

way of a lift. ogs coming down with a rush and piling every which way, rapidly choking up the stream in such a manner as to render it a herculean task to reopen navigation. Several old hands at the business were industriously tugging

A FORM SHOT FROM THE BANK.

oring to set the mass afloat. One or them had selected a huge stick far down on the inside of the jam, and was gradushout of warning from the other side. Bub, who had been watching the efforts of the inside man, saw him lose his footing as the jam broke and the logs went headlong down the current. The man jumped several times across the swaying logs, and had nearly gained a huge pot of tea, which to the half- the river bank, when he suddenly

slipped and disappeared under water. From either bank arose cries of horror, time. While good black coffee was the and all hands seemed paralyzed with staple drink of the men, an occasional fear at the apparently unavoidable depot of tea was served as a sort of sop to struction of taeir comrade. The logs had begun to run freely, and one monster passed over the spot where the unfortunate man had gone down. Before a moment had elapsed a form shot from the bank and landed on several logs which were running a neck-and-neck race down the river and headed directly for the half-drowned man, who was struggling to raise himself up to a portion of the jam which had not yet become loosened. Had he remained a moment longer the oncoming logs would have crashed into him and ground him to pulp, but the form that had ridden the approaching logs sprang through the air again, and, landing on the jam, tore the imperiled struggler from their path and towed him safely ashore.

It was all done so quickly that nobody knew who the hero was until the dripping twain were in their midst, and 'Yank," one of the oldest and hardiest customers on the river, raised his hands aloft and exclaimed: "Bub, by the mighty! Hooray for bully Bub!" And cheer went up which rang through the woods like the victorious cry of a hand

of Apache Indians. True enough, it was Bub, and the name at once lost its humorous import and took on a higher, a reverential significance, which made it to the ears of its now lionized wearer music sweet as the songs of praise sung in the ears of the conquering heroes of old. Here ends my faithful little story, and

it is with sincere pleasure that I give to the world the brave deed of my dude in the woods.-Frank B. Welch, in Northwestern Lumberman The Eternal Fitness of Things. "The new two-cent stamp is more appropriate in color than the old one," re-

marked the snake editor. "I don't see what color has to do with it," replied the horse editor. "Don't you? Well, if the letters the stamps carry are read, shouldn't the stamps be red also?"-Pittsburgh Chron-

George Fails. She (pining for pleasant words)—Oh, George! I can not understand it. Why do you lavish this wealth of love on me when there are so many girls more beautiful and more worthy than I?

He-I'm darned if I know .-- Munsey's

Weekly.

TEMPERANCE NOTES.

REMOVE TEMPTATION. Notes on the Rational Treatment of Re-

formed Drunkards. Inebriating substances have a tendency to excite inebriety. Alcohol is so powerful an excitant that a very small dose of fermented wine, or beer, the mere sip of fermented wine at the sacrament, have been known to excite churches using intoxicant wine (the sacredness of the occasion making no difference in the intoxicating properties of the symbol) would do well to bear in mind that they can not use an intoxicating material for sacramental purposes without some risk of exciting some communicants to an outbreak of drunkenness.

From all these, as well as from many culled during a somewhat prolonged experience of such cases, it will be apparent that inebriety is a true disease demanding recognition and appropriate treatment. Except in medical circles, I am unable to discuss the therapeutics of this disease, but I am at

toxicants, immediate in the case of al- that a man who can not drink as much in an emergency involving life when no from being overcome by strong drink is other suitable medicine is available; to let it entirely alone. No arguments

The physical damage wrought by the poison on the system should be repaired, and the original factors in the a few weeks since, the arrest of a midducing to inebriety may be rectified. to the same cause-strong drink. Fol-The resisting power and the will should be strengthened by the building up anew of healthy brain and nerve tissue, by suitable occupation, by intellectual and elevating pursuits, and the moral tone cultivated and raised by the ennobling influences of moral and religious what I said. I tried hird to keep my promise, Arriving at the jam they found the and elevating pursuits, and the moral considerations.

In many cases there is will-power enough left to secure the quondam drunkara's steadfastness in abstinence, and with such the beneficent achieved a vast amount of success. The abstinence movement is founded on iency of the temple of the body. But there are inebriates without num-

so desirous to be saved from themselves | roll into the bottomless abyss. that they are willing to surrender their little, but we still lack a National protary detention and care of all such narcomaniacs, be they rich or be they poor, who are so under the inebriate domination that they have neither resolution nor power to strike a blow for freedom.

Our present legislative treatment of these diseased ones is wasteful, dis-graceful and unjust. We have a huge government training school of inebriety, inasmuch as we im-prison the drunkard after he bas become drunk and can drink no more for the nonce, keep him in seclusion from intoxicants just long enough to recover from the effects of a debauch, the world once more fitted to indulge to excess. We refit him in a teetotal clubhouse, the only victims on whom punishment falls being the sorely-afflicted wife and children, whose sustenance has been taken from them by our imprisonment of their bread-winner. All this calls aloud for reformation

Once let the community comprehend

the relations of the disease of inebriety to the Temperance movement, once let the friends of abstinence realize the physical as well as the moral and religious aspects of intemperance, the great cause will then take a giant stride forwards; reformation and not penal procedure, kindness and not vengeance, will breathe through all our legalized dealing with the sick inebriate; the Christian church will clear herself of all complicity with the temptation of the rescued from strong drink to relapse and ruin, by banishing all intoxicating wines from her sacred precincts; the State, recognizing that prevention is better than cure, and that the first duty of good government is to preserve order, health, intelligence and life, will either prohibit the common sale of all such beverages as promote disease, crime and premature death, or invest the people with the power of rooting out so deadly a center of a common danger, a common menace, a common and a shameful reproach to our country and to our race. - Dr. N. Kerr, in Journal of Inebriety.

A SAD STORY INDEED. Crime, Misery and Poverty Brought On

by the Love for Liquor. Looking over the daily papers not man twenty-six years old, died in the jail last night of consumption. He had been committed for drunkenness the week before. When he was told that he could not live long, he gave his story to the city under an assumed name for a of a liquor saloon.

grace his friends. His family did not know where he was, although they had always been kind to him, and tried to do all they could to save him. But liquor had made a complete slave of him. He had a good position in his native town, but lost it, because his head was not kept level enough to fill the responsibil-

year, because he did not wish to dis-

ities He would have his sprees. Being or spirit, administered medicinally, and naturally of a delicate constitution, the exposures incident to a vagrant, drunkard's life, had told upon him. His year, of which 31 had been by drownto a paroxysm of inebriety. Christian friends were notified of his illness, but helad passed away before their arrival." Asad, sad story indeed! But the boy who heard it read said: "He needn't have been a drunkard; he might have behaved himself." Yes, yes, he might have been some-body of whom his friends would have

been proud, but instead of that he was a source of sorrow and of shame to them. That young man had good parents and other particulars about inebriety, good Christian teachings, but liquor was his master. Once he was a temperate, happy boy, but some time he took a first drink, and that was the begin-ning of all his ruin and shame. You boys may not have as yet been tempted by this form of evil, but the temptation is sure to come to you, as it has to the whole camp a-roaring, as, as, the stance, when he alluded to "snaking out" logs as "sneaking out trees," etc.

Total Abstaining Students. That sixty per cent. of the students attending the Toronto Medical College are pledged total abstainers is a fact in which the friends of Temperance may well rejoice. In no direction is the which is 150 feet above sea change of sentiment on this question ran in streams to the bottom. more marked than in the different opinion entertained by the medical fraternity now as compared with a quarter of a century ago. Now the testimony of those, who of all men are best qualified to judge of the effects of alcohol upon the human system, is overwhelmingly stinence. Nor can this fact fail to inson to be encouraged by the progress slackening of effort along the line of moral suasion .-- Toronto Truth.

A Supposititious Case. Suppose that up to the present time there had not been established a distillery, brewery or saloon in the land, and none of the dreadful results of the rum traffic had been realized; no drunkard had reeled in our streets, no drink criminal had been sentenced to penal service or to death, no drink pauper had been sent to the poor-house, no drink maniac had been confined in the madhouse, and no family had been disgraced or destroyed by a dranken husband and father; and suppose that suddenly all these terrible evils should appear, what would be the consternation that would fill the land, and what would the people do? Would they not, fired with righteous indignation and destructive wrath, rise and annihilate every distillery, brewery and saloon in a single day.—Rev. A. B. Leonard, in N. Y. Christian Advocate.

An Englishman who insulated his bedstead by placing underneath each post a broken-off bottle, says he had not long since, this heading appeared among the local items: "A Sad Story." It was fifteen years, and that he began to imbeen free from rheumatism or gout for a short, concise story, printed in ten lines of the column devoted to items of a local nature: "Frank Talbot, a young this, wisely adds: "There's many a fellow who could cure his gout, if he would break off the bottom of his glass bottles in time."

REIGN OF THE RED.

The Popular Color of Next Season Settled Upon by Ultra Fashionables. It is always a matter of interest, especially to ladies of extensive wardrobes, to know at the beginning of the season what is likely to be the popular color, for there is seldom or never a season that there is not some color that takes precedence of all others in feminine attire. Last summer it was gray and the summer before it was blue This summer it is to be red. glowing color will make of the most A few days ago the Albany Journal fashionable girl of the coming summer

needed the detector to tell him how much | red hats and even red shoes to match. Some of the most stylish people, who their face value in the place he came are not altogether sure about the comfrom, were subject to in the town where | plete investiture in red, have already e wanted to use them.

In the table referred to the bills of or shirts to wear with different skirts he banks in and around Albany, at and made pretty much the same as the Schenectady, Troy and Lansingburg blouses of last season, with the excepare quoted at par, but from Newburg, tion that the shoulders are not quite so Utica, Syracuse, Rochester and Buffalo high nor are the sleeves so large. The they were from one-fourth to 1 per favorite sleeve is quite full from the shoulder a short distance down, where it is gathered into a cuff. -Chicago Times. The Accumulation of Fat.

Growing fat seems to be a constitu tional and hereditary affair, and to depend very little on one's own personal habits, or the amount that one eats and drinks. Although at his death Daniel Lambert weighed more than seven hundred pounds, and was not quite six feet tall-his vast bulk never, however, seeming to incommode him-yet when he weighed over four hundred he walked long distances with less fatigue than was endured by his companions who weighed comparatively nothing, and until shortly before his death he was active in field exercises. Honever spent much time in bed, sleeping less than eight hours in the twenty-four, was a moderate eater, and drank only water, and still, in spite of all this, he went on accumulating adipose in a way that leads one to inquire seriously if eating, and drinking, and indolence, and self-indulalone prevents a return of wildcat and red-dog State banking.—Rochester (N. Lake View.

We are having a new supply of the beautiful (?) mud. Mr. Michael Wolf, of Frankville, is visiting his son John and attend-

ing court. Maj. Alderson is expected here in

a few days. The Major is a good business man and takes great pride in advancing the interest of this place. Mr. W. C. White is on the sick list this week.

Mr. Jerre Moon and wife, formerly of this place but late of Wilson's Mills, W. Va., paid their friends here a short visit, leaving this (Tuesday) morning for East Virginia, where they expect to engage in farming, We are sorry to see them leave but our best wishes go with them.

Circuit Court.

The May term of the Circuit Court did not commence until Tuesday morning, owing to the detention of Judge Hoffman at the court in Cumberland. Mr. C. J. Otto was appoint ed Foreman of the Grand Jury which was charged by Judge Hoffman. Owing to the crowded condition of our columns, and the fact that very little business of general interest was transacted up to the time of going to press, we concluded to give no proceedings in this issue.

## A MOUNTAIN TRAGEDY.

Sad Culmination of a Husband's Blind, Mad Jealousy.

was late one summer afternoon when I rode up to a little farm-house in the Tennesmountains, and paused for a brief rest and adrink of water Two persons were sitting on the piazza-a man and a wom-

try people, past middle agejust such a pair as one would expect to find in a quiet little mountain cottage. The farmer and his wife offered me a comfortable rocking chair, and a negro woman brought me a gourd of cold spring

It struck me after a few words had been exchanged that there was something wrong in the little household, but I could not see what it was. The man and woman both had sad faces, and their hair seemed to be prematurely white Their voices were pleasant, but they spoke in a subdued tone, in a mechanical way, apparently feeling little interest in any thing that was said. The man, I soon found, was partially alyzed, and moved slowly and with diffi-

I took it for granted that they were shy in the presence of a stranger, and at once proceeded to make myself agreeable by praising the scenery and complimenting the place and its surroundings.

The woman answered me without enthusiasm, and the man was silent, except when I asked him a direct ques tion. I attempted to make the two take a mutual interest in the conversation, but they did not look at each other, and what was said by one was absolutely ignored by the other.

Such placid indifference was depress ing. It was impossible to talk freely under such conditions, and in a few minutes I rose to go. My hosts did not ask me to remain longer, and I felt that

my visit was unwelcome. As I rode away up the hill I glanced back two or three times. Just as I expected, this singular couple remained seated as far away as they could get from each other. They were silently looking straight ahead. Evidently they had not exchanged a word concerning the stranger who had just left them.

Ali this was so unlike country people that I began to suspect some mystery. Half an hour's ride brought me to the house of my old friend. Colonel Jones. where I was to spend the night.

"Colonel," I said suddenly, as we smoked our pipes after supper, "do you know any thing about the people at the

next house, where I stopped on my way here this afternoon?" "Poor Jack Hunter and his wife," replied the Colonel. "Yes, I know all about them. You took them for very

peculiar people, I suppose?" Then I told my friend what I had seen, and how the strange manner of the farmer and his wife had puzzled

"Poor Jack and poor Mary!" ex-claimed the Colonel. "I will tell you their story.

He filled his pipe again, and after moment's reflection, said: "It was during the war when Mary Holt and her folks moved to this settle-

HE SAW JUST WHAT HE FEARED. ment. In those days Mary was the prettiest girl in this whole mountain range, and Jack Hunter was one of the finest young fellows to be found anywhere.

"You know what is coming. Jack and Mary, being the handsomest and brightest couple in the neighborhood, naturpart. ally fell in love with each other, and in six months they were married. No two young people ever began life under happier circumstances. The only drawback was Jack's temper. He was high- shall expect ze pocketbook zat goes wiz spirited, altogether too quick and flery, ze hand .- Chicago Times.

and some of the old folks predicted that

this would cause trouble."

The Colonel whiffed steadily at his

pipe for a full minute.
"The prophets of evil were right," he "In those times this was a sort of neutral ground. It was between the lines, and Confederate and Union oldiers came and went without being molested. Hunter was a red hot Secessionist, and would have joined the army if he had not been lame in one leg. As it was he made no secret of his sentiments, and the Unionists kept out of his

"Mary seemed to be devoted to her husband, and every thing moved along pleasantly for months after their wedding. One day there was a change. Things are not always what they seem, but still Jack had a kinswoman, a meddlesome 'twas Heaven designed them.

And we should class them all as good and take them as we find them. was wrong. Jack was furious, but his cousin told him he had married Mary without inquiring into her past history, and then she whispered something that drove the young man almost crazy with

rage." My companion rose from his chair and

paced the floor. "I hate to tell about it," he said, "but I must go on. Hunter learned from his ousin that Mary had been seen holding clandestine meetings with a Union officer in a secluded spot not far from her home. The husband said nothing to his wife. He waited and watched. Mary wondered why Jack had suddenly grown so cross and silent, but she made the best of it, thinking that he had some trouble on his mind.

"Just about twilight one day Jack came home from the field where he had been at work and found Mary missing. He instantly left the house and ran to the top of a neighboring hill. He saw just what he feared. Down in the valey below he saw his wife and a handsome Union officer parting from each other in the most affectionate fashion. They embraced and kissed after the manner of lovers.

"Hunter slipped back to the house, seized his rifle, and went off to the woods in the direction the officer would be sure to take on his way back to the Union lines. An hour later just as Mary was wondering why her husband was so late for supper Jack walked in and threw his rifle into a corner. His white face and blazing eyes alarmed Mary and she asked some excited question. Jack

GOD FORGIVE YOU! YOU HAVE KILLED MY BROTHER !"

her intrigue, and had followed her lover from their place of meeting and had shot him down like a dog within sight of his camp. He had seen some soldiers come out and carry the dead body off. "Mary stood like a marble statue list-

ening to the horrible story. "'God forgive you!" "she cried. "'You have killed my brother, and broken my

heart! "It was only too true. Mary knowing how strong Jack was for the Southern cause had never told him about her Union brother, but when the young officer was in the neighborhood the two

had secretly met several times. "Hunter fell on his knees and begged forgiveness. He offered to kill himself or do any thing that his wife demanded. But Mary would not talk. She asked to be let alone until morning, and locked herself in her room. Poor Jack roamed about in the woods all night, and in the morning returned home, where he found his wife waiting for him.

"Mary looked at the man's haggard ace, and noticed his trembling limbs. "'Jack,' she said, 'you are as good a man as ever lived, but you have blighted my life by your mistake or crime. I can never love you again, but my heart is full of pity. Let us live here until God calls us away. I will try to do my duty, but do not speak to me, for I can not answer you. Here is one kiss for our old love, and now let us bear our sorrow in silence until the spell is broken." The Colonel threw himself into a

chair and sighed. "There is nothing more to tell." he "Those two unfortunates have not spoken to each other in twenty-five years. They are kind and patient, but I am afraid they will never come together. Jack was paralyzed just after his great trouble, and his wife has been very good to him in her way. Sad story, isn't it?"-Wallace P. Reed, in Atlanta

### A MODERN PARABLE.

They Who Smile Upon the World Shall Grow in Beauty and Happiness. Two shrubs were planted near a paling fence. The soil was good, and with one of them was deeply offended at the that this fence must be driven away. And so, with a soured spirit it struck at the fence day and night, begging every wind and breeze to help it drive the enemy off the premises. The other shrub did not notice the fence but looked out cheerfully the other way, where it saw waving trees, green grass and beds of roses and other flowers. It that came with fragrance to be carried off to any and all who would receive it. Days passed, and a bluebird that had watched them from its perch assumed a little reckoning, and this was its conclusion: The fence stands and is unhurt. The plant that was cheerful and tried to be useful, turning itself kindly towards the open world beside it, is handsome in a wealth of foliage and flowers. The birdlets beneath it are chirping its praises, and the violets are blessing it at the fence and fenght it, is torn and edded, and its buds that might have been beautiful are blighted and blackhappiness; but they who fret, and scold and fight, while the objects of their buffetings remain unchanged, wear the discovery and use of the ballot. In themselves away into tatters and decay.

#### -United Presbyterian. A HOME IN A CANOE.

The Strange Residence of an Explorer in from disagreeable life. I have been exploring and surveying a large district between Old Calabar and the Cameron. To do the water part of the journey I hired at Old Calabara large native canoe representation was adopted. Citizens

# ANCIENT VOTING METHODS.

Leaves Used for Ballots More Than Two Thousand Years Ago.

Before the New York Academy of Anthropology in University place L. Benet, one of the trustees, undertook to present the history of voting in the form of a regulation paper. His research, however, was too comprehensive and day and night. But the one that fretted exhaustive for one reading, and he was compelled, for lack of time, to defer the presentation of the American branch of the subject. His investigations went back ened. It is always so. They who smile to the fifth century before Christ, when upon the world shall grow in beauty and the Greeks voted by ballot as the expression of the individual will. Democracy was comparatively unknown before

ancient times leaves were used for ballots. They were rejected when it was found that they could be easily broken and tampered with to secure false counts. Black and white stones, small pieces of I have been leading a strange but far brass, and other convenient material were used by the pioneers in voting

before paper was known. Athens set a high price on her citizenship after the great principle of popular with a house in it, an arrangement who did not come out and vote were faintly resembling the house-boat on fined. The Syracusans used at one time olive-leaves for ballots. Rome, at an early day after democracy was introduced, borrowed the ballot-box system of the Greeks, but never took kindly to

night, so that with a few minutes notice it. The Australian system of to-day is a revival of the practice in Rome two In the house, which has two small thousand years ago. The voting classiindows and two sliding doors and a fication in Greece in olden times was both social and territorial-not unlike bed, dressing bag, table, chair, and can the arrangement in this country in Presidential elections. Many of the

tem of voting was in Hungary, where

A GROWING MOUNTAIN.

Izalco, a Salvador Volcano, Which Gets Bigger Every Year. Down on the coast of Central America in the little republic of Salvador, so near the ocean that it may be seen from the decks of passing ships, is a moun tain that grows. There is another re markable fact about Izalco, as the mount tain is called, for it is not only increasing in height all the time, but it is the most violent and constant of all vol-canoes. Every little while, from one year's end to the other, it spouts vast uantities of fire, lava and ashes, which fall in a shower and wrap its sides for a thousand feet below the summit with a

blanket of living coals. It is impossible to conceive a grander spectacle than is presented at night to the passengers upon ships that go that all danger of burning or boiling over way. till the mountain is out of sight. Travelers go a long distance to see it and are always willing to admit that the journey repaid them. The mountain rises nearly 7,000 feet, and as its base is almost in the sea it looks much higher. An immense plume of smoke ascends from the crater. The incessant bursts of flame, mounting 500 feet every little | Heavy ones should always be tied, so while, can be seen for more than 100 miles in clear weather. The mountain when the covers are soiled .- Rural New has been called "the Light-House of Salvador," and the shipping on the coast needs no other beacon so far as

the mountain can be seen. Around the base of the volcano are productive sugar plantations, with a railroad running through them. Then omes a wide strip of timber-an almost impenetrable forest, whose foliage is perpetual and of the darkest green. Beyond the forest and between the timber line and the summit, is a belt of ashes and lava, which is constantly receiving accessions from the crater, and every few minutes changes from a livid yellow, when the ashes are hot, to a silver gray, as they begin to cool. At night the effect is very fine. At each eruption there is a violent explosion, like the discharge of a thousand cannons, and afterward a terrible rumbling is heard over the tubs.-The Home.

beneath the surface of the earth. Izalco arose suddenly from a plain in the spring of 1770 in the midst of what had been for nearly a hundred years a profitable sugar plantation. The owner, Don Balthazar Erazo, was absent on a visit to Spain at the time, and was greatly amazed on his return to discover it boils. Now stir in two well-beaten that his farm had been exchanged, without his knowledge or consent, for a firstclass volcano. It was in December, 1769, til rather fine. Season to taste, and that the peons on the plantation first noticed that something was wrong underneath. Although they were accustomed to "tremblers," as slight earthwell-beaten egg and then in pounded quakes are called, they became frightened at the unusual rumblings and growlings in the bowels of the earth. They decided to leave the place and got away not a moment too soon. A few days later, when some of the most venturesome went back to see how the animals were getting on, they discovered that all the buildings had been dethan would be found in any decent civil- stroyed, that great trees had been uprooted, and large craters had opened in the fields, from which came smoke and flames, but apparently there had been

no great eruption as vet. A party of shepherds, braver than the rest, decided to remain in the neighborhood and await developments, and on the 23d of February, 1770, they were enwhich have no amusements. In this tertained by a spectacle that perhaps no other men were ever permitted to witness-the birth of a mountain. It was latent in their nature. The children about ten o'clock in the morning, as when first taught to speak did so in a they afterward said, when the grand upheaval took place. First came a any thing like hearty laughter in a series of terrific explosions which lifted group of them always affected me the crust of the earth in a pile several hundred feet high, and from the opening issued flames and lava, with masses of smoke. An hour or two after there was another and grander convulsion, which shook the country for hundreds of miles and did great damage to the neighboring towns. Rocks weighing thousands of tons were lifted high in the air and fell several miles distant. The surface of the earth bulged up nearly 3,000 feet, and vast masses of rocks were piled up around the crater

from which they issued. These terrible earthquakes continued for several days, and great damage was Swat," he continued, majestically, "in done in the neighboring provinces of about two minutes. How long do you Nicaragua and Honduras, as well as in San Salvador. The volcano was healthy and vigotous child. In less than two months from a level field arose a mountain more than 4,000 feet high. The discharges from the crater from that time to this have accumulated around the edges until the pile has reached nearly 7,000 feet, and it is still growing. Unfortunately the growth of the monster has not been scientifically observed or accurately measured. It would be difficult to measure it, for the seen it yet. Where is it?" surface of the cone, down to 2,000 fees from the summit, is always covered with hot lava, over which no man could climb, and the fumes of the sulphur "and laid it down here, but I don't see would suffocate one if the heat could be

endured .- Youth's Companion. How Shoes Are Worn Out.

A writer, in answer to the question 'Are more shoes worn out in wet than in dry weather?" says there are more actually worn out, particularly at the bottoms, when the walking is fine; but the destruction of shoes is at least twenty-five per cent, greater during wet spells. In the former case the shoes have not the protection of the rubber, and they grind out rapidly; but then again, in stormy seasons, hundreds of been in its original grandeur. pairs of shoes are caught in drenching rains without overshoes, and they are more injured then than would be in a may now pause before this splendid month of walking in dry weather. A prodigyong walk in a thoroughly soaked shoe causes it irreparable damage. The strain- it, Billiger?" she wailed, sinking hopeing motions of the foot in this soft mass wreak damage that could never be pos the soles of shoes worn much in the wet, especially those of the poorer grades, have their term of usefulness considerably curtailed.—Troy (N. Y.) Times.

No, Evidently She Can Not. Young Husband—Are the proceedings lively at your cooking-school, May? Young Wife-We had quite a stir to

Young Hersband-Indeed! Young Wife-Yes. We had a stirabout. FIRESIDE FRAGMENTS.

-If a little pulverized borax be added to the water in which woolen blankets are washed, the dirt will be got rid of more easily than by any other means. -Hasty pudding requires not less than four hours' cooking at 212 degrees to be digestible. If not so cooked it is not m: stered by the stomach, and becomes

an irritant.

-Every one who prizes good health and intends to maintain it should indulge in a dry rub upon going to bed. A flesh brush is good for the purpose, but a good rough towel is better. object is to keep the pores open and in healthy activity.

-To can milk bring it to, or near, the boiling point—best done by placing the dish of milk in a vessel of water, when No one goes to bed on the steamer will be avoided. Boil it down richer if you wish, and place in cans while hot exactly as you do with fruits .- N.

Y. Observer. -It is impossible to wash a bed quilt which is filled with cotton batting without its becoming more or less hard and disagreeable, and this should only be attempted in the case of light ones. that the cotton can be easily removed

Yorker. -Mutton croquettes: Carefully remove all skin and bones: chop fine and season with salt and pepper. If no gravy were left, moisten with butter; make into round, or oval balls with the hands; roll each in egg and cracker crumbs, and brown in very hot lard. Cold veal can be substituted for mutton

in any of these receipts with equally good results.—Country Gentleman. -The first consideration in the management of the laundry is to have good utensils in proper order for work. The tubs should be sufficient in number, of good size, and always kept clean. The wash board should be free from nails that might tear the clothes. The wash bench should be firm and high enough to prevent fatigue in bending too low

-Corned Beef Balls: Stew a slice of onion in a cupful of the liquor in which the beef was boiled, then strain the liquor into a saucepan, add a spoonful of butter which has been rolled in browned flour until it has formed into a smooth paste, and stir constantly until eggs, and then two cupfuls of the corned beef which has been chopped unput it away in a cool place where it will become stiff. Then it is to be made into crackers or bread crumbs, and fried in boiling lard .- The Housekeeper.

#### THEY STAYED AT HOME. Why Mr. and Mrs. McSwat Were Not at

Church One Sunday Morning. "If you don't hurry un Lobel urged Mr. McSwat, as he fidgeted about in front of the mirror, trying to find a necktie that would harmonize with his mustache, "we'll be late to church. I never could understand," he protested, accidentally stepping on the cat and causing a howl that raised the nap on his spring (of 1888) overcoat: "I never could understand-scat, you yowling beast!—why it takes a woman so long to dress. Lobelia, what have you done with my cuff-buttons? Where the Sam

Hill are those cuff-buttons?" "I think, Billiger, they are-" "Lobelia, don't try to talk with your mouth full of hair-pins. Where are the cuff-buttons? If you want me to go to church with you this morning you'll have to turn up those blooming, idiotic

cuff-buttons!" "Have you looked in the soiled cuffs you took off last night, Billiger?" inquired Mrs. McSwat, calmly adjusting

her frizzes. Billiger had not. He hunted up the cuffs and found the buttons. "If you knew they were there why didn't you say so?" he demanded, in an injured tone, as he sat down hard on a chair and proceeded to put in the buttons, telescope the cuffs on his shirtsleeves, and slide them back and forth till the focus seemed to be about right. "I shall be ready for church, Mrs. Mc-

intend to keep me waiting?" "I have nothing to do, Billiger," answered Mrs. McSwat, giving a few finishing dabs to her front hair, "except to put on my bonnet and gloves." "Well, where's the bonnet!" vocifer-

ated her husband, as he jumped up, jerked on his coat, smoothed his silk hat, secured his cane, gloves and overcoat, and sat down again. "Trot out the miraculous bonnet, Lobelia. I haven't "I brought it down a few minutes ago," replied Mrs. McSwat, who was looking about with evident anxiety,

it. I thought I put it on a chair." "On-on a chair, Lobelia?" echoed Mr. McSwat, feebly, a dreadful suspicion crossing his mind. "Yes. Can it be—why, Billiger, you surely wouldn't—O, O, O!" she screamed.

'See what you have done!" For Billiger had risen to his feet and was looking in silence at the chair on which he had been sitting. There, on the seat, were the crushed remains of a once glorious bonnet. It was a flattened, shapeless mass, even

more hideous in its ruin than it had "Lobelia," said Mr. McSwat, in a deep, melo-dramatic voice, "it is fallen. We

"How could you, O, how could you do

lessly on another chair. "I didn't recognize it as the bonnet, sible in the same shoe when dry. Even Lobelia," he replied penitently. "I saw it, but supposed it to be a bunch of colored tissue paper, or a crumpled tidy, or a flesh towel, or something of that kind. Can't you fix it up again somehow?" he inquired anxiously. "Can't it be-er-inflated again or mashed together the

other way so you can make it do?" Mrs. McSwat looked witheringly at her crest-fallen husband, stalked out of the room without a word, and nobody from the McSwat household went to Can a woman joke?—Boston Courier. Service anywhere on that Sabbath.—Chicago Tribune. COOLING MILK.

Something About the Use of Ammonia Where Ice Can Not Be Obtained. The chemist of the Victorian Government gives some interesting infor- in the Department of Agriculture gave of ammonia.

possible after milk comes from the mum as a very large percentage of the the centrifugal separator. Then immediately, and preparatory to churning, sent to slaughter during the closing the cream, if not already cool, should be cooled down to a temperature not The abundant and be cooled down to a temperature not exceeding 55 degrees Fahrenheit. The of Indian corn is the controlling factor main object of cooling is to harden the grains. The butter thus obtains a "granular" structure, rendering it more thoroughly cleansable from the buttermilk; it also acquires a waxy consistency, whereby its keeping qualities and palatableness are improved. For cooling ana and Nebraska. No other State had the milk various appliances are in use.

Where the operations are on a fairly large scale, a small ice machine will be found most suitable and economical. Ice machines capable of producing four hundred pounds of ice daily, at an esti-mated cost of six shillings per diem, are now being placed on the Melbourne market. Such machines could easily be used on large farms, and would probably be found well suited for district milk and dairy factories. The cart food, have made swine breeding popular bringing the milk to these factories could take back with them their daily supply of ice.

Where ice is not procurable and there is not a sufficient supply of cold water for cooling purposes, perhaps no simpler and cheaper means can be adopted than "freezing mixtures." If crystals of ammoniae nitrate and chloride be dissolved by gentle stirring in water, in the following proportions: Six and twothirds pounds ammoniac nitrate, three and one-third pounds ammoniac chloride, ten pounds (one gallon) of water. the temperature of the mixture will quickly fall 51 degrees Fahrenheit.

Thus, if the temperature of the water was originally 75 degrees Fahrenheit, it would, after solution of the salts, fall to 24 degrees Fahrenheit, or 8 degrees be low freezing point. If a long, narrow tin containing such solution be stirred about in a cream can, it will in a few minutes reduce the cream to the required temperature. The cooling salts having been once dissolved, may be reobtained for further use by evaporating the solution to dryness. The evaporafire, or even the sun and hot wind may ient. Or it may be convenient ly done in old kerosene tins cut in half lengthwise. If a fire be used for evaporation, it should be a gentle fire, and the solution should not do more than simmer, otherwise there may be loss

Chicken Manure.

The old idea that chicken manure is a "complete" manure, suitable for all crops seems to be losing favor with a good many gardeners. A notable instance of the new way of dealing with this substance was given two weeks ago in the account of the one-horse farm in New Jersey. On this farm, it will be remembered, the chicken manure was used as the body of a home-made fertilizer, dissolved bone-black, muriate of izer, dissolved bone-black, muriate of potash and plaster being used to prop erly balance the fertilizer and give it the proper mechanical condition. We hope to have more to say next week about the proportions of these substances used. The use of this homemade fertilizer saved the farmer over \$200, which sum is supposed to equal the cost of mixing and a portion of the nitrogen added to freight charges, agents' commission, manufacturer's profit, etc., etc., all of which were paid to whom complete for when complete for the compl for when complete fertilizers were bought. Now is the time to consider after a rain, when the working is the a "complete" or a "one-sided" fertilizer. By the way, "stable manure" is supposed to be complete. Has it ever occurred to you that there may be almost as wide a proportionate difference be-tween two samples of manure as there is between a "low-grade" and a "highgrade" fertilizer? Again, if the stable manure is complete your farm may be so "one-sided" that you need to add something to the manure.-Rural New

seeds and between rows of vegetables. If the earth is ridged up against the vegetables the roller can be run over the ridge, on each side. A piece of log, twenty inches long, is dressed down until ten inches in diameter. Iron pins are driven in the center of each end, the pins working in the iron pieces, which unite to form a prong driven into the end of the handle. This roller can be made at home, except the iron pieces. -American Agriculturist.

SANDY SOIL.

A Farmer Who Thinks It the Best of All. Sandy soil, well managed, says Henry Stewart, in the Country Gentleman, is the best of all kinds. It absorbs the rain and holds it firmly; its porosity pass in and out of it freely at every change of temperature and condition of moisture, and also exerts that active oxidizing effect upon organic matter, as manure or composts, which is well known to be a property of all porous substances, and thus such soil makes at once available an application of manure by decomposing it very rapidly and conof clay land, and in twenty-four hours most effective.

It yields the best quality of wheat, thin, clear-skinned and heavy in the grain; the very best and brightest barley; the heaviest oats; the very finest potatoes and roots; and being warmed up quickly by the sun's heat, which it absorbs greedily, it yields the finest corn, clover and forage crops. It is healthful to live stock and to the owner. It is generous, kindly in disposition, tractable and, when liberally treated, it returns favors promptly and abundantly. Like the greatest virtue of humanity it is thrice blessed, it blesseth him that gives and him that takes; but also like everything kindly and good it hunt for a stick | pines for kindness and generosity in return. It is thankful for small favors, use as a prop to hold the gate open against loam farm than any other kind, and if the right kind of sand is there, the loam will soon be made of it by plowing in green crops and by the use of fertilizers,

lime included, as well as manure. From all over the country come re-

to the gate with ports of threatened foreclosures of mortgages on farm property. In Pennknow, reports from many parts of the ers. When the present occupants of these farms are driven away, who will be secured to fill their places? No true American can view the secured to fill their places? grasp on thousands of American farmtrue American can view this state of affairs without alarm. The present condition of American agriculture dedemand the prompt and careful attention of our statesmen and business

The Pralmist says, "I thought upon my ways, and turned my feet unto Thy testimonies." There are thousands who would thus turn if they only think upon their ways. If consider the duty they owe God, the requirements which He imposes on them, the consequences of disobediconsider these things, there are many who, thus thinking on their ways, would turn tyeir feet unto the testimonies of the Lord.

and rashness. Men must run or be turn. run over, and so they are hastening on, they know not whither, and are destined at last to a terrible awaken. tion, "was Gabe Turner, an old daring, when they shall find that in their key. He was charged with assault thoughtlessness they have gone far and battery. Gabe was a big deacon from God, and have plunged into in some church-I've forgotten the darkness and difficulty from which name-and was very much worked they find no way of escape,

What a change it would make in the life and conduct of many people it, as often as once a week even, they of another deacon in Gabe's church, thinking on their ways. How much more wisely they would walk, if Lord has given in His gracious Word. With most persons the beginning of a new life is thoughtfulness, and how many times this remark is made, that this or that one and tell the whole story. "seems very thoughtful"; and soon after we hear that the thoughtful ones have become Christians.

Do you, friend, think on your ways? Be honest with yourself, and with your God. Look squarely both

tigated in the New York courts some has needed a lawyer. Both times be months later. This was but another came to Atlanta after me. I can illustration of another method by charge what I please, and Gabe pays which the Standard Oil Company it cheerfully." used its influence over the railroads to crush out its rivals. It compelled the railroad companies to refuse to ship oil for other producers, and when of anxiety or the handle of faith. complaint was made to President Scott, of the Pennsylvania railroad, prodent, wise or foolish. They do he said that all he could do was to not consider whether their ways lead ask the Standard Company to allow him to carry the oil over his own road. The passage of the inter state commerce act has put an end to this despotism over the railroad companies, but the facts indicate the unlimited power of this trust. By the exercise of this absolute despotism the Standard Oil Company was enabled to crush out all effective opposition. Now its power is not less- it is merely turned into other directions.

### A Hard-Earned Fee.

"The hardest-earned fee I ever made," remarked a lawyer in the they would take time to honestly city court room a few days ago, "was In a justice court in Atlanta. That was just after I came here, over ten years ago. The case was before ence, the danger in the course which Judge Butt, when his office was on they are pursuing-if they would Mitchell street, near the corner of Whitehall, Surely a lawyer never worked harder for a \$10 fee than I did in that case."

It was during the recess for dinner Multitudes will go to ruin through and quite a number of lawyers had thoughtiessness. # Public Local Law.

CHAPTER 578. AN ACT

AN ACT
To provide for the assessment of the unclaimMilitary Lots and tracts of land in Allegacy
and Garrett counties, and for the collection
of State and County taxes thereon, by seiling the definquent lands and turning the
net proceeds into the State Treasury.
WHEREAS, Underthe Acts of 1781 and 1787
and 1783 upwards of two hundred thousand
eres of "the reserved lands westward of PortJumberland" were laid out in fifty-acre Lots
and gratuitonsity avarded to the officers and
soldiers of 'the "May yland Line" for their serrices in the Revelutionary War, and
WHEREAS, It aspectrs from the Assessment WHEREAS, It appears from the Assessment tooks that upwards of one thousand of these liftary Lots are not now assessed, and never ave paid any State or County Taxes during he past century, owing to the difficulty in scortaining the names of the last owners who are non-residents of the counties in which the Lots are lecated, and

WHEREAS, Many of these lots have been WHEREAS, Many of these lets have been aken up under escheat, and other warrants and patented by the State and subsequently lisowned by the patentees, for the alleged cusson that living, but non-resident helfs of he soldiers had been discovered, therefore, SECTION I. Be it enacted by the General Assembly of Maryland, That the Newspapers elected to publish the Laws passed at this ession shall publish the following notice, laily, for thirty days, in all daily newspapers to selected, and weekly for ten consecutive eks in all the weekly newspapers so se (Form of notice to be published.)

ash and the net proceeds paid into the State c. 2. And be it enacted. That in order to

dare to consider your ways. Turn your feet unto the Lord's testimonies, and do and say things which are pleasing in His sight.—Boston Christian.

Standard Oil Methods.

The Standard Oil Company is another illustration showing the modern facilities of gigantic combinations.

Gabe came to see me. The old darkey was able to pay, and I knew him to be prompt in meeting his debts. I felt a yague misgiving, though, as soon as I saw his face. He came to the point at once.

"'Well, boss,' said Gabe, 'I come to pay you for my case.'

"That sounded all right, but Gabe looked skittish. I noticed that, I suppose, because I needed the money so. I just had to have it.

SEC. 4. And be it enacted. That this Act shall take effect from the date of its passage.

4 28 3t Approved April 8, 1890.

Explanatory. We extract the following from the last issue of the Arizona Kicker,

which came out on a half-sheet: "We owe our readers an apology for the half-sheet we were obliged to issue this week. Monday morning as we entered the postoffice after our mail, which, by the way, is five times as large as that of any other establishment in Arizona, Mr. Wanamaker's man Friday, who was appointed postmaster against the protests of nine-tenths of our people, came out into the corridor and demanded a personal apology for what the Kicker said about him last week. In our pioneer days, when we lived on roots and hadn't a second shirt to our back, we used to get down and creeping for the past two years. On the confrary, we had the revolver and the other man has done the four-

legged act. Therefore, when Wanamaker's Friday demanded an apology, and took us by the ear to force obedience, we lit onto him with the weight of two tons, and had him hollering for mercy inside of two minutes. Before letting him up we took his gun away and in some manner it was discharged, and the bullet went through the palm of our right han I. The wound will prevent our using the pen for some weeks, and we must dictate our

# THE DYING WIFE'S FAREWELL.

- Raise my pillow, husband, dearest, Faint and fainter comes my breath, And these shadows stealing slowly Must, I know, be those of death. Sit down close beside me, darling,
- Let me clasp your warm, strong hand, Yours that ever has sustained me To the borders of this land. For your God and mine, our Father Thence shall ever lead me on, Where upon a throne eternal Sits his love and only Son;
- O'er the past, of joy and pain; Year by year I wandered backwa Till I was a child again. Dreams of girlhood, and the moment When I stood your wife and bride, How my heart filled with love's triumph

I've had visions and been dreaming

- In the hour of woman's pride. Dreams of thee and all the earth cords Firmly twined about my heart— h! the bitter, burning anguish, When I knew that we must part!
- It has passed, and God has promised All my footsteps to attend; He that's more than friend or brother— He'll be with you to the end.
  There's no shadow o'er the portal
  Leading to my beavenly being
  Christ has promised life immortal,

And 'tis He that bids me come

- When life's trials wait around thee And its chilling billows swell, Thou'lt thank Heaven that I'm spared, then Thou'lt feel that "all is well.
- Bring our boys unto my bedside—
  My last blessing let them keep—
  But they're sleeping, do not wake them,
  They'll learn soon enough to weep.
- Tell them often of their mother, Kiss them for me when they wake; ead them gently in life's parameter.

  Love them doubly for my sake. Lead them gently in life's pathway, Clasp my hands still closer, darling, This, the last, last night of life, For to-morrow I shall never Answer when you call me "wife."
- Fare thee well, my noble husband! Faint not 'neath the chast'ning rod: Throw your strong arm 'round our children, Keep them close to thee—and God.

# GOING HOME.

The Old Man Reaches the Fair Place of His Dreams at Last.

E WAS an old man and his head was whitened by the frosts of many winters.

> step was tottering. His eyes grown dim and his hands were feeble and wrinkled. Often and often of even-

twilight, and as he gazed up and away in the distance he talked of home, and of the

time when he was going there. "It will not be long," he said, "when I will go back to my home where the flowers bloomed in the meadow down by the orchard, and where the birds ased to sing in the woodland pasture fown by the big spring. To-morrow, perhaps, or the next day, or the day after, I shall go back. It is a long time since I was there and since I saw it all, but I know it is just as it was when I came away, for every night I have seen it in my dreams, and it all looks just as it did that day when I left it to wander over the world.

The people said the old man was queer, and many of them were so thoughtless as to laugh at his eccentricity. Sometimes he did little errands about town, and sometimes he begged from house to house, for he was too feeble to work much and he could no longer wander from place to place as he had done for so many years.

He lived in a little abandoned cabin and there was no one but his faithful old dog to keep him company. He did not care for those about him, and when they tried to learn something of his past life

he would only speak of his old home.

that he was going back soon. Often when the days were clear and shells and pebbles. On such occasions his little dog trotted by his side, and

of old. They noticed, too, that he was prowing thinner and his step was becoming feebler.

house where they had always been kind er hill. We have climbed a good many world."-Chicago Tribune.

to his master, and in his way begged hills to-day, but I was not so weak then, them to come with him to the cabin. 'Something has happened," some one said, "and the dog wants us to go. Perhaps the old man is sick, or dead."

They remembered then that he had not been seen, and they followed the dog home, there to find it was as they feared, and that the old man was sick. He lay on a poor bed of straw and leaves and tossed about with fever.

They entered very quietly and talked in low whispers so as not to disturb him, but his quick ears caught the sound of their rootsteps, and attempting to shrink

journey, and the way has been rough, hear the birds sing as they used to before we came away. They won't drive us off now as they did then, but we will live in the old house and wander about the garden and orchard every day, and when we are tired we'll go down and rest beneath the big tree where we used to go of evenings when the days were warm. We'll soon be there-soon be

Then the eyes closed and the old man vas quiet.

"He is asleep," some one said. "See now he smiles as he reaches out his hands. He is dreaming sweet dreams." For a long time they stood about the old man and watched him in silence. Once or twice his lips moved as if in speech, and the smile on his wasted face grew brighter. Then again his eyes pened and their gaze wandered about the little room.

"I thought we were there," he said, a little disappointed. "I thought we had reached the end of the journey and were resting on the blue grass under the big tree down by the meadow. I smelt the clover blossoms and the wild roses, and His form was heard the birds singing in the tree overhead, and the water as it flowed along over the white stones on its way down from the big spring up under the three old elm trees. But it is not far, and we shall be there before night comes on. Come, now, and let's be going, for we have another hill to climb, and I am anxious to see the dear old place." He was still again for a minute or two,

but no one looked up to disturb him. "Ah!" he said at last, as the smile faded from his features and a look of doubt and trouble succeeded it. "What if they will not let us come in? What if they drive us away again as they did before? But they can not be so cruel as that. No, no; I will tell them that we have come a long way and have walked many, many days to get back to the old home, and they can not be so cruel as to turn us away. I will tell them how well I love it, and of all the fond memories I have of it, and they will be touched by that and not drive us away any more. I will tell them of herof my dear, poor Marian, who came to live with me in the old house. I will speak to them of the times when she and I used to go arm-in-arm about the big pasture, and of the times when we sat on the long porch and dreamed and planned for the future. I will tell them how well she loved the flowers and the birds, and how often we wandered about gathering the roses and the ferns. I will tell them all this, and of the day she died, and I will ask them to let me stay at the old home, so

I can go every day and plant flowers on her grave. They will not drive us off when I tell them this." "He is dying," somebody said, in a

soft whisper.
"Yes, he is nearing the end of his over the old man. "Does anyone know any thing of his life?" No one spoke.

Then the door opened softly and a stranger entered. Leaning forward and form, the stranger looked on the haggard he muttered:

in silence. The stranger did not speak, and the doctor touching his arm asked:

way from home and soon after my mother died. Then there came trouble, and of its beauties and end by saying From the day I learned his fate I have

night for so many years. There is the in good taste for a young girl. As you blg room, the one with the great fireplace in which the hickory logs your wn neck I wonder how many o burned and crackled, shooting you know of the romance connected with up soft blazes of light. There those which were first made? but his quick ears caught the sound of their rootsteps, and attempting to shrink away from them, he put out his wasted hand as if to stay their approach.

"No, no," he said. "I will not go with you. I will not be locked up as a pauper where there are no flowers or birds, and no green fields and no beautiful forests. I am going home directly, and they can not send me away again. Go away now, and let me go on, for the journey is not long and I am in a hurry to get there."

"Poor old man," some one said; "he is flighty, and talks of unseen things."

The little dog came in and laid his head in the old man's hand. The tired eyes opened for a moment and a soft smile spread over the thin, sallow face.

"We are almost there, Sanch, almost there," the old man said, as he tried to pat the dog's head. "It has been a long journey, and the way has been rough, and sometimes the storms, raged high, but we are nearly through it now, and hard of light. There is where we used to sit of winter evenings, Marian and I, when we talked of the future and of what life would be to us. I saw Marian sitting there last night, and I saw the happy smile on her face, just as I have seen it so many then exist so many then the old days before she went away. Then there is the little garden with the flower-beds that we used to love, and down below is the great, old or the old man said, as he tried to go, and where I first saw the happy smile on the face, just as I have seen it so many that we used to love, and down below is the great, old or the flower-beds that we used to love, and down below is the great, old or the many years ago, but I have never forst tender to send the wor'd, to us. I saw Marian at I, when we talked of the future and of what life would be to us. I saw the happy smile on the face, just as I have seen it so many to exquisite beauty that he gave them. The ladies came from far and nearly objects the exquisite beauty that he way bear we will the wor'd, to us. I saw the happy smile on the face, just as I have seen it so many to s and sometimes the storms raged high, but we are nearly through it now, and in a little while we will be at home. There is but another hill or two to climb and then we shall see the dear old place with the meadows all in bloom and the trees green with leaves, and we shall than they used to, and it sounded sweeter and softer than they wed to

# STORY OF A NECKLACE.

The pretty Duchess of Fife has been photographed in evening dress with a single string of pearls about her neck "I will tell you about the old house There is somehow about this string of first, and I remember it well, for it was only last night that I saw it in my dreams, just as I have seen it every dreams, just as I have seen it every dreams.

so pleased the father that he had said "Ask of me any thing, for I am glad to have so sweet a daughter." With great glee she answered: "O, father, make for me one of those beautiful necklaces such as only you can make." The un happy man was speechless with horror and wanderel through the woods all night wondering what in the world he would do. When the daytime came h threw himself on a bank beside the water to rest, and there, floating on top was an iridescent substance, at which could not help but look; it seeme so like his own pearls. He searched for it and found that the effect was caused by the scales of a small whitefish. He collected some, experimented with them, and succeeded in producing with them the whiteness and polish for which he had formerly been forced to use the poison. On the wedding day he clasped around the neck of the beautiful bride the handsomest string of pearls that he had ever made, and as the kised her sweet, red lips he knew the stranger sank down on his he could be happy, for there was not a partide of poison in them. The truth of the story lies in the fact that to this only one. # TEMPERANCE NOTES.

AN ABSTINENCE SONG. Maldens, loving, gentle, tender,

Rally for the strife; Swear you'll not the heart surrender, Never be called wife, By the liquor dealing masses, Nor the genteel waif, Who from dainty little glasses

Drink, and deem it safe. Never let the hallow'd lovelight Beaming from your eye, Rest on man, if e'er this soul-blight Darkly you descry.

Never in the rosy arbor, At the day's decline, Never, for a moment, harbor Him who sippeth wine.

Never in the silvery moonlight Take the tippler's arm-Be it eve or glorious sunlight, Flee in dread alarm.

Buyer, seller, tippler, drunkard, Dealer, great and small—
Maidens, will you shout the watchward
Abstinence for all;

Or no wives to cound them cluster With a fond caress— No fair lips with ruby luster Theirs to meet and press.

Though with sadden'd soul, and tearful, Rally heart and mind; Satan's bonds, tho' strong and fearful, You may yet unbind.

Then work on, the day is dawning, Death transformed to life; In the glorious Temp'rance morning Victory is rife. Courage, maidens, no repining,

The' fond hopes it shroud;

Courage, for a silver lining Gems the darkest cloud. Oh! what bliss shall crown the hour,

Oh! what bliss shall crows.

"When the strife is o'er,
When redeemed from Satan's power
Men shall drink no more.

—Ohio Farmer.

### A PHYSICIAN'S STORY. Homes Ruined and Haunted by Poor Alcoholic Dements.

Some years ago I was an expert witness in a noted murder trial. The prisoner was the son of a very prominent family, who had killed a companion while intexicated, and made some blundering efforts to conceal the crime. The man who was murdered was a popular clerk, and had a large circle of friends; public sympathy was very pronounced against the murderer, and demanded his extreme punishment. Some of the ablest lawyers and medical experts were retained on both sides.

nesses became intensely interested, and grew more positive of the sanity and insanity of the prisoner. A very noted asylum superintendent led the party who believed the prisoner sane and re-

day the method of making pearl beads sponsible. On the other side an old-night journey, dark and fitful.—T. D. discovered by Martin Jacquin is still the fashioned physician and several young Crothers, M. D., in Union Signal. men were equally confident of the in-'Hush! They are singing down there necl a string of beads like that which sanity and irresponsibility of the pris-Their convictions deepened with each new turn of the testimony; what was called symptoms of disease and mental degeneration by one party, was called depravity and willfulness by the other. The disposition to drink spirits to excess in early life and violent temper displayed were considered a sign of mental disease by one side, and vice by the other. No one of a family of five,

all younger, had ever shown such tastes or disposition, or had used spirits. violent language. possess himself of doubts about our convictions, but that Once let the claims of sympathy be- we were forced to come before the public

e said, in sobbing tones.

counteract this view of disease and ir-responsibility. The lawyers were astonished, and finally concluded that the medical men had been influenced or the prisoner was sentenced to prison for life. A few months later the prisoner died, and his brain revealed extensive disease which had been going on for a long time. Recently this old-fashioned physician and myself were associated in another

case, and in conversation he related the following: "The man whom we defended had been from infancy an idiotic dement, with every symptom of partial intoxication. He reflected the exact state of his parents at the time he was given being; the intense sorrow and mortification led them to conceal this fact as far as possible. For over twenty years this young man was the terrible skeleton which haunted them continually. I early came into possession of this se-cret and helped the parents to conceal it. On the trial the testimony of the asylum physician was most to be dreaded. This physician was a man of firm theological convictions concerning vice, and dreaded all innovations o changes of theories. He also believed in heredity. The question was to put these facts of heredity in some form so they could be divested of all personality and in this way reach this physician. If his strong convictions of this prisoner's responsibility could be shaken the case would be won. So I arranged with the father to come in at the proper moment and make the statement of the origin of the prisoner's disorder, and plead that he could be sent to prison for life and not hung as a felon." parents are dead, and a family of great respectability bear their name, and the mystery of this criminal and the crime is buried. The skeleton which came As the trial went on the medical witmained to the very close of life. Many other homes are haunted in the same way by those poor alcoholic dements, who represent the sins of the parents, aud whose passage through life is a
